- (ii) not less than 15 days before the giving of the notice referred to in (i), notice to the Principal Paying Agent (and the CMU Lodging Agent if applicable) and, in the case of a redemption of Registered Notes, the Registrar; (which notices shall be irrevocable), redeem all or some of the Notes then outstanding on any Optional Redemption Date and at the Optional Redemption Amount(s) specified in, or determined in the manner specified in, the applicable Pricing Supplement together, if appropriate, with interest accrued to (but excluding) the relevant Optional Redemption Date; **provided, however, that** in the case of Subordinated Notes, (1) such redemption may not occur within five years of the Issue Date and (2) such redemption shall be subject to the prior approval of the FSS pursuant to regulations of the Financial Services Commission of Korea (the “FSC”) in effect at the applicable time relating to, *inter alia*, capital adequacy ratios, replacement capital and interest rates. Any such redemption must be of a nominal amount equal to the Minimum Redemption Amount or a Higher Redemption Amount. In the case of a partial redemption of Notes, the Notes to be redeemed (“**Redeemed Notes**”) will be selected individually by lot, in the case of Redeemed Notes represented by definitive Notes, and in accordance with the rules of Euroclear and/or Clearstream, Luxembourg and/or, as the case may be, DTC, in the case of Redeemed Notes represented by a global Note, not more than 15 days prior to the date fixed for redemption (such date of selection being hereinafter called the “**Selection Date**”). In the case of Redeemed Notes represented by definitive Notes, a list of the serial numbers of such Redeemed Notes will be published in accordance with Condition 15 not less than 15 days prior to the date fixed for redemption. The aggregate nominal amount of Redeemed Notes represented by definitive Notes shall bear the same proportion to the aggregate nominal amount of all Redeemed Notes as the aggregate nominal amount of definitive Notes outstanding bears to the aggregate nominal amount of the Notes outstanding, in each case on the Selection Date, **provided that** such first mentioned nominal amount shall, if necessary, be rounded downwards to the nearest integral multiple of the Specified Denomination, and the aggregate nominal amount of Redeemed Notes represented by a Global Note shall be equal to the balance of the Redeemed Notes. No exchange of the relevant Global Note will be permitted during the period from and including the Selection Date to and including the date fixed for redemption pursuant to this sub-paragraph (c) and notice to that effect shall be given by the Issuer to the Noteholders in accordance with Condition 15 at least 5 business days prior to the Selection Date.

(d) ***Redemption of the Senior Notes only at the Option of the Noteholders (“Investor Put”)***

If Investor Put is specified in the applicable Pricing Supplement with respect to any Series of Senior Notes only, upon the holder of any Senior Note giving to the Issuer in accordance with Condition 15 not less than 15 nor more than 30 days’ notice or such other period of notice as is specified in the applicable Pricing Supplement, the Issuer will, upon the expiry of such notice, redeem, subject to, and in accordance with, the terms specified in the applicable Pricing Supplement, in whole (but not in part), such Senior Note on the Optional Redemption Date and at the Optional Redemption Amount specified in, or determined in the manner specified in, the applicable Pricing Supplement together, if appropriate, with interest accrued to (but excluding) the Optional Redemption Date. Registered Notes may be redeemed under this Condition in any multiple of their lowest specified denomination.

If this Senior Note is in definitive form, to exercise the right to require redemption of this Senior Note the holder of this Senior Note must deliver such Senior Note at the specified office of any Paying Agent (in the case of a Bearer Note) or any Transfer Agent (in the case of a Registered Note) at any time during normal business hours of such Paying Agent or Transfer Agent, as the case may be, falling within the notice period, accompanied by a duly completed and signed notice of exercise in the form (for the time being current) obtainable from any specified office of any Paying Agent or Transfer

Agent (a “**Put Notice**”) and in which the holder must specify a bank account (or, if payment is by cheque, an address) to which payment is to be made under this Condition.

Any Put Notice given by a holder of any Senior Note pursuant to this paragraph shall be irrevocable except where prior to the due date of redemption an Event of Default shall have occurred and be continuing in which event such holder, at its option, may elect by notice to the Issuer to withdraw the notice given pursuant to this paragraph and instead to declare such Senior Note forthwith due and payable pursuant to Condition 11.

Each Senior Note should be presented for redemption together with all unmatured Coupons relating to it, failing which such Senior Note will be redeemed only against provision of such indemnity as the Issuer may require. Upon the date on which any Senior Note falls due for redemption or is purchased for cancellation, all unmatured Coupons appertaining thereto will become void and no payment will thereafter be made in respect thereto.

(e) **Early Redemption Amounts**

For the purpose of paragraph (b) above and Condition 11, the Notes will be redeemed at the Early Redemption Amount calculated as follows:

- (i) in the case of Notes with a Final Redemption Amount equal to the Issue Price, at the Final Redemption Amount thereof;
- (ii) in the case of Notes (other than Zero Coupon Notes but including Instalment Notes and Partly Paid Notes) with a Final Redemption Amount which is or may be less or greater than the Issue Price or which is payable in a Specified Currency other than that in which the Notes are denominated, at the amount specified in, or determined in the manner specified in, the applicable Pricing Supplement or, if no such amount or manner is so specified in the Pricing Supplement, at their nominal amount; or
- (iii) in the case of Zero Coupon Notes, at an amount (the “**Amortised Face Amount**”) calculated in accordance with the following formula:

$$\text{Early Redemption Amount} = \text{RP} \times (1 + \text{AY})^y$$

where:

“**RP**” means the Reference Price;

“**AY**” means the Accrual Yield expressed as a decimal; and

“**y**” is a fraction, the numerator of which is equal to the number of days (calculated on the basis of a 360-day year consisting of 12 months of 30 days each) from (and including) the Issue Date of the first Tranche of the Notes to (but excluding) the date fixed for redemption or (as the case may be) the date upon which such Note becomes due and repayable and the denominator of which is 360; or

- (iv) on such other calculation basis as may be specified in the applicable Pricing Supplement.

(f) **Instalments**

If the Notes are repayable in instalments, they will be redeemed in the Instalment Amounts and on the Instalment Dates. In the case of early redemption, the Early Redemption Amount will be determined pursuant to paragraph (e) above.

(g) **Partly Paid Notes**

If the Notes are Partly Paid Notes, they will be redeemed, whether at maturity, early redemption or otherwise, in accordance with the provisions of this Condition and the applicable Pricing Supplement.

(h) **Purchases**

The Issuer may at any time purchase Senior Notes at any price (**provided that**, in the case of Bearer Notes in definitive form, these are purchased together with all unmatured Receipts, Coupons and Talons appertaining thereto) in the open market or otherwise. Such Notes may be held, reissued, resold

or, at the option of the Issuer, surrendered to any Paying Agent, the Registrar or the CMU Lodging Agent for cancellation. In case of the Subordinated Notes, the Issuer and any person or entity over which the Issuer exercises substantial control including any affiliated company or subsidiary of the Issuer (the “**Issuer Related Party**”) shall not purchase the Subordinated Notes nor provide, directly or indirectly, the fund to acquire the Subordinated Notes by providing any collateral, guarantee or loan in favour of the person or entity which will acquire such Notes. In addition, neither the Issuer nor any Issuer Related Party shall enhance, legally or economically, the payment seniority of the Subordinated Notes, nor provide, directly or indirectly through its affiliated company or subsidiary, any collateral or guaranty in favour of the person or entity which acquires such Notes.

(i) ***Cancellation***

All Notes which are redeemed will forthwith be cancelled (together with all unmatured Receipts, Coupons and Talons attached thereto or surrendered therewith at the time of redemption). All Notes so cancelled and the Notes purchased and cancelled pursuant to paragraph (h) above (together with all unmatured Receipts, Coupons and Talons cancelled therewith) shall be forwarded to the Principal Paying Agent (and the CMU Lodging Agent if applicable) which shall notify the Registrar of such cancelled Notes in the case of Registered Notes and such Notes cannot be reissued or resold.

(j) ***Late payment on Zero Coupon Notes***

If the amount payable in respect of any Zero Coupon Note upon redemption of such Zero Coupon Note pursuant to paragraph (a), (b), (c) or (d) above or upon its becoming due and repayable as provided in Condition 11 is improperly withheld or refused, the amount due and repayable in respect of such Zero Coupon Note shall be the amount calculated as provided in paragraph (e)(iii) above as though the references therein to the date fixed for the redemption or the date upon which such Zero Coupon Note becomes due and payable were replaced by references to the date which is the earlier of:

- (i) the date on which all amounts due in respect of such Zero Coupon Note have been paid; and
- (ii) the date on which the full amount of the moneys payable has been received by the Principal Paying Agent, the Registrar or the CMU Lodging Agent, as the case may be, and notice to that effect has been given to the Noteholders in accordance with Condition 15.

(k) ***Obligation to redeem***

Upon the expiry of any notice as is referred to in paragraph (b), (c) or (d) above, the Issuer shall be bound to redeem the Notes to which the notice referred at the relevant redemption price applicable at the date of such redemption together with, if appropriate, interest accrued to (but excluding) the relevant redemption date.

(l) ***Redemption of Tier I Subordinated Notes for tax non-deductibility or regulatory reasons***

Any Series of Tier I Subordinated Notes may be redeemed at the option of the Issuer in whole, but not in part, at any time, on giving not less than 30 nor more than 60 days' notice to the Principal Paying Agent (and the CMU Lodging Agent if applicable) and, in accordance with Condition 15, the Noteholders (which notice shall be irrevocable), if either a Tax Non-deductibility Event or a Regulatory Event (each as defined below) has occurred and is continuing; **provided that** (1) the prior approval of the FSS or such other relevant regulatory authorities in Korea shall have been obtained, if necessary and (2) no such notice of redemption shall be given earlier than 90 days prior to the earliest date on which (x) the Issuer would cease to be able to claim the relevant tax deduction pursuant to such Tax Non-deductibility Event or (y) such Series of Tier I Subordinated Notes would cease to qualify (in whole or in part) as additional Tier I capital pursuant to such Regulatory Event, as applicable.

Any Series of Tier II Subordinated Notes may be redeemed at the option of the Issuer in whole, but not in part, at any time, on giving not less than 30 nor more than 60 days' notice to the Principal Paying Agent (and the CMU Lodging Agent if applicable) and, in accordance with Condition 15, the Noteholders (which notice shall be irrevocable), if a Regulatory Event (as defined below) has occurred and is continuing; **provided that** (1) the prior approval of the FSS or such other relevant regulatory authorities in Korea shall have been obtained, if necessary and (2) no such notice of redemption shall be given earlier than 90 days prior to the earliest date on which such Series of Tier II Subordinated Notes would cease to qualify (in whole or in part) as Tier II capital pursuant to such Regulatory Event.

Prior to the publication of any notice of redemption pursuant to this Condition, the Issuer shall deliver to the Principal Paying Agent (1) a certificate signed by two duly authorised officers of the Issuer stating that the Issuer is entitled to effect such redemption and setting forth a statement of facts showing that the conditions precedent to the right of the Issuer so to redeem have occurred and (2) an opinion of independent legal advisers of recognised standing to the effect that such Tax Non-deductibility Event or Regulatory Event, as applicable, has occurred and is continuing.

Notes redeemed pursuant to this Condition will be redeemed at their Final Redemption Amount, together (subject to Condition 5(e)) with interest accrued to (but excluding) the date of redemption.

As used herein:

**“Regulatory Event”** means, (i) with respect to any Series of Tier I Subordinated Notes, such Notes (after having qualified as such at the time of their issuance) will no longer qualify (in whole or in part) as additional Tier I capital of the Issuer under applicable Korean Law or (ii) with respect to any Series of Tier II Subordinated Notes, such Notes (after having qualified as such at the time of their issuance) will no longer qualify (in whole or in part) as Tier II capital of the Issuer under applicable Korean Law, in the case of either (i) or (ii), as a result of a change in or amendment to, or a change in the application or official interpretation of, such Korean Law; provided, however, that such change or amendment was not pending or foreseeable at the time of issuance of such Notes.

**“Tax Non-deductibility Event”** means, with respect to any Series of Tier I Subordinated Notes, the Issuer (after having been entitled to claim such a deduction at the time of issuance of such Notes) will no longer be entitled to claim a deduction in respect of interest paid or payable on such Notes for the purposes of Korean corporation tax or tax on corporate income, as a result of a change in or amendment to, or a change in the application or official interpretation of, such Korean Law; provided, however, that such tax non-deductibility cannot be avoided by the Issuer taking reasonable measures available to it at no material cost to it.

## 8. Loss Absorption Upon a Trigger Event in Respect of Subordinated Notes

### (a) *Write-off on a Trigger Event*

Effective as of the third Korean Business Day from the occurrence of a Trigger Event, each Subordinated Note, including the then outstanding principal amount thereof and any accrued but unpaid interest thereon, shall be irrevocably cancelled in whole, without the need for the consent of the holders of the Subordinated Notes (such cancellation being referred to herein as a **“Write-off,”** and **“Written-off”** shall be construed accordingly). Once the principal amount of, and any accrued but unpaid interest under, the Subordinated Notes has been Written-off, such amounts will not be restored in any circumstances, including where the relevant Trigger Event ceases to continue.

The Issuer shall provide a Trigger Event Notice to the holders of the Subordinated Notes, but such Write-off shall be effective irrespective of whether the Issuer has provided such Trigger Event Notice.

For the avoidance of doubt, any Write-off pursuant to this Condition 8(a) will not constitute an Event of Default under the Notes or any other insolvency events of the Issuer.

### (b) *Interpretation*

In these Conditions and unless stated otherwise in the applicable Pricing Supplement:

a **“Korean Business Day”** means a day (other than a Saturday or Sunday) on which banks and foreign exchange markets are open for business in Seoul, Korea;

a **“Trigger Event”** means (i) the designation of the Issuer as an “insolvent financial institution” pursuant to the Act on the Structural Improvement of the Financial Industry or (ii) the designation of the Issuer as an “insolvent financial company” pursuant to the Depositor Protection Act; and

a **“Trigger Event Notice”** means the notice specifying that a Trigger Event has occurred, which shall be issued by the Issuer not more than two Korean Business Days after the occurrence of a Trigger Event to the holders of the Subordinated Notes and the Principal Paying Agent in accordance with Condition 15 and which shall state in reasonable detail the nature of the relevant Trigger Event. Notwithstanding any provisions of Condition 15 to the contrary, any such notice shall be effective as of the date of its issuance by the Issuer.

## 9. Taxation

All payments of principal and interest in respect of the Notes, Receipts and Coupons by the Issuer will be made without withholding or deduction for or on account of any present or future taxes, duties, levies, imposts, assessments or other government charges and any interest, penalties or other liabilities with respect thereto (“**Taxes**”) imposed or levied by or on behalf of any Tax Jurisdiction unless such withholding or deduction is required by law. In such event, the Issuer will pay such additional amounts as shall be necessary in order that the net amounts received by the holders of the Notes, Receipts or Coupons after such withholding or deduction shall equal the amounts which would otherwise have been receivable in respect of the Notes, Receipts or Coupons, as the case may be, in the absence of such withholding or deduction; except that no such additional amounts shall be payable with respect to:

- (i) any Taxes with respect to a Note, Receipt or Coupon presented for payment (where presentation is necessary) in Korea (solely to the extent such Taxes would not have been imposed if such Note, Receipt or Coupon, as the case may be, were presented at an office of a Paying Agent outside Korea); or
- (ii) any withholding or deduction imposed on a payment received by or on behalf of a holder of a Note, Receipt or Coupon in circumstances where such withholding or deduction would not have been required but for such holder of the Note (or fiduciary, settlor, beneficiary, member or shareholder of, or possessor of power over the relevant holder, if the relevant holder is an estate, nominee, trust or corporation) being or having been connected with a Tax Jurisdiction (as defined below) otherwise than merely by holding such Note, Receipt or Coupon, or enforcing rights thereunder; or
- (iii) any Taxes with respect to a Note, Receipt or Coupon presented for payment (where presentation is necessary) more than 30 days after the Relevant Date (as defined below) except to the extent that the holder thereof would have been entitled to additional amounts on presenting the same for payment on any date during such 30-day period; or
- (iv) a Note, Receipt or Coupon presented for payment by or on behalf of a holder of such Note, Receipt or Coupon who, at the time of such presentation, is able to avoid such withholding or deduction by making a declaration of non-residence or other similar claim for exemption and does not make such declaration or claim; or
- (v) any withholding or deduction that would not have been imposed but for a failure by the holder or beneficial owner (or any financial institution through which the holder or beneficial owner holds any Note, Receipt or Coupon or through which payment on the Note, Receipt or Coupon is made) to comply with any certification, information, identification, documentation or other reporting requirements (including entering into and complying with an agreement with the U.S. Internal Revenue Service) imposed pursuant to Sections 1471 through 1474 of the Code, any regulations or agreements thereunder, official interpretations thereof or any law, treaty or agreement implementing an intergovernmental approach thereto; or
- (vi) any combination of paragraphs (i), (ii), (iii), (iv) or (v) above;

nor will additional amounts be paid with respect to any payment on a Note, Receipt or Coupon to a holder who is a fiduciary, a partnership, a limited liability company or a holder other than the sole beneficial owner of that payment to the extent that a beneficiary or settlor with respect to such fiduciary, a member of such a partnership, an interest holder in such a limited liability company or the beneficial owner of the payment would not have been entitled to the additional amounts had the beneficiary, settlor, member or beneficial owner been the holder of such Note, Receipt or Coupon.

As used herein:

“**Tax Jurisdiction**” means Korea or any political subdivision or any authority thereof or therein having power to tax or, in addition, if the Issuer is acting through a Specified Branch, the Specified Country, or any political subdivision or any authority thereof or therein having power to tax; and

the “**Relevant Date**” means the date on which such payment first becomes due, except that, if the full amount of the moneys payable has not been duly received by the Principal Paying Agent or the Registrar, as the case may be, on or prior to such due date, it means the date on which, the full amount of such moneys having been so received, notice to that effect is duly given to the Noteholders in accordance with Condition 15.

The obligation to pay additional amounts shall not apply in relation to (a) any withholding or deduction for or on account of any estate, inheritance, gift, sales, transfer, personal property or any similar tax, assessment

or other governmental charge or (b) any tax, duty, levy, impost, assessment or other governmental charge which is payable otherwise than by deduction or withholding from payments on the Notes, Receipts or Coupons; **provided that**, except as otherwise set forth in these Terms and Conditions, the Issuer shall pay all stamp and similar duties, if any, which may be imposed by Korea, the United Kingdom, the United States or any respective political subdivision or any taxing authority thereof or therein, as a consequence of the initial issuance of the Notes.

Whenever there is mentioned in any context the payment of principal of, and any premium or interest on, any Note, Receipt or Coupon, such mention shall be deemed to include payment of additional amounts to the extent that, in such context, additional amounts are, were or would be payable in respect thereof.

## 10. Prescription

The Notes, Receipts and Coupons will become void unless presented for payment within a period of 10 years (in the case of principal) and five years (in the case of interest) after the Relevant Date (as defined in Condition 9) therefor.

There shall not be included in any Coupon sheet issued on exchange of a Talon any Coupon the claim for payment in respect of which would be void pursuant to this Condition or Condition 6(b) or any Talon which would be void pursuant to Condition 6(b).

## 11. Events of Default

### (a) *Applicable to Senior Notes only*

If any of the following events (each an “**Event of Default**”) occurs and is continuing:

- (i) *Non-payment*: default is made in the payment of any amount of principal or interest in respect of the Senior Notes on the due date for payment thereof and such default remains unremedied for ten days or, in the case of default in the payment of interest, 15 days thereafter; or
- (ii) *Breach of other obligations*: default is made in the performance or observance of any other material obligation of the Issuer under or in respect of the Senior Notes and such default remains unremedied for 30 days after written notice thereof, addressed to the Issuer by any holder of Senior Notes, has been delivered to the Issuer; or
- (iii) *Cross-acceleration*: any Indebtedness (as defined below) in aggregate exceeding U.S.\$20,000,000 (or its equivalent in one or more other currencies) of the Issuer either (1) becoming due and payable prior to the due date for payment thereof by reason of acceleration following a default by the Issuer or (2) not being repaid by the Issuer at, and remaining unpaid after, maturity (as extended by an originally applicable period of grace, if any) applicable thereto, or any guarantee given by the Issuer in respect of Indebtedness of any other person not being honoured and remaining dishonoured after becoming due and called; **provided that**, in the case of (1) above, if any such default under any such Indebtedness shall be cured or waived, then the default under the Notes shall be deemed not to have occurred; or
- (iv) the Issuer becomes insolvent or unable to pay its debts when due or commits or permits any act of bankruptcy which terms shall include (1) the filing of a petition in any bankruptcy, reorganisation, winding-up or liquidation proceeding or other proceedings analogous in purpose or effect and the failure by the Issuer to have any such petition filed by another party discharged within 30 days, (2) the appointment of a receiver or trustee for the bankruptcy, reorganisation, winding-up or liquidation of the Issuer and such appointment is not discharged within thirty days, (3) the making by the Issuer of an assignment or an arrangement or composition with or for the benefit of its creditors, (4) the admission in writing by the Issuer of its inability to pay its debts as they fall due, (5) the entry of any court order or judgement confirming the bankruptcy or insolvency of the Issuer or, as the case may be, in relation to a substantial portion of its properties or assets, or (6) the Issuer takes corporate action to authorise or give effect to any of the foregoing; or
- (v) a moratorium is agreed or declared in respect of any Indebtedness of the Issuer or any governmental agency or authority confiscates or seizes or compulsorily purchases or expropriates all or a material part of the assets or capital of the Issuer,

then the holders of not less than 25% in aggregate principal amount of the Senior Notes outstanding may, by written notice addressed to the Issuer and delivered to the Issuer or to the Principal Paying

Agent in accordance with Condition 15, declare such Note to be immediately due and payable whereupon it shall become immediately due and payable at its principal amount together with accrued interest without further action or formality. Any such notice shall specify the serial number of each Note in respect of which it is given.

The Issuer shall fully indemnify each Noteholder from and against any reasonable costs, expenses, liabilities and losses which such Noteholder may suffer or incur as a direct result of the occurrence of any Event of Default (including, but without limitation, any expenses incurred in connection with legal proceedings to enforce repayment of such Note).

Nothing contained in these Conditions shall prevent the Issuer from, without the consent of the Noteholders, Receiptholders or Couponholders, consolidating with, or merging into, or selling, transferring, leasing or conveying its assets as an entirety or substantially as an entirety to any corporation organised under the laws of the respective jurisdiction of its incorporation; **provided that** (i) any successor corporation either (a) expressly assumes the applicable obligations of the Issuer under the Notes and the Agency Agreement or (b) succeeds to the applicable obligations of the Issuer under the Notes and the Agency Agreement by way of universal succession, (ii) after giving effect to the transaction, with respect to the Issuer or any such successor corporation, no Event of Default and no event which, after notice or lapse of time or both, would become an Event of Default, shall have occurred and be continuing, and (iii) the Issuer has delivered to the Principal Paying Agent a certificate executed by a duly authorised officer of the Issuer and an opinion of counsel as to matters of law stating that such consolidation, merger, sale, transfer, lease or conveyance and, if a supplemental agency agreement is required in connection with such transaction, such supplemental agency agreement comply with the Agency Agreement and the Notes and that all conditions precedent herein provided for relating to such transaction have been complied with.

**(b) *Applicable to Subordinated Notes only***

- (i) If any Bankruptcy Event or Liquidation Event of the Issuer shall occur and be continuing (and **provided that** a Trigger Event has not occurred) then, in any such event, the holder of any Subordinated Note may by written notice to the Issuer declare such Note to be forthwith due and payable upon receipt of such notice by the Issuer whereupon such Note shall become due and repayable at its principal amount plus accrued interest (if any).
- (ii) Except as expressly provided in this Condition 11(b), no holder of any Subordinated Note shall have any right to accelerate any payment of principal or interest in respect of the Subordinated Notes.
- (iii) The only action the holder of a Subordinated Note may take in Korea against the Issuer on acceleration of the Subordinated Notes is to prove claims in the liquidation or other applicable proceedings in respect of the Issuer in Korea (subject to the satisfaction of the relevant requirements under applicable laws).

**(c) *Interpretation***

In these Conditions “**Indebtedness**” means any obligation or obligations (whether present or future, actual or contingent) for the payment or repayment of money borrowed and/or interest thereon.

**12. Replacement of Notes, Receipts, Coupons and Talons**

Should any Note, Receipt, Coupon or Talon be lost, stolen, mutilated, defaced or destroyed, it may be replaced at the specified office of the Principal Paying Agent or the relevant Paying Agent (in the case of Bearer Notes, Receipts, Coupons and Talons) or of any Transfer Agent (in the case of Registered Notes) upon payment by the claimant of such costs and expenses as may be incurred in connection therewith and on such terms as to evidence and indemnity as the Issuer and the relevant Paying Agent or the Transfer Agent, as the case may be, may reasonably require. Mutilated or defaced Notes, Receipts, Coupons or Talons must be surrendered before replacements will be issued.

**13. Principal Paying Agent, Registrar, Exchange Agent, Paying and Transfer Agents**

The names of the initial Principal Paying Agent, the other initial Paying Agents, the initial Exchange Agent, the initial Registrar and the other initial Transfer Agents and their initial specified offices are set out below.

The Issuer is entitled to vary or terminate the appointment of any Paying Agent, Exchange Agent Registrar or Transfer Agent and/or appoint additional or other Paying Agents, Registrars, Exchange Agents or Transfer Agents and/or approve any change in the specified office through which any of the same acts, **provided that:**

- (i) so long as the Notes are listed on any stock exchange, there will at all times be a Paying Agent and, if appropriate, a Registrar and Transfer Agent with a specified office in such place as may be required by the rules and regulations of the relevant stock exchange;
- (ii) there will at all times be a Paying Agent and a Transfer Agent with a specified office in a city in continental Europe;
- (iii) there will at all times be a Registrar and a Transfer Agent each having a specified office in New York City;
- (iv) so long as any of the Registered Global Notes payable in a Specified Currency other than U.S. dollars are held through DTC or its nominee, there will at all times be an Exchange Agent with a specified office in New York City;
- (v) there will at all times be a Principal Paying Agent; and
- (vi) so long as the Notes are listed on the Singapore Exchange Securities Trading Limited (the “**Singapore Stock Exchange**”) and the rules of the Singapore Stock Exchange so require, if the Notes are issued in definitive form, there will at all times be a Paying Agent in Singapore unless the Issuer obtains an exemption from the Singapore Stock Exchange.

In addition, the Issuer shall forthwith appoint a Paying Agent having a specified office in New York City in the circumstances described in the second paragraph of Condition 6(b). Any variation, termination, appointment or change shall only take effect (other than in the case of insolvency, when it shall be of immediate effect) after not less than 30 nor more than 45 days’ prior notice thereof shall have been given to the Noteholders in accordance with Condition 15.

In acting under the Agency Agreement, the Principal Paying Agent, the Registrar, the Exchange Agent, the other Paying Agents and the Transfer Agents act solely as agents of the Issuer and do not assume any obligation or trust for or with any Noteholders.

#### 14. Exchange of Talons

On and after the Fixed Interest Date or the Interest Payment Date, as appropriate, on which the final Coupon comprised in any Coupon sheet matures, the Talon (if any) forming part of such Coupon sheet may be surrendered at the specified office of the Principal Paying Agent or any other Paying Agent in exchange for a further Coupon sheet including (if such further Coupon sheet does not include Coupons to (and including) the final date for the payment of interest due in respect of the Bearer Note to which it appertains) a further Talon, subject to the provisions of Condition 10. Each Talon shall, for the purposes of these Terms and Conditions, be deemed to mature on the Fixed Interest Date or the Interest Payment Date (as the case may be) on which the final Coupon comprised in the relative Coupon sheet matures.

#### 15. Notices

Notices to holders of Registered Notes will be deemed to be validly given (i) if sent by first class mail or (if posted to an overseas address) by air mail to them at their respective addresses as recorded in the Register and (ii) if and for so long as the Notes are listed on the Singapore Stock Exchange and the rules of the Singapore Stock Exchange so require, if published in a daily newspaper of general circulation in Singapore. Any such notice will be deemed to have been validly given on the latter of the fourth day after the date of such mailing and, if applicable, the date of such first publication.

All notices regarding the Bearer Notes shall be published in a leading English language daily newspaper of general circulation in London. It is expected that such publication will be made in the *Financial Times* in London and the *Wall Street Journal Asia Edition*. The Issuer shall also ensure that notices are duly published in a manner which complies with the rules and regulations of any other stock exchange on which the Notes are for the time being listed. Any such notice will be deemed to have been given on the date of the first publication or, where required to be published in more than one newspaper, on the date of first publication in each such newspaper or where published in such newspapers on different dates, the last date of such first publication.

Until such time as any definitive Notes are issued, there may (**provided that**, in the case of Notes listed on a stock exchange, the rules of the stock exchange allow for and further **provided that**, for so long as the Notes are listed on the Singapore Stock Exchange and the rules of the Singapore Stock Exchange so require, notices will always be published in a daily newspaper of a general circulation in Singapore), so long as the Global Note(s) is or are held in its/their entirety on behalf of (i) Euroclear and/or Clearstream, Luxembourg or DTC, be substituted for such publication in such newspaper(s), the delivery of the relevant notice to Euroclear and/or Clearstream, Luxembourg or DTC for communication by them to the holders of the Notes and (ii) the CMU Service, be substituted for such publication in such newspaper(s) the delivery of the relevant notice to the persons shown in a CMU Instrument Position Report issued by the CMU Service on the second business day preceding the date of dispatch of such notice as holding interests in the relevant Global Note and, in addition, for so long as any Notes are listed on a stock exchange and the rules of that stock exchange (or any other relevant authority) so require, such notice will be published in a manner specified by those rules. Any such notice shall be deemed to have been given to the holders of the Notes on the seventh day after the day on which the said notice was given to Euroclear and/or Clearstream, Luxembourg or DTC or the persons shown in the relevant CMU Instrument Position Report.

Notices to be given by any holder of the Notes shall be in writing and given by lodging the same, together with the relative Note or Notes, with the Principal Paying Agent. While any of the Notes are represented by a Global Note, such notice or demand may be given or made by any holder of a Note to the Principal Paying Agent or, the Registrar through Euroclear, Clearstream, Luxembourg and/or DTC or, in the case of Notes lodged with the CMU Service, by delivery by such holder of such notice to the CMU Lodging Agent in Hong Kong, as the case may be, in such manner as the Principal Paying Agent and Registrar and Euroclear, Clearstream, Luxembourg, the CMU Service and/or DTC, as the case may be, may approve for this purpose.

#### **16. Meetings of Noteholders, Modification and Waiver**

The Agency Agreement contains provisions for convening meetings of the Noteholders to consider any matter affecting their interests, including the sanctioning by Extraordinary Resolution of a modification of the Notes, the Receipts, the Coupons or any of the provisions of the Agency Agreement. Such a meeting may be convened by the Issuer or Noteholders holding not less than ten% in nominal amount of the Notes for the time being remaining outstanding. The quorum at any such meeting for passing an Extraordinary Resolution is one or more persons holding or representing not less than 50% in nominal amount of the Notes for the time being outstanding, or at any adjourned meeting one or more persons being or representing Noteholders whatever the nominal amount of the Notes so held or represented, except that at any meeting the business of which includes the modification of certain provisions of the Notes, Receipts or Coupons (including modifying the date of maturity of the Notes or any date for payment of interest thereof, reducing or cancelling the amount of principal or the rate of interest payable in respect of the Notes or altering the currency of payment of the Notes, Receipts or Coupons), the quorum shall be one or more persons holding or representing not less than 75% in nominal amount of the Notes for the time being outstanding, or at any adjourned such meeting one or more persons holding or representing a clear majority, in nominal amount of the Notes for the time being outstanding. An Extraordinary Resolution passed at any meeting of the Noteholders shall be binding on all the Noteholders, whether or not they are present at the meeting, and on all Receiptholders and Couponholders.

The Principal Paying Agent and the Issuer may agree, without the consent of the Noteholders, Receiptholders or Couponholders, to:

- (i) any modification (except as mentioned above) of any of the provisions of the Notes, the Receipts, the Coupons, the Conditions, the Deed of Covenant or the Agency Agreement which is not prejudicial to the interests of the Noteholders; or
- (ii) any modification of the Notes, the Receipts, the Coupons, the Conditions, the Deed of Covenant or the Agency Agreement which is of a formal, minor or technical nature or is made to correct a manifest error or to comply with mandatory provisions of the law of the jurisdiction in which the Issuer is incorporated.

Any such modification shall be binding on the Noteholders, the Receiptholders and the Couponholders and any such modification shall be notified to the Noteholders in accordance with Condition 15 as soon as practicable thereafter.

#### **17. Further Issues**

The Issuer shall be at liberty from time to time without the consent of the Noteholders, Receiptholders or Couponholders to create and issue further notes having terms and conditions the same as the Notes or the

same in all respects save for the amount and date of the first payment of interest thereon and so that the same shall be consolidated and form a single Series with the outstanding Notes, **provided that** such further issuance constitutes a qualified reopening for U.S. federal income tax purposes.

#### 18. **Provision of Information**

The Issuer has covenanted in the Deed Poll for the benefit of the Noteholders, Receiptholders and Couponholders that for so long as any Notes remain outstanding and are “**restricted securities**” (as defined in Rule 144(a)(3) under the Securities Act), the Issuer shall, during any period in which it is neither subject to Section 13 or 15(d) of the Exchange Act nor exempt from reporting pursuant to Rule 12g3-2(b) under the Exchange Act, make available to any Noteholder, Receiptholder or Couponholder of, or beneficial owner of an interest in, such Notes, Receipts or Coupons in connection with any resale thereof and to any prospective purchaser designated by such Noteholder, Receiptholder, Couponholder or beneficial owner, in each case upon request, the information specified in, and meeting the requirements of, Rule 144A(d)(4) under the Securities Act.

#### 19. **Governing Law and Submission to Jurisdiction**

- (a) The Agency Agreement, the Deed of Covenant, the Deed Poll, the Notes, the Receipts and the Coupons and all non-contractual obligations arising out of or in connection with such agreements and deeds are governed by English law, except that, in the case of Subordinated Notes, Conditions 3(b) and 3(c), contractual obligations arising out of those provisions are governed by, and shall be construed in accordance with, Korean Law.
- (b) The Issuer agrees, for the exclusive benefit of the Noteholders, the Receiptholders and the Couponholders that the courts of England are to have jurisdiction to settle any disputes which may arise out of or in connection with the Agency Agreement, the Deed of Covenant, the Deed Poll, the Notes, the Receipts and/or the Coupons and that accordingly any suit, action or proceedings (together referred to as “**Proceedings**”) arising out of or in connection with the Agency Agreement, the Deed of Covenant, the Deed Poll, the Notes, the Receipts and the Coupons may be brought in such courts. The Issuer hereby irrevocably waives any objection which it may have now or hereafter to the laying of the venue of any such Proceedings in any such court and any claim that any such Proceedings have been brought in an inconvenient forum and hereby further irrevocably agrees that a judgement in any such Proceedings brought in the English courts shall be conclusive and binding upon it and may be enforced in the courts of any other jurisdiction. Nothing contained in this Condition shall limit any right to take Proceedings against the Issuer in any other court of competent jurisdiction, nor shall the taking of Proceedings in one or more jurisdictions preclude the taking of Proceedings in any other jurisdiction, whether concurrently or not. The Issuer appoints KEB Hana Bank, London Branch at its registered office for the time being, currently at 8 Old Jewry, London EC2R 8DN, United Kingdom as its agent for service of process, and undertakes that, in the event of it ceasing so to act or ceasing to be registered in England, it will appoint another person as its agent for service of process in England in respect of any Proceedings. Nothing herein shall affect the right to serve proceedings in any other manner permitted by law. The Issuer hereby irrevocably and unconditionally waives with respect to the Agency Agreement, the Deed of Covenant, the Deed Poll, the Notes, the Receipts and/or the Coupons any right to claim immunity from jurisdiction or execution and any similar defence and irrevocably and unconditionally consents to the giving of any relief or the issue of any process, including without limitation, the making, enforcement or execution against any property whatsoever (irrespective of its use or intended use) of any order or judgement made or given in connection with any proceedings.

