Credit Agricole CIB – UAE

Pillar 3 Market Disclosures
Quarter 3-2022

TABLE OF CONTENTS

1 Introduction

The Basel 3 agreements are structured around three pillars:

- **Pillar 1** determines the minimum capital adequacy requirements and ratio levels in accordance with current regulatory framework:
- **Pillar 2** supplements the regulatory approach with the quantification of a capital requirement covering the major risks to which the Bank is exposed, based on the methodologies specific to it;
- **Pillar 3** introduces new standards for financial disclosures to the market. These must detail the components of regulatory capital, the assessments of risks both with regard to the regulations applied and the activity during the period.

Credit Agricole CIB publishes the qualitative and quantitative information required for a large listed institution, included in the consolidation scope of the Credit Agricole S.A Group.

Solvency Management is primarily aimed at assessing the capital and ensuring it is sufficient to cover the risks to which Credit Agricole CIB is or may be exposed in light of its activities, to that end, Credit Agricole CIB group measures regulatory capital requirements (Pillar 1) and manages regulatory capital by relying on short and medium term forward looking measures, consistent with budget projections, based on a central economic scenario.

Credit Agricole S.A's subsidiaries under exclusive control and subject to compliance with capital requirements, including the Credit Agricole CIB Group are allocated capital at a consistent level, taking into account local regulatory requirements, the capital requirements needed to finance their development and a management buffer tailored to the volatility of their CET1 ratio.

In addition, the group has a comprehensive Internal Capital Adequacy Assessment Process (ICAAP) developed in accordance with the interpretation of the regulatory texts below. The ICAAP includes in particular:

- governance of capital management
- measurement of economic capital requirements based on risk identification process and a quantification of capital requirements using an internal approach (Pillar 2)
- performance of ICAAP stress tests aimed at stimulating capital destruction after 3 years of an adverse economic scenario
- a qualitative ICAAP that formalizes the major areas of risk assessment.

The Pillar 3 disclosures, based on a common framework, are an effective means of informing the market about the risks faced by a bank, which will allow market participants to assess key information on the scope of application, capital, risk exposure, risk assessment process and hence the capital adequacy of the bank.

Verification:

The Pillar 3 Disclosures have been prepared in accordance with the latest Capital Adequacy Standards issued by UAE Central bank. This report has been jointly compiled by Risk and Finance departments. Pillar 3 disclosures have been independently reviewed by the internal audit department and approved by Bank's Senior Management.

2 Overview of Risk management, Key Prudential Metrics and RWA

2.1 Key metrics (KM1)

Key prudential regulatory metrics related to regulatory capital, leverage ratio and liquidity standards have been included in the following table:

		SEP-22 AED 000	JUN-22 AED 000	MAR-22 AED 000	DEC-21 AED 000

26	Advances to Stable Resources Ratio (%)	30.91%	12.70%	7.64%	24.93%

Narrative Commentary on QoQ Variance:

- Total risk-weighted assets (RWA): QoQ increase (AED 66M) is mainly due to Increase in overdraft utilization of few clients.
- ELAR: QoQ variance is mainly due to movement in total liabilities (particularly due to the evolution in the client demand deposits and HQLA balances during Quarter 3 2022.
- ASRR: Increase in ratio is mainly due to increase in overdraft utilization of few clients.

2.2 Overview of Risk Management, Key Prudential Metrics and RWA (OV1)

The overall solvency ratio, as presented in the prudential ratio table is equal to the ratio of the total capital to the sum of the credit, market and operational risk-weighted exposures.

The following table provides an overview of total Risk Weighted Assets:

		RWA		Minimum capital requirements
		SEP-22 AED 000	**JUN-22 AED 000**	**SEP -22 AED 000**
1	Credit risk (excluding counterparty credit risk)	601,754	535,311	63,184
2	Of which: standardised approach (SA)	601,754	535,311	63,184

Narrative Commentary on QoQ Variance:
Exposure remains in line with normal business operating activity. Variation in Risk weighted Assets is mainly due to Increase in overdraft utilization of few clients.

4 Leverage ratio