#### 20. **Contracts (Rights of Third Parties) Act 1999**

Unless expressly provided to the contrary in the terms of the Notes, any third party may not enforce any of the terms of the Notes notwithstanding the provisions in the Contracts (Rights of Third Parties) Act 1999.

## USE OF PROCEEDS

The net proceeds from each issue of Notes will be applied by the Issuer for its general corporate purposes; and/or if so specified in the relevant Pricing Supplement, the amount equivalent to the net proceeds from each issue of Notes will be allocated by the Issuer towards the financing or refinancing, in whole or in part, of Green Eligible Categories, Social Eligible Categories (each as defined below) or a combination of the two categories (in the case of Sustainability Bonds) in accordance with the Issuer's Sustainable Financing Framework (see "*Sustainable Financing Framework*").

According to the definition criteria set out by the ICMA Green Bond Principles, the ICMA Social Bond Principles or the ICMA Sustainability Bond Guidelines (as defined herein), only Tranches of Notes allocated exclusively to financing or refinancing Green Eligible Categories, Social Eligible Categories or a combination of the two categories (in the case of Sustainability Bonds) may be designated as "Green Bonds," "Social Bonds" or "Sustainability Bonds".

Green Eligible Categories, Social Eligible Categories or a combination of the two categories (in the case of Sustainability Bonds) have been defined in accordance with the broad categorisation of eligibility for Green Projects, Social Projects or Sustainability Projects set out by the ICMA Green Bond Principles, the ICMA Social Bond Principles or the ICMA Sustainability Bond Guidelines.

**"Green Eligible Categories"** are those which comprise financing within the Green Eligible Categories set out in the Issuer's Sustainable Financing Framework. Such Green Eligible Categories include those which relate to: renewable energy, energy efficiency, clean transportation, green buildings, pollution prevention and control and sustainable management of living natural resources and land use.

**"Social Eligible Categories"** are those which comprise financing within the Social Eligible Categories set out in the Issuer's Sustainable Financing Framework. Such Social Eligible Categories include those which relate to: access to essential services, affordable housing, employment generation and socioeconomic advancement and empowerment.

Financings within categories related to the luxury sectors, industries associated with elevated risk of child labour, adult entertainment, weapons, alcohol, tobacco, fossil fuel, nuclear, large-scale hydro-power projects with a generating capacity of more than 25MW and biomass suitable for food production are specifically excluded from consideration for eligibility.

The Dealers have not undertaken, nor are responsible for, any assessment of the eligibility of the assets within the definition of Green Eligible Categories, Social Eligible Categories or a combination of the two categories or the monitoring of the use of proceeds from the offering of any Green Bonds, Social Bonds or Sustainability Bonds. See "*Investment Considerations—Risks Relating to the Notes—Notes issued as Green Bonds, Social Bonds or Sustainability Bonds may not be a suitable investment for all investors seeking exposure to green assets, social assets or sustainability assets.*" for a discussion of certain factors to be considered in connection with the issuance of Green Bonds, Social Bonds or Sustainability Bonds.

## SUSTAINABLE FINANCING FRAMEWORK

*The description of the Issuer's sustainable financing framework (as amended or updated from time to time, the "Framework") included herein is in summarised form only. It is intended to provide non-exhaustive, general information and does not purport to be comprehensive. The information contained herein is provided as at the date of the Framework and is subject to change without notice and the Issuer does not assume any responsibility or obligation to update or revise such information, regardless of whether such information is affected by the results of new information, future events or otherwise. None of the Dealers is responsible for the assessment of the Issuer's Framework. The Issuer's Framework, the Second Party Opinion and any other similar opinion (including any content of websites or webpages references to which hyperlinks are included in this Offering Circular) does not form part of, nor is incorporated by reference in, this Offering Circular.*

As part of its commitment to responsible corporate citizenship, the Issuer has elected to create the Framework, which will help the Issuer to issue financing instruments such as bonds and loans that contribute to sustainable development.

Capitalised terms used but not otherwise defined herein shall have the same meanings as in the Framework, which is publicly available on the following website:

<https://www.hanafn.com/esg/report/esgbond/archive.do>

The objective of the Framework is to reinforce the Issuer's capabilities in financing green and social projects and contribute to the achievement of the UN Sustainable Development Goals.

The Framework is in line with:

- The ICMA Green Bond Principles (GBP), Social Bond Principles (SBP) and the Sustainability Bond Guidelines (SBG)
- The LMA Green Loan Principles (GLP) and Social Loan Principles (SLP) jointly published by the Loan Market Association, Asia Pacific Loan Market Association and Loan Syndications and Trading Association

The Framework is presented through the following four key pillars:

- (1) Use of Proceeds
- (2) Process for Project Evaluation and Selection
- (3) Management of Proceeds
- (4) Reporting

The Framework enables the Issuer to launch sustainable financing transactions in the following formats (the "**Sustainability Financing Transaction**" or "**SFT**"):

- Green SFT: Financing of Eligible Green Assets (as defined in the Framework) and/or green bonds/loans for refinancing
- Social SFT: Finance of Eligible Social Assets (as defined in the Framework) and/or social bonds/loans for refinancing
- Sustainability SFT: Finance of a mix of Eligible Green Assets and Eligible Social Assets and/or sustainability bonds/loans for refinancing

### **Use of Proceeds**

The amount equivalent to the net proceeds of SFTs issued under the Framework will be used to finance or refinance Eligible Assets that fall under one of the Eligible Categories defined in the Framework.

### **Process for Evaluation and Selection of Projects**

The project evaluation and selection process will ensure that the amount equivalent to the net proceeds of the Issuer's SFT is allocated to new lending or existing projects/expenditures that meet the criteria set out in the Framework.

In addition, the eligibility of assets will also be subject to consistency with the Issuer's environmental and/or social (E&S) screening process applied during loan origination. The Issuer has enhanced the monitoring, assessment, and management of ESG-related issues and established clear direction and process for E&S risk management, including establishing a thorough screening and oversight process to minimise both direct and indirect negative E&S consequences that may be generated through the Issuer's business activities and operations.

The Issuer has also set up an ESG Planning Section ("ESG PS") to carry out the evaluation and selection process. The ESG PS collaborates with Hana Financial Group's ESG Planning Section to align procedures between the Issuer and the Group.

On an ongoing basis, Eligible Assets from the Issuer's lending book will be identified and proposed by the Issuer's business units. Relevant business units will screen customer information against the Eligibility Criteria set out in the Framework and recommend eligible projects or expenditures for inclusion as Eligible Assets to the ESG PS. The ESG PS will evaluate and monitor the eligibility requests of the recommended projects at controversy and decide whether to include the recommended projects as Eligible Assets.

On an annual basis, the ESG PS will review all proposed Eligible Assets to determine their compliance with the Framework to approve the allocation of proceeds. The ESG PS will also review the allocation of the proceeds to the Eligible Use of Proceeds annually and determine if any changes are necessary (for instance, if assets have been prepaid, sold or otherwise become ineligible). Moreover, ESG PS will also review the management of proceeds and facilitate reporting.

### **Management of Proceeds**

To manage the proceeds of its SFT, the Issuer will establish a Sustainable Financing Register. The amount equivalent to the net proceeds of each SFT will be deposited in general funding accounts and earmarked for allocation in the Sustainable Financing Register.

The Sustainable Financing Register will be reviewed annually by the ESG PS to account for any repayments and drawings on the Eligible Assets. The portfolio will be managed with a view to ensure that the amount of Eligible Assets allocated will be equal to or exceed the balance of the net proceeds of outstanding SFT issued over time.

### **Reporting**

The Issuer will publish the Sustainable Bond Report on an annual basis until the full allocation of the proceeds or the maturity of the relevant bond. In the instances of any material changes in the projects allocated or replacement of the allocated assets, the Issuer will also publish an updated allocation report. The Sustainable Bond Report will cover the allocation and impact metrics and will be published on the following website:

<https://www.hanafn.com/esg/report/esgbond/archive.do>

### **External Review**

The Issuer has engaged DNV to provide an External Review in the form of a Second Party Opinion that confirms the alignment of the Framework with the ICMA GBP, SBP, SBG, and the LMA GLP and SLP.

The Second Party Opinion will be made available on the following website:

<https://www.hanafn.com/esg/report/esgbond/archive.do>

Neither the Second Party Opinion nor the Issuer's Framework is and shall be deemed to be incorporated into and/or form part of this Offering Circular.

None of the Dealers makes any representation or warranty, express or implied, concerning any information in the Framework, and nothing contained in the Framework is, or shall be relied upon as, a promise or representation, from the Dealers. None of the Dealers accepts any responsibility for the contents of the Framework. The Dealers have not separately verified nor will make any assurances as to (i) whether any Green Bonds, Social Bonds or Sustainability Bonds will meet the investor criteria and expectations regarding environmental impact and sustainability performance of any investor, (ii) whether an amount equal to the net proceeds will be used for financing the Green Eligible Categories, Social Eligible Categories or a combination of the two categories (in the case of Sustainability Bonds) or (iii) the characteristics of the Green Eligible Categories or Social Eligible Categories, including their environmental and sustainability criteria.

None of the Dealers accepts any responsibility for any environmental, social and sustainability assessment of any Notes which will be issued as Green Bonds, Social Bonds or Sustainability Bonds or makes any representation or warranty or assurance whether such Notes will meet any investor expectations or requirements regarding such “green”, “social”, “sustainable” or similar labels or any requirements of such labels as they may evolve from time to time. None of the Dealers is responsible for the use or allocation of proceeds for any Notes issued as Green Bonds, Social Bonds or Sustainability Bonds nor the impact or monitoring of such use of proceeds nor do any of the Dealers undertake to ensure that an amount equal to the net proceeds of the issue of such Green Bonds, Social Bonds or Sustainability Bonds will be used for financing the Green Eligible Categories, Social Eligible Categories or a combination of the two categories (in the case of Sustainability Bonds).

In addition, none of the Dealers is responsible for the assessment of the Framework including the assessment of the applicable eligibility criteria in relation to Green Bonds, Social Bonds or Sustainability Bonds set out therein. The Second Party Opinion is not intended to address any credit, market or other aspects of an investment in any Notes, including without limitation market price, marketability, investor preference or suitability of any security. The Second Party Opinion is not a statement of fact. No representation or assurance is given by the Dealers as to the suitability or reliability of the Second Party Opinion or any opinion or certification of any third party made available in connection with any issue of Notes issued as Green Bonds, Social Bonds or Sustainability Bonds. The Second Party Opinion and any other such opinion is not, nor should be deemed to be, a recommendation by the Dealers, or any other person to buy, sell or hold any Notes and is current only as of the date it is issued. The criteria and/or considerations that formed the basis of the Second Party Opinion or any such other opinion may change at any time and the Second Party Opinion may be amended, updated, supplemented, replaced and/or withdrawn. Prospective investors must determine for themselves the relevance of any such opinion and/or the information contained therein. The Framework may also be subject to review and change and may be amended, updated, supplemented, replaced and/or withdrawn from time to time and any subsequent version(s) may differ from any description given in this Offering Circular.

In the event any such Notes are, or are intended to be, listed, or admitted to trading on a dedicated “green”, “social”, “sustainable” or other equivalently labelled segment of a stock exchange or securities market, no representation or assurance is given by the Dealers that such listing or admission will be obtained or maintained for the lifetime of the Notes.

## EXCHANGE RATES

The table below sets out, for the periods and dates indicated, information concerning the Market Average Exchange Rate, which is rounded to the nearest tenth of one Won. No representation is made that the Won or U.S. dollar amounts referred to herein could have been or could be converted into U.S. dollars or Won, as the case may be, at any particular rate, or at all.

| <u>Year ended 31 December</u>          | <u>Low</u>     | <u>High</u>    | <u>Average<sup>(1)</sup></u> | <u>Period-end</u> |
|----------------------------------------|----------------|----------------|------------------------------|-------------------|
|                                        |                |                | <i>(Won per US\$1.00)</i>    |                   |

(1) Represents the average of the daily Market Average Exchange Rate over the relevant period.

## INVESTMENT CONSIDERATIONS

*Prospective purchasers of Notes should carefully review the information contained in this Offering Circular, including the following matters.*

### **Risks Relating to Our Business**

***Uncertainties and instability in global market conditions could adversely affect our business, financial condition and results of operations, as well as the value of the Notes.***

Most of our assets are located in Korea, where we generate most of our income. Accordingly, our business and profitability are largely dependent on the general economic and social conditions in Korea, including interest rates, inflation, exports, personal expenditure and consumption, unemployment, demand for business products and services, debt service burden of households and businesses, the general availability of credit, the asset value of real estate and securities and other factors affecting the financial well-being of our corporate and retail customers. The Korean economy is closely integrated with, and is significantly affected by, developments in the global economy and financial markets. Accordingly, adverse global market conditions could adversely affect economic conditions in Korea and in turn our business, financial condition and results of operations. See “—Risks Relating to Korea —Adverse developments in Korea may have adverse effects on us.”

While there have been mixed signs of recovery in the global economy in recent years, the global economic outlook for the near future continues to remain uncertain, mainly due to the general uncertainty about economic and political conditions in Europe and Latin America, the slowdown of economic growth in China and other major emerging market economies, a potential escalation in trade conflicts between the United States and China, continuing geopolitical and social instability and the escalation of hostilities in the Middle East following the Israel-Hamas war and the Israel-Iran war, the Russia-Ukraine war and ensuing sanctions against Russia, fluctuations in policy interest rates globally to combat inflationary pressures and, more recently, rising global trade tensions, particularly between the United States and its trading partners in light of tariffs to be imposed or increased under the second Trump administration, and the subsequent retaliatory trade measures by affected countries, among others. While there were rapid increases in interest rates globally between the second half of 2021 and the first half of 2024 to combat inflation, many central banks, including those of Korea and the U.S., began cutting their policy interest rates in late 2024 as global inflation showed signs of stabilisation. Further fluctuations in inflation and policy interest rates in the future may continue to materially and adversely affect the global economy and the financial markets. The Korean economy also continues to face difficulties, including sluggishness in domestic consumption and investment, volatility in the real estate market, rising household debt, potential declines in productivity due to ageing demographics and low birth rates, and a rise in income disparities. Any future deterioration of the global and Korean economies could adversely affect our business, financial condition and results of operations.

***Our exposure to large Korean conglomerates, known as “chaebols”, could have an adverse effect on us.***

One of our core banking businesses has historically been, and continues to be, lending to large corporations. As of 30 June 2025, on a separate basis, our loan exposure (consisting of loans and other on-balance sheet items, confirmed guarantees and acceptances and debt securities) to our 10 largest borrowers was ₩36.6 trillion, which represented 8.1% of our total exposures, and a majority of such borrowers were named in the “Main Debtor Group”, as identified and designated by the FSS. The Main Debtor Group is a list of companies maintained by the FSS which sets forth those companies whose outstanding credit amount to a financial institution is not less than 0.075% of the total credit provided by such financial institution and total debt is not less than 0.1% of the nominal GDP of Korea, and includes most of the Korean conglomerates, or *chaebols*. Our largest exposure, on a separate basis, to a single *chaebol* group as of 30 June 2025 was ₩4.6 trillion, which represented 1.0% of our total exposures. See “Description of Assets and Liabilities — Loan Concentrations”. As of 30 June 2025, our 10 largest credits were all classified as normal. However, if any of our large credits were to become non-performing, the quality of our total loan portfolio could be adversely affected and additional provisions may be required. In addition, we may decide to reduce or freeze the amount of credit available to certain large conglomerates in order to avoid excessive credit concentration in any single borrower or related group of borrowers, which may have an adverse impact on our profitability.

***Exposure to small- and medium-sized enterprises (“SMEs”), and financial difficulties experienced by such enterprises, may result in a deterioration of our asset quality.***

We provide an extensive range of loan products and other banking services to SMEs. As of 30 June 2025, our total loans to SMEs (before allowance for loan losses and net deferred origination fees and costs) amounted to

₩149.6 trillion, representing 40.6% of our total loan portfolio. In addition, as of 31 December 2022, 2023 and 2024 and 30 June 2025, on a separate basis, our delinquent loans (which represent loans the principal and interest amount of which is past due for one month or more) to SMEs were ₩381.0 billion, ₩516.6 billion, ₩282.0 billion and ₩765.7 billion, respectively, representing delinquency ratios (defined, on a separate basis, as delinquent SME loan amount divided by total SME loan amount, net of charge-offs and loan sales) of 0.31%, 0.38%, 0.21% and 0.55%, respectively. Delinquency ratios as of 30 June 2025 increased due to the continued unfavourable financial environment, both domestically and internationally, with delinquency rates rising particularly among vulnerable borrowers in the SME and Small Office Home Office (SOHO) sectors.

Compared to loans to large corporate borrowers, which tend to be better capitalised and better able to weather business downturns, or loans to individuals and households, which tend to be secured with homes and with respect to which the borrowers are therefore less willing to default, loans to SMEs have historically had a relatively higher delinquency ratio. Many SMEs represent sole proprietorships or very small businesses dependent on a relatively limited number of suppliers or customers and tend to be affected to a greater extent than large corporate borrowers by fluctuations in the Korean and global economy. In addition, SMEs often maintain less sophisticated financial records than large corporate borrowers. Therefore, it is generally more difficult for banks to judge the level of risk inherent in lending to these enterprises, as compared to large corporate borrowers. In addition, many SMEs have close business relationships with *chaebols* in Korea, primarily as suppliers. Any difficulties encountered by those *chaebols* would likely hurt the liquidity and financial condition of related SMEs, including those to which we have exposure, also resulting in an impairment of their ability to repay loans. In recent years, some *chaebols* have expanded into China and other countries with lower labour costs and other expenses by relocating their production plants and facilities to such countries, which may have a material adverse impact on such SMEs.

Due to the relatively vulnerable financial position faced by SMEs in Korea, the Government has historically introduced policies and initiatives intended to encourage Korean banks to provide financial support to SME borrowers. For instance, in response to a series of Government-led initiatives to mitigate the impacts of adverse market conditions induced by the COVID-19 pandemic on SMEs and small merchants, we provided special loans to small merchants affected by the COVID-19 pandemic starting from 24 January 2022, but have ceased to provide such loans to small merchants since December 2022. Additionally, in December 2023, we joined other major commercial banks in Korea in announcing a joint statement with the FSC and the FSS according to which more than ₩2 trillion was committed as a relief measure to relieve the financially vulnerable groups affected by the COVID-19 pandemic. Most recently, in December 2024, the Korea Federation of Banks, in line with similar initiatives of the Government, announced that 20 participating banks, including us, would collectively provide approximately ₩600 billion to ₩700 billion annually in various forms of financial support to small business owners over the next three years to help them overcome the prevailing adverse economic conditions in Korea. The overall prospects for the Korean economy in 2025 and beyond remain uncertain, and the Government may extend or renew existing or past policies and initiatives or introduce new policies or initiatives to encourage Korean banks to provide financial support to SMEs. Our participation in such Government-led initiatives may lead us to extend credit to SME borrowers that we would not otherwise extend, or offer terms for such credit that we would not otherwise offer, in the absence of such initiatives. There is no guarantee that the financial condition and liquidity position of our SME borrowers benefiting from such initiatives will improve sufficiently for them to service their debt on a timely basis, or at all. Accordingly, increases in our exposure to SME borrowers resulting from such Government-led initiatives may have a material adverse effect on our business, financial condition and results of operations.

We have been taking active steps to curtail delinquency among our SME customers, including by way of increasing our exposure to so-called “blue-chip” companies with low credit risk profiles and reducing our exposure to companies with high credit risk profiles. Despite such efforts, the amount of our delinquent loans to SMEs and delinquency ratios have been steadily increasing in recent years primarily due to the economic downturn and there can be no assurance that delinquency levels for our loans to SMEs will not rise further in the future. In addition, aggressive marketing and intense competition among banks to lend to this segment, may lead to a deterioration in the asset quality of our loans to this segment in the future. Any such deterioration would result in increased charge-offs, higher provisioning and reduced interest and fee income from this segment, which could have an adverse impact on our business, financial condition and results of operations.

***The asset quality of our household loan portfolio may deteriorate.***

In recent years, consumer debt, including lending to small unincorporated businesses, has continued to increase in Korea. Our portfolio of household loans is comprised of two principal product types, namely secured household

loans (which are primarily comprised of housing loans secured by real estate) and general purpose household loans (which are unsecured loans and tend to carry a higher credit risk). As of 31 December 2022, 2023 and 2024 and 30 June 2025, our household loan portfolio (before allowance for loan losses and net deferred origination fees and costs) was ₩132.5 trillion, ₩131.9 trillion, ₩139.7 trillion and ₩141.9 trillion, representing 40.0%, 37.8%, 37.9% and 38.6% of our total loans outstanding, respectively.

Our large exposure to household loans means that we are exposed to changes in economic conditions affecting Korean consumers. For example, a rise in unemployment or an increase in interest rates in Korea could adversely affect the ability of consumers to make payments and increase the likelihood of potential defaults. Accordingly, economic difficulties in Korea that hurt consumers could result in increasing delinquencies and a decline in the asset quality of our household loan portfolio, which would in turn require us to record increased provisions for credit loss and charge-offs and may materially and adversely affect our business, financial condition and results of operations.

In response to increasing levels of household loans in recent years and amid concerns over the debt-servicing capacity of borrowers if interest rates were to rise, the Government has led a series of initiatives for Korean commercial banks, including us, to participate to help manage the debt-servicing capacity of borrowers. For example, under a pre-workout programme for household borrowers established by the Credit Counseling and Recovery Service, a public service organisation that provides debt adjustment services to low-income families in Korea, a number of Korean banks, including us, provide maturity extensions and/or interest reductions for borrowers with total loans of ₩1.5 billion or less (consisting of no more than ₩500 million of unsecured loans and ₩1 billion of secured loans) who are in arrears on their payments for more than 30 days but less than 90 days, or for retail borrowers with an annual income of ₩40 million or less who have been in arrears on their payments for 30 days or more on an aggregate basis for the 12 months prior to their application, among others. Our participation in such refinancing programme may lead to a decrease in our interest income on our outstanding mortgage loans, as well as in our overall net interest margin. More generally, our participation in such Government-led initiatives to provide financial support to retail borrowers may lead us to offer credit terms for such borrowers that we would not otherwise offer in the absence of such initiatives, which may have an adverse effect on our business, financial condition and results of operations.

In addition, real estate comprises the most significant asset for a substantial number of households in Korea, and movements of housing prices have generally had a significant impact on the domestic economy. Accordingly, regulating housing prices, either in terms of attempting to stem actual or anticipated excessive speculation during times of a suspected housing price bubble and spur the pricing and/or volume of real estate transactions during times of a depressed real estate market by way of tax subsidy, guidelines to lending institutions or otherwise, has been a key policy initiative for the Government.

In particular, the regulations on mortgage and home equity loans are susceptible to the changing housing market cycles and have been revised from time to time. In the second half of 2022, the Government led by the former President Yoon Suk Yeol had announced and implemented a series of policies to ease the demand-side regulations in the real estate market in order to prevent the housing prices from crashing in light of general increases in interest rates. For example, the Government released most areas from “speculative areas”, “overheated speculative areas” and “adjustment targeted areas” (collectively, the “**regulated areas**”), where tighter loan-to-value ratios and debt-to-income ratios are applicable to mortgage or home equity loans, and as a result, only Gangnam-Gu, Seocho-Gu, Songpa-Gu and Yongsan-Gu in the greater Seoul metropolitan area are currently left as the regulated areas. The Government also increased the loan to value ratio applicable to the regulated areas from 40% to 50% for general non-home-owners, removed the application of stricter loan to value ratio to new loans secured by high-priced houses located in the regulated areas and, since March 2023, allowed the extension of new loans secured by houses located in the regulated areas to a household that already owns one or more house with the maximum loan-to-value ratio of 30%. The Government led by newly elected President Lee Jae-myung is expected to implement stricter regulations to curb the growth of household debt, including the introduction of a tighter cap on the maximum amount of mortgage loans for home purchases in regulated areas, such as the greater Seoul metropolitan area.

Housing prices in Korea fluctuated throughout 2024 and the first half of 2025, with prices continuing to rise in certain parts of the Seoul metropolitan area, while generally declining in regional markets, particularly across many provincial cities. Adverse trends of interest rates and real estate market conditions could lead to a deterioration of the quality of our household loan portfolio, which in turn could lead to an adverse impact on our business, financial condition and results of operations.

***We have significant exposure through our lending and other activities to a number of industries, and financial difficulties of any companies within these industries may adversely impact us.***

Many Korean companies, including certain of our borrowers in the construction, shipbuilding and shipping sectors, are continuing to face financial difficulties rooted from the aftermath of the 2008 global financial crisis and accentuated by the COVID-19 pandemic.

The construction industry in Korea has been stagnant for many years due to stringent government regulations on real estate and a decrease in overseas construction orders, among others. In particular, a rise in the costs of raw materials including steel and cement has increased the financial costs and contingent liabilities of many Korean construction companies in the industry with added uncertainties arising from construction companies' exposures to project financing loans. In the case of real estate project financing, a downturn in the construction industry, together with a continued stagnation of the real estate market, has resulted in difficulties for the real estate project financing industry. Real estate project financing is not an official industry classification used by us but rather a concept that encompasses exposures across several sectors, including real estate leasing, apartment construction and real estate development. Accordingly, a portion of our construction exposures is also included within our real estate project financing exposures. The high levels of interest rates prevailing in Korea until the end of 2024 resulted in increases in both the number of insolvent real estate projects and delinquency rates for project financing loans, including short-term bridge loans. For example, Taeyoung E&C, a Korean construction company that was ranked 16th by construction capacity in 2023, filed for a debt workout process in December 2023 after failing to repay its real estate project financing loan. In June 2024, Taeyoung E&C's financial creditors, including us, converted a total of ₩633 billion of unsecured debt into equity. As part of this transaction, we converted our loans of ₩25 billion and acquired a 3.79% equity interest in Taeyoung E&C. As of 30 June 2025, the amount of loans we had provided to Taeyoung E&C was ₩27.6 billion, including project finance loans of ₩2.2 billion, for which we set aside allowances for loan losses in the amount of ₩19.2 billion as of the same date. As of the date of this Offering Circular, Taeyoung E&C continues to face uncertainties regarding its financial soundness, and its construction capacity ranking declined to 24th in 2024 but rebounded to 19th as of July 2025.

The shipbuilding and shipping industries in Korea experienced a severe downturn in recent years reflecting a significant decrease in ship orders, primarily due to the COVID-19 pandemic and the ensuing global lockdown. Although the shipbuilding and shipping industries subsequently showed signs of recovery from the pandemic due to increased global traffic resulting from increases in consumer spending and shipments as well as higher shipping rates reflecting more stringent global environmental regulations, the industries have again entered a downturn starting in the second quarter of 2022 resulting from decreases in shipping volume and freight rates and an increase in the supply of ships, as well as increased competition from shipbuilding companies in China and escalations in trade protectionism. The industries continue to face difficulties arising from, among others, a deteriorating global economy, an increase in global military conflicts, including the Russia-Ukraine war and the escalation of hostilities in the Middle East following the Israel-Hamas war and the Israel-Iran war, a decrease in shipping volume and the strengthening of international shipping regulations.

As of 30 June 2025, on a separate basis, we had exposures of ₩12.0 trillion, ₩4.6 trillion, ₩9.1 trillion and ₩0.9 trillion to borrowers in the construction, real estate project financing, shipbuilding and shipping sectors, respectively, which represented 3.38%, 1.30%, 2.54% and 0.24%, respectively, of our total credits (including loans, guarantees, purchases of securities (only in the nature of a credit) and such other transactions which directly or indirectly create credit risk as reported to the FSS based on the FSC's asset classification criteria). As of the same date, we had set aside allowances for loan losses in the amount of ₩128.2 billion, ₩89.9 billion, ₩9.8 billion and ₩3.3 billion for our general loans to borrowers in the construction, real estate project financing, shipbuilding and shipping sectors, respectively.

In addition to our on-balance sheet loan exposures, we have other exposures to such borrowers, in the form of guarantees extended for the benefit of such borrowers (which included, on a separate basis, ₩1,744.3 billion for construction companies, ₩24.8 billion for real estate project financing companies, ₩5,937.4 billion for shipbuilding companies and ₩117.8 billion for shipping companies as of 30 June 2025) and debt and equity securities of such borrowers held by us. In the case of construction companies, such exposures include guarantees provided to us by general contractors with respect to financing extended by us for residential and commercial real estate development projects. In the case of shipbuilding companies, such exposures include refund guarantees extended by us on behalf of shipbuilding companies to cover their obligation to return a portion of the ship order contract amount to customers in the event of performance delays or defaults under shipbuilding contracts.

As of 30 June 2025, our largest single exposure (consisting of loans, confirmed guarantees and acceptances, and debt and equity securities) in the construction, real estate project financing, shipbuilding and shipping sectors was to HD Hyundai Heavy Industries Co., Ltd., which amounted to ₩2,388.1 billion, on a separate basis, for which we established allowance for loan losses of ₩0.5 billion. Our other significant exposures as of the same date include Samsung Heavy Industries Co., Ltd. and Booyoung Housing Co., Ltd. in the amount of ₩1,625.1 billion and ₩1,734.9 billion, respectively, on a separate basis, for which we had allowance for loan losses of ₩1.9 billion and ₩1.1 billion, respectively.

Companies in the cable TV network industry in Korea have also been experiencing financial difficulties due to decreasing revenue and subscription base, as many subscribers opt for new forms of media such as Internet streaming, Internet Protocol Television, online video sharing platforms and OTT (over-the-top) platforms in lieu of cable TV subscription. As of 30 June 2025, our exposure to D'Live Co., Ltd. ("**D'Live**"), a major cable TV network and subsidiary of Kookmin Cable Investment Inc. ("**Kookmin Cable**"), amounted to ₩40.6 billion, on a separate basis, and we established allowance for loan losses for the entire exposure amount. Since 2016, D'Live has faced the risk of defaulting on the loans from us and other creditors due to their inability to make interest payments. We and other creditors have extended maturity and lowered interest rates of the loans and converted loans to Kookmin Cable into equity. As of 30 June 2025, we held 4.42% interest in Kookmin Cable. Subject to market conditions, we plan to liquidate our equity investments in Kookmin Cable in the future.

The allowances that we have established against our credit exposures to Korean companies in the above described industries may be insufficient to cover all future losses arising from such exposures. If the credit quality of our exposures to such Korean companies declines, we may be required to take substantial additional provisions for credit loss, which could adversely impact our business, financial condition and results of operations. Furthermore, although a portion of our loans to such Korean companies may be secured by collateral, such collateral may be insufficient to cover uncollectible amounts in respect of such loans. See "*— A decline in the value of the collateral securing our loans or our inability to fully realise the collateral value may adversely affect us.*"

***We have exposure to companies that are currently or may in the future be put in restructuring, and we may suffer losses as a result of additional loan loss provisions which may be required and/or the adoption of restructuring plans with which we do not agree.***

As of 30 June 2025, on a separate basis, our loans to companies that were in restructuring (in the form of either workout or rehabilitation) amounted to ₩289.7 billion, representing 0.08% of our total loans. Our allowances for losses on these loans may not be sufficient to cover all future losses arising from our exposure to these companies. Furthermore, we have other exposure to such companies, in the form of guarantees extended for the benefit of such companies and debt and equity securities of such companies held by us (including equity securities we acquired as a result of debt-to-equity conversions). With respect to those companies that are in or may in the future enter into workout or liquidation proceedings, we may not be able to make any recoveries against such companies. We may, therefore, experience future losses with respect to those loans. In addition, in the case of borrowers that are or become subject to workout, we may be forced to restructure our credits pursuant to restructuring plans approved by other creditor financial institutions or to dispose of our credits to other creditors on unfavourable terms, which may adversely affect our business, financial condition and results of operations.

In particular, as of 30 June 2025, on a separate basis, we had ₩36.8 billion of outstanding loans and ₩525.3 billion of outstanding guarantees (mainly in the form of refund guarantees relating to shipbuilding contracts), to Hanwha Ocean Co., Ltd. ("**Hanwha Ocean**"), formerly known as Daewoo Shipbuilding & Marine Engineering Co., Ltd. ("**DSME**"). In April 2017, the creditors of DSME agreed on a plan to provide additional financial support to DSME in connection with its voluntary restructuring programme, under which The Korea Development Bank and The Export-Import Bank of Korea would provide ₩2.9 trillion of new loans to DSME, on the condition that DSME's other creditors and bondholders agree to a ₩2.9 trillion debt-to-equity swap. The financial support plan required the Korean commercial bank creditors of DSME, including us, to swap 80% of their outstanding unsecured loans into equity of DSME and extend the maturity of the remaining loans for a period of three years. The financial support plan also required DSME's creditors, including us, to provide additional refund guarantees in connection with future shipbuilding contracts of DSME. As a result of the debt-to-equity swap, we converted our loans in the amount of ₩364 billion and received 8.40% of equity interest in DSME, which was subsequently reduced to 1.88% as a result of the completion of acquisition of 49.3% equity interest in DSME by a group of subsidiaries of Hanwha Group in April 2023 and an additional paid-in capital increase in May 2023. In 2024, we sold all of our equity interests in Hanwha Ocean. As of 30 June 2025, our

exposure to Hanwha Ocean included loans and refund guarantees, which may require us to increase our loan loss provisions and recognise write-offs and impairment losses, and may therefore have a material adverse impact on our results of operations and financial condition.

***In furtherance of policy objectives, the Government may promote lending and financial support to certain types of institutions to which we would not lend or provide support absent such policies, and such lending or other forms of support may negatively impact our financial condition.***

Through its policies and recommendations, the Government has promoted and, as a matter of policy, may continue to attempt to promote lending by the Korean financial industry to particular types of borrowers. For example, the Government has in the past provided and may continue to provide policy loans, which encourage lending to particular types of borrowers. The Government has generally provided such loans by identifying sectors of the economy it wishes to promote and making low-interest funding available to financial institutions that may voluntarily choose to lend to these sectors. For example, the Government has in this manner provided policy loans intended to promote mortgage lending to low-income individuals and lending to SMEs. The Government may implement similar or other initiatives in the future to spur the overall economy or encourage the growth of targeted industries or relief to certain segments of the population. All loans or credits we choose to make pursuant to these policy loans would be subject to review in accordance with our credit approval procedures. However, the availability of policy loans may influence us to lend to certain sectors or in a manner in which we otherwise would not have done in the absence of such policy initiatives from the Government, and the policy-driven lending may create enhanced difficulties for us in terms of risk management and may lead to deterioration of our asset quality and reduced earnings.

In addition, the Government has requested and may in the future request financial institutions in Korea, including us, to make investments in or provide other forms of financial support to particular sectors of the Korean economy as a matter of policy, which such financial institutions, including us, may decide to accept. We may incur costs or losses as a result of providing such financial support.

***Competition in the Korean banking industry is intense and may further intensify.***

We compete principally with other national banks in Korea and also face competition from regional banks, Government policy banks, specialised banks, branches of foreign banks operating in Korea and various other types of financial service institutions. In particular, competition in the retail and SME lending sectors, which have traditionally been important business areas for us, has intensified in recent years and is expected to further increase. Profitability in our retail banking operations may decline due to market saturation in the retail lending segment, heightened interest rate competition and increased marketing expenses. Intense competition has made, and is expected to continue to make, it more challenging for us to attract and retain retail and SME customers with the credit quality and on the terms necessary to meet our business objectives in a commercially acceptable manner.

Consolidation among financial institutions and the Government's privatisation initiatives may also intensify competition in the markets in which we operate. For example, as part of the Government's privatisation plan for Woori Finance Holdings Co., Ltd. (the former financial holding company of Woori Bank) and its former subsidiaries, certain subsidiaries were sold to other financial institutions and Woori Finance Holdings Co., Ltd. was merged into Woori Bank in 2014. Woori Financial Group Inc. was established in January 2019 as Woori Bank's new financial holding company. Large financial groups have also been expanding their asset bases and non-banking businesses by actively pursuing acquisitions. Shinhan Financial Group acquired Orange Life Insurance Ltd. (formerly ING Life Insurance Korea Ltd.) in February 2019 and BNP Paribas Cardif General Insurance in November 2021. KB Financial Group acquired Prudential Life Insurance Co. of Korea in September 2020. Hana Financial Group, our parent holding company, acquired The-K Non-Life Insurance in May 2020. We expect that industry consolidation will continue and that financial institutions resulting from such mergers or acquisitions will possess greater size and business scope, which could enable them to compete more effectively against us.

In July 2023, the FSC announced measures to enhance competition in the banking sector, including plans to issue additional banking licences (including for internet-only banks, taking into account the performance and stability of existing internet-only banks) and to permit the conversion of existing regional or savings banks into nationwide commercial banks. The FSC and the FSS published detailed guidelines regarding these measures in January 2024. In May 2024, the FSC approved DGB Daegu Bank's application to convert from a regional bank into a nationwide commercial bank. DGB Daegu Bank subsequently became Korea's seventh commercial bank and rebranded itself as iM Bank in June 2024. Additionally, as of the date of this Offering Circular, four

consortiums, including those involving major nationwide commercial banks and other financial service providers, have publicly announced their intent to apply for an internet-only banking licence to become the fourth internet-only bank in Korea. Among these consortiums, we submitted a letter of intent to invest as a shareholder in the Korea SOHO Bank Consortium in March 2025.

In addition, we believe that structural changes in the Korean financial investment industry will further intensify competition. Increases in foreign investments by Korean investors, the emergence of alternative trading systems and rising trading volumes have prompted securities firms to offer low commission rates to capture market share. In March 2025, Nextrade was established as the first alternative trading platform to the Korea Exchange, which is expected to further transform the competitive landscape for financial institutions in Korea.

There can be no assurance that we will be able to compete effectively in the face of such increasing competition. Heightened competition may make it difficult for us to expand our loan portfolio and deposit base and to maintain or improve our margins, which could have a material adverse effect on our business, financial condition and results of operations. See “— *The adoption of new technologies and intensifying competition from fintech companies and online-only banks may adversely affect our business, financial condition and results of operations.*”

***The adoption of new technologies and intensifying competition from fintech companies and online-only banks may adversely affect our business, financial condition and results of operations.***

The banking and financial services industries are undergoing rapid transformation driven by technological advancements and evolving customer preferences. Financial institutions are increasingly adopting new technologies such as artificial intelligence and data analytics to offer innovative services, enhance customer engagement and differentiate themselves from competitors. The proliferation of mobile-based transactions and the growing demand for digital banking, settlement and payment solutions have significantly reshaped the competitive landscape.

Large commercial banks, digital banks, credit card companies, fintech companies and other financial service providers have expanded their mobile-based offerings in response to these trends, resulting in overlapping and competing products and services. This convergence has blurred traditional boundaries between financial institutions in different sectors. For example, K Bank, Korea’s first online-only bank, commenced operations in April 2017, followed by Kakao Bank in July 2017, which was listed in August 2021. Toss Bank, in which we held an 8.95% equity interest as of 30 June 2025, commenced operations in October 2021. Online-only banks may have competitive advantages over traditional banks by passing savings in labour and overhead costs to customers through higher interest rates on deposit accounts, lower lending rates and reduced service fees.

The shift towards digital platforms has compelled commercial banks to continuously upgrade their service platforms to attract and retain online users, whose growth has outpaced that of customers who primarily conduct banking in-person at physical branches. Additionally, technology companies with large-scale user networks such as Kakao Corp., Naver Corporation and Samsung Electronics Co., Ltd. have made significant inroads into the financial services sector by providing virtual payment services through fintech platforms. As a result, competition for online customers has intensified not only among commercial banks but also from non-bank mobile payment service providers.

Furthermore, companies outside the traditional banking and financial services industries such as Naver Financial, Kakao Pay and Toss operate mobile payment and money transfer platforms that compete directly with our service offerings. These companies are not required to obtain banking licences to provide certain financial services, which enables them to offer flexible and innovative products that may encroach on our market share.

On the regulatory side, the Government has introduced various policy initiatives to promote fintech as a future growth industry. Pursuant to the Special Act on Support for Financial Innovation of Korea (the “**Special Act**”), effective since April 2019, the Government established a regulatory “sandbox” framework that allows fintech companies to test new financial services not covered by existing regulations in a controlled environment, provides expedited regulatory approvals to promising fintech companies and facilitates collaboration between fintech companies and traditional financial institutions. In December 2019, we participated in the formal launch of Korea’s open banking services, which enable customers to access a wide range of banking services through a single mobile application and allow fintech companies access to banks’ payment systems.

In July 2020, the Government announced the Comprehensive Digital Finance Innovation Plan, which included measures permitting certain fintech companies to apply to become comprehensive payment settlement business

entities capable of opening non-interest-bearing deposit and payment accounts without requiring a banking licence. In May 2021, the FSC launched the “D-Testbed” digital sandbox to support early-stage fintech start-ups in verifying the feasibility of innovative financial products through simulated tests using real financial data. The D-Testbed was officially expanded in August 2022 to provide data-based fintech companies with a broader set of real financial and non-financial data, opportunities to collaborate with financial institutions, legal consulting services and evaluation reports.

In June 2023, the FSC announced its plan to select 30 fintech start-ups and early-stage companies over a three-year period (the “**K-Fintech 30**”) and provide them with support measures including preferential financing terms, increased credit limits, favourable interest rates and enhanced access to financial institution services. As of the date of this Offering Circular, the FSC has selected the first 20 companies under the K-Fintech 30 initiative and is expected to select the remaining 10 companies later in 2025.

In addition, amendments to the Credit Information Use and Protection Act in August 2020 established the framework for “MyData” services, which allow consumers to consolidate and manage their personal credit information through authorised service providers. As of February 2024, the FSC had granted MyData licences to 69 companies, including 25 fintech or IT firms. We currently provide MyData-based asset management services through our “Hana HAP” application. The increasing adoption of MyData services is expected to intensify competition, particularly in asset management services.

The ongoing convergence of financial services and technology is expected to accelerate, which may further erode traditional boundaries between banks, digital banks and fintech companies. While the Government’s policies remain subject to change, these initiatives could significantly alter the competitive dynamics of the industry. There can be no assurance that we will be able to effectively compete against new market participants or adapt to the rapid pace of technological innovation. Failure to respond to these competitive pressures could adversely affect our business, financial condition and results of operations.

***Changes in interest rates could hurt our net interest margin due to a mismatch in our assets and liabilities structures and other factors, which could have a material adverse effect on our asset quality and profitability.***

The Bank of Korea has historically utilised monetary policy tools, including adjustments to the base interest rate, to support economic growth or control inflationary pressures. In response to the economic uncertainty and financial market volatility caused by the COVID-19 pandemic, the Bank of Korea reduced the base interest rate in March 2020 by 50 basis points to 0.75% and further to 0.50% in May 2020. As the impact of the pandemic began to recede and the Korean economy showed signs of recovery in the second half of 2021, the Bank of Korea gradually raised the base interest rate, returning it to the pre-pandemic level of 1.25% by January 2022. Thereafter, in response to rising inflationary pressures and increasing household debt levels, the Bank of Korea continued its rate hikes throughout 2022 and early 2023, raising the base interest rate to 3.50% by January 2023. The base interest rate remained at 3.50% until October 2024. As inflation in Korea showed signs of stabilising and concerns over slowing economic growth intensified, the Bank of Korea began an easing cycle, lowering the base interest rate to 3.25% in October 2024, 3.00% in November 2024, 2.75% in February 2025 and 2.50% in May 2025.

Interest rate movements, in terms of magnitude and timing, have a significant impact on our net interest margin and profitability, particularly with respect to our financial products that are sensitive to such movements. For example, if the interest rates applicable to our loans (which are recorded as assets) increase at a slower pace or by a thinner margin than the interest rates applicable to our deposits (which are recorded as liabilities), our net interest margin will shrink and our profitability will be negatively affected. In addition, the relative size and composition of our variable rate loans and deposits (as compared to our fixed rate loans and deposits) may also impact our net interest margin. Furthermore, the difference in the average repricing frequency of our interest-earning assets (primarily loans) compared to our interest-bearing liabilities (primarily deposits) may also impact our net interest margin. For example, since our deposits tend to have longer terms, on average, than those of our loans, our deposits are on average less sensitive to movements in the base interest rates on which our deposits and loans tend to be pegged, and therefore, a decrease in the base interest rates tends to decrease our net interest margin while an increase in the base interest rates tends to have the opposite effect. While we continually manage our assets and liabilities to minimise our exposure to interest rate volatility, such efforts may not mitigate the impact of interest rate volatility in a timely or effective manner, and our net interest margin, and in turn our business, financial condition and results of operations, could suffer significantly.

We cannot assure when and to what extent the Government will in the future adjust the base interest rate, to which the market interest rate correlates. A decision to adjust the base interest rate is subject to many policy

considerations as well as market factors, including the general economic cycle, inflationary levels, interest rates in other economies and foreign currency exchange rates, among others. In general, a decrease in interest rates adversely affects our interest income due to the different maturity structure for our assets and liabilities as discussed above. In contrast, if there were to be a significant or sustained increase in interest rates, all else being equal, such movement would lead to a decline in the value of traded debt securities and could also raise our funding costs, while reducing loan demand, especially among retail customers. Rising interest rates may therefore require us to re-balance our assets and liabilities in order to minimise the risk of potential mismatches in our asset liability management and to maintain our profitability. In addition, rising interest rates may adversely affect the Korean economy and the financial condition of our corporate and retail borrowers, which in turn may lead to deterioration of asset quality for our credit portfolio. Since most of our retail and corporate loans bear interest at rates that adjust periodically based on prevailing market rates, a sustained increase in interest rates will increase the funding costs of our borrowers and may adversely affect their ability to make payments on their outstanding loans.

***A decline in the value of the collateral securing our loans or our inability to fully realise the collateral value may adversely affect us.***

A substantial portion of our home and mortgage loans are secured by borrowers' homes, other real estate or other securities and guarantees (which are principally provided by the Government and other financial institutions), and a large portion of our corporate loans are also secured, including by real estate. The secured portion of our loans amounted to ₩254.2 trillion, or 76.2%, of our total loans as of 30 June 2025, on a separate basis. Although our general policy for home and mortgage loans is to lend up to 70% (or lower in the case of houses priced over a certain amount in accordance with Government regulations and located in areas designated by the Government as a regulated area) of the appraised value of the collateral and to periodically re-appraise the value of the collateral, the recent downturn in the real estate market in Korea has resulted in declines in the value of the collateral securing our home and mortgage loans. If collateral values continue to decline in the future, they may not be sufficient to cover uncollectible amounts in respect of our secured loans. Any further declines in the value of the real estate or other collateral securing our loans, or our inability to obtain additional collateral in the event of such declines, may result in the deterioration of our asset quality and require us to take additional loan loss provisions.

In Korea, foreclosure on collateral generally requires a written petition to a Korean court. Foreclosure procedures in Korea typically take ten to fourteen months from initiation to collection depending on the nature of the collateral, and foreclosure applications may be subject to delays and administrative requirements, which may result in a decrease in the recovery value of such collateral. We cannot assure that we will be able to realise the full value of the collateral as there can be, among other factors, delays in foreclosure proceedings, defects in the perfection of the collateral and general declines in the collateral value. Our failure to recover the expected value of the collateral could expose us to significant losses.

***Our exposure to real estate financing is subject to risks related to payment guarantees and stricter regulatory supervision.***

We, alone or together with other financial institutions, provide financing to real estate development projects, which are concentrated in the construction of residential and, to a lesser extent, commercial complexes. Developers in Korea commonly use project financing to acquire land and to cover related project development costs. It is market practice for general contractors to guarantee loans raised by special purpose financing vehicles established by the developers in order to procure the construction orders, as most developers tend to be small and highly leveraged. While general contractors tend to be large and well-established construction companies, there can be no guarantee that even such companies will have sufficient liquidity to back up their payment guarantees if the real estate development projects do not generate sufficient cash flow from pre-sales of the residential or commercial units. If defaults arise under our loans to real estate development projects and payment guarantees are not paid in sufficient amounts to cover the amount of our financings, our business, financial condition and results of operations may be adversely affected.

Additionally, the real estate financing is subject to strict regulatory supervision. In May 2024, the FSS strengthened the standards for evaluating the feasibility of project financing projects, which led to an increase in our non-performing loans and related provisions as existing projects are re-evaluated and reclassified.

***Any deterioration in the asset quality of exposures underlying our guarantees and acceptances will likely have a material adverse effect on our business, financial condition and results of operations.***

In the normal course of our banking activities, we make various commitments and incur certain contingent liabilities in the form of guarantees and acceptances, which are recorded as off-balance sheet items in the notes to our financial statements. As of 30 June 2025, we had aggregate guarantees and acceptances of ₩19.1 trillion, on a separate basis, for which we provided allowances for losses of ₩38.9 billion. No assurance can be given that such allowances will be sufficient to cover any actual losses resulting in respect of these instruments.

***We may incur significant losses from our investments and, to a lesser extent, trading activities due to market fluctuations.***

We enter into and maintain large investment positions in the fixed income markets, primarily through our treasury and investment business. We also maintain smaller trading positions, including securities and derivative financial instruments, as part of our banking operations. Maintaining these positions entails making assessments about financial market conditions and trends. The revenues and profits that we derive from many of these positions and related transactions are dependent on market prices, which are beyond our control. When we own assets such as debt securities, a decline in market prices, as a result of fluctuating market interest rates, can expose us to losses. In 2022, for instance, as the global financial market entered into recession, the value of our debt securities declined as a result of the rising interest rates compared to 2021. If market prices move in a way that we have not anticipated, we may experience losses. In addition, when markets are volatile and subject to rapid changes in the price directions, the actual market prices may be contrary to our assessments and lead to lower-than-anticipated revenues or profits, or even result in losses, with respect to the related transactions and positions.

***We may incur losses from our commission- and fee-based business.***

Downturns in stock markets are likely to lead to a decline in the volume of transactions that we execute for our customers and, therefore, to a decline in our non-interest revenues. In addition, because the fees that we charge for managing our clients' portfolios are in many cases based on the size of the assets under management, a market downturn which has the effect of reducing the value of our clients' portfolios or increasing the amount of withdrawals may reduce the revenues that we receive from our trust account management. Even in the absence of a market downturn, below-market performance by our trust account services may result in increased withdrawals and reduced inflows, which may reduce the revenue that we receive from these businesses. In addition, protracted market movements resulting in declines of asset prices can reduce liquidity for assets held by us and lead to material losses if we cannot close out or otherwise dispose of deteriorating positions in a timely way or at commercially reasonable prices.

***Our business may be adversely affected by legal claims and regulatory actions against us.***

We and our employees are subject to the risk of legal claims and regulatory actions, which may expose us to monetary damages and legal costs, injunctive relief, criminal and civil penalties, sanctions against our management and employees and regulatory restrictions on our operations, as well as reputational harm. See “KEB Hana Bank — Legal and Regulatory Proceedings.”

We are unable to predict the outcome of the legal claims and regulatory actions in which we and our employees are involved, and the scope of the claims or actions or the total amount in dispute in such matters may increase. Furthermore, adverse final determinations, decisions or resolutions in such matters could encourage other parties to bring related claims and actions against us. Accordingly, the outcome of current and future legal claims and regulatory actions, particularly those for which it is difficult to assess the maximum potential exposure or the ultimate adverse impact with any degree of certainty, may materially and adversely impact our business, reputation, financial condition and results of operations.

***We may not be able to successfully execute our overseas expansion strategy.***

As part of our business strategy, we have been seeking opportunities to expand our operations in markets outside Korea, including through the opening of additional overseas branches and offices as well as strategic acquisitions and investments, particularly in China and Southeast Asia, and entering into MOUs with leading banks in Eastern Europe, India and the Middle East. In 2019, we acquired a 15% stake in the Bank of Investment and Development of Vietnam (“BIDV”), one of the largest banks controlled by the State Bank of Vietnam, for over

₩1 trillion. In April 2022, we established a branch office in Taipei, Taiwan as the first and only Korean bank to establish presence in Taiwan. More recently, we established a subsidiary in Monterrey, Mexico in September 2024 and opened a representative office in Budapest, Hungary in March 2024. In August 2025, we opened a branch office in Los Angeles, California through our U.S. subsidiary, Hana Bank USA, representing our first branch expansion in North America in 17 years. We have also entered into MOUs with several leading banks in Eastern Europe, India and Saudi Arabia as part of our strategic initiatives to explore further market expansion in those regions.

While we will continue to explore opportunities to expand our global presence, the expansion of our operations abroad may be difficult due to the presence of established competitors in the relevant local markets. In addition, overseas expansion and the management of international operations may require significant financial expenditures as well as management resources and will subject us to the challenges of operating in an unfamiliar business environment with different regulatory, legal and taxation systems and political, economic and social risks. Accordingly, there is no guarantee that we will be successful in executing our overseas expansion strategy. The failure of our overseas expansion strategy could have an adverse impact on our business, financial condition and results of operations.

***Reductions in our credit ratings could, among other things, increase the cost of borrowing funds and may have an adverse impact on our ability to raise new funds or refinance maturing debt on commercially acceptable terms.***

Credit ratings are an indicator of our financial and liquidity profile. Among other factors, our credit ratings are based on our financial strength, the credit quality of and concentrations in our loan portfolio, the level and volatility of our earnings, our capital adequacy, the quality of our management, the liquidity of our balance sheet, the availability of a significant base of core and retail deposits and our ability to access a broad range of funding sources. Any reduction in our credit ratings could adversely affect our liquidity and competitive position, increase our borrowing costs and limit our access to the capital markets and funding sources on commercially acceptable terms. Such events could adversely affect our business, financial condition and results of operations. A reduction in our ratings could also adversely affect the ratings of the Notes.

***Our risk management policies and procedures may not be fully effective at all times.***

In the course of our operations, we must manage a number of risks, such as credit risks, market risks and operational risks. We seek to monitor and manage our risk exposure through a comprehensive risk management platform, encompassing centralised risk management organisation and credit evaluation systems, reporting and monitoring systems, early warning systems and other risk management infrastructure, using a variety of risk management strategies and techniques. Supplementally, pursuant to certain amendments made to the Act on the Corporate Governance of Financial Companies aimed at strengthening the internal control systems of financial companies in Korea, which became effective in July 2024, we established an internal control committee under our board of directors on 24 December 2024. This new committee is responsible for establishing and amending our strategies and standards relating to internal control and overseeing their proper implementation, among others. See “Risk Management.”

Although we devote significant resources to developing and improving our risk management policies and procedures and expect to continue to do so in the future, our risk management techniques may not be fully effective at all times in mitigating risk exposures in all market environments or against all types of risk, including risks that are unidentified or unanticipated. Management of credit, market and operational risks requires, among other things, policies and procedures to properly record and verify a large number of transactions and events, and we cannot assure that these policies and procedures will prove to be fully effective at all times against all the risks that we face.

***We may experience disruptions, delays and other difficulties relating to our information technology systems.***

We rely on our IT systems for our daily operations, including billing, effecting online and offline financial transactions and recordkeeping. We also upgrade from time to time our group-wide customer data sharing and other customer relations management systems. We may experience disruptions, delays or other difficulties relating to our IT systems, and may not integrate or upgrade our systems as currently planned. Any of these developments may have an adverse effect on our business and adversely impact our customers’ confidence in us.

***We are subject to cybersecurity risk.***

We are subject to a risk of cyber-attacks, the nature of which is continually evolving. Cybersecurity risks include unauthorised access, through system-wide “hacking” or other means, to privileged and sensitive customer information, including passwords and account information and illegal use thereof. Cybersecurity risk is generally on the rise as a growing number of our customers increasingly rely on Internet- and mobile phone-based banking services for various types of financial transactions. While we vigilantly protect customer data through encryption and other security programmes and have made substantial investments to build and upgrade our systems to address the growing threats from cyber-attacks, there is no assurance that such data will not be subject to future security breaches as a result of illegal activities by our employees, outside consultants or hackers, or otherwise.

We have not experienced any material security breaches in the past. However, major financial institutions in Korea have fallen victim to cybersecurity attacks in the past, and given the unpredictable and continually evolving nature of cybersecurity threats due to advances in technology or other reasons, there is no assurance that, notwithstanding our best efforts at maintaining the best-in-class cybersecurity systems, we will not be vulnerable to major cybersecurity attacks in the future.

The public is developing heightened awareness about the importance of keeping their personal data private and the financial regulators are placing greater emphasis on data protection by financial service providers. As such, in light of the various incidents of security breaches involving financial institutions, the Government has implemented heightened consumer protection measures. For example, under the Personal Information Protection Act, financial institutions, as personal information managers, may not collect, store, maintain, utilise or provide resident registration numbers of their customers, except in any of the following cases: (i) where other laws or regulations specifically require or permit the management of resident registration numbers; (ii) where it is deemed manifestly necessary for the protection, from imminent danger, of life, bodily and property interests of a data subject or a third party; and (iii) where it is inevitable to process resident registration numbers in line with the above cases prescribed by Notification of the Protection Commission. Further, under the Use and Protection of Credit Information Act, a financial institution has a higher duty to protect all information that it collects from its customers and must ensure that the collection and processing of credit information comply with the provisions of the Use and Protection of Credit Information Act and the Personal Information Protection Act. When providing credit information to a third party, financial institutions are required to strictly follow the procedures set forth in the Credit Information Use and Protection Act, and in case of violation, an administrative fine may be imposed on the financial institution. In addition, under the Electronic Financial Transaction Act, a financial institution is primarily responsible for compensating its customers harmed by a cybersecurity breach affecting the financial institution, even if the breach is not directly attributable to the financial institution.

If a cyber or other security breach were to happen, it may result in litigation by affected customers or other third parties (including class actions), compensation for any losses suffered by victims of cybersecurity attacks, reputational damage, loss of customers, heightened regulatory security and related sanctions, more stringent compliance with the present and future regulatory restrictions, and other costs related to damage control, reparation and reinforcement of information security systems, any of which may have a material adverse effect on our business, financial condition and results of operations.

***We may be required to raise additional capital if our capital adequacy ratio deteriorates or the applicable capital requirements change in the future, but we may not be able to do so on favourable terms or at all.***

Pursuant to the capital adequacy requirements of the FSC, as of the date of this Offering Circular, we are required to maintain a minimum common equity Tier I capital adequacy ratio of 9.0%, a minimum Tier I capital adequacy ratio of 10.5% and a combined Tier I and Tier II capital adequacy ratio of 12.5%, each on a consolidated basis (including applicable additional capital buffers and requirements as described below). Our Tier I capital adequacy ratio and our combined Tier I and Tier II capital adequacy ratio were 16.68% and 17.83%, respectively, as of 30 June 2025, each of which exceeded the minimum levels required by the FSC. See “*Capitalisation — Capital Adequacy*.” However, our capital base and capital adequacy ratio may deteriorate in the future if our business, financial condition or results of operations deteriorates for any reason, including as a result of a deterioration in the asset quality of our loans to households, SMEs and/or large conglomerates, or if we are not able to deploy our funding into suitably low-risk assets.

The current capital adequacy requirements of the FSC are derived from a new set of bank capital measures, referred to as Basel III (“**Basel III**”), which the Basel Committee on Banking Supervision initially introduced in 2009 and began phasing in starting from 2013. Commencing in July 2013, the FSC promulgated a series of

amended regulations implementing Basel III, pursuant to which Korean banks and bank holding companies are currently required to maintain a minimum ratio of Tier I common equity capital (which principally includes equity capital, capital surplus and retained earnings) to risk-weighted assets of 4.5% and Tier I capital to risk-weighted assets of 6.0%. Such requirements are in addition to the pre-existing requirement for a total minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets of 8.0%. The amended regulations also require an additional capital conservation buffer of 2.5%, as well as a potential counter-cyclical capital buffer of up to 2.5%, which is determined on a quarterly basis by the FSC. While counter-cyclical capital buffer was initially set at 0%, it was raised to 1% effective from May 2024. Furthermore, beginning in 2016, the FSC has annually designated “Domestic Systemically Important Banks”, which are required to maintain higher capital buffers. We have been designated as one of the “Domestic Systemically Important Banks” by the FSC since 2016 and have been subject to an additional capital requirement of 1.0%. In addition, the FSC indicated that it may introduce a stress buffer capital requirement of up to 2.5% later in 2025. The implementation of Basel III in Korea has had, and may continue to have, a significant effect on the capital requirements of Korean financial institutions, including us.

We may be required to obtain additional capital in the future in order to remain in compliance with more stringent capital adequacy and other regulatory requirements. However, we may not be able to obtain additional capital on favourable terms, or at all. Our ability to obtain additional capital at any time may be constrained to the extent that banks or other financial institutions in Korea or from other Asian countries are seeking to raise capital at the same time. To the extent that we fail to comply with applicable capital adequacy ratios or other regulatory requirements in the future, Korean regulatory authorities may impose penalties on us ranging from a warning to suspension or revocation of our banking licence.

***We are a heavily regulated entity and operate in a legal and regulatory environment that is subject to change, and violations could result in penalties and other regulatory actions.***

Under the Financial Consumer Protection Act, banks as financial instrument distributors will be subject to heightened investor and consumer protection measures, including stricter distribution guidelines, improved financial dispute resolution system, increased liability for damages borne by direct financial instrument distributors and newly imposed penalty surcharges starting from March 2021. We may also become subject to other restrictions on our operations as a result of future changes in laws and regulations, including more stringent liquidity requirements under Basel III, which are being adopted in phases in Korea in consideration of, among other things, the pace and scope of international adoption of such requirements. Specifically, Basel III includes a minimum liquidity standard, known as the liquidity coverage ratio (“LCR”), which is designed to ensure that banks have an adequate stock of unencumbered high-quality liquid assets (“HQLA”) that can be easily and speedily converted into cash in the private marketplace to survive a significant stress scenario lasting 30 calendar days. The LCR is computed as (a) the value of a banking organisation’s HQLA, divided by (b) its total expected net cash outflows over the next 30 calendar days under stress scenarios. In addition, we are required to maintain a minimum foreign currency liquidity coverage ratio (“FLCR”). The FLCR is computed as (a) the value of a banking organisation’s HQLA, divided by (b) its total expected net cash outflows over the next 30 calendar days under stress scenarios, each in terms of its foreign currency assets and liabilities.

The FSC requires us and other Korean commercial banks to maintain LCR of not less than 100% and FLCR of not less than 80%. The minimum LCR and FLCR were temporarily lowered between 2020 and 2024 due to the volatility and uncertainty facing the financial markets as a result of the COVID-19 pandemic, but as of the date of this Offering Circular, the applicable LCR and FLCR have been restored to 100% and 80%, respectively. Any of these regulatory developments may have a material adverse effect on our ability to expand operations or adequately manage our risks and liabilities.

In addition, violations of law and regulations could expose us to significant liabilities and sanctions. See “*KEB Hana Bank — Legal and Regulatory Proceedings*.” The FSC conducts periodic audits on banks and, from time to time, we have received institutional warnings from the FSC. If the FSC determines as part of such audit or otherwise that our financial condition is unsound or that we have violated applicable law or regulations, including FSC orders, or if we fail to meet applicable regulatory standards, such as minimum capital adequacy and liquidity ratios, as the case may be, set forth under Korean law, the FSC may order, among other things, capital increases or reductions, suspension of officers from performing their duties and appointment of custodians, stock cancellations, consolidations, transfers of business, sales of assets, closures of branch offices, mergers with other financial institutions and/or suspensions of a part or all of our business operations. If any of

such measures is imposed on us as a result of unsound financial condition or failure to comply with minimum capital adequacy requirements or for other reasons, it will have a material adverse effect on our business, financial condition and results of operations.

For further details on the principal laws and regulations applicable to us, see “*Regulation and Supervision*”.

***We may be assessed additional taxes in respect of prior periods as a result of tax audits by Korean tax authorities.***

From time to time, we are subject to tax audits by Korean tax authorities. The most recent tax audit by the Seoul Regional Tax Office was completed in March 2023. Although we believe that we have complied with our obligations under applicable Korean tax laws and regulations in all material respects, there can be no assurance that we will not be involved in disputes with, or will not be assessed additional income or other taxes with respect to prior periods or in connection with the Merger by, Korean tax authorities as a result of tax audits of us. Any such additional taxes assessed against us, if significant, may have an adverse effect on our business, financial condition and results of operations.

***We had engaged in limited activities with sanctions targets in the Russian Federation (“Russia”) and operated as a settlement bank for Euro-denominated transactions with Iran, any of which may subject us to legal and reputational risks.***

The U.S. Department of the Treasury’s Office of Foreign Assets Control (“**OFAC**”) administers and enforces certain laws and regulations (“**OFAC Sanctions**”) that impose restrictions upon U.S. persons with respect to dealings with or related to certain countries, governments, entities and individuals that are the subject of OFAC Sanctions, including Russia and Iran, and maintains a list of specially designated nationals (the “**SDN List**”), whose assets are blocked and with whom U.S. persons are generally prohibited from dealing. OFAC also publishes a Sectoral Sanctions Identifications (“**SSI**”) list to identify certain persons operating in sectors of the Russian economy identified by the Secretary of the Treasury pursuant to Executive Order 13662 and the four directives issued thereunder. Depending on the directive implicated, U.S. persons are prohibited from engaging in certain activities with those entities designated on the SSI list. Some OFAC Sanctions require a U.S. nexus in order to apply (“**Primary Sanctions**”), while other OFAC Sanctions on certain dealings with or related to Iran and Russia can apply even in the absence of a U.S. nexus (“**Secondary Sanctions**”). Non-U.S. persons are subject to Secondary Sanctions and can also be held liable for violations of OFAC Sanctions on various legal grounds, such as causing violations by U.S. persons by engaging in transactions completed in part in the United States or engaging in certain transactions with Iran and Iranian entities. The European Union (“**EU**”) also enforces certain laws and regulations that impose restrictions upon nationals and entities of, and business conducted in, member states with respect to activities or transactions with certain countries, governments, entities and individuals that are the subject of such laws and regulations. The United Nations Security Council and other governmental entities also impose similar sanctions.

In the past, we had engaged in certain dealings with VTB Bank by maintaining a Russian ruble account, and our Russian subsidiary (KEB HNB Rus LLC) also maintained a Russian ruble account with Sberbank. Both Sberbank and VTB Bank are currently the targets of OFAC sanctions including Directive 1 (as amended) issued under Executive Order 13662, and as such they are included on OFAC’s SSI list. Under Directive 1, certain activities by U.S. persons or conducted within the United States relating to debt or equity of certain SSI targets are prohibited. Sberbank is also subject to Directive 2 under E.O. 14024 (“**CAPTA sanction**”), which prohibits U.S. financial institutions from opening and maintaining correspondent and payable through-accounts on behalf of Sberbank. Sberbank was further added by OFAC to the SDN List on 6 April 2022 and VTB Bank was added by OFAC to the SDN List on 24 February 2022. Sberbank and VTB Bank are also targets of European Union restrictive measures under Council Regulation (EU) 2014/833 (“**Regulation 2014/833**”). Additionally, the EU has issued Council Regulation (EU) 2022/345 (“**Regulation 2022/345**”) prohibiting the provision of specialised financial messaging services, which are used to exchange financial data, to VTB Bank and Council Regulation (EU) 2022/879 (“**Regulation 2022/879**”) removing Sberbank’s access to the SWIFT payment network. Both Sberbank and VTB Bank are also subject to UK economic sanctions.

While SSI sanctions on Sberbank and VTB Bank and CAPTA sanction on Sberbank do not apply to non-U.S. persons and entities and the designations of Sberbank and VTB Bank as SDNs do not prohibit a non-U.S. person from certain dealings with such entities, we have completely stopped all dealings and transactions with Sberbank and VTB Bank since 24 February 2022 and moved all balances in the VTB Bank account to our Russian subsidiary’s (KEB HNB Rus LLC) account. Since 11 March 2022, our account with VTB Bank has been effectively frozen and, for all practical purposes, has reflected a nil available balance. The account

currently maintains only a nominal sum to cover incidental fees, which has not been transferred or otherwise made available for use, and we have no other nexus or business with any of the other sanctioned targets in Russia or around the world. Despite these efforts, non-U.S. persons may be exposed to sanctions risk in relation to activities with persons subject to blocking sanctions and there is no guarantee that such activities will not be found to violate applicable sanctions laws. Moreover, future changes in law concerning Sberbank or VTB Bank specifically or Russia generally could also adversely affect us. Accordingly, our historical activities relating to Russia may subject us to legal and reputational risks.

With regard to our Iran dealings, in August 2016, the Government authorised us to act as a settlement bank for Euro-denominated transactions between South Korean and Iranian businesses. Pursuant to this authorisation, we processed Euro-denominated settlement transactions involving Iranian companies for a limited period of time. In April 2018, however, we suspended our settlement system for Euro-denominated transactions with Iranian businesses, and as of the date of this Offering Circular, we have no plans to resume operating this system in the future. We are committed to engaging only in lawful activities and complying with all relevant OFAC and EU sanctions but cannot guarantee that actions taken by our employees will not violate such sanctions should we re-engage in settling transactions involving Iranian businesses.

On 8 May 2018, the first Trump administration announced its decision to terminate the participation of the United States in the Joint Comprehensive Plan of Action (the “JCPOA”), pursuant to which certain relief of OFAC Sanctions relating to Iran had been provided. Following two wind-down periods, one ending on 6 August 2018 and the other ending on 4 November 2018, all Iran-related Secondary Sanctions that had been waived pursuant to the JCPOA were re-imposed and on 27 May 2020, then-U.S. Secretary of State Michael Pompeo further announced that the United States would terminate all remaining sanctions waivers allowing for nonproliferation cooperation projects in Iran. On 18 February 2021, the Biden administration formally rescinded the first Trump administration’s request that all sanctions lifted in accordance with the JCPOA be re-imposed. On 4 February 2025, President Trump signed a National Security Presidential Memorandum (NSPM-2) re-establishing a “maximum pressure” campaign against Iran, directing the U.S. Treasury to re-impose sanctions aimed at curbing Iran’s oil exports and other revenue streams. Since then, the U.S. Treasury has re-imposed multiple sanctions on Iran, primarily targeting its oil network. It remains unclear how far such sanctions may expand, whether further sanctions will be introduced and how it might affect non-U.S. persons. As a result, non-U.S. persons may face risk of Secondary Sanctions for dealing with certain key sectors of the Iranian economy and/or for providing associated services related to the targeted activities. Thus, our activities related to Iran may subject us to OFAC Sanctions and to potential legal and reputational risks in the future.

***You may not be able to enforce a judgement of a foreign court against us.***

We are a corporation with limited liability organised under the laws of Korea. Substantially all of our directors and officers and other persons named in this Offering Circular reside in Korea, and all or a significant portion of the assets of our directors and officers and other persons named in this Offering Circular as well as substantially all of our assets are located in Korea. As a result, it may not be possible for investors to effect service of process within the United States or certain other jurisdictions, or to enforce against them or us in the United States or certain other jurisdictions judgements obtained in courts in such jurisdictions based on the civil liability provisions of such jurisdictions. There is doubt as to the enforceability in Korea, either in original actions or in actions for enforcement of judgements of courts in such jurisdictions, of civil liabilities predicated on the laws of such jurisdictions.

**Risks Relating to Korea**

***Adverse developments in Korea may have adverse effects on us.***

We are incorporated in Korea, where most of our assets are located and most of our income is generated. As a result, our performance and successful fulfilment of our operational strategies are necessarily dependent on the overall Korean economy. In 2020, the economic indicators, such as GDP, in Korea and globally deteriorated largely due to the adverse macroeconomic conditions induced by the COVID-19 pandemic. In 2021, such indicators generally improved as stimulus packages were implemented around the world, but inflation continued to rise throughout 2022 and 2023 due to rising energy and commodity costs, labour shortages and supply chain disruptions. In 2024, inflation in Korea began to stabilise, but the pace of economic growth slowed as external demand weakened, particularly due to global monetary tightening cycles and sluggish recovery in major export markets such as China and the United States. In response, the Bank of Korea commenced a series of interest rate cuts starting in the fourth quarter of 2024 to support domestic demand and mitigate downside risks to growth. These efforts have continued into 2025, with further policy easing measures implemented in light of persistent concerns over slowing economic activity, despite inflation trending towards target levels.

Adverse conditions and volatility in the worldwide financial markets, fluctuations in oil and commodity prices, supply chain disruptions and the general weakness of the global economy, mainly due to the COVID-19 pandemic, Russia-Ukraine war and ensuing sanctions against Russia, difficulties faced by several banks in the United States and Europe, the escalation of hostilities in the Middle East following the Israel-Hamas war and the Israel-Iran war, fluctuations in policy interest rates globally to combat rising inflationary pressures and, more recently, rising global trade tensions, particularly between the United States and its trading partners in light of tariffs to be imposed or increased under the second Trump administration, have contributed to the uncertainty of global economic prospects in general and have adversely affected, and may continue to adversely affect, the Korean economy. See “— *Risks Relating to Our Business — Uncertainties and instability in global market conditions could adversely affect our business, financial condition and results of operations, as well as the value of the Notes.*” The value of the Won relative to major foreign currencies in general and the U.S. dollar in particular has also fluctuated significantly. Furthermore, as a result of adverse global and Korean economic conditions, there has been volatility in the stock prices of Korean companies in recent years. Future declines in the Korea Composite Stock Price Index (“KOSPI”) and large amounts of sales of Korean securities by foreign investors and subsequent repatriation of the proceeds of such sales may adversely affect the value of the Won, the foreign currency reserves held by financial institutions in Korea, and the ability of Korean companies to raise capital. Any future deterioration of the Korean or global economy could adversely affect our business, financial condition and results of operations.

Political instability may further adversely affect the Korean economy and cause volatility in the prices of securities of Korean companies. Occasional political upheavals can cause social unrest and economic instability. Events such as declarations of martial law or impeachments have the potential to disrupt the nation’s political and economic landscape. These incidents, when they occur, can lead to widespread protests, market volatility and temporary setbacks in various sectors of the economy, potentially affecting businesses operating within the country.

Additional developments that could have an adverse impact on Korea’s economy include:

- continued volatility or deterioration in Korea’s credit and capital markets;
- declines in consumer confidence and a slowdown in consumer spending in the Korean or global economy;
- rising inflationary pressures leading to increases in the costs of goods and services and a decrease in purchasing power;
- adverse conditions in the economies of countries and regions that are important export markets for Korea, such as China, the United States, Europe and Japan, or in emerging market economies in Asia or elsewhere, including as a result of economic and trade tensions between the United States and China and increased uncertainties in the global financial markets and industry;
- adverse changes or volatility in foreign currency reserve levels, commodity prices (including oil prices), exchange rates (including fluctuation of the U.S. dollar, the Euro or Japanese Yen exchange rates or revaluation of the Chinese Renminbi), interest rates, inflation rates or stock markets;
- deterioration in economic or diplomatic relations between Korea and its trading partners or allies, including deterioration resulting from territorial or trade disputes or disagreements in foreign policy;
- imposition of tariffs, quotas, trade barriers and other trade protection measures by various countries;
- increased sovereign default risk in select countries and the resulting adverse effects on the global financial markets;
- a deterioration in the financial condition or performance of SMEs and other companies in Korea due to Government’s policies to increase minimum wages and limit working hours of employees;
- investigations of large Korean business groups and their senior management for possible misconduct;
- a continuing rise in the level of household debt and increasing delinquencies and credit defaults by retail and SME borrowers in Korea;
- a rise in unemployment or stagnation of real wages;
- shortages of imported raw materials, natural resources, rare earth minerals or component parts, including semiconductors, due to disruptions to the global supply chain;
- the economic impact of any pending or future free trade agreements or of any changes to existing free trade agreements;
- social and labour unrest;

- a continued decrease in the population and birthrates in Korea;
- substantial fluctuations in the market prices of Korean real estate and uncertainties arising from construction companies' exposures to project financing loans;
- the economic impact of any pending or future free trade agreements or changes in existing free trade agreements;
- a widening fiscal deficit from a decrease in tax revenue and a substantial increase in the Government's expenditures for fiscal stimulus measures, unemployment compensation and other economic and social programmes that, together, would lead to an increased Government budget deficit;
- financial problems or lack of progress in the restructuring of Korean business groups, other large troubled companies, their suppliers or the financial sector;
- loss of investor confidence arising from corporate accounting irregularities or corporate governance issues, including in respect of certain chaebols;
- increases in social expenditures to support an ageing population in Korea or decreases in economic productivity due to the declining population size in Korea;
- geopolitical uncertainty and the risk of further attacks by terrorist groups around the world;
- the occurrence of severe health epidemics in Korea or other parts of the world;
- natural or man-made disasters that have a significant adverse economic or other impact on Korea or its major trading partners;
- political uncertainty or increasing strife among or within political parties in Korea;
- laws, regulations or other government actions (financial, economic or otherwise) that fail to achieve desired policy objectives, produce adverse unintended consequences or otherwise constrain or distort sound economic activities;
- hostilities, political or social tensions involving Russia (including the Russia-Ukraine war and ensuing actions that the United States and other countries have taken or may take in the future) as well as the escalation of hostilities in the Middle East (including the Israel-Hamas war and the Israel-Iran war) and in other regions such as North Africa and the resulting adverse effects on the global supply of oil and other natural resources and the global financial markets;
- increased reliance on exports to service foreign currency debts, which could cause friction with Korea's trading partners;
- volatility of the won-dollar exchange rate as internal and external uncertainties continue to grow and preference for safe assets also grow;
- an increase in the level of tensions or an outbreak of hostilities in the Korean peninsula;
- changes in financial regulations in Korea; and
- any other developments that have a material adverse effect on the global or Korean economy, such as geopolitical tensions, an act of war, a terrorist act, a breakout of an epidemic or natural or man-made disasters.

***Escalations in tensions with North Korea could have an adverse effect on us and the market value of the Notes.***

Relations between Korea and North Korea have been tense throughout Korea's modern history. The level of tension between the two Koreas has fluctuated and may increase abruptly as a result of current and future events. In particular, there have been heightened security concerns in recent years stemming from North Korea's nuclear weapon, ballistic missile and satellite programmes as well as its hostile military actions against Korea. Some of the significant incidents in recent years include the following:

- North Korea renounced its obligations under the Nuclear Non-Proliferation Treaty in January 2003 and conducted six rounds of nuclear tests since October 2006, including claimed detonations of hydrogen bombs, which are more powerful than plutonium bombs, and warheads that can be mounted on ballistic missiles. Over the years, North Korea has continued to conduct a series of missile tests, including missiles launched from submarines and intercontinental ballistic missiles that it claims can reach the United States mainland. North Korea has increased the frequency of its missile tests in 2022, firing numerous ballistic

missiles, including intercontinental ballistic missiles, and in November 2023, successfully launched its first spy satellite. In response, the Government has repeatedly condemned the provocations and flagrant violations of relevant United Nations Security Council resolutions. In February 2016, the Government also closed the inter-Korea Gaeseong Industrial Complex in response to North Korea's fourth nuclear test in January 2016. Internationally, the United Nations Security Council has passed a series of resolutions condemning North Korea's actions and significantly expanding the scope of sanctions applicable to North Korea, in December 2017, in response to North Korea's intercontinental ballistic missile test in November 2017. Over the years, the United States and the European Union have also expanded their sanctions applicable to North Korea.

Since April 2018, North Korea has held a series of bilateral summit meetings with Korea and the United States to discuss peace and denuclearisation of the Korean peninsula. At the end of July 2021, the inter-Korean communication lines were restored for the first time since June 2020, when North Korea severed all inter-Korean governmental communication, but days later, North Korea stopped answering routine calls from Korea in apparent protest of the joint U.S.-Korea military exercises scheduled for August 2021. Although in October 2021, North Korea began answering military and liaison office communication lines again, there can be no assurance that the level of tensions affecting the Korean peninsula will not escalate in the future or that such escalation will not have a material adverse impact on the Korean economy and the Bank. Despite some mixed signs of improved relationship between North Korea and Korea as well as the United States in recent years, North Korea has not ceased its missile testing, heightening tensions, and the outlook of discussions with North Korea remains uncertain.

North Korea's economy also faces severe challenges, including severe inflation and food shortages, which may further aggravate social and political tensions within North Korea.

Although bilateral summit meetings were held between Korea and North Korea in April 2018, May 2018 and September 2018 and between the United States and North Korea in June 2018, February 2019 and June 2019, there can be no assurance that the level of tensions affecting the Korean peninsula will not escalate in the future. In addition, reunification of Korea and North Korea may suddenly occur in the future, which would entail significant economic commitment and expenditure by Korea that may outweigh any resulting economic benefits of reunification. Any further increase in tension or uncertainty relating to the military, political or economic stability in the Korean peninsula, including a breakdown of diplomatic negotiations over the North Korean nuclear programme, occurrence of military hostilities, heightened concerns about the stability of North Korea's political leadership or its actual collapse, a leadership crisis, a breakdown of high-level contacts or accelerated reunification could have a material adverse effect our business, financial condition and results of operations, as well as the credit rating of Korea, us or the Notes.

***We are generally subject to Korean accounting, regulatory, corporate governance and disclosure standards, which differ from those applicable to banks in other countries.***

Banks in Korea, including us, are subject to Korean accounting standards and disclosure requirements, which may differ in significant respects from those applicable to banks in certain other countries, including the United States. Our financial statements are prepared in accordance with K-IFRS, which may differ in certain respects from IFRS applied in other countries. In addition, we are subject to corporate governance standards applicable to Korean banks, which differ in many respects from standards applicable in other countries. There may also be less publicly available information about Korean banks, such as us, than is regularly made available by public or non-public companies in other countries. Such differences in accounting and corporate governance standards as well as less available public information could result in corporate governance practices or disclosures that are perceived as less than satisfactory by investors in certain countries.

### **Risks Relating to the Notes**

Capitalised terms used but not defined in this section shall have the meanings given to them in the “*Terms and Conditions of the Notes*”.

#### ***The Notes are unsecured obligations.***

Because the Notes are unsecured obligations, their repayment may be compromised if:

- we enter into bankruptcy, liquidation, reorganisation or other winding-up proceedings;

- there is a default in payment under our future secured indebtedness or other unsecured indebtedness; or
- there is an acceleration of any of our indebtedness.

If any of these events occurs, our assets may not be sufficient to pay amounts due on any of the Notes.

***The Notes may have limited liquidity.***

The Notes, when issued, will constitute a new issue of securities for which there will be no existing trading market. Although the Dealers may make a market for the Notes, they are not obligated to do so, and any market-making activity with respect to the Notes, if commenced, may be discontinued at any time without notice.

No assurances can be given that a market for the Notes will develop in the future. If such a market were to develop, the Notes could trade at prices that may be higher or lower than the offering price depending on many factors, including, among others:

- prevailing interest rates;
- our financial condition, performance and prospects;
- the rate of exchange between Won and the currency of the Notes;
- political and economic developments in Korea; and
- the market conditions for similar securities.

***The Notes are subject to transfer restrictions.***

The Notes will not be registered under the Securities Act or any state securities laws and may not be offered or sold within the United States, except to certain persons in offshore transactions in reliance on Regulation S, or, if available, pursuant to another exemption from, or in another transaction not subject to, the registration requirements of the Securities Act and, in each case, in accordance with applicable state securities laws. For a further discussion of the transfer restrictions applicable to the Notes, see “*Subscription and Sale and Transfer and Selling Restrictions*”.

***The Notes may be redeemed by us in certain circumstances.***

The Notes may be redeemable at our option, in whole but not in part, on any of the optional redemption dates specified in the applicable Pricing Supplement at their outstanding principal amount together (if applicable) with interest accrued to (but excluding) the date of redemption. Furthermore, the Notes may be redeemable at our option, in whole but not in part, at their outstanding principal amount together (if applicable) with interest accrued to (but excluding) the date of redemption, upon the occurrence of certain changes in applicable tax laws and regulations which (i) require us to pay additional amounts on payments of principal and interest in respect of the Notes due to withholding or deduction required by law or (ii) in the case of Notes that are Tier I Subordinated Notes, cause us to no longer be entitled to claim a deduction in respect of interest paid on the Tier I Subordinated Notes for purposes of Korean corporation tax. In addition, the Notes that are Subordinated Notes may be redeemed by us, in whole but not in part, at their outstanding principal amount together (if applicable) with interest accrued to (but excluding) the date of redemption, upon the occurrence of a regulatory event that would cause the Subordinated Notes to no longer qualify as our (in case of the Tier I Subordinated Notes) additional Tier I capital or (in case of the Tier II Subordinated Notes) Tier II capital (as the case may be). Such redemptions at our option are subject to necessary prior approval by the FSS or such other relevant regulatory authorities in Korea. See “*Terms and Conditions of the Notes — Redemption and Purchase*”.

Accordingly, holders of the Notes should not rely on being able to hold the Notes until their maturity date. The date on which we may elect to redeem the Notes may not align with the preference of holders of the Notes, and such election by us may be disadvantageous to holders of the Notes in light of market conditions or the individual circumstances of such holders. In addition, if the Notes are redeemed prior to their maturity date, there is no guarantee that the holders of the Notes will be able to reinvest the amounts received upon redemption at a rate that will provide the same return as the investment in the Notes.

***The Notes that are Subordinated Notes are subordinated and have only limited rights of acceleration.***

The relevant Pricing Supplement may specify that the Notes will be Subordinated Notes (as defined in Condition 3(c) of the Terms and Conditions of the Notes), which will be our subordinated obligations. Payments

on the Subordinated Notes will be subordinate in right of payment upon the occurrence of a Subordination Event (as defined in Condition 3(c) of the Terms and Conditions of the Notes) to the prior payment in full of all deposits and other liabilities of us, except those liabilities which rank equally with or junior to the Subordinated Notes. As a consequence of these subordination provisions, if any of such events should occur, the holders of the Subordinated Notes may recover proportionately less than the holders of our deposit liabilities or the holders of our other unsubordinated liabilities.

Only those limited events described herein regarding our bankruptcy or liquidation will permit a holder of Subordinated Notes to accelerate payment of such Subordinated Notes. In such event, the only action the holder may take in Korea against us is to make a claim in our liquidation or other applicable proceeding. Furthermore, if our indebtedness were to be accelerated, our assets may be insufficient to repay in full borrowings under all such debt instruments, including the Subordinated Notes.

In addition, subject to complying with applicable regulatory requirements in respect of our leverage and capital ratios, there is no restriction on the amount or type of other securities or indebtedness that we may issue or incur, as the case may be, that rank senior to, or *pari passu* with, the Subordinated Notes. The issue of any such other securities or the incurrence of any such other indebtedness may reduce the amount, if any, recoverable by holders of the Subordinated Notes on our liquidation or winding-up and may increase the likelihood of a non-payment or reduction of interest on the Subordinated Notes. The issue of any such other securities or the incurrence of any such other indebtedness might also have an adverse impact on the market price of the Subordinated Notes and the ability of holders to sell the Subordinated Notes.

***Holders of Notes that are Subordinated Notes will have no creditor objection rights in connection with our future merger with another entity.***

Under the Korean Commercial Code, a Korean company that has resolved to merge with another entity is required to provide notice of the impending merger to its creditors and, if any creditor raises an objection to the merger during the applicable creditor objection period, to either repay the relevant debt owed to such creditor or provide adequate collateral to secure such debt. In addition, similar creditor objection rights are also applicable in the case of a capital reduction, merger, split-off or merger-after-split-off of a Korean company under the Korean Commercial Code. However, pursuant to Condition 3(c) of the Terms and Conditions of the Notes, holders of Subordinated Notes will be deemed to have waived, and agreed not to exercise, any such creditor objection rights that may arise in connection with our merger, capital reduction, merger, split-off or merger after split-off. Accordingly, holders of Subordinated Notes will have no creditor objection rights in connection with our future merger, capital reduction, split-off or merger after split-off.

***The Notes that are Subordinated Notes may be fully written off upon the occurrence of certain trigger events, in which case holders of the Subordinated Notes will lose all of their investment.***

The Subordinated Notes will be subject to loss absorption provisions pursuant to which we will irrevocably effect a full write-off of the outstanding principal amount and accrued but unpaid interest on the Subordinated Notes (without the need for the consent of the holders) upon the occurrence of a trigger event tied to our performance and viability. A trigger event would occur upon (i) the designation of us as an “insolvent financial institution” pursuant to the Act on Structural Improvement of the Financial Industry or (ii) the designation of us as an “insolvent financial company” pursuant to the Depositor Protection Act. Such write-off will come into effect on the third business day in Korea from the date of occurrence of such trigger event.

An “**insolvent financial institution**” under Article 2 of the Act on Structural Improvement of the Financial Industry or an “**insolvent financial company**” under Article 2 of the Depositor Protection Act is defined as a financial institution that is:

- determined by the FSC or the Deposit Insurance Committee (the “**DIC**”) established within the Korea Deposit Insurance Corporation (the “**KDIC**”), based on an actual survey of such financial institution’s business operations as (i) having liabilities that exceed its assets (each as valued and calculated in accordance with standards established by the FSC), or (ii) facing apparent difficulty in its normal operations because its liabilities exceed its assets (each as valued and calculated in accordance with standards established by the FSC) as a result of the occurrence of a major financial scandal or the accrual of non-performing loans;
- subject to a suspension of payment of claims (including deposits) or repayment of money borrowed from other financial institutions; or

- determined by the FSC or the DIC to be unable to make payments of claims (including deposits) or repayments of money borrowed, without external support or additional borrowings (other than borrowings accruing from ordinary course financial transactions).

In the event that the Subordinated Notes are written off, such written-off amount will be irrevocably lost and holders of the Subordinated Notes will cease to have any claims for any principal amount and accrued but unpaid interest on the Subordinated Notes. See “*Terms and Conditions of the Notes — Loss Absorption Upon a Trigger Event in Respect of Subordinated Notes*”.

Potential investors should consider the risk that, due to the existence of such loss absorption features, a holder of Subordinated Notes may lose all of its investment in such Subordinated Notes in the event that a trigger event occurs.

The applicable Korean laws and regulations relating to the trigger event and loss absorption features of capital instruments like the Subordinated Notes are relatively new and have yet to be tested. There is considerable uncertainty as to the circumstances under which the relevant Korean regulatory authorities will decide to effect a trigger event with respect to a particular financial institution. The occurrence of a trigger event with respect to us is therefore inherently unpredictable and is subject to factors that are outside our control, which will make it difficult for investors to anticipate when, if at all, a write-off of the Subordinated Notes will take place. Accordingly, the trading behaviour with respect to the Subordinated Notes may not follow trading behaviour associated with other types of securities of us or other issuers. Any indication that we are trending towards a possible trigger event could have a material adverse effect on the market price of the Subordinated Notes. A potential investor should not invest in the Subordinated Notes unless it has knowledge and expertise to evaluate how the Subordinated Notes will perform under changing market conditions and the resulting effect on the likelihood of a write-down and on the market value of the Notes.

Under Article 38 of the Depositor Protection Act, the KDIC (upon a resolution by the DIC) may provide financial assistance to an insured financial institution (such as us) or a financial holding company holding the insured financial institution that becomes an “insolvent or similar financial institution” (including an “insolvency-threatened financial institution”) in the following circumstances: (i) there is a request to the KDIC for financial support in merging, receiving business transfer from, or receiving assignment of agreement from an insolvent or similar financial institution or from a financial holding company holding such institution or such financial assistance is deemed necessary for an orderly merger etc. of an insolvent or similar financial institution, (ii) the improvement of the financial structure of such institution is deemed necessary for the protection of depositors and the preservation of order in credit transactions, or (iii) there is a request from the FSC pursuant to Article 12(1) of the Act on Structural Improvement of the Financial Industry in consideration that the insolvent or similar financial institution can no longer continue its business due to deteriorated financial structure. An “**insolvency-threatened financial institution**” is defined under Article 2 of the Depositor Protection Act as an insured financial institution determined by the DIC as having a high possibility of becoming an insolvent financial institution due to its weak financial standing. The financial assistance to be provided can take the form of a loan or deposit of funds, a purchase of assets, a guarantee or assumption of obligations and an equity injection or contribution.

In addition, upon the issuance of a management improvement demand with respect to a financial institution (the “**Subject Financial Institution**”) pursuant to Article 11 of the Act on Structural Improvement of the Financial Industry and Article 35 of the Regulation on Supervision of Banking Business, the FSC may demand that the Subject Financial Institution merge with another financial institution, and the KDIC may provide financial assistance or arrangements to the financial institution acquiring the Subject Financial Institution pursuant to such demand.

Pursuant to Article 8 of the Act on Structural Improvement of the Financial Industry, even where the Subject Financial Institution has not become subject to such a demand for merger from the FSC, if the Subject Financial Institution voluntarily merges with another financial institution for the improvement of its financial structure, the Government may provide financial assistance to the merged financial institution through: (i) the KDIC, (ii) the purchase by the Government’s Public Capital Management Fund of certain government bonds held by the merged financial institution (such as bonds issued by the Government or local governments or bonds guaranteed by the Government), and (iii) a capital injection by the Government of state-owned assets into the merged financial institution.

In light of our size and scale and our relative importance to the Korean banking system, it is possible that, prior to the occurrence of a trigger event that leads to a write-off of the Subordinated Notes, we will be classified as an

insolvency-threatened financial institution and receive some form of financial assistance from the KDIC, or that the Government will decide to provide other forms of financial assistance or capital support to us. However, since the provision of any such financial assistance or capital support would be at the discretion of the KDIC or the Government, as applicable, there is no guarantee that we will receive any financial assistance or capital support prior to the occurrence of a trigger event or that any such financial assistance or capital support received by us will be sufficient to prevent the occurrence of a trigger event leading to a write-off of the Subordinated Notes.

Pursuant to the Conditions, we will issue a Trigger Event Notice not more than two Korean Business Days after the occurrence of a Trigger Event, confirming that a Trigger Event has occurred. Although we will notify the Principal Paying Agent and the holders of the Subordinated Notes not more than two Korean Business Days after the occurrence of a Trigger Event, there may be a delay between a Trigger Event and the time that the clearing systems and the holders of the Subordinated Notes are notified of the occurrence of the relevant Trigger Event. Such delay may exceed several days during which trading and settlement in the Subordinated Notes may continue. Any such delay will not change or delay the effect of a Trigger Event or our obligations under the Subordinated Notes or the rights of the Subordinated Noteholders. We will provide at least five Business Days advance notice to the clearing systems and the Principal Paying Agent of any mark down of the Notes.

The clearing systems are expected to suspend all clearance and settlement of transfers of the Subordinated Notes by the Subordinated Noteholders following receipt of a Trigger Event Notice, and any transfer of Subordinated Notes which are scheduled to settle after commencement of such suspension is expected to be rejected by clearing systems and will not be settled within the clearing systems.

It is possible that transfers that are initiated prior to any suspension following receipt by the clearing systems of a Trigger Event Notice and scheduled to settle on a date before the clearing systems commence such suspension will be settled through the clearing system even though such transfers were initiated after the Trigger Event. In such circumstances, transferees of the Subordinated Notes may be required to pay consideration through the clearing systems even though, upon the occurrence of a Trigger Event, no amounts under the Subordinated Notes will thereafter become due, and such transferees will have no rights whatsoever under the Conditions or the Subordinated Notes to take any action or enforce any rights whatsoever against us. The settlement of the Subordinated Notes following a Trigger Event will be subject to procedures of the clearing system for the time being in effect.

The Agency Agreement contains certain protections and disclaimers as applicable to the Agents in relation to Condition 8. Each holder of Subordinated Notes shall be deemed to have authorised, directed and requested the taking of any and all necessary action to give effect to any loss absorption feature and any Write-off following the occurrence of the Trigger Event.

***The Notes that are Tier I Subordinated Notes have no fixed maturity date and holders of the Tier I Subordinated Notes have no right to call for redemption of the Tier I Subordinated Notes.***

The Tier I Subordinated Notes are undated perpetual securities and accordingly have no fixed final maturity date. Subject to the subordination provisions of Condition 3(c) of the Terms and Conditions of the Notes, the principal amount of the Tier I Subordinated Notes will become due and payable by us on the date on which voluntary or involuntary winding-up proceedings are instituted in respect of us in accordance with, as the case may be, (i) a resolution passed at a meeting of our shareholders, (ii) any provision of our articles of incorporation or (iii) any applicable law or any decision of any judicial or administrative authority. In addition, the holders of Tier I Subordinated Notes have no right to call for the redemption of the Tier I Subordinated Notes. Although we may redeem the Tier I Subordinated Notes at our option on any of the optional redemption dates specified in the applicable Pricing Supplement or at any time for certain tax or regulatory reasons, there are limitations on redemption of the Tier I Subordinated Notes, including a requirement to obtain the necessary prior approval of the FSS or such other relevant regulatory authorities in Korea. See “*Terms and Conditions of the Notes — Redemption and Purchase*”. Accordingly, there is no guarantee as to whether or when the Tier I Subordinated Notes will be redeemed.

***Interest payments on the Notes that are Tier I Subordinated Notes are discretionary and are not cumulative.***

The rate of interest applicable to the Tier I Subordinated Notes may be subject to reset periodically, based on the prevailing base rate plus the spread as specified in the applicable Pricing Supplement. Furthermore, interest on Tier I Subordinated Notes may not be paid in full, or at all. We may elect, in our sole discretion, to not pay any

interest, or to pay only partial interest, on Tier I Subordinated Notes on any interest payment date for any reason. In addition, Tier I Subordinated Notes will not bear any interest, and any interest payable on Tier I Subordinated Notes on any interest payment date will not be paid, during an interest cancellation period, which will be triggered upon the issuance of a management improvement recommendation, a management improvement requirement or a management improvement order, or the imposition of emergency measures, by the FSC against us.

Article 36 of the Regulation on Supervision of Banking Business provides that the FSC shall issue a management improvement order to a bank where:

- the bank constitutes an “insolvent financial institution” under the Act on Structural Improvement of the Financial Industry;
- its combined Tier I and Tier II capital adequacy ratio is no greater than 2.0% or its Tier I capital adequacy ratio is no greater than 1.5% or its Tier I common equity capital ratio is no greater than 1.2%; or
- the bank has difficulty continuing its normal operations, even though it has previously become subject to a management improvement requirement under Article 35(1), and has been urged (but has failed) to implement a management improvement plan under Article 39(6), of the Regulation on Supervision of Banking Business.

Prior to issuing a management improvement order to a bank, the FSC would be expected to (i) issue a management improvement recommendation to such bank (for example, if its combined Tier I and Tier II capital adequacy ratio is no greater than 8.0% or its Tier I capital adequacy ratio is no greater than 6.0% or its Tier I common equity capital ratio is no greater than 4.5%) under Article 34 of the Regulation on Supervision of Banking Business and (ii) subject such bank to a management improvement requirement (for example, if its combined Tier I and Tier II capital adequacy ratio is no greater than 6.0% or its Tier I capital adequacy ratio is no greater than 4.5% or its Tier I common equity capital ratio is no greater than 3.5%) under Article 35 of the Regulation on Supervision of Banking Business.

Article 38(1) of the Regulation on Supervision of Banking Business provides that the FSC or its chairman shall impose emergency measures on a bank where:

- a drastic deterioration in the liquidity of the bank causes it to experience, among others, shortages of reserves and assets for repayment of deposits or an inability to repay its external debts;
- it becomes impracticable or impossible for the bank to conduct normal business operations due to the occurrence of events such as, among others, a strike, work stoppage, labour dispute or a run on its deposits; or
- there is a manifest risk of bankruptcy or insolvency of the bank or the bank is unable to repay its deposits.

Such emergency measures may include (i) restrictions on acceptance of deposits and provision of loans by the bank; (ii) a suspension on repayment of all or any part of the bank’s deposits; (iii) a prohibition on repayment of debts by the bank; and (iv) mandatory dispositions of the bank’s assets under Article 38(2) of the Regulation on Supervision of Banking Business.

Furthermore, interest on any Series of Tier I Subordinated Notes will be paid only out of such amounts legally available to us from time to time under applicable Korean law for payment of dividends on our equity (or, if higher, such amounts for payment of interest on such Tier I Subordinated Notes). Under the Korean Commercial Code, we may pay an annual dividend only out of the excess of our net assets, on a non-consolidated basis, over the sum of (i) our stated capital (i.e., paid-in capital), (ii) the total amount of our capital surplus reserve and legal reserve accumulated up to the end of the relevant dividend period, (iii) the earned surplus reserve to be set aside for the annual dividend and (iv) any increase in net assets caused by the valuation of assets and liabilities performed in accordance with Korean accounting principles, against which no unrealised loss is set off. Depending on our ability to meet certain capital ratios, such amounts legally available to us under the Korean Commercial Code are subject to further restrictions pursuant to Articles 26(4) of the Regulation on Supervision of Banking Business, which sets forth upper limits on the amounts a bank may use from its legally available amounts under the Korean Commercial Code to pay discretionary dividends, including discretionary interest payments on capital securities such as the Tier I Subordinated Notes. Specifically, we would be able to use only a certain percentage (ranging from 0% to 100%, depending on the degree of the shortfall in the applicable capital adequacy ratios) of our annual consolidated net income (attributable to the controlling shareholder) as stated in our latest audited financial report after deducting the regulatory reserve for credit loss (attributable to the controlling shareholder) if our Tier I common equity capital ratio, Tier I capital adequacy ratio or combined

Tier I and Tier II capital adequacy ratio were to fall below 9.0%, 10.5% or 12.5%, respectively. The foregoing thresholds have been calculated based on (i) an additional capital conservation buffer of 2.5%, (ii) a countercyclical capital buffer set at 1.0% and (iii) an additional capital requirement of 1.0% for being designated as one of six “Domestic Systemically Important Banks” in 2022. See “— *Risks Relating to Our Business — We may be required to raise additional capital if our capital adequacy ratio deteriorates or the applicable capital requirements change in the future, but we may not be able to do so on favourable terms or at all*” and “*Regulation and Supervision — Principal Regulations Applicable to Banks — Capital Adequacy and Allowances*”.

To the extent the aggregate amount of interest and other distributions payable on any Series of Tier I Subordinated Notes and other Tier I obligations exceed such amounts legally available to us, the aggregate amount of interest payable on such Tier I Subordinated Notes would be reduced by an amount equal to the pro rata portion of such excess. Moreover, because we are entitled to not pay interest on any interest payment date in our sole discretion, we may choose to do so even if amounts are legally available for payment of dividends or interest. See “*Terms and Conditions of the Notes — Interest — Special Provisions Relating to Interest on Tier I Subordinated Notes*”.

Interest payments on the Tier I Subordinated Notes are not cumulative. Accordingly, if interest is not paid or is reduced on any interest payment date as a result of any of the foregoing, such unpaid interest will be irrevocably lost, and holders of Tier I Subordinated Notes will not be entitled to receive such unpaid interest on any subsequent interest payment date or any other date, whether or not funds are, or subsequently become, available. Any non-payment of interest by us will not constitute an event of default under the Tier I Subordinated Notes. Due to these interest cancellation features, the trading behaviour with respect to the Tier I Subordinated Notes may not follow trading behaviour associated with other types of our securities or of other issuers. A potential investor should not invest in Tier I Subordinated Notes unless it has knowledge and expertise to evaluate how the Tier I Subordinated Notes will perform under changing market conditions and the resulting effect on the likelihood of an interest cancellation and on the market value of the Tier I Subordinated Notes.

***Non-payment of interest may adversely affect the trading price of the Notes that are Tier I Subordinated Notes.***

If interest is not paid on the Tier I Subordinated Notes on any interest payment date, the Tier I Subordinated Notes may trade at a price which is lower than the issue price or the prevailing market price prior to such interest payment date. The sale of the Tier I Subordinated Notes during any period of non-payment of interest thereon may result in the holder receiving lower returns on the investment than a holder who continues to hold the Tier I Subordinated Notes until the interest payments resume (if at all). In addition, because of the interest cancellation provisions applicable to the Tier I Subordinated Notes, the market price of the Tier I Subordinated Notes may be more volatile than that of other securities that are not subject to such provisions.

***The Notes may be subject to the Proposed Financial Transactions Tax (“FTT”).***

On 14 February 2013, the European Commission published a proposal (the “**Commission’s Proposal**”) for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the “**participating Member States**”). However, Estonia has since stated that it will not participate.

The Commission’s Proposal has very broad scope and could, if introduced, apply to certain dealings in Notes (including secondary market transactions) in certain circumstances. The issuance and subscription of Notes should, however, be exempt.

Under the Commission’s Proposal, the FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in Notes where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, “established” in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

However, the FTT proposal remains subject to negotiation between the participating Member States. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU Member States may decide to participate.

Prospective holders of Notes are advised to seek their own professional advice in relation to the FTT.

***Payments made on or with respect to the Notes may be subject to U.S. withholding tax.***

Pursuant to certain provisions of the Code, commonly known as FATCA, a “foreign financial institution” may be required to withhold on certain payments it makes (“**foreign passthru payments**”) to persons that fail to meet certain certification, reporting, or related requirements. A number of jurisdictions (including Korea) have entered into, or have agreed in substance to, intergovernmental agreements with the United States to implement FATCA (“**IGAs**”), which modify the way in which FATCA applies in their jurisdictions. Under the provisions of IGAs as currently in effect, a foreign financial institution in an IGA jurisdiction would generally not be required to withhold under FATCA or an IGA from payments that it makes. Certain aspects of the application of the FATCA provisions and IGAs to instruments such as the Notes, including whether withholding would ever be required pursuant to FATCA or an IGA with respect to payments on instruments such as the Notes, are uncertain and may be subject to change. Even if withholding would be required pursuant to FATCA or an IGA with respect to payments on instruments such as the Notes, Notes treated as debt for U.S. federal income tax purposes issued on or prior to the date that is six months after the date on which final regulations defining “foreign passthru payments” are filed with the U.S. Federal Register generally would be “grandfathered” for purposes of FATCA withholding unless materially modified after such date. Additionally, under proposed regulations, any withholding on “foreign passthru payments” on Notes that are not otherwise grandfathered would apply to such payments made on or after the date that is two years after the date of publication in the U.S. Federal Register of final regulations defining “foreign passthru payments.” Taxpayers generally may rely on these proposed regulations until final regulations are issued. However, if additional notes (as described under “*Terms and Conditions of the Notes — Further Issues*”) that are not distinguishable from previously issued Notes are issued after the expiration of the grandfathering period and are subject to withholding under FATCA, then withholding agents may treat all Notes, including the Notes offered prior to the expiration of the grandfathering period, as subject to withholding under FATCA. Holders should consult their own tax advisors regarding how these rules may apply to their investment in the Notes. In the event any withholding would be required pursuant to FATCA or an IGA with respect to payments on the Notes, no person will be required to pay additional amounts as a result of the withholding.

***The regulation or reform of certain benchmark rates may adversely affect the value of Floating Rate Notes linked to or referencing such benchmark rates.***

The Euro Interbank Offered Rate (“**EURIBOR**”) and other interest rate or other types of rates and indices which are deemed to be benchmarks are the subject of ongoing national and international regulatory discussions and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any Floating Rate Notes linked to or referencing such a “benchmark”.

Regulation (EU) No. 2016/1011 (the “**EU Benchmarks Regulation**”) and Regulation (EU) No. 2016/1011 as it forms part of domestic law of the United Kingdom by virtue of the European Union (Withdrawal) Act 2018 (the “**UK Benchmarks Regulation**”) apply to the provision of benchmarks, the contribution of input data to a benchmark and the use of a benchmark, within the EU and the UK, respectively. The EU Benchmark Regulation and UK Benchmark Regulation could have a material impact on any Floating Rate Notes linked to EURIBOR or another benchmark rate or index, in particular, if the methodology or other terms of the benchmark are changed in order to comply with the terms of the EU Benchmark Regulation or UK Benchmark Regulation, and such changes could (amongst other things) have the effect of reducing or increasing the rate or level, or affecting the volatility of the published rate or level, of the benchmark. More broadly, any of the international, national or other proposals for reform, or the general increased regulatory scrutiny of benchmarks, could increase the costs and risks of administering or otherwise participating in the setting of a benchmark and complying with any such regulations or requirements. Such factors may have the effect of discouraging market participants from continuing to administer or contribute to certain “benchmarks,” trigger changes in the rules or methodologies used in certain “benchmarks” or lead to the discontinuance or unavailability of quotes of certain “benchmarks.”

As an example of such benchmark reforms, on 21 September 2017, the European Central Bank announced that it would be part of a new working group tasked with the identification and adoption of a “risk free overnight rate,” which can serve as a basis for an alternative to current benchmarks used in a variety of financial instruments and contracts in the euro area. On 13 September 2018, the working group on Euro risk-free rates recommended the new Euro short-term rate (“**€STR**”) as the new risk-free rate for the euro area. The €STR was published for the first time on 2 October 2019. Although EURIBOR has been reformed in order to comply with the terms of the Benchmark Regulation, it remains uncertain as to how long it will continue in its current form, or whether it will be further reformed or replaced with €STR or an alternative benchmark.

Where the Interest Rate specified in the relevant Pricing Supplement is SOFR, if we determine that a Benchmark Transition Event and its related Benchmark Replacement Date has occurred, the then-current Benchmark will be replaced by a Benchmark Replacement (determined by us in accordance with the Terms and Conditions of the Notes) for all purposes relating to the relevant Floating Rate Notes in respect of all determinations on such date and for all determinations on all subsequent dates. We will have to exercise our discretion to determine (or to elect not to determine) a Benchmark Replacement and, if applicable, a Benchmark Replacement Adjustment, in a situation in which it is presented with a conflict of interest.

The use of a Benchmark Replacement may result in interest payments that are substantially lower than or that do not otherwise correlate over time with the payments that could have been made on the relevant Floating Rate Notes if the relevant benchmark remained available in its current form.

Any of the above changes or any other consequential changes to benchmarks as a result of EU, UK, or other international, national, or other proposals for reform or other initiatives or investigations, or any further uncertainty in relation to the timing and manner of implementation of such changes could have a material adverse effect on the trading market for, value of and return on any Notes linked to such benchmark. Investors should consult their own independent advisers and make their own assessment about the potential risks imposed by the Benchmark Regulation reforms or possible cessation or reform of certain reference rates in making any investment decision with respect to any Notes linked to or referencing a benchmark.

***The market continues to develop in relation to risk-free rates as a reference rate for Floating Rate Notes.***

Investors should be aware that the market continues to develop in relation to risk-free rates, such as the Secured Overnight Financing Rate (“SOFR”). This relates not only to the substance of the calculation and the development and adoption of market infrastructure for the issuance and trading of bonds referencing such rates, but also how widely such rates and methodologies might be adopted.

The market or a significant part thereof may adopt an application of SOFR that differs significantly from that set out in the Terms and Conditions as applicable to the Notes. Furthermore, we may in future issue Notes referencing SOFR that differ materially in terms of interest determination when compared with the Notes.

In addition, the manner of adoption or application of SOFR reference rates in the Eurobond markets may differ materially compared with the application and adoption of SOFR in other markets, such as the derivatives and loan markets. Noteholders should carefully consider how any mismatch between the adoption of SOFR reference rates across these markets may impact any hedging or other financial arrangements which they may put in place in connection with any acquisition, holding or disposal of Notes referencing SOFR.

***SOFR has a limited history.***

Publication of SOFR began in April 2018 and it therefore has a limited history. The future performance of SOFR may therefore be difficult to predict based on the limited historical performance. The level of SOFR during the term of the Notes may bear little or no relation to the historical level of SOFR. Prior observed patterns, if any, in the behaviour of market variables and their relation to SOFR such as correlations, may change in the future.

Furthermore, the Interest Rate is only capable of being determined at the end of the relevant Reference Period and immediately prior to the relevant Interest Payment Date. It may be difficult for Noteholders to estimate reliably the amount of interest which will be payable on the Notes, and some investors may be unable or unwilling to trade such Notes without changes to their IT systems, both of which factors could adversely impact the liquidity of the Notes. Further, if the Notes become due and payable as a result of an Event of Default under Condition 11 (*Events of Default*), or are otherwise redeemed early on a date which is not an Interest Payment Date, the final Interest Rate payable in respect of the Notes shall be determined by reference to a shortened period ending immediately prior to the date on which the Notes become due and payable.

***The administrator of SOFR may make changes that could change the value of SOFR or discontinue SOFR.***

The New York Federal Reserve (or a successor), as administrator of SOFR, may make methodological or other changes that could change the value of SOFR, including changes related to the method by which SOFR is calculated, eligibility criteria applicable to the transactions used to calculate SOFR, or timing related to the publication of SOFR. In addition, the administrator may alter, discontinue or suspend calculation or dissemination of SOFR (in which case a fallback method of determining the interest rate on the Notes will apply). The administrator has no obligation to consider the interests of Noteholders when calculating, adjusting, converting, revising or discontinuing SOFR.

***The Notes may be represented by Global Notes and holders of a beneficial interest in a Global Note must rely on the procedures of the relevant Clearing System(s).***

Notes issued under the Programme may be represented by one or more Global Notes. Such Global Notes will be deposited with a common depositary for Euroclear and Clearstream, Luxembourg and/or a sub-custodian for the HKMA as operator of the CMU and/or DTC (each of Euroclear, Clearstream, Luxembourg, the CMU and DTC, a “**Clearing System**”). Except in the circumstances described in the relevant Global Note, investors will not be entitled to receive definitive Notes. The relevant Clearing System(s) will maintain records of the beneficial interests in the Global Notes. While the Notes are represented by one or more Global Notes, investors will be able to trade their beneficial interests only through the Clearing Systems.

While the Notes are represented by one or more Global Notes, we will discharge our payment obligations under the Notes by making payments to the relevant Clearing System for distribution to their account holders.

A holder of a beneficial interest in a Global Note must rely on the procedures of the relevant Clearing System(s) to receive payments under the relevant Notes. We have no responsibility or liability for the records relating to, or payments made in respect of, beneficial interests in the Global Notes.

***Notes issued as Green Bonds, Social Bonds or Sustainability Bonds may not be a suitable investment for all investors seeking exposure to green assets, social assets or sustainability assets.***

We may issue Notes under the Programme which are specified to be “Green Bonds,” “Social Bonds” or “Sustainability Bonds” in the applicable Pricing Supplement (any such Notes, Green Bonds, Social Bonds or Sustainability Bonds, respectively), in accordance with our Framework. See “*Sustainable Financing Framework*”. In connection with an issue of Green Bonds, Social Bonds or Sustainability Bonds, we may request a sustainability rating agency or sustainability consulting firm to issue a Second Party Opinion confirming that any Green Bonds, Social Bonds or Sustainability Bonds are in compliance with the GBP 2021, ICMA (the “**ICMA Green Bond Principles**”), the SBP 2021, ICMA (the “**ICMA Social Bond Principles**”), the SBG 2021, ICMA (the “**ICMA Sustainability Bond Guidelines**”), the GLP 2023, LMA (the “**LMA Green Loan Principles**”) or SLP 2023, LMA (the “**LMA Social Loan Principles**”). The ICMA Green Bond Principles, the ICMA Social Bond Principles, the ICMA Sustainability Bond Guidelines, the LMA Green Loan Principles and the LMA Social Loan Principles are a set of voluntary guidelines that recommend transparency and disclosure and promote integrity in the development of the green bond, social bond and sustainability bond markets.

There is currently no market consensus on what precise attributes are required for a particular project to be defined as “green,” “social” or “sustainability,” and therefore no assurance can be provided to potential investors that the Green Eligible Categories, Social Eligible Categories or a combination of the two categories (in the case of Sustainability Bonds) will continue to meet the relevant eligibility criteria. Although applicable green projects, social projects or sustainability projects are expected to be selected in accordance with the categories recognised by the ICMA Green Bond Principles, the ICMA Social Bond Principles, the ICMA Sustainability Bond Guidelines, the LMA Green Loan Principles or the LMA Social Loan Principles and are expected to be developed in accordance with applicable legislation and standards, there can be no guarantee that adverse environmental and/or social impacts will not occur during the design, construction, commissioning and/or operation of any such green projects, social projects or sustainability projects. Where any negative impacts are insufficiently mitigated, green projects, social projects or sustainability projects may become controversial, and/or may be criticised by activist groups or other stakeholders.

Additionally, in accordance with the coal phase-out commitment declared by Hana Financial Group in March 2021, we have committed to stop any financings of new or expansion of coal-related projects and aim to reduce exposure to coal projects to zero by 2050. Our current exposure to coal projects was approximately 0.05% of our total loans outstanding as of 30 June 2025 on a separate basis. For the avoidance of doubt, any projects related to the development, construction or production/transmission of energy from fossil fuels such as coal are excluded from the “renewable energy” category of Eligible Green Categories, as set forth in our Framework.

Potential investors should be aware that any Second Party Opinion will not be incorporated into, and will not form part of, this Offering Circular or the applicable Pricing Supplement. Any such Second Party Opinion may not reflect the potential impact of all risks related to the structure of the relevant Series of Green Bonds, Social Bonds or Sustainability Bonds, their marketability, trading price or liquidity or any other factors that may affect the price or value of the Green Bonds, Social Bonds or Sustainability Bonds. Any such Second Party Opinion is not a recommendation to buy, sell or hold securities and is only current as of its date of issue.

Furthermore, although we may agree at the relevant issue date of any Green Bonds, Social Bonds or Sustainability Bonds to allocate the amount equivalent to the net proceeds towards the financing and/or refinancing of Green Eligible Categories, Social Eligible Categories or a combination of the two categories (in the case of Sustainability Bonds) in accordance with certain prescribed eligibility criteria as described under the Framework, it would not be an event of default under the Green Bonds, Social Bonds or Sustainability Bonds if (i) we were to fail to comply with such undertaking or were to fail to allocate the proceeds in the manner specified in the applicable Pricing Supplement and/or (ii) any Second Party Opinion issued in connection with such Green Bonds, Social Bonds or Sustainability Bonds were to be withdrawn. Any failure to allocate the amount equivalent to the net proceeds of any Series of Green Bonds, Social Bonds or Sustainability Bonds in connection with green projects, social projects or sustainability projects and/or any failure to meet, or to continue to meet, the investment requirements of certain environmentally or socially focused investors with respect to such Green Bonds, Social Bonds or Sustainability Bonds may affect the value and/or trading price of the Green Bonds, Social Bonds or Sustainability Bonds, and/or may have consequences for certain investors with portfolio mandates to invest in green assets, social assets or sustainability assets.

Neither we nor the Dealers make any representation as to the suitability for any purpose of any Second Party Opinion or whether any Green Bonds, Social Bonds or Sustainability Bonds fulfil the relevant environmental or social criteria. Prospective investors should have regard to the relevant Green Eligible Categories, Social Eligible Categories or a combination of the two categories (in the case of Sustainability Bonds) and the use of proceeds described in the applicable Pricing Supplement. Each potential purchaser of any Series of Green Bonds, Social Bonds or Sustainability Bonds should determine for itself the relevance of the information contained in this Offering Circular and in the applicable Pricing Supplement regarding the use of proceeds and its purchase of any Green Bonds, Social Bonds or Sustainability Bonds should be based upon such investigation as it deems necessary.

#### **Risks Relating to Notes Denominated in Renminbi**

A description of risks which may be relevant to an investor in Notes denominated in Renminbi (“**Renminbi Notes**”) are set out below.

***Renminbi is not completely freely convertible and there are significant restrictions on the remittance of Renminbi into and outside the PRC which may adversely affect the liquidity of Renminbi Notes.***

Renminbi is not completely freely convertible at present. The government of the PRC (the “**PRC Government**”) continues to regulate conversion between Renminbi and foreign currencies, including the Hong Kong dollar, despite significant reduction in control by it in recent years over trade transactions involving import and export of goods and services as well as other frequent routine foreign exchange transactions. These transactions are known as current account items.

However, remittance of Renminbi by foreign investors into the PRC for the purposes of capital account items, such as capital contributions, is generally only permitted upon obtaining specific approvals from, or completing specific registrations or filings with, the relevant authorities on a case-by-case basis and is subject to a strict monitoring system.

Regulations in the PRC on the remittance of Renminbi into the PRC for settlement of capital account items are developing gradually. In recent years, the People’s Bank of China (“**PBoC**”) and the Ministry of Commerce of the PRC have issued circulars providing guidance on simplifying certain remittance requirements for settlement of capital account items. However, such circulars are relatively new and are subject to interpretation and application by the relevant authorities in the PRC.

In the event that we decide to remit some or all of the proceeds into the PRC in Renminbi, our ability to do so will be subject to obtaining all necessary approvals from, and/or registration or filing with, the relevant PRC government authorities. Investors may be required to provide certifications and other information (including Renminbi account information) in order to be allowed to receive payments in Renminbi in accordance with the Renminbi clearing and settlement system for participating banks in Hong Kong, Singapore and Taiwan. However, there is no assurance that the necessary approvals from, and/or registration or filing with, the relevant PRC government authorities will be obtained at all or, if obtained, they will not be revoked or amended in the future.

There is no assurance that the PRC Government will continue to gradually liberalise control over cross-border remittance of Renminbi in the future, that the pilot schemes for Renminbi cross-border utilisation will not be

discontinued or that new regulations in the PRC will not be promulgated in the future which have the effect of restricting or eliminating the remittance of Renminbi into or outside the PRC. In the event that funds cannot be repatriated outside the PRC in Renminbi, this may affect the overall availability of Renminbi outside the PRC and our ability to source Renminbi to finance our obligations under Notes denominated in Renminbi.

***There is only limited availability of Renminbi outside the PRC, which may affect the liquidity of the Renminbi Notes and our ability to source Renminbi outside the PRC to service Renminbi Notes.***

As a result of the restrictions by the PRC Government on cross-border Renminbi fund flows, the availability of Renminbi outside the PRC is limited. While the PBoC has entered into settlement agreements on the clearing of Renminbi business with financial institutions in a number of financial centres and cities (the “**Renminbi Clearing Banks**”), including but not limited to Hong Kong and is in the process of establishing Renminbi clearing and settlement mechanisms in several other jurisdictions (the “**Settlement Arrangements**”), the current size of Renminbi-denominated financial assets outside the PRC is limited.

There are restrictions imposed by PBoC on Renminbi business participating banks in respect of cross-border Renminbi settlement, such as those relating to direct transactions with PRC enterprises. Furthermore, Renminbi business participating banks do not have direct Renminbi liquidity support from the PBoC. The Renminbi Clearing Banks only have access to onshore liquidity support from the PBoC for the purpose of squaring open positions of participating banks for limited types of transactions and are not obliged to square for participating banks any open positions resulting from other foreign exchange transactions or conversion services. In such cases, the participating banks will need to source Renminbi from outside the PRC to square such open positions.

Although it is expected that the offshore Renminbi market will continue to grow in depth and size, its growth is subject to many constraints as a result of PRC laws and regulations on foreign exchange. There is no assurance that new PRC regulations will not be promulgated or the existing Settlement Arrangements will not be terminated or amended in the future which will have the effect of restricting availability of Renminbi outside the PRC. The limited availability of Renminbi outside the PRC may affect the liquidity of the Renminbi Notes. To the extent we are required to source Renminbi in the offshore market to service our Renminbi Notes, there is no assurance that we will be able to source such Renminbi on satisfactory terms, if at all.

***Investment in the Renminbi Notes is subject to exchange rate risks.***

The value of Renminbi against the U.S. dollar and other foreign currencies fluctuates from time to time and is affected by changes in the PRC and international political and economic conditions as well as many other factors. We will make all payments of interest and principal with respect to the Renminbi Notes in Renminbi unless otherwise specified. As a result, the value of these Renminbi payments may vary with the changes in the prevailing exchange rates in the marketplace. If the value of Renminbi depreciates against the U.S. dollar or other currencies, the value of the investment made by a holder of the Renminbi Notes in U.S. dollars or any other foreign currency terms will decline.

***Investment in the Renminbi Notes is subject to interest rate risks.***

The PRC Government has gradually liberalised its regulation of interest rates in recent years. Further liberalisation may increase interest rate volatility. Consequently, the trading price of the Renminbi Notes will vary with the fluctuations in the Renminbi interest rates. If holders of the Renminbi Notes propose to sell their Notes before their maturity, they may receive an offer lower than the amount they have invested.

***Payments with respect to the Renminbi Notes may be made only in the manner designated in the Renminbi Notes.***

Except in the limited circumstances where the Renminbi is not available for delivery outside the PRC, all payments to investors in respect of the Renminbi Notes will be made solely (i) for so long as the Renminbi Notes are represented by global certificates held with the common depositary or common safekeeper, as the case may be, for Clearstream, Luxembourg, Euroclear or the CMU Service, as the case may be, by transfer to a Renminbi bank account maintained in Hong Kong, or (ii) for so long as the Renminbi Notes are in definitive form, by transfer to a Renminbi bank account maintained in Hong Kong in accordance with prevailing rules and regulations of Clearstream, Luxembourg, Euroclear or the CMU Service, as the case may be. We cannot be required to make payment by any other means (including in any other currency or by transfer to a bank account in the PRC).

***Gains on the transfer of the Renminbi Notes may be subject to income tax under PRC tax laws.***

Under the New Enterprise Income Tax Law and its implementation rules, any gains realised on the transfer of Renminbi Notes by holders who are deemed under the New Enterprise Income Tax Law as non-resident enterprises may be subject to PRC enterprise income tax if such gains are regarded as income derived from sources within the PRC. However, there remains uncertainty as to whether the gains realised from the transfer of the Renminbi Notes would be treated as income derived from sources within the PRC and be subject to PRC tax. This will depend on how the PRC tax authorities interpret, apply or enforce the relevant laws and rules. According to an arrangement between the PRC and Hong Kong, for the avoidance of double taxation, noteholders who are Hong Kong residents, including both enterprise holders and individual holders, will be exempted from PRC income tax on capital gains derived from a sale or exchange of the Renminbi Notes.

Therefore, if a noteholder, being a non-resident enterprise, is required to pay any PRC income tax on gains on the transfer of the Renminbi Notes (such enterprise income tax is currently levied at the rate of 10% of the gross proceeds, unless there is an applicable tax treaty between the PRC and the jurisdiction in which such non-resident enterprise holders of Renminbi Notes reside that reduces or exempts the relevant tax), the value of their investment in the Renminbi Notes may be materially and adversely affected.

Similarly, if a noteholder, as a non-resident individual holder, is required to pay any PRC income tax on gains on the transfer of the Renminbi Notes (such individual income tax is currently levied at the rate of 20% of the gross proceeds, unless there is an applicable tax treaty between the PRC and the jurisdiction in which the relevant non-resident individual holder of the Renminbi Notes resides that reduces or exempts the relevant tax), the value of such noteholder's investment in the Renminbi Notes may be affected.

**Investors should contact their own financial, legal, accounting and tax advisers about the risks associated with an investment in the Renminbi Notes, the appropriate tools to analyse that investment, and the suitability of the investment in each investor's particular circumstances. No investor should purchase the Renminbi Notes unless that investor understands and has sufficient financial resources to bear the price, market liquidity, structure and other risks associated with an investment in the Renminbi Notes.**

**Before entering into any transaction, investors should ensure that they fully understand the potential risks and rewards of that transaction and independently determine that the transaction is appropriate given their objectives, experience, financial and operational resources and other relevant circumstances. Investors should consider consulting with such advisers as they deem necessary to assist them in making these determinations.**

## CAPITALISATION

The following table shows our capitalisation, which is equal to the sum of borrowings, debentures and total equity, as of 30 June 2025. This information has been extracted from our unaudited interim consolidated financial statements as of 30 June 2025.

|                                                          | As of<br>30 June<br>2025        |
|----------------------------------------------------------|---------------------------------|
|                                                          | <i>(In billions of<br/>Won)</i> |
| <b>Indebtedness</b>                                      |                                 |
| Borrowings .....                                         | ₩27,398                         |
| Debentures .....                                         | 29,979                          |
| <b>Total indebtedness</b> .....                          | <u>₩57,377</u>                  |
| <b>Equity</b>                                            |                                 |
| Capital stock .....                                      | 5,360                           |
| Capital surplus .....                                    | 6,161                           |
| Hybrid equity securities .....                           | 354                             |
| Capital adjustments .....                                | (38)                            |
| Retained earnings .....                                  | 23,809                          |
| Accumulated other comprehensive loss .....               | (866)                           |
| <b>Equity attributable to owners of the parent</b> ..... | <u>₩34,780</u>                  |
| Non-controlling interests .....                          | 317                             |
| <b>Total equity</b> .....                                | <u>35,097</u>                   |
| <b>Total capitalisation</b> .....                        | <u>₩92,474</u>                  |

There have been no material changes to our capitalisation since 30 June 2025.

## Capital Adequacy

Pursuant to the capital adequacy requirements of the FSC as of the date hereof, we are required to maintain a minimum common equity Tier I capital adequacy ratio of 9.0%, a minimum Tier I capital adequacy ratio of 10.5% and a combined Tier I and Tier II capital adequacy ratio of 12.5%.

The following table sets out a summary of our capital base and capital adequacy ratios, on a consolidated basis and calculated in accordance with the standards set by the FSC, as of 30 June 2025.

|                                                          | <b>As of<br/>30 June<br/>2025</b>                       |
|----------------------------------------------------------|---------------------------------------------------------|
|                                                          | <i>(In billions of<br/>Won, except<br/>percentages)</i> |
| <b>Tier I capital<sup>(1)</sup></b>                      |                                                         |
| Common equity capital <sup>(2)</sup> .....               | ₩ 32,967                                                |
| Other basic capital <sup>(3)</sup> .....                 | 373                                                     |
| Total Tier I capital .....                               | ₩ 33,340                                                |
| <b>Tier II capital<sup>(4)</sup> .....</b>               | <b>₩ 2,304</b>                                          |
| <b>Total Tier I and II capital .....</b>                 | <b>₩ 35,644</b>                                         |
| <b>Risk-weighted assets (“RWA”)<sup>(5)</sup></b>        |                                                         |
| Credit RWA .....                                         | ₩176,273                                                |
| Operational RWA .....                                    | 18,238                                                  |
| Market RWA .....                                         | 5,348                                                   |
| Total RWA .....                                          | ₩199,859                                                |
| <b>BIS capital ratio</b>                                 |                                                         |
| Common equity Tier I capital adequacy ratio .....        | 16.49%                                                  |
| Tier I capital adequacy ratio .....                      | 16.68%                                                  |
| Tier II capital adequacy ratio .....                     | 1.15%                                                   |
| Combined Tier I and Tier II capital adequacy ratio ..... | 17.83%                                                  |

(1) Tier I capital is a sum of common equity capital and other basic capital.

(2) Common equity capital includes, among others, capital incurred in connection with common stock issued to meet the eligible requirement, capital surplus and capital adjustments, retained earnings, accumulated other comprehensive income and other capital surplus, capital adjustments and non-controlling interest on common shares issued by banks and affiliated subsidiaries.

(3) Other basic capital includes, among others, capital securities to meet accreditation requirements of other basic capital, capital surplus associated with the issuance of other basic capital, non-qualifying capital securities and accredited amount as other basic capital of a non-controlling interest on equity securities issued by a subsidiary.

(4) Tier II capital indicates supplementary capital, which includes, among others, capital securities to meet supplementary capital accreditation requirements, capital surplus associated with the issuance of supplementary capital, accredited amount of supplementary capital of non-qualifying capital securities, accredited amount as supplementary capital of a non-controlling interest on equity securities issued by a subsidiary, eligible allowance for possible loan losses on “normal” or “precautionary” category assets and allowance for possible loan losses in excess of the total amount of expected losses.

(5) Based on market risks.

There have been no material changes to our capital base and capital adequacy ratios since 30 June 2025.

## SELECTED FINANCIAL INFORMATION

The following tables set forth selected financial data in respect of the Bank and its subsidiaries as of and for the years ended 31 December 2022, 2023 and 2024 and as of 30 June 2025 and for the six months ended 30 June 2024 and 2025. The selected financial data set forth below have been derived from the audited consolidated financial statements of the Bank and its subsidiaries as of and for the years ended 31 December 2022, 2023 and 2024 and the unaudited interim consolidated financial statements of the Bank and its subsidiaries as of 30 June 2025 and for the six months ended 30 June 2024 and 2025, each included elsewhere in this Offering Circular.

The audited annual consolidated financial statements of the Bank and its subsidiaries as of and for the years ended 31 December 2022, 2023 and 2024 have been audited by Deloitte Anjin LLC, whose reports thereon are included elsewhere in this Offering Circular. The unaudited interim consolidated financial statements of the Bank and its subsidiaries as of and for the six months ended 30 June 2024 have been reviewed by Deloitte Anjin LLC, and the unaudited interim consolidated financial statements of the Bank and its subsidiaries as of and for the six months ended 30 June 2025 have been reviewed by Ernst & Young Han Young, whose reports thereon are included elsewhere in this Offering Circular, respectively. The consolidated financial statements included in this Offering Circular have been prepared in accordance with K-IFRS.

Our results of operations for the six months ended 30 June 2025 may not be indicative of our result of operations for any future interim period or for the full year 2025.

(1) Defined as net income (annualised for interim periods) divided by the arithmetic average of the quarterly ending balances of total assets.

(2) Defined as net income (annualised for interim periods) divided by the arithmetic average of the quarterly ending balances of total equity.

(3) Defined, on a separate basis, as net interest income (annualised for interim periods) divided by the average of the daily ending balances of interest earning assets (calculated in accordance with FSS reporting guidelines).

(4) Represents, on a separate basis, the difference between the average yield (annualised for interim periods) on interest earning assets and the average cost (annualised for interim periods) of interest bearing liabilities (calculated in accordance with FSS reporting guidelines).

(5) Calculated as the ratio of general and administrative expenses to operating income (prior to deducting general and administrative expenses, provision (reversal) of allowance for credit loss, (reversal of) provisions for payment guarantees, (reversal of) allowances for unused commitments and other provisions under other operating income or expenses).

(6) Represents the ratio of total equity to total assets.

(7) Represents, on a separate basis, the ratio of non-performing assets to total credits. Non-performing assets are defined as those assets that are classified as substandard or below based on the FSC's asset classification criteria. Credits refer to our total credits (as reported to the FSS based on the FSC's asset classification criteria), the principal components of which include the total loan portfolio of our bank accounts, loans provided from our trust accounts and merchant bank accounts, and confirmed guarantees and acceptances (which are off-balance sheet items).

(8) Represents, on a separate basis, the ratio of the sum of allowance for possible loan losses and reserve for bad debts to non-performing loans.

N.A.means not available.

## MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with, and is qualified in its entirety by reference to, the historical consolidated financial statements and the notes thereto included elsewhere in this Offering Circular. The discussion contains forward-looking statements that involve risks, uncertainties and assumptions. Actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors such as those set forth under “Investment Considerations” and elsewhere in this Offering Circular. Any discrepancies in any table between totals and the sums of the amounts listed are due to rounding.

### Overview

We are one of the leading commercial banks in Korea in terms of total assets, revenues, profitability and capital adequacy. As of 30 June 2025, we had total assets, total net loans (after allowance for loan losses and net deferred origination fees and costs), total deposits and total equity of ₩531.7 trillion, ₩366.6 trillion, ₩376.2 trillion and ₩35.1 trillion, respectively.

As a full-service financial institution, we operate an extensive nationwide and overseas banking network, consisting of 607 domestic branches and sub-branches, as well as 20 international branches, one sub-branch of such international branches, five overseas representative offices, 11 overseas subsidiaries and 74 sub-branches of such overseas subsidiaries as of 30 June 2025. Our overseas operations span across 26 countries outside of Korea, the most among all major commercial banks in Korea.

We also operated 3,524 ATMs throughout Korea as of 30 June 2025 and offer Internet and mobile banking services. Through this nationwide and global network, we serve corporate and retail customers with a full complement of banking and financial services. We continue to hold strong market positions in the business segments where we have historically maintained competitive strengths, such as large corporate banking, foreign exchange and trade financing, and following the Merger, we have also gained a leading position in other business areas, such as retail banking, private banking and wealth management. Our leading presence in the market has been widely recognised by a number of significant industry awards over the years. In 2025, we received the “Best Private Bank in Korea” award from Euromoney Magazine and the “Best Bank in Korea”, the “Most Innovative Private Bank in the World”, the “Asia’s Best Foreign Exchange Bank” and the “Best Trade Finance Provider in Korea” awards from Global Finance Magazine. In 2024, we received the “Best Bank in Korea”, the “Best Trade Finance Provider in Korea”, the “Best Foreign Exchange Bank in Korea”, the “Best Private Bank in Korea” and the “Most Innovative Private Bank in the World” awards from Global Finance Magazine and the “Best Bank in Korea” and the “Best Private Bank in Korea” awards from Euromoney Magazine. In 2023, we received the “Best Private Bank in Korea” award from The Banker, the “Best Bank in Korea”, the “Best Sub-Custodian Bank in Korea”, the “Best Foreign Exchange Bank in Korea” and the “Best Trade Finance Provider in Korea” awards from Global Finance Magazine, and the “Best Private Bank in Korea” award from Euromoney Magazine. In 2022, we received the “Best Bank in Korea”, the “Best Trade Finance Provider in Korea” and the “Best Private Bank in Korea” awards from Global Finance Magazine, the “Best Private Bank in Korea” award from Euromoney Magazine and the “Best Bank in Korea” and the “Innovation in Digital Banking” awards from The Banker.

### Trends in the Korean Economy and the Commercial Banking Industry

Our financial condition and results of operations have been, and will continue to be, significantly affected by the economic conditions in Korea. Since 2020, the economic indicators in Korea and globally have shown mixed signs of deterioration and recovery, largely due to the macroeconomic effects of the COVID-19 pandemic, elevated inflation and the Government’s measures to counter price pressures. According to the Bank of Korea, Korea’s GDP growth was 2.6% in 2022, 1.4% in 2023 and 2.0% in 2024. Meanwhile, in May 2025, the Bank of Korea forecasted GDP growth to be 0.8% in 2025. Housing prices in Korea, particularly those in the Seoul metropolitan area, have fluctuated significantly in recent years.

We are also exposed to changes and volatility in global and Korean financial markets as a result of our liabilities and assets denominated in foreign currencies and our holdings of trading and investment securities, including structured products. The value of the Won relative to major foreign currencies in general and the U.S. dollar in particular has fluctuated in recent years, and a depreciation of the Won will have the impact of increasing our cost in Won of servicing our foreign currency-denominated debt, while continued exchange rate volatility may also result in foreign exchange losses for us. Furthermore, as a result of continued uncertainty in global and Korean economic conditions, there has been continued volatility in securities prices, including the prices of debt

and equity securities held by us. Such volatility may lead to further trading and valuation losses on our trading and investment securities portfolio as well as impairment losses on our investments accounted for under the equity method.

Currently, we consider the following as potential risks to the Korean economy and financial markets: (i) a potential decline in exports resulting from a global economic slowdown, particularly given Korea's significant dependence on trade with China, which may be further exacerbated by trade disputes between the United States and its trading partners in light of tariffs to be imposed or increased under the second Trump administration, subsequent retaliatory trade measures by affected countries, adverse foreign exchange rate movements and geopolitical tensions involving Russia and countries in the Middle East; (ii) a weakening of Korea's long-term growth potential due to declines in domestic investment and a shrinking labour force, which may hinder sustained economic recovery; and (iii) potential credit risks arising from fluctuations in interest rates and foreign exchange rates, continued growth in household debt and increasing default risks of households and corporations adversely impacted by macroeconomic conditions.

As for interest rate movements, like many other countries, Korea experienced a low interest rate environment between 2009 and 2019 despite some marginal fluctuations, in part due to the Government's policy to stimulate the economy through active rate-lowering measures. Between 2009 and 2019, the base interest rate set by the Bank of Korea, to which the market interest rates correlate, fluctuated within a range of 1.25% and 3.25%. In response to the economic uncertainties stemming from the COVID-19 pandemic, the Bank of Korea reduced the base interest rate by 50 basis points to 0.75% in March 2020 and further to 0.50% in May 2020. As the Korean economy began to recover in the second half of 2021, the Bank of Korea initiated a series of rate hikes, returning the base interest rate to its pre-pandemic level of 1.25% by January 2022. Thereafter, amid rising household debt levels and accelerating inflationary pressures in Korea and globally, the Bank of Korea continued its tightening cycle, raising the base interest rate to 3.50% by January 2023. The base interest rate remained at 3.50% until October 2024. As inflationary pressures showed signs of moderating and concerns over slowing economic growth intensified, the Bank of Korea commenced a series of rate cuts, lowering the base interest rate to 3.25% in October 2024, 3.00% in November 2024, 2.75% in February 2025 and 2.50% in May 2025 to support economic activity and mitigate downside risks to growth. All else being equal, increases in interest rates in the future could lead to a decline in the value of our portfolio of debt securities, which generally pay interest based on a fixed rate. A sustained increase in interest rates will also raise our funding costs, while reducing loan demand, especially among consumers. Rising interest rates may therefore require us to re-balance our asset portfolio and our liabilities in order to minimise the risk of potential mismatches and maintain our profitability. On the other hand, while a sustained decrease in interest rates may lead to an increase in loan demand among our customers and a reduction in our funding costs as well as an appreciation of the value of our debt securities, it would also decrease the interest rates we charge on our loan products.

We are currently not aware of any major regulatory developments that may have a material adverse effect on the commercial banking industry in Korea.

Furthermore, with the growing popularity of online financial service platforms and promotion of the fintech industry by the Government, we face growing competition from online-only banks and fintech companies, which compete, to a certain extent, with the financial services provided by traditional commercial banks like us. See *"Investment Considerations—Risks Relating to Our Business—Competition in the Korean banking industry is intense and may further intensify."* Accordingly, commercial banks, like us, will likely face increasing pressure to upgrade their service platforms to attract and maintain online users, which represent a growing customer base compared to traditional customers who have primarily conducted banking in-person at physical banking branches and ATMs.

As a result of volatile conditions in the Korean and global economies, as well as factors such as the COVID-19 pandemic, trade disputes and global geopolitics, anticipation of the policy rate moves by the U.S. Federal Reserve, fluctuations in oil and commodity prices and exchange rates, potential changes in fiscal and monetary policies, continued developments involving North Korea, Russia, Ukraine and the Middle East, and ongoing evolution in the finance industry, the outlook for the commercial banking sector in Korea remains uncertain.

## Changes in Securities Values, Exchange Rates and Interest Rates

Fluctuations of exchange rates, interest rates and stock prices affect, among other things, the demand for our products and services, the value of and rate of return on our assets, the availability and cost of funding and the financial condition of our customers. The following table shows, for the dates indicated, the stock price index of all equities listed on the KRX KOSPI Market as published in the KOSPI, the Won to U.S. dollar exchange rates and benchmark Won borrowing interest rates.

(1) Represents the Market Average Exchange Rate in effect on such dates.

(2) Measured by the yield on three-year Korean corporate bonds rated as AA- by the Korean credit rating agencies.

(3) Measured by the yield on three-year treasury bonds issued by the Ministry of Economy and Finance of Korea.

## Critical Accounting Policies

The preparation of our financial statements requires management to make judgements, involving significant estimates and assumptions, in the application of certain accounting policies about the effects of matters that are inherently uncertain. These estimates and assumptions, which may materially affect the reported amounts of certain assets, liabilities, revenues and expenses, are based on information available to us as of the date of the financial statements, and changes in this information over time could materially impact amounts reported in the financial statements as a result of the use of different estimates and assumptions. Certain accounting policies, by their nature, have a greater reliance on the use of estimates and assumptions, and could produce results materially different from those originally reported because of the possibility that future events affecting these estimates and assumptions may differ significantly from our current judgement.

See “— *Changes in Accounting Standards*” as well as Note 2 of the notes to our consolidated financial statements included in this Offering Circular for summaries of our significant accounting policies that involve critical accounting estimates.

## Changes in Accounting Standards

For discussions of new accounting standards, interpretations and amendments applicable to us, see Note 2.2 of the notes to our consolidated financial statements included elsewhere in this Offering Circular.

## Results of Operations

### Net Interest Income

The following table sets out the principal components of our net interest income for the periods indicated, as well as changes in these components over such periods in percentage terms.

|                                    | Year Ended 31 December |                |                | Six Months Ended 30 June |               | Percentage Change |               |                   |
|------------------------------------|------------------------|----------------|----------------|--------------------------|---------------|-------------------|---------------|-------------------|
|                                    | 2022                   | 2023           | 2024           | 2024                     | 2025          | 2022/<br>2023     | 2023/<br>2024 | 1H2024/<br>1H2025 |

| Net interest margin <sup>(1)</sup> | 1.62%                  | 1.59%          | 1.48%          | 1.51%                    | 1.47%         |                   |               |                   |

(1) Defined, on a separate basis, as net interest income (annualised for interim periods) divided by the average of the daily ending balances of interest earning assets (calculated in accordance with FSS reporting guidelines).

### Comparison of the First Six Months of 2025 to the First Six Months of 2024

#### Interest Income

Our interest income decreased by 8.4% from ₩10,225 billion in the six months ended 30 June 2024 to ₩9,365 billion in the six months ended 30 June 2025, primarily due to a 9.4% decrease in interest income on loans. On a separate basis, the average balance of our interest-earning assets increased from ₩421,996 billion in the six months ended 30 June 2024 to ₩430,830 billion in the six months ended 30 June 2025, principally due to an increase in the average balance of loans from ₩334,020 billion in the six months ended 30 June 2024 to ₩342,350 billion in the six months ended 30 June 2025. Such increase in the average balance of loans was primarily due to an increase in household loans, resulting from the growth of mortgage loans. Despite such increase in the average balance of loans, our interest income on loans decreased, on a separate basis, from ₩8,318 billion in the six months ended 30 June 2024 to ₩7,502 billion in the six months ended 30 June 2025 primarily due to the lower overall level of interest rates prevailing in Korea in the six months ended 30 June 2025 compared to the same period in 2024. On a separate basis, our annualised average yields on interest-earning assets (defined, on a separate basis, as interest divided by the average balance of interest-earning assets) decreased from 4.45% in the six months ended 30 June 2024 to 3.96% in the six months ended 30 June 2025, primarily due to a decrease in the general level of interest rates in the financial markets.

#### Interest Expenses

Our interest expenses decreased by 13.8% from ₩6,343 billion in the six months ended 30 June 2024 to ₩5,467 billion in the six months ended 30 June 2025, primarily due to a 14.8% decrease in interest expenses on deposit liabilities. On a separate basis, the average balance of our interest-bearing liabilities increased from ₩404,349 billion in the six months ended 30 June 2024 to ₩418,562 billion in the six months ended 30 June 2025, primarily due to (i) an increase in the average balance of deposits from ₩353,025 billion in the six months ended 30 June 2024 to ₩355,437 billion in the six months ended 30 June 2025, which was mainly caused by an increase in core low-interest deposits as part of our efforts to effectively manage funding procurement costs; (ii) an increase in the average balance of borrowings from ₩14,835 billion in the six months ended 30 June 2024 to ₩23,770 billion in the six months ended 30 June 2025, which was mainly caused by an increase in borrowings from the Bank of Korea driven by the expansion of policy funding loans, as well as a rise in the Bank of Korea's purchases of repurchase agreements from us in 2025 for market liquidity management purposes; and (iii) an increase in the average balance of bonds from ₩27,410 billion in the six months ended 30 June 2024 to ₩30,112 billion in the six months ended 30 June 2025, which was mainly caused by an increase in bond issuance as a relatively lower-cost source of funding, reflecting our efforts to improve the efficiency of our funding procurement structure. Despite the increase in the average balance of deposits, our interest expenses on deposit liabilities decreased, on a separate basis, from ₩4,912 billion in the six months ended 30 June 2024 to ₩4,122 billion in the six months ended 30 June 2025 primarily due to the lower overall level of interest rates prevailing in Korea in the six months ended 30 June 2025 compared to the same period in 2024 as well as an increase in core low-interest deposits. On a separate basis, the annualised average cost of our interest-bearing liabilities decreased from 3.06% in the six months ended 30 June 2024 to 2.58% in the six months ended 30 June 2025, primarily due to a decrease in the general level of interest rates in the financial markets.

## Net Interest Margin

Net interest margin represents the ratio of net interest income (annualised for interim periods) to the average of the daily ending balances of interest-earning assets. Our net interest margin on a separate basis decreased from 1.51% in the six months ended 30 June 2024 to 1.47% in the six months ended 30 June 2025, primarily due to a 2.1% increase in the average balance of interest-earning assets which outpaced a 0.4% increase in our net interest income. Net interest spread represents the difference between the average yield (annualised for interim periods) on interest-earning assets and the average cost (annualised for interim periods) of interest-bearing liabilities. Our net interest spread on a separate basis remained stable at 1.39% in the six months ended 30 June 2024 and at 1.39% in the six months ended 30 June 2025.

### *Comparison of 2024 to 2023*

#### Interest Income

Our interest income increased by 2.5% from ₩19,793 billion in 2023 to ₩20,286 billion in 2024, primarily due to an increase in the average balance of loans. On a separate basis, the average balance of our interest-earning assets increased from ₩403,446 billion in 2023 to ₩425,436 billion in 2024, principally due to an increase in the average balance of loans from ₩317,121 billion in 2023 to ₩338,281 billion in 2024 and an increase in the average balance of securities from ₩71,647 billion in 2023 to ₩74,320 billion in 2024. Such increases in the average balance of loans and securities were primarily due to our efforts to attract new customers and the increase in the size of our investment portfolio. On a separate basis, our average yields on interest-earning assets (defined, on a separate basis, as interest divided by the average balance of interest-earning assets) decreased from 4.51% in 2023 to 4.38% in 2024, primarily due to a decrease in the general level of interest rates in the financial markets in anticipation of a decrease in policy rates, which occurred towards the end of 2024.

#### Interest Expenses

Our interest expenses increased by 5.7% from ₩11,876 billion in 2023 to ₩12,547 billion in 2024, primarily due to a 4.5% increase in interest expense on deposit liabilities that resulted from an increase in the average balance of deposits. On a separate basis, the average balance of our interest-bearing liabilities increased from ₩392,868 billion in 2023 to ₩413,697 billion in 2024. The increase in the average balance of our interest-bearing liabilities was principally due to increases in the average balance of deposits from ₩338,366 billion in 2023 to ₩355,413 billion in 2024 and the average balance of bonds from ₩24,833 billion in 2023 to ₩28,284 billion in 2024, which were mainly caused by our funding procurement strategy in response to an increase in the average balance of loans. On a separate basis, the average cost of our interest-bearing liabilities decreased from 2.99% in 2023 to 2.98% in 2024, primarily due to a decrease in the general level of interest rates in the financial markets in anticipation of a decrease in policy rates, which occurred towards the end of 2024.

## Net Interest Margin

Our net interest margin on a separate basis decreased from 1.59% in 2023 to 1.48% in 2024, primarily due to a 5.5% increase in the average balance of interest-earning assets and a 2.1% decrease in our net interest income. Our net interest spread on a separate basis decreased from 1.51% in 2023 to 1.40% in 2024, primarily due to a decrease in our loan yield caused by the lower general level of interest rates and an increase in the proportion of higher-cost financing, which led to an increase in our average funding costs.

### *Comparison of 2023 to 2022*

#### Interest Income

Our interest income increased by 48.3% from ₩13,347 billion in 2022 to ₩19,793 billion in 2023, primarily due to a 45.6% increase in interest income from loans as a result of the higher general level of interest rates in Korea in 2023 compared to 2022, coupled with an increase in the average balance of loans. On a separate basis, the average balance of our interest-earning assets increased from ₩382,346 billion in 2022 to ₩403,446 billion in 2023, principally due to an increase in the average balance of loans from ₩305,379 billion in 2022 to ₩317,121 billion in 2023 and an increase in the average balance of securities from ₩61,394 billion in 2022 to ₩71,647 billion in 2023. Such increases in the average balance of loans and securities were primarily due to our efforts to attract new customers. On a separate basis, our average yields on interest-earning assets (defined, on a separate basis, as interest divided by the average balance of interest-earning assets) increased from 3.13% in 2022 to 4.51% in 2023, primarily due to the higher general level of interest rates in Korea in 2023 compared to 2022.

## Interest Expenses

Our interest expenses increased by 106.9% from ₩5,739 billion in 2022 to ₩11,876 billion in 2023, primarily due to a 114.4% increase in interest expense on deposit liabilities as a result of the higher general level of interest rates in Korea in 2023 compared to 2022 and an increase in the average balance of deposits. On a separate basis, the average balance of our interest-bearing liabilities increased from ₩374,431 billion in 2022 to ₩392,868 billion in 2023. The increase in the average balance of our interest-bearing liabilities was principally due to an increase in the average balance of deposits from ₩318,855 billion in 2022 to ₩338,366 billion in 2023, which was mainly due to an increase in bank savings deposits as a result of higher interest rates and increased uncertainties of global economy. On a separate basis, the average cost of our interest-bearing liabilities increased from 1.54% in 2022 to 2.99% in 2023, primarily due to the higher general level of interest rates in Korea in 2023 compared to 2022.

## Net Interest Margin

Our net interest margin on a separate basis decreased from 1.62% in 2022 to 1.59% in 2023, primarily due to a 5.5% increase in the average balance of interest-earning assets outpaced a 3.9% increase in our net interest income. Our net interest spread on a separate basis decreased from 1.59% in 2022 to 1.51% in 2023, primarily due to the fact that the financial instruments we utilise for fund management have relatively shorter terms of interest rate period and therefore the effect of an increase in base interest rates was reflected quickly, whereas the same effect was slow to be reflected in the interest-bearing liabilities which have relatively longer terms.

## Net Fees and Commission Income

The following table sets forth the components of our net fees and commission income for the periods indicated, as well as changes in these components over such periods in percentage terms.

|                                          | Year Ended 31 December      |             |              | Six Months Ended 30 June |             | Percentage Change   |               |                   |
|------------------------------------------|-----------------------------|-------------|--------------|--------------------------|-------------|---------------------|---------------|-------------------|

| Net fees and commission income . . . . . | <u>₩594</u>                 | <u>₩661</u> | <u>₩ 744</u> | <u>₩385</u>              | <u>₩396</u> | 11.4%               | 12.5%         | 2.9%              |

## Comparison of the First Six Months of 2025 to the First Six Months of 2024

Our net fees and commission income increased by 2.9% from ₩385 billion in the six months ended 30 June 2024 to ₩396 billion in the six months ended 30 June 2025, as the increase in fees and commission income from ₩520 billion in the six months ended 30 June 2024 to ₩543 billion in the six months ended 30 June 2025 outpaced the increase in fees and commission expenses from ₩135 billion in the six months ended 30 June 2024 to ₩147 billion in the six months ended 30 June 2025. The increase in fees and commission income was mainly attributable to a 2.6% increase in commissions received from loans and others from ₩339 billion in the six months ended 30 June 2024 to ₩347 billion in the six months ended 30 June 2025. The increase in commissions received from loans and others was due to an increase in our wealth management fees, primarily driven by bancassurance commissions resulting from revitalised sales activities. The increase in fees and commission expenses was primarily due to a 11.8% increase in commissions paid from ₩104 billion in the six months ended 30 June 2024 to ₩116 billion in the six months ended 30 June 2025. The increase in commissions paid was due to an overall increase in our commission expenses, including partnership-related fees.

## Comparison of 2024 to 2023

Our net fees and commission income increased by 12.5% from ₩661 billion in 2023 to ₩744 billion in 2024, as the 10.2% increase in fees and commission income from ₩932 billion in 2023 to ₩1,026 billion in 2024 outpaced the 4.6% increase in fees and commission expenses from ₩270 billion in 2023 to ₩282 billion in 2024. The increase in fees and commission income was mainly attributable to an 12.5% increase in commissions received from loans and others from ₩581 billion in 2023 to ₩654 billion in 2024. The increase in commissions received from loans and others was due to increases in commissions from our pension products and investment banking operations. The increase in fees and commission expenses was primarily due to a 3.2% increase in commissions paid for borrowings and others from ₩212 billion in 2023 to ₩219 billion in 2024.

### Comparison of 2023 to 2022

Our net fees and commission income increased by 11.4% from ₩594 billion in 2022 to ₩661 billion in 2023, as fees and commission income increased by 6.5% from ₩875 billion in 2022 to ₩932 billion in 2023, while fees and commission expenses decreased by 3.9% from ₩281 billion in 2022 to ₩270 billion in 2023. The increase in fees and commission income was mainly attributable to an 11.4% increase in commissions received from loans and others from ₩522 billion in 2022 to ₩581 billion in 2023. The increase in commissions received from loans and others was due to increases in commissions from our bancassurance and trust account operations. The decrease in fees and commission expenses was primarily due to a 6.4% decrease in commissions paid borrowings and others from ₩227 billion in 2022 to ₩212 billion in 2023.

### Net Gain (Loss) on Financial Instruments

The following table sets forth the components of our net gain (loss) on financial instruments for the periods indicated, as well as changes in these components over such periods in percentage terms.

|                                                                            | Year Ended 31 December |      |      | Six Months Ended 30 June |      | Percentage Change |               |                   |
|----------------------------------------------------------------------------|------------------------|------|------|--------------------------|------|-------------------|---------------|-------------------|
|                                                                            | 2022                   | 2023 | 2024 | 2024                     | 2025 | 2022/<br>2023     | 2023/<br>2024 | 1H2024/<br>1H2025 |
|                                                                            | (In billions of Won)   |      |      |                          |      | (percentage)      |               |                   |
| Net gain on financial instruments at FVTPL .....                           | ₩125                   | ₩492 | ₩ 99 | ₩136                     | ₩536 | 293.6%            | (79.9)%       | 295.3%            |

| Net gain on financial instruments at FVOCI .....                           | 2                      | 84   | 160  | 98                       | 120  | N.M.              | 89.9          | 21.4              |
| Net gain on financial instruments at amortised cost .....                  | 0                      | 0    | 0    | 0                        | —    | N.M.              | N.M.          | N.M.              |
| Total net gain on financial instruments .....                              | ₩ 63                   | ₩603 | ₩197 | ₩199                     | ₩757 | 852.0%            | (67.4)%       | 279.9%            |

N.M. means not meaningful.

### Comparison of the First Six Months of 2025 to the First Six Months of 2024

Our net gain on financial instruments increased by 279.9% from ₩199 billion in the six months ended 30 June 2024 to ₩757 billion in the six months ended 30 June 2025. Such increase was primarily attributable to an increase in net gain on financial instruments at fair value through profit or loss from ₩136 billion in the six months ended 30 June 2024 to ₩536 billion in the six months ended 30 June 2025, which was due to a decrease in losses related to foreign currency denominated derivative financial instruments caused by favourable fluctuations in foreign exchange rates.

### Comparison of 2024 to 2023

Our net gain on financial instruments decreased by 67.4% from ₩603 billion in 2023 to ₩197 billion in 2024. Such decrease was primarily attributable to a decrease in net gain on financial instruments at fair value through profit or loss from ₩492 billion in 2023 to ₩99 billion in 2024, which was due to an increase in losses related to foreign currency denominated derivative financial instruments caused by adverse fluctuations in foreign exchange rates.

### Comparison of 2023 to 2022

Our net gain on financial instruments increased by 852.0% from ₩63 billion in 2022 to ₩603 billion in 2023. Such increase was primarily attributable to an increase in net gain on financial instruments at fair value through profit or loss from ₩125 billion in 2022 to ₩492 billion in 2023, which was due to an increase in gains from currency- and interest-related transaction and valuations, resulting from fluctuations in exchange rates and favourable interest rate movements in 2023.

### ***Provision for Allowance for Credit Loss***

Provision for allowance for credit loss includes provision (reversal) of credit loss of debt securities at fair value through other comprehensive income, provision for possible loan loss for debt for securities at amortised cost, provision for bad debts of loan losses and provision for bad debts of other asset losses.

#### ***Comparison of the First Six Months of 2025 to the First Six Months of 2024***

Our provision for allowance for credit loss increased by 70.9% from ₩140 billion in the six months ended 30 June 2024 to ₩239 billion in the six months ended 30 June 2025. Such increase was primarily attributable to a 79.2% increase in provision of allowance for loss of loan receivables from ₩133 billion in the six months ended 30 June 2024 to ₩238 billion in the six months ended 30 June 2025, which was mainly caused by the base effect of large-scale reversals in the six months ended 30 June 2024, including the reversal related to the sale of our equity interests in Hanwha Ocean, whereas no such reversals occurred in the same period in 2025.

#### ***Comparison of 2024 to 2023***

Our provision for allowance for credit loss decreased by 48.0% from ₩658 billion in 2023 to ₩343 billion in 2024. Such decrease was primarily attributable to a 54.1% decrease in provision for bad debts of loan losses from ₩690 billion in 2023 to ₩316 billion in 2024, which was mainly caused by large-scale reversals in 2024, including the reversal related to the sale of our equity interests in Hanwha Ocean.

#### ***Comparison of 2023 to 2022***

Our provision for allowance for credit loss remained relatively stable, increasing by 0.1% from ₩658 billion in 2022 to ₩658 billion in 2023.

### ***General and Administrative Expenses***

#### ***Comparison of the First Six Months of 2025 to the First Six Months of 2024***

Our general and administrative expenses in the six months ended 30 June 2025 was ₩1,739 billion, which increased from ₩1,668 billion in the six months ended 30 June 2024. Specifically:

- Retirement benefits-defined benefit plans increased by 15.6% from ₩72 billion in the six months ended 30 June 2024 to ₩83 billion in the six months ended 30 June 2025, primarily due to an increase in the valuation of retirement benefit obligations caused by a decline in market interest rates.
- Termination benefits increased substantially from ₩0 billion in the six months ended 30 June 2024 to ₩85 billion in the six months ended 30 June 2025, primarily due to the recognition in the six months ended 30 June 2025 of accrued expenses related to voluntary retirement benefits incurred in 2024, which arose from a timing difference in accounting expense recognition.
- Employee welfare benefits increased by 17.2% from ₩37 billion in the six months ended 30 June 2024 to ₩43 billion in the six months ended 30 June 2025, primarily due to the recognition in the six months ended 30 June 2025 of accrued expenses incurred in 2024, which arose from a timing difference in accounting expense recognition.
- Depreciation increased by 4.0% from ₩197 billion in the six months ended 30 June 2024 to ₩205 billion in the six months ended 30 June 2025, primarily due to an increase in assets related to the establishment of next-generation IT systems and facilities from expanded construction activities for new specialised branches, such as Culture Bank.
- Amortisation increased by 17.4% from ₩62 billion in the six months ended 30 June 2024 to ₩73 billion in the six months ended 30 June 2025, primarily due to an increase in intangible assets related to the establishment of next-generation IT systems.

Such increases in general and administrative expenses were partially offset by a decrease in advertising expenses by 30.3% from ₩64 billion in the six months ended 30 June 2024 to ₩45 billion in the six months ended 30 June 2025, primarily due to a reduced budget for indirect advertising activities in the six months ended 30 June 2025, compared to the same period in 2024.

### Comparison of 2024 to 2023

Our general and administrative expenses in 2024 was ₩3,479 billion, which increased from ₩3,449 billion in 2023. Specifically:

- Salaries increased by 3.6% from ₩1,655 billion in 2023 to ₩1,714 billion in 2024, primarily due to an increase in the number of our employees as part of our efforts to enhance our sales capability.
- Retirement benefits-DB increased by 15.3% from ₩127 billion in 2023 to ₩146 billion in 2024, primarily due to an increase in the valuation of retirement benefit obligations caused by a decline in market interest rates.
- Depreciation increased by 2.9% from ₩395 billion in 2023 to ₩406 billion in 2024, primarily due to an increase in intangible assets related to the establishment of next-generation IT systems and expanded construction activities for new specialised branches, such as Culture Bank.
- Amortisation increased by 22.2% from ₩109 billion in 2023 to ₩133 billion in 2024, primarily due to an increase in our intangible assets related to the establishment of the next-generation IT system.
- Advertising expenses increased by 12.6% from ₩183 billion in 2023 to ₩206 billion in 2024, primarily due to increases in promotion and sales support for the launch of our new financial products.

Such increase in general and administrative expenses was partially offset by a decrease in termination benefits by 76.9% from ₩128 billion in 2023 to ₩29 billion in 2024, and a decrease in employee welfare by 12.5% from ₩104 billion in 2023 to ₩91 billion in 2024, both of which are attributable to the base effect resulting from accrued expenses recognised in 2023 for expenses incurred in 2022, reflecting a timing difference in accounting expense recognition.

### Comparison of 2023 to 2022

Our general and administrative expenses in 2023 was ₩3,449 billion, which increased from ₩3,319 billion in 2022. Specifically:

- Depreciation increased by 15.4% from ₩342 billion in 2022 to ₩395 billion in 2023, primarily due to an increase in intangible assets resulting from the recent expansion of our IT investments and a one-time increase in depreciation expense related to the disposal of our old headquarters building.
- Salaries increased by 2.5% from ₩1,615 billion in 2022 to ₩1,655 billion in 2023, primarily due to an increase in the number of employees as part of our efforts to enhance our sales capability and an increase in the salary base of our employees.

Such increase in general and administrative expenses was partially offset by a decrease in termination benefits by 27.9% from ₩177 billion in 2022 to ₩128 billion in 2023, primarily due to the base effect of the one-time implementation of a retirement programme in 2022.

### Other Operating Income (Expenses)

The following table sets forth the components of our net other operating income (expenses) for the periods indicated, as well as changes in these components over such periods in percentage terms.

|                                              | Year Ended 31 December |         |         | Six Months Ended 30 June |         | Percentage Change |               |                   |
|----------------------------------------------|------------------------|---------|---------|--------------------------|---------|-------------------|---------------|-------------------|
|                                              | 2022                   | 2023    | 2024    | 2024                     | 2025    | 2022/<br>2023     | 2023/<br>2024 | 1H2024/<br>1H2025 |
|                                              | (In billions of Won)   |         |         |                          |         | (percentage)      |               |                   |
| Other operating income . . . . .             | ₩7,616                 | ₩7,934  | ₩7,722  | ₩3,230                   | ₩4,377  | 4.2%              | (2.7)%        | 35.5%             |
| Other operating expenses . . . . .           | 7,838                  | 8,403   | 8,033   | 3,386                    | 4,786   | 7.2               | (4.4)         | 41.3              |
| Total net other operating expenses . . . . . | ₩ (223)                | ₩ (469) | ₩ (311) | ₩ (156)                  | ₩ (409) | 110.8%            | (33.8)%       | 162.1%            |

The principal component of our other operating income is gain on foreign exchange transaction. Other items that comprise our other operating income include gain on disposal of loans, reversal of provisions for payment guarantees, reversal of allowances for unused commitments, trust commissions, gain on merchant banking accounts and dividend income.

The principal component of our other operating expenses is loss on foreign exchange transaction. Other items that comprise our other operating expenses include loss on disposal of loans, provision for payment guarantees, provision for unused commitments, other provisions, contribution to Korea Credit Guarantee Fund, insurance fee on deposit and merchant banking accounts expenses.

#### *Comparison of the First Six Months of 2025 to the First Six Months of 2024*

Our net other operating expenses increased by 162.1% from ₩156 billion in the six months ended 30 June 2024 to ₩409 billion in the six months ended 30 June 2025.

Our other operating income increased by 35.5% from ₩3,230 billion in the six months ended 30 June 2024 to ₩4,377 billion in the six months ended 30 June 2025, primarily due to a 40.9% increase in gain on foreign exchange transaction from ₩2,924 billion in the six months ended 30 June 2024 to ₩4,118 billion in the six months ended 30 June 2025 as a result of fluctuations in foreign exchange rates.

Our other operating expenses increased by 41.3% from ₩3,386 billion in the six months ended 30 June 2024 to ₩4,786 billion in the six months ended 30 June 2025, primarily due to an increase in loss on foreign exchange transaction from ₩2,770 billion in the six months ended 30 June 2024 to ₩4,099 billion in the six months ended 30 June 2025, which was mainly caused by fluctuations in foreign exchange rates.

On a net basis, our net gain on foreign exchange transaction decreased by 87.6% from ₩154 billion in the six months ended 30 June 2024 to ₩19 billion in the six months ended 30 June 2025. In terms of the Market Average Exchange Rate, the Won depreciated from Won 1,289.4 to US\$1.00 as of 31 December 2023 to Won 1,389.2 to US\$1.00 as of 30 June 2024, while it appreciated from Won 1,470.0 to US\$1.00 as of 31 December 2024 to Won 1,356.4 to US\$1.00 as of 30 June 2025. In addition, the average value of the Market Average Exchange Rate depreciated from Won 1,349.5 to US\$1.00 in the six months ended 30 June 2024 to Won 1,427.9 to US\$1.00 in the six months ended 30 June 2025.

#### *Comparison of 2024 to 2023*

Our net other operating expenses decreased by 33.8% from ₩469 billion in 2023 to ₩311 billion in 2024.

Our other operating income decreased by 2.7% from ₩7,934 billion in 2023 to ₩7,722 billion in 2024, primarily due to a 3.8% decrease in gain on foreign exchange transaction from ₩7,375 billion in 2023 to ₩7,093 billion in 2024 as a result of fluctuations in foreign exchange rates.

Our other operating expenses decreased by 4.4% from ₩8,403 billion in 2023 to ₩8,033 billion in 2024, primarily due to a 5.6% decrease in loss on foreign exchange transaction from ₩7,035 billion in 2023 to ₩6,642 billion in 2024, which was mainly caused by fluctuations in foreign exchange rates.

On a net basis, our net gain on foreign exchange transaction increased by 33.0% from ₩339 billion in 2023 to ₩451 billion in 2024. In terms of the Market Average Exchange Rate, the Won depreciated from Won 1,289.4 to US\$1.00 as of 31 December 2023 to Won 1,470.0 to US\$1.00 as of 31 December 2024. In 2024, the Market Average Exchange Rate ranged between Won 1,289.4 and Won 1,474.1 per US\$1.00.

#### *Comparison of 2023 to 2022*

Our net other operating expenses increased by 110.8% from ₩223 billion in 2022 to ₩469 billion in 2023.

Our other operating income increased by 4.2% from ₩7,616 billion in 2022 to ₩7,934 billion in 2023, primarily due to a 2.9% increase in gain on foreign exchange transaction from ₩7,170 billion in 2022 to ₩7,375 billion in 2023 as a result of fluctuations in foreign exchange rate.

Our other operating expenses increased by 7.2% from ₩7,838 billion in 2022 to ₩8,403 billion in 2023, primarily due to an increase in provision for other allowances from nil in 2022 to ₩182 billion in 2023 and a 3.5% increase in loss on foreign exchange transaction from ₩6,794 billion in 2022 to ₩7,035 billion in 2023. The increase in provision of payment guarantees transferred was mainly due to new allowances we set aside in response to our participation in the Government-led initiatives, together with other commercial banks in Korea, to commit a relief measure to relieve the financially vulnerable groups affected by the COVID-19 pandemic of the burden of high-interest rates. The increase in loss on foreign exchange transaction was mainly due to fluctuations in foreign exchange rate.

On a net basis, our net gain on foreign exchange transaction decreased by 9.7% from ₩376 billion in 2022 to ₩339 billion in 2023. In terms of the Market Average Exchange Rate, the Won depreciated from Won 1,267.3 to US\$1.00 as of 31 December 2022 to Won 1,289.4 to US\$1.00 as of 31 December 2023. In 2023, the Market Average Exchange Rate ranged between Won 1,219.3 and Won 1,360.6 per US\$1.00.

### *Non-operating Income (Expenses)*

Non-operating income principally includes rental fee income, gain on disposal of property, plant and equipment, gain on disposal of investment properties, gain on disposal of non-current assets held for sale, gain on disposal of investments in associates and joint ventures, gain on equity method and gain on termination of right-of-use assets.

Non-operating expenses principally include loss on disposal of property, plant and equipment, loss on impairment of property, plant and equipment, loss on impairment of intangible assets, impairment loss on non-current assets held for sale, loss on equity method, collection expenses for written-off claims, collection commissions for written-off claims, loss on disposal of investments in associates and joint ventures, loss on termination of lease assets, donations and others.

### *Comparison of the First Six Months of 2025 to the First Six Months of 2024*

We recorded net non-operating income of ₩87 billion in the six months ended 30 June 2025, compared to net non-operating expense of ₩109 billion in the six months ended 30 June 2024.

Our non-operating income increased by 3.7% from ₩144 billion in the six months ended 30 June 2024 to ₩149 billion in the six months ended 30 June 2025, primarily due to a ₩14 billion increase in gain on disposal of investment properties, mainly caused by a one-time gain recognised in the six months ended 30 June 2025 from the disposal of one of our branch buildings in connection with its reconstruction, as well as a ₩14 billion increase in gain on disposal of investments in associates and joint ventures, mainly caused by disposal gains arising from changes in our ownership interests in associates, including BIDV and Bank of Jilin, following their capital increases through third-party allotments. Such increase was partially offset by a ₩39 billion decrease in gain on equity method, primarily attributable to a decrease in the earnings of BIDV.

Our non-operating expenses decreased by 75.4% from ₩253 billion in the six months ended 30 June 2024 to ₩62 billion in the six months ended 30 June 2025, primarily due to a ₩92 billion decrease in donations, mainly caused by the base effect of our financial support for financially vulnerable groups in the six months ended 30 June 2024, as part of our commitment to the joint relief measure among major commercial banks in Korea and the Government, as well as a ₩95 billion decrease in other non-operating expenses primarily due to the base effect of the loss reserves we set aside for compensation of losses from HK ELS Products (defined in “KEB Hana Bank—Legal and Regulatory Proceedings”) which were recognised in the six months ended 30 June 2024.

### *Comparison of 2024 to 2023*

We recorded net non-operating expenses of ₩128 billion in 2024, compared to net non-operating income of ₩8 billion in 2023.

Our non-operating income increased by 22.7% from ₩223 billion in 2023 to ₩273 billion in 2024, primarily due to a ₩26 billion increase in gain on equity method, mainly caused by an increase in the valuation of our domestic investments.

Our non-operating expenses increased by 86.4% from ₩215 billion in 2023 to ₩401 billion in 2024, primarily due to a ₩109 billion increase in donations mainly caused by an increase in our financial support for financially vulnerable groups as part of the joint relief initiative by major commercial banks in Korea and the Government in 2024, as well as a ₩78 billion increase in other non-operating expenses primarily due to loss reserves we set aside in March 2024 in connection with the sale of HK ELS Products.

### *Comparison of 2023 to 2022*

Our net non-operating income decreased by 92.8% from ₩105 billion in 2022 to ₩8 billion in 2023.

Our non-operating income decreased by 16.7% from ₩267 billion in 2022 to ₩223 billion in 2023, primarily due to a ₩42 billion decrease in gain on equity method, mainly caused by a decrease in profit of BIDV, our equity investee in Vietnam.

Our non-operating expenses increased by 32.4% from ₩162 billion in 2022 to ₩215 billion in 2023, primarily due to a ₩67 billion increase in donations, mainly caused by our efforts to strengthen ESG management.

### ***Income Tax Expenses***

#### *Comparison of the First Six Months of 2025 to the First Six Months of 2024*

Our income tax expenses increased by 3.1% from ₩637 billion in the six months ended 30 June 2024 to ₩657 billion in the six months ended 30 June 2025, primarily due to a 37.7% increase in current income taxes from ₩528 billion in the six months ended 30 June 2024 to ₩727 billion in the six months ended 30 June 2025, which was partially offset by the changes in deferred tax assets of ₩163 billion in the six months ended 30 June 2024 to the changes in deferred tax liabilities of ₩1 billion in the six months ended 30 June 2025. Our effective income tax rate, which represents income tax expenses divided by income before tax expenses, was 26.6% in the six months ended 30 June 2024 and 23.9% in the six months ended 30 June 2025, compared to the maximum statutory tax rate of 26.4% in Korea for both periods.

See Note 47 of the notes to our consolidated financial statements for the six months ended 30 June 2025 and 2024 included elsewhere in this Offering Circular.

#### *Comparison of 2024 to 2023*

Our income tax expenses decreased by 6.7% from ₩1,126 billion in 2023 to ₩1,051 billion in 2024, primarily due to a 27.4% decrease in the changes in deferred tax assets from ₩433 billion in 2023 to ₩315 billion in 2024, which was partially offset by a decrease in income tax directly recognised in equity from ₩163 billion in 2023 to ₩120 billion in 2024. Our effective income tax rate was 24.4% in 2023 and 23.8% in 2024, compared to the maximum statutory tax rate of 26.4% in Korea for both periods.

See Note 47 of the notes to our consolidated financial statements for the years ended 31 December 2024 and 2023 included elsewhere in this Offering Circular.

#### *Comparison of 2023 to 2022*

Our income tax expenses increased by 6.2% from ₩1,060 billion in 2022 to ₩1,126 billion in 2023, primarily due to the effect of recognising changes in deferred tax assets of ₩433 billion in 2023, compared to changes in deferred tax liabilities of ₩282 billion in 2022, which was partially offset by a 19.7% decrease in current income taxes from ₩1,214 billion in 2022 to ₩975 billion in 2023. Our effective income tax rate was 25.4% in 2022 and 24.4% in 2023, compared to the maximum statutory tax rate of 27.5% and 26.4% in Korea in 2022 and 2023, respectively.

See Note 47 of the notes to our consolidated financial statements for the years ended 31 December 2023 and 2022 included elsewhere in this Offering Circular.

### ***Net Income for the Year/Period***

Due to the factors described above, our net income for the year was ₩3,112 billion in 2022, ₩3,487 billion in 2023 and ₩3,369 billion in 2024. Our net income for the period was ₩1,757 billion for the first six months of 2024 and ₩2,094 billion for the first six months of 2025.

## Financial Condition

### Assets

The following table sets forth the principal components of our assets as of the dates indicated, as well as changes in these components over such dates in percentage terms.

(1) Includes investments in associates and a joint venture, investment properties, intangible assets, net defined benefit assets, current tax assets, deferred tax assets, other assets, merchant banking account assets and non-current assets held for sale.

For further information on our assets, see “Description of Assets and Liabilities.”

### Comparison as of 30 June 2025 to 31 December 2024

Our total assets decreased by 0.1% from ₩532,418 billion as of 31 December 2024 to ₩531,704 billion as of 30 June 2025, mainly due to decreases in cash and due from banks, financial assets at fair value through profit or loss, financial assets at fair value through other comprehensive income and securities at amortised cost. Our cash and due from banks decreased by 12.6% from ₩35,033 billion as of 31 December 2024 to ₩30,621 billion as of 30 June 2025, primarily due to a decrease in our foreign currency-denominated due from banks resulting from fluctuations in exchange rates. Our financial assets at fair value through profit or loss decreased by 14.1% from ₩30,865 billion as of 31 December 2024 to ₩26,498 billion as of 30 June 2025, primarily due to a decrease in our foreign currency derivative financial instruments resulting from fluctuations in exchange rates. Our financial assets at fair value through other comprehensive income decreased by 4.9% from ₩37,911 billion as of 31 December 2024 to ₩36,061 billion as of 30 June 2025, primarily due to our disposal of financial assets to realise trading gains amid declining market interest rates. Our securities at amortised cost decreased by 8.4% from ₩33,966 billion as of 31 December 2024 to ₩31,128 billion as of 30 June 2025, primarily due to securities reaching their maturities. Such decreases were partially offset by a 90.5% increase in other assets from ₩15,376 billion as of 31 December 2024 to ₩29,292 billion as of 30 June 2025, which was mainly caused by an increase in our receivables from unsettled foreign exchange spot transactions.

### Comparison as of 31 December 2024 to 31 December 2023

Our total assets increased by 6.7% from ₩498,843 billion as of 31 December 2023 to ₩532,418 billion as of 31 December 2024, mainly due to increases in loans and financial assets at fair value through profit or loss. Our cash and due from banks increased by 14.6% from ₩30,564 billion as of 31 December 2023 to ₩35,033 billion as of 31 December 2024, primarily due to an increase in the amount of reserves on deposits in compliance with enhanced regulatory requirements, as well as an increase in foreign currency-denominated due from banks caused by fluctuations in exchange rates. Our loans increased by 5.8% from ₩347,247 billion as of 31 December 2023 to ₩367,214 billion as of 31 December 2024, primarily due to an increase in loans extended to corporate and household borrowers. Our financial assets at fair value through profit or loss increased by 76.2% from ₩17,515 billion as of 31 December 2023 to ₩30,865 billion as of 31 December 2024, primarily due to an increase in our bond purchases in anticipation of a decrease in the general level of interest rates, as well as an increase in our foreign currency derivative financial instruments caused by fluctuations in exchange rates. Such increases were partially offset by a 6.5% decrease in securities at amortised cost from ₩36,338 billion as of 31 December 2023 to ₩33,966 billion as of 31 December 2024, which was mainly caused by securities reaching

their maturities and a 17.5% decrease in other assets from ₩18,634 billion as of 31 December 2023 to ₩15,376 billion as of 31 December 2024, which was mainly caused by a decrease in our receivables from unsettled foreign exchange spot transactions.

*Comparison as of 31 December 2023 to 31 December 2022*

Our total assets increased by 2.8% from ₩485,308 billion as of 31 December 2022 to ₩498,843 billion as of 31 December 2023, mainly due to increases in loans and financial assets at fair value through other comprehensive income. Our loans increased by 5.2% from ₩330,186 billion as of 31 December 2022 to ₩347,247 billion as of 31 December 2023, primarily due to an increase in loans extended to corporate borrowers. Our financial assets at fair value through other comprehensive income increased by 11.9% from ₩32,961 billion as of 31 December 2022 to ₩36,894 billion as of 31 December 2023, primarily due to our proactive efforts to enhance our gains in the high-interest-rate environment. Such increases were partially offset by a 3.3% decrease in securities at amortised cost from ₩37,583 billion in 2022 to ₩36,338 billion in 2023, primarily due to bonds reaching maturity.

**Liabilities and Equity**

The following table sets forth the principal components of our liabilities and equity as of the dates indicated, as well as changes in these components over such dates in percentage terms.

|                                          | As of 31 December    |                 |                 | As of 30 June   | Percentage Change |               |                                      |

(1) Includes net defined benefit liabilities, provisions, current tax liabilities, deferred tax liabilities, other liabilities and merchant banking account liabilities.

For further information on our liabilities, see “Description of Assets and Liabilities.”

*Comparison as of 30 June 2025 to 31 December 2024*

Our total liabilities decreased by 0.3% from ₩498,175 billion as of 31 December 2024 to ₩496,607 billion as of 30 June 2025, principally as a result of decreases in deposits and financial liabilities at fair value through profit

or loss. Our deposits decreased by 2.8% from ₩387,192 billion as of 31 December 2024 to ₩376,217 billion as of 30 June 2025, primarily due to our efforts to improve the procurement portfolio to enhance interest income, including a shift from certificates of deposit to core low-cost deposits, and the flexible management of funding volume in line with the pace of asset growth. Our financial liabilities at fair value through profit or loss decreased by 51.6% from ₩15,176 billion as of 31 December 2024 to ₩7,345 billion as of 30 June 2025, primarily due to fluctuations in exchange rates. Such decreases were partially offset by a 12.9% increase in borrowings from ₩24,257 billion as of 31 December 2024 to ₩27,398 billion as of 30 June 2025, which was mainly caused by an increase in our sale of repurchase agreements, reflecting higher demand from the Bank of Korea for repurchase agreement purchases as part of its liquidity management activities, as well as a 38.8% increase in other liabilities from ₩35,574 billion as of 31 December 2024 to ₩49,362 billion as of 30 June 2025, which was mainly caused by an increase in our payables from unsettled foreign exchange spot transactions. Our total equity increased by 2.5% from ₩34,243 billion as of 31 December 2024 to ₩35,097 billion as of 30 June 2025, primarily due to an increase in retained earnings from ₩22,732 billion as of 31 December 2024 to ₩23,809 billion as of 30 June 2025 as a result of an increase in our net income.

#### *Comparison as of 31 December 2024 to 31 December 2023*

Our total liabilities increased by 6.7% from ₩466,759 billion as of 31 December 2023 to ₩498,175 billion as of 31 December 2024, principally as a result of increases in deposits and financial liabilities at fair value through profit or loss and, to a lesser extent, increases in borrowings and debentures. Our deposits increased by 4.7% from ₩369,749 billion as of 31 December 2023 to ₩387,192 billion as of 31 December 2024, primarily due to an increase in bank savings deposits as a result of increased uncertainties of global economy. Our financial liabilities at fair value through profit or loss increased by 125.5% from ₩6,729 billion as of 31 December 2023 to ₩15,176 billion as of 31 December 2024, primarily due to an increase in foreign currency derivative financial liabilities caused by fluctuations in exchange rates. Our borrowings increased by 10.1% from ₩22,034 billion as of 31 December 2023 to ₩24,257 billion as of 31 December 2024, primarily due to an increase in our financing amount to mitigate interest rate risks and comply with regulatory liquidity requirements, as well as an increase in foreign currency-denominated borrowings caused by fluctuations in exchange rates. Our debentures increased by 12.2% from ₩26,542 billion as of 31 December 2023 to ₩29,779 billion as of 31 December 2024, primarily due to an increase in our financial bond issuance in anticipation of a benchmark interest rate cut. Our total equity increased by 6.7% from ₩32,084 billion as of 31 December 2023 to ₩34,243 billion as of 31 December 2024, primarily due to an increase in retained earnings from ₩21,050 billion as of 31 December 2023 to ₩22,732 billion as of 31 December 2024 as a result of the excess of net income over dividends paid in 2024, which increased retained earnings despite lower net income in 2024 compared to in 2023.

#### *Comparison as of 31 December 2023 to 31 December 2022*

Our total liabilities increased by 2.5% from ₩455,342 billion as of 31 December 2022 to ₩466,759 billion as of 31 December 2023, primarily due to a 2.7% increase in deposits from ₩359,858 billion in 2022 to ₩369,749 billion in 2023. The increase in deposits was due to an increase in bank savings deposits as a result of higher interest rates and increased uncertainties of global economy. Such increase was partially offset by a 40.1% decrease in financial liabilities at fair value through profit or loss from ₩11,228 billion in 2022 to ₩6,729 billion in 2023, which was mainly caused by the fluctuations in interest rates and changes in our liability management structure to respond to such fluctuations. Our total equity increased by 7.1% from ₩29,965 billion as of 31 December 2022 to ₩32,084 billion as of 31 December 2023, primarily due to an increase in retained earnings from ₩19,236 billion as of 31 December 2022 to ₩21,050 billion as of 31 December 2023 as a result of an increase in our net income.

#### ***Liquidity and Capital Resources***

We are exposed to liquidity risk arising from withdrawals of deposits and maturities of our borrowings and debentures, as well as our need to fund our lending, trading and investment activities and to manage our trading positions. Our goal in managing liquidity is to be able, even under adverse conditions, to meet all of our liability repayments on time and to fund all investment opportunities. For a discussion of how we manage liquidity risk, see “Risk Management — Market Risk Management — Non-Trading Activities — Liquidity Risk Management” and Note 8 of the notes to our consolidated financial statements appearing elsewhere in this Offering Circular. In our opinion, we have sufficient working capital to meet our requirements for the next 12 months.

The following table sets forth our source of capital as of the dates indicated.

|                                                    | As of 31 December           |                 |                 | As of 30 June   |
|----------------------------------------------------|-----------------------------|-----------------|-----------------|-----------------|
|                                                    | 2022                        | 2023            | 2024            | 2025            |

| Total .....                                        | <u>₩413,714</u>             | <u>₩423,692</u> | <u>₩446,593</u> | <u>₩438,958</u> |

Our primary source of funding has historically been and continues to be customer deposits. Deposits amounted to ₩359,858 billion as of 31 December 2022, ₩369,749 billion as of 31 December 2023, ₩387,192 billion as of 31 December 2024 and ₩376,217 billion as of 30 June 2025, which represented 87.0%, 87.3%, 86.7% and 85.7%, respectively, of our total funding (as presented above) as of each relevant date.

As customers typically roll over a substantial majority of deposits upon maturity, deposits have generally been a stable source of funding for us. However, in times of a bullish stock market, customers tend to transfer a significant amount of bank deposits to alternative investment products, such as money market funds and other brokerage accounts maintained at securities companies, in search of higher returns, which may result in temporary difficulties in finding sufficient funding for Korean banks in general, including us. On the other hand, when the economy shows signs of slowing down, customers generally revert back to bank deposits as their investment priorities shift to maintaining the safety of their principal and stable returns, and deposits also increase due to an overall increase in liquidity from more expansionary fiscal and monetary policies designed to stimulate the economy. We cannot assure you that there will not be significant outflows in bank deposits in the future resulting from upturns in the stock market, the availability of other attractive investment alternatives or a tightening in market liquidity. While we are not facing liquidity difficulties currently, if we are unable to obtain the funding we need on terms commercially acceptable to us for an extended period of time, we may not be able to ensure our financial viability, meet regulatory requirements, implement our strategies or compete effectively.

We may use secondary and other funding sources, such as issuances of debt and equity securities, denominated in both Won and foreign currencies, to complement, or if necessary, replace, funding through customer deposits. We depend on borrowings in foreign currencies as a significant source of funding, principally in the form of corporate debt securities denominated in foreign currencies. As of 31 December 2022, 2023 and 2024 and 30 June 2025, our borrowings in foreign currencies amounted to ₩10,045 billion, ₩9,519 billion, ₩10,510 billion and ₩9,597 billion, respectively. Secondary funding sources also include call money and debentures denominated in both Won and foreign currencies, which in the aggregate amounted to ₩27,204 billion, ₩27,476 billion, ₩31,071 billion and ₩31,546 billion as of 31 December 2022, 2023 and 2024 and 30 June 2025, respectively, representing 6.6%, 6.5%, 7.0% and 7.2% of our total funding (as presented above) as of each relevant date, respectively.

For a description of liquidity requirements, see “*Regulation and Supervision — Principal Regulations Applicable to Banks — Liquidity.*”

## Cash Flows

The following table sets forth, for the periods indicated, the principal components of our cash flows.

|                                                                   | Year Ended 31 December      |                 |                | Six Months Ended 30 June |                |
|-------------------------------------------------------------------|-----------------------------|-----------------|----------------|--------------------------|----------------|
|                                                                   | 2022                        | 2023            | 2024           | 2024                     | 2025           |
|                                                                   | <i>(In billions of Won)</i> |                 |                |                          |                |

| Cash and cash equivalents at the end of the year and period       | <u>₩ 38,500</u>             | <u>₩ 28,282</u> | <u>₩30,955</u> | <u>₩28,486</u>           | <u>₩28,811</u> |

## Contractual Obligations

In our ordinary course of business, we make certain contractual cash obligations and commitments which extend for several years. As we are able to obtain liquidity and funding through various sources as described in “— *Liquidity and Capital Resources*” above, we do not believe that these contractual cash obligations and commitments will have a material effect on our liquidity or capital resources. The following table sets forth our contractual cash obligations as of 30 June 2025.

| Payments Due by Period (as of 30 June 2025) |                   |                |                   |                  |                   |                |                 |
|---------------------------------------------|-------------------|----------------|-------------------|------------------|-------------------|----------------|-----------------|
| On Demand                                   | Less than 1 month | 1 – 3 months   | 3 months – 1 year | 1 year – 5 years | More than 5 years | Total          |                 |
| <i>(In billions of Won)</i>                 |                   |                |                   |                  |                   |                |                 |
| <b>On-balance accounts:</b>                 |                   |                |                   |                  |                   |                |                 |
| Financial liabilities at                    |                   |                |                   |                  |                   |                |                 |
| FVTPL                                       | ₩ 6,911           | ₩ —            | ₩ —               | ₩ —              | ₩ —               | ₩ 705          | ₩ 7,616         |

### ***Commitments and Guarantees***

For a description of our commitments and guarantees, see “*Description of Assets and Liabilities — Commitments and Guarantees.*”

### ***Off-Balance Sheet Arrangements***

We have several types of off-balance sheet arrangements, including guarantees for loans, bonds, trade financing arrangements, guarantees for other financings, credit lines, letters of credit and credit commitments.

Details of our off-balance sheet arrangements are provided in Note 8 of the notes to our consolidated financial statements included in this Offering Circular.

## KEB HANA BANK

### Introduction

We are one of the leading commercial banks in Korea in terms of total assets, revenues, profitability and capital adequacy. As of 30 June 2025, we had total assets, total net loans (after allowance for loan losses and net deferred origination fees and costs), total deposits and total equity of ₩531.7 trillion, ₩366.6 trillion, ₩376.2 trillion and ₩35.1 trillion, respectively.-

As a full-service financial institution, we operate an extensive nationwide and overseas banking network, consisting of 607 domestic branches and sub-branches, as well as 20 international branches, one sub-branch of such international branches, five overseas representative offices, 11 overseas subsidiaries and 74 sub-branches of such overseas subsidiaries as of 30 June 2025. Our overseas operations span across 26 countries outside of Korea, the most among all major commercial banks in Korea.

We also operated over 3,524 ATMs throughout Korea as of 30 June 2025, and offer Internet and mobile banking services. Through this nationwide and global network, we serve corporate and retail customers with a full complement of banking and financial services. We continue to hold strong market positions in the business segments where we have historically maintained competitive strengths, such as large corporate banking, foreign exchange and trade financing, and following the Merger, we have also gained a leading position in other business areas, such as retail banking, private banking and wealth management. Our leading presence in the market has been widely recognised by a number of significant industry awards over the years. In 2025, we received the “Best Private Bank in Korea” award from Euromoney Magazine and the “Best Bank in Korea”, the “Most Innovative Private Bank in the World”, the “Asia’s Best Foreign Exchange Bank” and the “Best Trade Finance Provider in Korea” awards from Global Finance Magazine. In 2024, we received the “Best Bank in Korea”, the “Best Trade Finance Provider in Korea”, the “Best Foreign Exchange Bank in Korea”, the “Best Private Bank in Korea” and the “Most Innovative Private Bank in the World” awards from Global Finance Magazine and the “Best Bank in Korea” and the “Best Private Bank in Korea” awards from Euromoney Magazine. In 2023, we received the “Best Private Bank in Korea” award from The Banker, the “Best Bank in Korea”, the “Best Sub-Custodian Bank in Korea”, the “Best Foreign Exchange Bank in Korea” and the “Best Trade Finance Provider in Korea” awards from Global Finance Magazine and the “Best Private Bank in Korea” award from Euromoney Magazine. In 2022, we received the “Best Bank in Korea”, the “Best Trade Finance Provider in Korea” and the “Best Private Bank in Korea” awards from Global Finance Magazine, the “Best Private Bank in Korea” award from Euromoney Magazine and the “Best Bank in Korea” and the “Innovation in Digital Banking” awards from The Banker.

### History

We were established in September 2015 through a merger of Original Hana Bank, the flagship commercial bank of Hana Financial Group, with Korea Exchange Bank, which was acquired by Hana Financial Group in February 2012 (the “**Merger**”). Upon completion of the Merger, Korea Exchange Bank as the surviving entity changed its name to KEB Hana Bank. In February 2020, we changed our brand name to “Hana Bank” while maintaining “KEB Hana Bank” as our legal name.

Original Hana Bank was founded in 1971 as Korea’s first short-term finance and investment company. It obtained a commercial banking licence in 1991 and evolved into a full-service commercial bank, serving on a nationwide basis the three principal Korean banking market segments: large corporates, SMEs and households. Original Hana Bank expanded its operations, assets and deposit and customer bases primarily through mergers and acquisitions. It acquired certain assets and liabilities of Chungchong Bank in June 1998 and merged with Boram Bank in January 1999. Through the merger with Boram Bank, Original Hana Bank also strengthened its leading position in the high net-worth individuals market segment. Original Hana Bank continued its expansion by merging with Seoul Bank, then one of the largest commercial banks in Korea, in December 2002. Following the introduction of the Financial Holding Companies Act of Korea, Hana Financial Group was established in December 2005 and Original Hana Bank became the wholly-owned principal banking subsidiary of the group.

Korea Exchange Bank was established in 1967, pursuant to the Korea Exchange Bank Act, as a wholly Government-owned bank specialising in the foreign exchange and international trade finance businesses. Until 1977, Korea Exchange Bank was the only Korean bank to offer trade financing and foreign exchange services. Following the loss of its monopoly in trade financing and foreign exchange, Korea Exchange Bank expanded its operations and diversified its activities to include a full range of commercial banking services, through expansion of its branch network and diversification of its customer base and financial product and

service offerings. Korea Exchange Bank was privatised in 1989 with the repeal of the Korea Exchange Bank Act, and its shares were first offered for public ownership in 1991. Its common stock, which was listed on the KRX KOSPI Market in 1994, was delisted in April 2013 when Hana Financial Group acquired the remaining 42.73% stake in Korea Exchange Bank and became the beneficial owner of 100% of its issued and outstanding share capital. Until the Merger, Korea Exchange Bank remained independent from other member companies of Hana Financial Group with respect to its business, including its brand, employment and wage systems. In January 2019, we completed the operational and system integration of Korea Exchange Bank and Original Hana Bank.

## Business

### Corporate Banking

#### Overview

We provide comprehensive commercial banking services in Korea to corporate customers, ranging from SMEs to large corporations, including the member companies of Korea's major *chaebols*. Our corporate banking operations include lending to and taking deposits from our corporate customers, mostly in Won. As of 30 June 2025, our corporate loans (comprising loans to large-sized businesses, SMEs and public sector and others; before allowance for loan losses and net deferred origination fees and costs) amounted to ₩226.1 trillion, accounting for 61.4% of our total loans (before allowance for loan losses and net deferred origination fees and costs). We also provide our corporate customers with a variety of fee- and commission-based services, such as investment banking and foreign exchange transactions. We focus our efforts on increasing our corporate exposure to so called "blue-chip" companies with low credit risk profiles, regardless of their size, and decreasing our corporate exposure to the companies with high credit risk profiles so as to improve our asset quality.

The following table sets forth the balances and percentages of the total loans (before allowance for loan losses and net deferred origination fees and costs) attributable to each category of our corporate lending business.

|                                                 | As of 31 December |               |                 |               |                 |             | As of 30 June   |             |

#### Large Corporate Banking

We pursue a focused, profit-oriented marketing approach toward large corporate customers. In particular, we orient our large corporate banking business around a fee-based income structure, offering a broad range of fee-earning products and services, rather than simply providing traditional lending services. Our large corporate banking business strategy includes developing new products and services, as well as cross-selling existing fee-based products and services to our core large corporate customers. As a result, we have increased the volume and proportion of our fee income from corporate banking areas such as investment banking, financial advisory services and derivatives transactions.

We also use our advanced customer relationship management technology, which allows us to segment customers by creditworthiness and profitability and identify high-quality large corporate customers on whom we can concentrate our marketing efforts. This technology also allows us to automate the pricing of products and services accordingly.

We market to potential large corporate banking customers primarily through our senior relationship managers and relationship managers, all of whom are sales professionals specifically dedicated to marketing to high credit large corporate customers.

#### Small- and Medium-Sized Enterprise Banking

The SME segment of the corporate banking market has grown significantly in recent years, primarily as a result of the Government's measures to encourage lending to those enterprises. As of 30 June 2025, our corporate loans

to SMEs (before allowance for loan losses and net deferred origination fees and costs) amounted to ₩149.6 trillion, accounting for 40.6% of our total loans (before allowance for loan losses and net deferred origination fees and costs). We pursue a selective loan strategy that focuses on identifying and marketing to SME borrowers with low credit risk profiles based on our internal credit risk assessment.

## Retail Banking

### Overview

We offer a wide range of retail banking services in Korea through our national network of local branches and digital banking platform. While our retail banking operations are focused primarily on retail lending and deposit-taking activities, we also provide an array of ancillary fee-based services.

Our retail banking services include mortgage and retail lending, as well as demand, savings and time deposit-taking, digital banking (consisting of Internet and mobile banking services), bill paying services and payroll services.

We not only view retail banking as a significant source of income, but also believe that it is a business area through which we may further enhance our brand recognition as a customer-oriented provider of comprehensive banking services. In order to better understand, serve and market to our retail clients, we have increased our efforts to improve our marketing strategies and implement a customer management system which will allow us to target more effectively the various customer groups based on each customer's financial needs, career and current marital status. We assess the marketing procedures operating between our branches and headquarters in order to enhance the efficiency of our marketing strategies and have been recognised by retail customers for our superior banking services. In 2022, we received the "Innovation in Digital Banking" award from The Banker. In May 2023, "Hana HAP," our MyData-based asset management service application, was awarded the Service Marketing Awards Grand Prize from the Service Marketing Academic Society. In July 2024, we were selected as the Best Bank in the Customer Contact category of the Korean Service Quality Index conducted by Korean Management Association Consulting for the ninth consecutive year. In October 2024, we were recognised as an "outstanding provider" of retirement pension products and received an award from the Minister of Employment and Labour.

The following table sets forth our deposit portfolio on a separate basis as of the dates indicated.

(1) Defined as interest expense of each deposit divided by the average of its daily ending balances.

(2) Calculated as a sum of Won-denominated deposits, foreign currency deposits and certificate of deposits.

We offer various types of household loans to individuals and small unincorporated businesses. Our household loans (before allowance for loan losses and net deferred origination fees and costs) as of 30 June 2025 amounted to ₩138.4 trillion, on a separate basis, ₩20.7 trillion, or 14.9%, of which were unsecured loans.

### ***Private Banking Operations***

We offer private banking services to high net-worth retail customers. Through our private banking network, we offer diversified, packaged products and services such as standard retail banking, loan products, brokerage, bancassurance, investment products, real estate and estate management services. These products and services, along with customer relationship management, continue to be a focal point of our retail banking growth strategy. Our VIP Advisors across all our retail branches and private banking channel Gold Club serve the needs of high net-worth customers, advising them on tax matters and asset management. Our strength in private banking has been recognised by the industry and media through numerous awards, including the “Best Private Bank in Korea” award from Euromoney Magazine and the “Most Innovative Private Bank in the World” awards from Global Finance Magazine in 2025, the “Most Innovative Private Bank in the World” award from Global Finance Magazine and the “Best Private Bank in Korea” award from Euromoney Magazine in 2024, the “Best Private Bank in Korea” awards from The Banker and Euromoney Magazine in 2023, and the “Best Private Bank in Korea” awards from The Banker, Global Finance Magazine and Euromoney Magazine in 2022. With the rising number of high net-worth retail customers, we believe the Korean wealth management market offers potential for significant growth.

In order to meet the enhanced expectations and sophisticated needs of our high net-worth retail customers, we pursue a “total financial service package” approach, which encompasses a wide range of services from traditional banking to advanced asset-allocation, and have started to offer highly personalised digital private banking service to our high net-worth customers via our mobile application, Hana 1Q, since January 2023. Our Wealth Management Group solely focuses on providing value-added and high-quality products and services to high net-worth customers. As of 30 June 2025, we had 308 professionals dedicated to private banking, working in 8 Gold Clubs (targeted for high net-worth customers with more than ₩500 million in total relationship balance) and 12 in-branch PB centres (targeted for high net-worth customers with more than ₩300 million in total relationship balance).

### ***Trust Management Services***

We offer our customers a variety of money trust products and manage the funds that they invest in money trusts, on a fee basis. We generally manage money trusts that allow investors to share in the investment performance of the trust in proportion to the amount of their investment in the trust. We also offer property trust management services, where we manage non-cash assets for a fee. The trust management services that we offer include (i) money trusts, consisting of pension trusts, specific money trusts and retired pension trusts, and (ii) property trusts, consisting of real estate collateral trusts and money receivable trusts.

Pursuant to Korean law, the assets of our money trusts are segregated from our assets and are not available to satisfy the claims of our creditors. Accordingly, trust accounts are accounted for, and reported separately from, bank accounts. For money trusts, under the Financial Investment Services and Capital Markets Act (“FSCMA”), we are permitted to offer only specified money trust account products. Specified money trusts are established on behalf of individual customers, typically corporations, which direct our investment of trust assets.

### ***Investment Banking and Capital Markets***

We engage in different types of investment banking and capital markets activities, primarily on behalf of corporate customers in Korea, as well as for our own account. Our principal investment banking activities include:

- arrangement of project financing and other international bond issues and syndicated loans;
- arrangement and advisory services relating to issuances of asset-backed securities;
- real estate financing and advisory services; and
- acquisition financing and financial advisory services.

We invest in and trade securities for our own account, primarily to maintain adequate sources of liquidity and to generate interest and dividend income and capital gains.

### ***Foreign Exchange and Trade Financing***

We are one of the leaders in the Korean foreign exchange market and believe that we continue to hold the largest market share of any Korean bank with respect to customer-related foreign exchange and trade financing transactions, with numerous awards from industry journals. In 2025, we received the “Asia’s Best Foreign Exchange Bank” and the “Best Trade Finance Provider in Korea” awards from Global Finance Magazine. In 2024, we received the “Best Trade Finance Provider in Korea” and the “Best Foreign Exchange Bank in Korea” awards from Global Finance Magazine. In 2023, we received the “Best Foreign Exchange Bank in Korea” award from Global Finance Magazine and the “Best Trade Finance Provider in Korea” award for the twenty-second time from the same magazine. In 2022, we received the “Best Trade Finance Provider in Korea” award for the twenty-first time from Global Finance Magazine.

The foreign exchange services we offer include purchases and sales of foreign currencies in the spot and forward markets on behalf of customers, which enable them to satisfy payment obligations, hedge currency exposures and meet other needs for foreign currency. During the first six months of 2025, the foreign exchange transaction volumes handled by us, which includes wire transfers of foreign currencies, amounted to US\$229.9 billion. We also provide international trade financing services, including documentary letters of credit, bankers’ acceptances and other forms of trade financing, to meet the complex needs of our customers in the export and import business. During the first six months of 2025, our export and import volumes in the aggregate totalled US\$236.2 billion. In December 2022, we signed a memorandum of understanding (“MOU”) with Toss Securities to provide real time foreign exchange rate information and trading services 24-hour-a-day for the first time in the Korean foreign exchange market, which have been implemented since December 2022. In 2025, we also launched the Hana Global FX Trading System, a non-face-to-face foreign exchange trading platform, in the United Kingdom, which represented the first such initiative by a Korean bank and resulted in our designation as a leading Registered Foreign Institution by Korea’s Ministry of Strategy and Finance.

### ***Merchant Banking***

Our merchant banking services principally include the following:

- commercial paper discounting, which entails purchasing at a discount notes that are issued, endorsed or guaranteed by companies to supply them with short-term working capital; and
- payment guarantees, which entail issuing guarantees in respect of notes, corporate bonds and other Won and foreign currency payment obligations in return for fees.

### ***Bancassurance***

We work with third party insurance companies to offer insurance products through our branch network in the bancassurance market. We primarily offer our customers third-party insurance products, including the following:

- annuity insurance, which generally pays a fixed amount yearly or monthly during an insured’s lifetime and for a fixed period after death;
- long-term savings insurance, which compensates for physical injury or disease occurring during the coverage period and reimburses the insured for premiums paid and interest accrued at the end of such coverage period; and
- travel and leisure insurance, which compensates for physical injury or disease, as well as loss of personal property incurred during travel.

We believe our focus on providing a wide variety of bancassurance products, rather than focusing on one product, allows us to better meet individual customer needs, increases customer satisfaction and drives increased sales. In addition, due to the tax favourable nature of our bancassurance products, we are seeing increased interest from high net-worth individuals, professionals and high income self-employed persons. As of 30 June 2025, our bancassurance business had alliances with 21 life insurance companies and 12 non-life insurance companies.

### ***Domestic Branch and Digital Banking***

#### ***Domestic Branch Network***

As of 30 June 2025, we maintained 533 branches and 74 sub-branches in Korea, most of which are located in Seoul and the surrounding provinces. The sub-branches are “compact” branches opened to produce higher returns on investment with relatively lower operating costs, based on facility design, efficient staffing and location in relatively affluent areas. As of 30 June 2025, we maintained 3,524 ATMs located in our branches.

Our branch network is designed to provide one-stop banking services tailored to their respective target customers. We have grouped our branches based on regional characteristics and classified them into retail and corporate groups. Decisions as to whether to open, close or merge a branch office are based on considerations of profitability, growth potential in the branch's surrounding area, competitive concerns and impact on our branch network, among other factors.

The following table presents the geographical distribution of our domestic branch network as of 30 June 2025, according to major metropolitan areas.

|                               | Number of Domestic Branches |                  |                   |
|-------------------------------|-----------------------------|------------------|-------------------|
|                               | Branch                      | Sub-branch       | Total             |
| Seoul metropolitan area ..... | 220                         | 23               | 243               |
| Gyeonggi Province .....       | 96                          | 15               | 111               |
| <b>Six major cities:</b>      |                             |                  |                   |
| Incheon .....                 | 25                          | 6                | 31                |

| Daejeon .....                 | 33                          | 9                | 42                |
| <b>Sub-total</b> .....        | <u>449</u>                  | <u>59</u>        | <u>508</u>        |
| Others .....                  | 84                          | 15               | 99                |
| <b>Total</b> .....            | <u><b>533</b></u>           | <u><b>74</b></u> | <u><b>607</b></u> |

### ***Digital Banking***

Our digital banking platform consists of Internet and mobile banking services, which complements our branch network. As of 30 June 2025, we had approximately 19.9 million customers using our Internet banking services and 17.1 million customers using our mobile banking services.

The advancement of mobile technology and growing sophistication of smartphones in recent years has led to a growth in mobile banking. In response to such trends, we have launched a number of multilingual mobile apps and services. Our current portfolio of mobile apps includes Hana 1Q, our centralised mobile banking app with a “Single Sign On” function, allowing multiple services with a single login. Hana EZ is our mobile app for international financial transactions, including overseas remittances and non-face-to-face currency exchange services. Hana Members is our members services and loyalty mobile app. We plan to launch additional mobile apps and services and build an open, web-based Internet banking platform that supports a number of operating systems and web browsers, strengthening our customers’ access to our services on mobile devices. In addition, we are developing technologies to increase our level of support for people who have difficulty using computers and/or accessing the Internet.

In addition to building our portfolio of mobile apps and services, in recent years, we have also looked to invest in, and find synergies with, fintech companies. In 2016, Hana Financial Group established Finng Inc. (formerly Hana-SK Fintech Co., Ltd.; “**Finng**”), a joint venture with a mobile service provider, SK Telecom Co., Ltd. (“**SK Telecom**”), to provide fintech-based services such as mobile-oriented asset management, simplified payment and overseas transactions through a mobile application launched in 2017. We collaborate with Finng in connection with fintech-based services. Furthermore, since 2015, we have fostered collaboration with fintech start-ups through our fintech accelerator, Fintech 1Q Lab. In addition, in 2020, we invested ₩7.5 billion for the acquisition of 7.5% equity in Toss Bank, and in 2021 acquired additional equity interest. Our stake in Toss Bank amounted to 8.95% as of 30 June 2025. In July 2021, we also established GLN International Co., Ltd. (“**GLN International**”) through the spin-off of our global payment network division to operate GLN (Global Loyalty Network), a global payment and remittance network in Asia. As of the date of this Offering Circular, GLN International provides overseas ATM cash withdrawal and international remittance services in ten Asian countries, including Japan, Thailand and Taiwan.

We focus our efforts to facilitate the digital transformation of our business. In March 2019, we implemented our first Robotic Process Automation, named Hanabot, an automated machine-learning software programme that handles tasks including personal, household and corporate lending as well as credit card transactions. Furthermore, in 2022, we launched HAI Chatbot, an AI chatbot service for retail customers that leverages deep

learning-based natural language processing to provide services ranging from simple financial consultations to personalised assistance. In December 2024, we further introduced Corporate HAI Chatbot, the first of its kind among Korean commercial banks, dedicated to sole proprietors and corporate clients and offering financial consultations, troubleshooting support for system errors, guided menu navigation and guidance on corporate documentation.

In addition, we lead the development of blockchain technologies in the banking industry. In 2019, we became the first Korean bank to join Hyperledger and Enterprise Ethereum Alliance, the global blockchain consortia, and received patents for 46 new business models that will facilitate the adoption of blockchain technology to our business. In September 2023, we signed a strategic business agreement with BitGo, a global crypto custodian company, to jointly enter the digital asset custody sector and formed a Security Token Offering consortium called “Next Finance Initiative” with Mirae Asset Securities Co., Ltd. and SK Telecom. Furthermore, since October 2023, we have started to offer seven fractional investment financial products via our Hana 1Q, our mobile application.

In 2021, we also launched a digital fund platform called “Fun Shop” which provides highly customised search functions for various investment options and a MyData-based asset management service called “Hana HAP” which provides optimised asset management solutions in digitalised format. In October 2022, we launched a new digital bank account service in collaboration with Naver Pay, one of the most common forms of mobile payment service in Korea, through which a user can benefit from the features that are commonly associated with traditional bank accounts, such as deposit protection and accrual of interests, and enjoy at the same time discounts and loyalty points offered by Naver Pay.

We are also making efforts to establish an environment that can actively respond to the rapidly changing AI landscape. For example, in April 2023, we introduced an AI wealth management service called “AI Wealth,” the first of its kind in the Korean banking industry. Additionally, in January 2024, we began offering the “Customised AI-based Policy Funds Search” service, which allows SMEs to check their eligibility for policy fund loans and receive recommendations for appropriate financial products. In April 2025, we launched a pilot-phase AI-driven pre-approval service for corporate banking that automates export screening and auto-generates export-related documents using AI-OCR, with full-scale deployment scheduled in 2026. We also provide AI-based exchange rate forecasts as part of our corporate banking services.

## **Overseas Network**

We operate the largest overseas network among Korean banks to meet the needs of our customers for foreign exchange, trade finance, funds remittance and other global banking services in Korea and elsewhere around the world.

As of 30 June 2025, our overseas network consisted of 110 business units in 26 countries (24 in the Americas, 11 in Europe and the Middle East, and 75 in Asia and Oceania). Specifically, we had 20 international branches, one sub-branch of such international branches, five overseas representative offices, 11 overseas subsidiaries and 74 sub-branches of such overseas subsidiaries located overseas.

We have over 50 years of experience operating in many high-growth regions of the world. For the first six months of 2025, our net income from our offshore operations was ₩168.6 billion, which represented 8.1% of our total net income, and we had total overseas assets of ₩53.4 trillion as of 30 June 2025.

We continue to adapt the focus of our overseas network operations in response to changes in the global economy. To overcome the difficulties we may face due to current market volatility and instability, we are concentrating our efforts on maintaining quality assets and creating new products for our overseas business. Under our “Global Expansion and Profitable Growth” drive, we are promoting projects to help clients restructure assets, adjust their business models and develop their scope of business. In May 2020, Hana Financial Group, our holding company, entered into an MOU with Shinhan Financial Group, the holding company of Shinhan Bank, to strengthen their global businesses by creating synergies between the two banking groups. It is expected that such MOU will lead to greater opportunities to expand our overseas business.

The table below sets forth our overseas subsidiaries, branches (not including sub-branches) and representative offices as of 30 June 2025.

| <u>Business Unit<sup>(1)</sup></u>                  | <u>Location</u>      | <u>Year Established</u> |
|-----------------------------------------------------|----------------------|-------------------------|

(1) Excludes subsidiaries, branches and representative offices planned for closure due to no actual operations.

In addition to our overseas networks of branches, representative offices and overseas subsidiaries, we have also looked at strategic acquisitions, investments and MOU opportunities to find business synergies outside of Korea, particularly in China and Southeast Asia, as well as Eastern Europe, India and the Middle East. For example, in November 2019, we completed the acquisition of a 15% stake in BIDV, one of the largest banks controlled by the State Bank of Vietnam, for over ₩1 trillion. We expect that this strategic investment will allow us to expand our network in Vietnam, where we currently have two branches, by gaining access to BIDV's vast chain of branches and ATMs. In April 2022, we established a branch office in Taipei, Taiwan as the first and only Korean

bank to establish presence in Taiwan. More recently, we established a subsidiary in Monterrey, Mexico in September 2024 and opened a representative office in Budapest, Hungary in March 2024. In August 2025, we opened a branch office in Los Angeles, California through our U.S. subsidiary, Hana Bank USA, representing our first branch expansion in North America in 17 years. We have also entered into MOUs with several leading banks in Eastern Europe, India and Saudi Arabia as part of our strategic initiatives to explore further market expansion in those regions.

## **Competition**

We compete principally with other national banks in Korea and also face competition from regional banks, Government policy banks, specialised banks, branches of foreign banks operating in Korea and various other types of financial service institutions. In particular, competition in the retail and SME lending sectors, which have traditionally been important business areas for us, has intensified in recent years and is expected to further increase. Profitability in our retail banking operations may decline due to market saturation in the retail lending segment, heightened interest rate competition and increased marketing expenses. Intense and increasing competition has made, and is expected to continue to make, it more challenging for us to attract and retain retail and SME customers with the credit quality and on the terms necessary to meet our business objectives in a commercially acceptable manner.

Consolidation among financial institutions and the Government's privatisation initiatives may also intensify competition in the markets in which we operate. For example, as part of the Government's privatisation plan for Woori Finance Holdings Co., Ltd. (the former financial holding company of Woori Bank) and its former subsidiaries, certain subsidiaries were sold to other financial institutions and Woori Finance Holdings Co., Ltd. was merged into Woori Bank in 2014. Woori Financial Group Inc. was established in January 2019 as Woori Bank's new financial holding company. Large financial groups have also been expanding their asset bases and non-banking businesses by actively pursuing acquisitions. Shinhan Financial Group acquired Orange Life Insurance Ltd. (formerly ING Life Insurance Korea Ltd.) in February 2019 and BNP Paribas Cardif General Insurance in November 2021. KB Financial Group acquired Prudential Life Insurance Co. of Korea in September 2020. Hana Financial Group, our parent holding company, acquired The-K Non-Life Insurance in May 2020. We expect that industry consolidation will continue and that financial institutions resulting from such mergers or acquisitions will possess greater size and business scope, which could enable them to compete more effectively against us. Increased competition and continuing consolidation may lead to decreased margins, resulting in a material adverse impact on our future profitability.

In July 2023, the FSC announced measures to enhance competition in the banking sector, including plans to issue additional banking licences (including for internet-only banks, taking into account the performance and stability of existing internet-only banks) and to permit the conversion of existing regional or savings banks into nationwide commercial banks. The FSC and the FSS published detailed guidelines regarding these measures in January 2024. In May 2024, the FSC approved DGB Daegu Bank's application to convert from a regional bank into a nationwide commercial bank. DGB Daegu Bank subsequently became Korea's seventh commercial bank and rebranded itself as iM Bank in June 2024. Additionally, as of the date of this Offering Circular, four consortiums, including those involving major nationwide commercial banks and other financial service providers, have publicly announced their intent to apply for an internet-only banking licence to become the fourth internet-only bank in Korea. Among these consortiums, we submitted a letter of intent to invest as a shareholder in the Korea SOHO Bank Consortium in March 2025.

In addition, we believe that structural changes in the Korean financial investment industry will further intensify competition. Increases in foreign investments by Korean investors, the emergence of alternative trading systems and rising trading volumes have prompted securities firms to offer low commission rates to capture market share. In March 2025, Nextrade was established as the first alternative trading platform to the Korea Exchange, which is expected to further transform the competitive landscape for financial institutions in Korea.

Furthermore, the shift towards digital platforms has compelled commercial banks to continuously upgrade their service platforms to attract and retain online users, whose growth has outpaced that of customers who primarily conduct banking in-person at physical branches. Additionally, technology companies with large-scale user networks such as Kakao Corp., Naver Corporation and Samsung Electronics Co., Ltd. have made significant inroads into the financial services sector by providing virtual payment services through fintech platforms. As a result, competition for online customers has intensified not only among commercial banks but also from non-bank mobile payment service providers.

Lastly, companies outside the traditional banking and financial services industries such as Naver Financial, Kakao Pay and Toss operate mobile payment and money transfer platforms that compete directly with our service offerings. These companies are not required to obtain banking licences to provide certain financial services, which enables them to offer flexible and innovative products that may encroach on our market share. See “*Investment Considerations—Risks Relating to Our Business—Competition in the Korean banking industry is intense and may further intensify*” and “*Investment Considerations—Risks Relating to Our Business—The adoption of new technologies and intensifying competition from fintech companies and online-only banks may adversely affect our business, financial condition and results of operations.*”

## **Information Technology**

We have a fully integrated IT system that provides information to all offices and branches. We believe that a sophisticated IT system is critical to supporting our operations management and providing high-quality customer service. Accordingly, we have made, and intend to continue to make, significant investments to upgrade and expand our IT systems in order to improve our risk management, operations management and customer service. In recent years, we have developed and implemented several new technologically advanced risk management systems, including our Basel II System, Anti-Money Laundering System and BIS Risk-Weighted Asset Management System. Currently, our IT systems are capable of collecting and generating data in compliance with the Basel III requirements.

We continuously allocate considerable resources to improve the capacity and reliability of our IT infrastructure in our business divisions, which we believe is crucial to supporting our operations management and providing high-quality customer service.

## **Properties**

Our principal establishment is our self-owned headquarters building located in Seoul, Korea, which has a total floor area of approximately 53,981 square metres. In addition, we own or lease various land and buildings for our branches.

## **Legal and Regulatory Proceedings**

We may from time to time become a party to various legal, arbitration or administrative proceedings arising in the ordinary course of business. As of 30 June 2025, the aggregate amounts of claims brought against us totalled ₩484.7 billion (relating to 314 cases), for which we recorded a provision of ₩63.1 billion. As of the same date, the aggregate amounts of claims brought by us totalled ₩177.5 billion (relating to 162 cases).

We are currently involved in several pending disputes or potential disputes against us and have recently been involved in certain regulatory matters, including the following:

- In February 2020, the Seoul Southern District Prosecutors’ Office commenced an investigation into the management of trade finance funds by Lime Asset Management Co. (“**Lime**”) which may have resulted in significant losses to certain customers who purchased such products from banks and securities companies in Korea, including us. Such trade finance funds of Lime had investments in certain funds managed by International Investment Group LLC, a New York-based investment adviser, which had its licence revoked by the Securities and Exchange Commission in November 2018 for concealing losses and selling fraudulent loan assets, triggering suspension of the redemption of such trade finance funds. In March 2020, the FSS began its investigation into Lime, and on 27 August 2020, the FSS recommended that the financial institutions that sold such trade finance funds, including us, nullify such investment and provide full refunds to affected investors. Following a meeting of the board of directors, we agreed to accept the recommendations of the FSS and the proposed full refunds to affected investors in the amounts of approximately ₩36.4 billion. In February 2022, we filed an indemnity lawsuit against Lime and Shinhan Securities Co., Ltd. (formerly known as Shinhan Investment Corp.), which had Total Return Swap contracts in place with Lime and was tasked with supervising and overseeing Lime, for damages of approximately ₩36.4 billion and the trial is currently ongoing as of the date of this Offering Circular.
- In June 2020, the Seoul Central District Prosecutor’s Office commenced an investigation into the management of trade receivable funds by Optimus Asset Management (“**Optimus**”), whom we and another commercial bank acted as the custodian of the funds’ assets, after Optimus had suspended withdrawals in four of the funds before maturity. Such funds were marketed as safe investments of trade receivables of government corporations and public institutions but the Prosecutor’s Office found that Optimus had

invested the assets of the funds elsewhere, which may have resulted in significant losses to investors. In July 2020, the CEO of Optimus, among others related to the funds, was arrested for fraud and other charges. In September 2020, the Prosecutor's Office executed a second search warrant at our headquarters, following the initial search warrant executed in June 2020, in connection with the ongoing investigation into the management of the funds. In May 2021, the Prosecutor's Office indicted us and our employees on charges of violation of the FSCMA and occupational breach of trust, and in 2022, the Seoul Central District Court acquitted us and the employees of all charges, which was affirmed by the appellate court in January 2024. The Prosecutor's Office subsequently appealed, and the case is currently ongoing at the Supreme Court of Korea. In addition, in October 2021, NH Investment & Securities Co., Ltd. ("**NH I&S**") filed a lawsuit against Optimus, the Korea Securities Depository ("**KSD**") and us, among others, for damages. The trial is currently ongoing. Due to the ongoing nature of the investigation, we cannot predict its potential outcome, including any implication on us. Furthermore, as an administrative sanction for our violation of the FSCMA in connection with this case, on 2 March 2022, the FSC resolved to partially suspend us from accepting new general private equity fund assets for custody for three months. We filed an administrative lawsuit requesting the repeal of the FSC's suspension, but the Seoul Administrative Court ruled against us on 8 September 2023. We subsequently appealed, and the case is currently ongoing at the Supreme Court of Korea. In January 2024, the Seoul Central District Court ordered that we, NH I&S and KSD collectively compensate Green Cross WellBeing Corporation with approximately half of the invested principal along with accrued interest. This ruling marks the first acknowledgment of joint liability among a securities firm, a bank and a depository in the Optimus-related cases. We, NH I&S and KSD have all appealed the decision, and Green Cross Wellbeing has also appealed, seeking a higher compensation amount. On the other hand, in June 2025, the Seoul Central District Court ordered NH I&S to compensate Nexen Corporation with a half of the investment and did not acknowledge joint liability among NH I&S, KSD and us. Both NH I&S and Nexen subsequently appealed, and the case is currently ongoing.

- As part of a broad governmental initiative to foster fair recruitment practices, in December 2017, the FSS launched an examination of 11 Korean commercial banks and preliminarily concluded that several banks, including us, may have given preferential treatment to certain job applicants during the recruiting process. Based on these preliminary findings by the FSS, in February 2018, the Supreme Prosecutors' Office of Korea initiated an investigation of six major commercial banks, including us, for alleged irregularities in hiring new employees. As a result of the investigation, the Supreme Prosecutors' Office charged us and six of our officials, including our former President Young Joo Ham, whose term ended in March 2019, with illegally influencing the hiring process of new employees and manipulating hiring standards for certain candidates. The Seoul Western District Court held trials for Mr. Ham starting from August 2018 in which Mr. Ham denied any involvement in hiring irregularities. The Supreme Prosecutors' Office sought a 3-year prison term and a fine of ₩5 million for Mr. Ham, but the Seoul Western District Court on 11 March 2022 found Mr. Ham not guilty on all charges. The Supreme Prosecutors' Office appealed the decision, and on 23 November 2023, the Criminal Appeal Division of the Seoul Western District Court found Mr. Ham guilty of the violation of the Equal Employment Opportunity and Work-Family Balance Assistance Act and imposed a fine on the Bank. We subsequently appealed, and the case is ongoing at the Supreme Court of Korea. Since the indictment of our officials, we have taken measures to reform our procedures for hiring new employees, including abolishing the hiring recommendation system and outsourcing all hiring processes.
- In June 2023, the Fair Trade Commission (the "**FTC**") of Korea commenced its investigation into potential collusion among four largest commercial banks in Korea, including us, whereby such banks had allegedly structured their secured loans in similar terms in order to limit competition. The FTC had concluded its investigation and issued its investigation report on 8 January 2024, but launched a reinvestigation in February 2025 against four major banks, including us, regarding possible collusion on setting lending limit, the loan-to-value ratios. In April 2025, the FTC had concluded the reinvestigation and issued its investigation report. The disciplinary action against the involved banks, if any, will be finalised after the deliberation process by the FTC is concluded.
- In November 2023, the FSS began its investigation into the sale of equity-linked securities products tracking the Hang Seng China Enterprises Index ("**HK ELS Products**") by Korean financial institutions, including us, amidst the increasing concerns from investors that their investments in HK ELS Products are expected to suffer heavy losses due to a sharp decline of the Hang Seng China Enterprises Index which dropped more than 50% since hitting its peak in early 2021. We had sold approximately ₩2.1 trillion of such HK ELS Products to investors from March 2011 until November 2023, after which we had ceased the sale due to increasing volatility in the financial markets and the continued decline of the Hang Seng China Enterprises Index. In January 2024, we expanded the suspension of sales to all equity-linked securities products. In

March 2024, we voluntarily set up a dedicated compensation committee and decided to compensate certain investors for their losses related to HK ELS Products. After conclusion of its investigation in April 2024, the FSS convened a dispute resolution committee for five representative cases from five major commercial banks, including us, and determined the compensation ratio to be 30-65% of the total loss incurred by the investors. The compensation ratio set by the dispute resolution committee for our representative case was 30%. In 2024, we paid ₩97.1 billion in compensation, and during the first half of 2025, we paid an additional ₩12.1 billion. As of 30 June 2025, the remaining amount subject to compensation was ₩4.7 billion across 474 accounts.

- In February 2023, immediately following the designation of MTS Bank, a commercial bank in Russia, as a sanctions target on the SDN List, we implemented an asset freezing measure on the assets of MTS Bank in an account held by us. Following such measure, MTS Bank filed a lawsuit with the Moscow Commercial Court against us and our subsidiary in Russia seeking release of their frozen assets. The case is currently pending.
- In April 2025, the FSS conducted an on-site inspection of us in connection with an improper loan incident totalling approximately ₩7.5 billion that occurred between 2021 and 2024. Following the identification of the incident, we took prompt administrative measures, including disciplinary action and the filing of a criminal complaint against the employee involved. The FSS inspection was completed in May 2025, and we are currently in the process of recovering the relevant loan proceeds.

Other than the matters discussed above, we are not a party to any legal or administrative proceedings, and no proceedings are known by us to be contemplated by governmental authorities or third parties, which, if adversely determined, may have a material adverse effect on our business, financial condition or results of operations.

## DESCRIPTION OF ASSETS AND LIABILITIES

The tables below and accompanying discussions provide selected financial highlights regarding our assets and liabilities. Unless otherwise specified, the information provided below is presented on a consolidated basis.

### Average Balance Sheets and Related Interest

The following tables set forth our average balances of assets and liabilities, on a separate basis, for the periods indicated. For interest-earning assets and interest-bearing liabilities, the tables provide the amount of interest earned or paid and the average rate (annualised for interim periods) of such interest. For the purposes of these tables, average balance has been determined based upon the average of the daily ending balances.

(1) Defined as interest earned from or borne by an individual asset or liability divided by the average of its daily ending balances.

N.M. means not meaningful.

## Analysis of Changes in Net Interest Income — Volume and Rate Analysis

The following table provides analyses of our changes in interest income, interest expense and net interest income based on changes in volume and changes in rates, on a separate basis, for the periods indicated. Information is provided with respect to (i) effects attributable to changes in volume (changes in volume multiplied by prior rate) and (ii) effects attributable to changes in rate (changes in rate multiplied by prior volume). Changes attributable to the combined impact of changes in rate and volume have been allocated proportionately to the changes due to volume changes and changes due to rate changes.

## Loan Portfolio

As of 31 December 2022, 2023 and 2024 and 30 June 2025, the balance of our total loans before allowance for loan losses and net deferred origination fees and costs was ₩331,497 billion, ₩348,908 billion, ₩368,686 billion and ₩368,082 billion, respectively, 86.4%, 87.5%, 87.5% and 87.7%, respectively, of which was denominated in Won and 13.6%, 12.5%, 12.5% and 12.3%, respectively, of which was denominated in other currencies, principally in U.S. dollars.

As of 31 December 2022, 2023 and 2024 and 30 June 2025, our total loans after allowance for loan losses and net deferred origination fees and costs was ₩330,186 billion, ₩347,247 billion, ₩367,214 billion and ₩366,583 billion, respectively.

Guarantees are not categorised as loans unless and until we have made a payment on behalf of a customer in relation to the guarantee.

### Borrower Types

The table below sets forth our summaries of loans by type of borrower (before allowance for loan losses and net deferred origination fees and costs) as of the dates indicated.

### Loan Concentrations

We limit our total exposure to any single borrower as required by Korean regulations and pursuant to our internal policies. “Exposures” refer to our credits and other exposures, including debt securities held by us. “Credits” refer to our total credits (as reported to the FSS based on the FSC’s asset classification criteria), the principal components of which include the total loan portfolio of our bank accounts, loans provided from our trust accounts and merchant bank accounts, and confirmed guarantees and acceptances (which are off-balance sheet items).

We determine our exposure limit based on the borrower’s credit rating provided by our Credit Analysis System and adjust it if it would otherwise exceed the limit imposed by Korean regulations.

### 10 Largest Exposures by Borrower

As of 30 June 2025, on a separate basis, our 10 largest exposures totalled ₩36,640 billion and accounted for 8.1% of our total exposure (consisting of loans and other on-balance sheet items, confirmed guarantees and

acceptances, and debt securities in merchant banking account assets). The following table sets forth our total exposures to these top 10 borrowers as of 30 June 2025, on a separate basis.

| As of 30 June 2025                                 |                                                                |                                               |                    |                |

(1) Loans are before allowance for loan losses and net deferred origination fees and costs. Other on-balance sheet items consist of government, public and financial bonds and private convertible bonds in financial assets at FVTPL, financial assets at FVOCI excluding stocks and equity securities in foreign currencies, and securities at amortised cost before allowances.

#### ***Exposure to Main Debtor Groups***

As of 30 June 2025, on a separate basis, 5.5% of our total exposure was to the main debtor groups as designated by the FSS. The main debtor groups consist mostly of chaebols. The following table shows, as of 30 June 2025, on a separate basis, our total exposure to the 10 chaebol groups to which we have the largest exposure.

| As of 30 June 2025                |                                                 |                                               |                    |                |

|                                       | <i>(In billions of Won)</i> |                                       |                |                 |
| Corporate loans .....                 | ₩130,127                    | ₩36,373                               | ₩ 3,746        | ₩170,246        |
| Household loans .....                 | 37,326                      | 18,894                                | 81,622         | 137,842         |
| <b>Total gross loans in Won</b> ..... | <b>₩167,453</b>             | <b>₩55,267</b>                        | <b>₩85,368</b> | <b>₩308,088</b> |

We may roll over our corporate loans (primarily consisting of working capital loans and facility loans) and retail loans (to the extent not payable in instalments) after we conduct our normal loan review in accordance with our loan review procedures. In general, our corporate loans may be extended for periods of up to one year for a maximum aggregate term of six years from the date the relevant loan is initially made. Facilities loans that are bullet loans may be extended for periods of up to one year for a maximum term of 10 years, with partial payment of 10% or more of the initial loan amount required for each extension. Our working capital loans may be extended on an annual basis for an aggregate term of three to five years for unsecured loans and up to five years for secured loans. Facilities loans, which are generally secured, may be extended once for a maximum term of five years from the date when the relevant loan is initially made. Retail loans may be extended for additional terms of up to 12 months for a maximum aggregate of 10 years for both unsecured loans and secured loans.

## Interest Rate Sensitivity (Loans in Won)

The following table shows, on a separate basis, our loans, excluding delinquent loans, denominated in Won by interest rate sensitivity as of 30 June 2025.

|                                                        | As of 30 June 2025          |                     |                 |
|--------------------------------------------------------|-----------------------------|---------------------|-----------------|
|                                                        | Due Within<br>1 Year        | Due After<br>1 Year | Total           |
|                                                        | <i>(In billions of Won)</i> |                     |                 |
| Fixed rate loans <sup>(1)</sup> .....                  | ₩ 20,379                    | ₩ 18,136            | ₩ 38,515        |
| Variable or adjustable rate loans <sup>(2)</sup> ..... | 147,074                     | 122,499             | 269,573         |
| <b>Total gross loans in Won</b> .....                  | <b>₩167,453</b>             | <b>₩140,635</b>     | <b>₩308,088</b> |

(1) Fixed rate loans are loans for which the interest rate is fixed for the entire term.

(2) Variable or adjustable rate loans are loans for which the interest rate is not fixed for the entire term.

For additional information regarding our management of interest rate risk for our loans, see “*Risk Management — Market Risk Management — Trading Activities*”.

## Asset Quality of Loans

### Loan Classifications

The FSC generally requires Korean financial institutions to analyse and classify their assets by quality into one of five categories. In making these classifications, we take into account a number of factors, including the financial position, profitability and transaction history of the borrower, and the value of any collateral or guarantee taken as security for the extension of credit. This classification method and our related provisioning policy are intended to fully reflect the borrower’s capacity to repay.

The following is a summary of the asset classification criteria we apply for corporate and retail credits based on the asset classification guidelines of the FSC. We also apply different criteria for other types of credits such as loans to the Government or to government related or controlled entities, certain bills of exchange and certain receivables.

| Asset Classification | Characteristics                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Normal .....         | Credits to customers that, based on our consideration of their business, financial position and future cash flows, do not raise concerns regarding their ability to repay the credits.                                                                                                                                                                                                                                                                                                                                                                      |
| Precautionary .....  | Credits to customers that: <ul style="list-style-type: none"> <li>• based on our consideration of their business, financial position and future cash flows, show potential risks with respect to their ability to repay the credits, although showing no immediate default risk; or</li> <li>• are in arrears for one month or more but less than three months.</li> </ul>                                                                                                                                                                                  |
| Substandard .....    | Either: <ul style="list-style-type: none"> <li>• credits to customers that, based on our consideration of their business, financial position and future cash flows, are judged to have incurred considerable default risks as their ability to repay has deteriorated; or</li> <li>• the portion that we expect to collect of total credits (1) extended to customers that have been in arrears for three months or more, (2) extended to customers that have incurred serious default risks due to the occurrence of, among other things, final</li> </ul> |

|                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|                      | refusal to pay their debt instruments, entry into liquidation or bankruptcy proceedings, or closure of their businesses, or (3) extended to customers who have outstanding credits that are classified as “doubtful” or “estimated loss.”                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| Doubtful .....       | <p>Credits exceeding the amount we expect to collect of total credits to customers that:</p> <ul style="list-style-type: none"><li>• based on our consideration of their business, financial position and future cash flows, have incurred serious default risks due to noticeable deterioration in their ability to repay; or</li><li>• have been in arrears for three months or more but less than 12 months.</li></ul>                                                                                                                                                                                                                                                  |
| Estimated Loss ..... | <p>Credits exceeding the amount we expect to collect of total credits to customers that:</p> <ul style="list-style-type: none"><li>• based on our consideration of their business, financial position and future cash flows, are judged to have to be accounted as a loss as the inability to repay became certain due to serious deterioration in their ability to repay;</li><li>• have been in arrears for 12 months or more; or</li><li>• have incurred serious risks of default in repayment due to the occurrence of, among other things, final refusal to pay their debt instruments, liquidation or bankruptcy proceedings or closure of their business.</li></ul> |

We classify our corporate loans based on the borrower’s capacity to repay in consideration of its business operations, financial position and future cash flows, the past due period (if any) of the loans and status of any bankruptcy proceedings in which the borrower is involved. Loans to small companies and to households, however, are classified not by evaluating the debt repayment capability of the borrower but by the past due period (if any) of the loans and the status of any bankruptcy proceedings in which the borrower is involved. We generally classify all credits to a single borrower in the same category of classification, but guaranteed credits or credits secured by bank deposits, real estate or other collateral may be classified differently based on the guarantor’s capability to perform under its guarantee or based on the value of collateral securing the credits.

***Loan Loss Provisioning Policy***

We have established an allowance for loan losses to absorb losses that we incur in our loan portfolio.

We first assess whether objective evidence of impairment exists individually for financial assets that exceed the individual assessment threshold of ₱2 billion and are therefore considered individually significant. For financial assets that are not individually significant, we assess whether the objective evidence of impairment exists collectively. If we determine that no objective evidence of impairment exists for an individually assessed financial asset, whether significant or not, we include the asset in a group of financial assets with similar credit risk characteristics and collectively assess them for impairment.

Impairment loss is deducted from allowance for possible losses on credits when it is considered unrecoverable. If it is subsequently recovered, allowance for possible losses on credits increases and the changes are recognised in net income.

#### *Allowance for possible losses on credits by individual assessment*

Allowance for possible losses on credits is recognised by the difference between the asset's carrying amount and the present value of future cash flows expected to be collected, considering the borrower's management performance, financial position, overdue period and mortgage amount.

#### *Allowance for possible losses on credits by collective assessment*

Allowance for possible losses on credits is recognised by adjusting probability of default and loss given default from Basel III for the purpose of accounting and applying that to carrying amount. Such approach considers various elements, including borrower type, credit rating, size of portfolio, loss emergence period and collection period, and applies consistent assumptions so as to model the measurement of inbuilt loss and determine variables based on historical loss experience and current conditions.

Similar provisioning requirements apply to other types of credits such as guarantees and acceptances and loans from the trust accounts.

### **Allowances for Loan Losses**

#### *Analysis of Allowance for Loan Losses*

The following table presents the changes in our allowance for possible loan losses on a separate basis for the periods indicated.

|                                              | Year Ended 31 December      |               |               | Six Months Ended<br>30 June |

### Loans to Companies in Workout and Rehabilitation

Our loans to borrowers under restructuring are managed and collected by our Credit Group. As of 31 December 2022, 2023 and 2024 and 30 June 2025, on a separate basis, 0.05%, 0.04%, 0.04% and 0.08%, respectively, of our total loans calculated in accordance with the FSS reporting guidelines, or ₩163.7 billion, ₩143.8 billion, ₩125.6 billion and ₩289.7 billion, respectively, was to borrowers under restructuring, on a separate basis. The amount of our loans to borrowers under restructuring has increased in 2025 due to an increase in the number of borrowers under restructuring as a result of the delayed economic recovery, as well as the addition of one new large workout borrower.

### Non-Performing Loans

Non-performing loans are defined as loans past due by more than three months. These loans are generally rated “substandard” or below under the FSC guidelines.

The following tables set forth, as of the dates indicated, our total non-performing loans by type of borrower, on a separate basis.

|                                                 | As of 31 December          |                      |                        |                 |                      |                        |

### Sales of Non-Performing Loans

We have also issued securities backed by non-performing loans and other assets through special purpose companies. Some of these transactions involved transfers of loans in connection with asset securitisations. The assets are not included in our statements of financial position as these transactions are classified as sold under K-IFRS.

We sell non-performing loans to savings banks and the Korea Asset Management Corporation. The aggregate principal amounts, on a separate basis, of non-performing loans we sold in connection with asset securitisation transactions were ₩145.6 billion, ₩530.0 billion and ₩661.7 billion in 2022, 2023 and 2024, respectively, and ₩290.5 billion and ₩378.8 billion for the six months ended 30 June 2024 and 2025, respectively.

### Non-Performing Loan Strategy

One of our primary objectives is to prevent our loans from becoming non-performing. Through our corporate credit rating system, we strive to limit or reduce our credit risk relating to future non-performing loans. Our credit rating system is designed to prevent our loan officers from extending new loans to borrowers with high credit risks based on the borrower's credit rating. Our early warning system is designed to bring any sudden increase in a borrower's credit risk to the attention of our loan officers, who then closely monitor such loans.

Notwithstanding the above, if a loan becomes non-performing, an officer at the branch level responsible for monitoring non-performing loans will commence due diligence of the borrower's assets, send a notice demanding payment or a notice that we will take legal action or prepare for legal action.

At the same time, we also initiate our non-performing loan management process, which begins with:

- identifying loans subject to a proposed sale by assessing the estimated losses from such sale based on the estimated recovery value of collateral, if any, for such non-performing loans;
- identifying loans subject to write-off based on the estimated recovery value of collateral, if any, for such non-performing loans and the estimated rate of recovery of unsecured loans; and
- on a limited basis, identifying commercial loans subject to normalisation efforts based on the cash flow situation of the borrower.

Once the details of a non-performing loan are identified, we pursue early solutions for recovery. Actual recovery efforts on non-performing loans are handled by several of our departments or units, depending on the nature of such loans and of the borrower.

The officers or agents of the responsible departments and units use a variety of methods to resolve non-performing loans, including:

- making phone calls and paying visits to the borrower requesting payment;
- continuing to assess and evaluate assets of our borrowers; and
- if necessary, initiating legal action such as foreclosures, attachments and litigation.

In order to promote speedy recovery on loans subject to foreclosures and litigation, our policy is to permit the branch responsible for handling these loans to transfer them to the relevant unit at headquarters or regional headquarters.

### ***Foreclosure and Collateral***

Generally, when a non-performing loan becomes overdue for more than three months, we foreclose on mortgages or exercise our security interests in respect of other collateral. At that time, we will petition a court to foreclose on collateral and to sell that collateral through a court-supervised auction. Under Korean law, that petition must be filed with a court that has jurisdiction over the mortgaged property, and must be filed together with a copy of the mortgage agreement and an extract of the court registry regarding the subject property. The court will then issue an order to commence the foreclosure auction, which will be registered in the court registry of the subject property. If no bidder bids at least the minimum amount set by the court on the first auction date, the court will set another date for a subsequent auction approximately one month later. Each time a new auction date is set, the minimum auction price will typically be lowered by 20.0%. Korean law does not provide for non-judicial foreclosure.

Korean financial institutions, including us, maintain general policies to assess a potential customer's eligibility for loans based on that entity's credit quality, rather than requiring a particular level of collateral, especially in the case of large corporate borrowers. As a result, the ratio of our collateral to non-performing corporate loans is relatively low when compared with our total exposures. For secured household loans, however, we generally impose limits on loan amounts based on the collateral we receive.

We reflect this collateral level when we estimate the future cash flow for our loans, which we calculate using a discounted cash flow method. With respect to loans to borrowers that we do not believe will be going concerns in the future, the lower collateral ratio has a direct effect on cash flow estimates and results in a higher level of allowances. With respect to loans to borrowers that we expect to be going concerns, the lower collateral ratio has an effect on cash flow estimates, but we also consider other factors, including future operating income and future asset disposals and restructuring, in determining allowance levels. Accordingly, for these latter borrowers, the effect of lower collateral levels on allowances is mitigated by other characteristics of the borrower, and that lower collateral level will not necessarily result in a higher level of allowances.

### ***Loan Write-Offs***

Our loan write-offs were ₩428.7 billion, ₩402.9 billion and ₩568.2 billion in 2022, 2023 and 2024, respectively, and ₩192.5 billion and ₩190.1 billion for the six months ended 30 June 2024 and 2025, respectively.

### ***Basic Principles***

We attempt to minimise loans to be written-off, by practicing a sound credit approval process based on credit risk analysis prior to extending loans and a systematic management of outstanding loans.

### Loans to be Written-Off

Loans are written-off if they are deemed to be uncollectible by falling under any of the following categories:

- loans for which collection is not foreseeable due to insolvency, bankruptcy, dissolution or the shutting down of the business of the debtor;
- loans for which collection is not foreseeable due to the death or disappearance of the debtor;
- loans for which expenses of collection exceed the collectable amount;
- loans on which collection is not possible through legal or any other means; or
- the portion of loans classified as “estimated loss,” net of any recovery from collateral, which is deemed to be uncollectible.

### Procedure for Write-Offs

All applications for our loan write-off are submitted to our credit group, whether they are corporate loans or individual loans. Such applications for write-off are generally submitted immediately after the relevant loan becomes one month past due, which our credit group will then evaluate. Once loans are written-off, they are derecognised from our statements of financial position.

### Credit Portfolio

The table below sets forth, on a separate basis, our credit portfolio (as reported to the FSS based on FSC’s asset classification criteria) as of the dates indicated.

|                                                | As of 31 December           |                 |                 | As of<br>30 June |
|------------------------------------------------|-----------------------------|-----------------|-----------------|------------------|
|                                                | 2022                        | 2023            | 2024            | 2025             |

| <b>Total credits<sup>(1)</sup></b>             | <u>₩332,029</u>             | <u>₩351,050</u> | <u>₩370,498</u> | <u>₩371,343</u>  |

(1) Before present value discounts; does not include Won-denominated loans at fair value through profit or loss.

### Investment Portfolio

We invest in and trade Won-denominated and, to a lesser extent, foreign currency-denominated securities for our own account to:

- maintain the stability and diversification of our assets;
- maintain adequate sources of back-up liquidity to match our funding requirements; and
- supplement income from our core lending activities.

In making securities investments, we take into account a number of factors, including macroeconomic trends, industry analysis and evaluation of credit.

Our investments in securities are also subject to a number of guidelines, including limitations prescribed under the Bank Act. Under these regulations, we must limit our investments in shares and securities with a maturity in excess of three years (other than monetary stabilisation bonds issued by the Bank of Korea, national government bonds and government guaranteed bonds) to 100.0% of our total Tier I and Tier II capital. Generally, we are also prohibited from acquiring more than 15.0% of the shares with voting rights issued by any other corporation (other than for the purpose of establishing or acquiring a subsidiary as permitted under the Regulation on the Supervision of the Banking Business). Further information on the regulatory environment governing our investment activities is set out in “*Regulation and Supervision*”.

### ***Securities Classifications***

The classification guidelines and methods of valuation for securities are as follows:

| <b><u>Classification</u></b>               | <b><u>Description</u></b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |

| <i>Financial assets at FVTPL</i> . . . . . | Financial assets at fair value through profit or loss (FVTPL) include financial assets held-for-trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets are classified as held-for-trading if they are acquired for the purpose of selling or repurchasing in the short term. Also, financial assets can be designated at FVTPL if assets or liabilities are measured in accordance with different standards or in order to get rid of or reduce accounting mismatch. Financial assets measured at FVTPL are measured at fair value and the gain or loss on valuation is recognised as profit or loss. Dividends and interest income from the financial assets are also recognised as profit or loss.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <i>Financial assets at FVOCI</i> . . . . . | Financial assets that meet the following two conditions must be measured at fair value through other comprehensive income (FVOCI): (i) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, and (ii) the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets. Financial assets at FVOCI are measured at fair value after initial recognition. Gain or loss from changes in the fair value is recognised as other comprehensive income, except for (i) interest income in accordance with the effective interest rate method, (ii) dividends and (iii) foreign exchange differences on monetary assets that are directly recognised as profit or loss. When financial assets measured at FVOCI are disposed of, the cumulative income recognised in other comprehensive income is transferred to the current profit or loss. However, the cumulative income recognised for equity securities designated as financial assets measured at FVOCI is not transferred to the current profit or loss. The fair value of financial assets measured at FVOCI presented in foreign currencies is translated using the exchange rate as at the end of the reporting period. Changes in the fair value from exchange differences due to changes in amortised cost are recognised in the current profit or loss, while other changes are recognised directly in equity. |

| Classification                                      | Description                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|-----------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <i>Financial assets at amortised cost</i> . . . . . | Financial assets that meet the following two conditions must be measured at amortised cost: (i) the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding, and (ii) the objective of the entity's business model is to hold the financial asset to collect the contractual cash flows. After initial recognition, the financial assets are recognised at amortised cost using the effective interest rate, net of the allowance for doubtful accounts. |

Privately-placed commercial paper, privately-placed corporate bonds and guaranteed notes are not subject to the above valuation method. Instead, they are classified as loans and are subject to the corresponding loan loss provisioning method.

### **Book Value**

The following table sets out the book value of securities in our investment portfolio as of the dates indicated.

### Concentrations of Risk

We held no securities of individual issuers where the aggregate book value of those securities exceeded 10% of our equity as of 30 June 2025.

### Commitments and Guarantees

In the normal course of our operations, we make various commitments and guarantees to meet the financing and other business needs of our customers. Commitments and guarantees are usually in the form of, among others, payment guarantees for issuance of debentures, letters of guarantee for importers, commercial letters of credit and performance guarantees. The contractual amount of these financial instruments represents the maximum possible loss that would occur if the counterparty were to draw down the commitment or we were to fulfil our obligation under the guarantee and the counterparty were to fail to perform under the contract.

The following table sets forth our credit-related commitments and guarantees, as of the dates indicated.

|                                                            | As of 31 December           |                 |                 | As of 30 June   |

(1) Includes purchases of asset-backed commercial papers

We have credit-related commitments that are not reflected on the statement of financial position, which primarily consist of commitments to extend credit and letters of credit. Commitments to extend credit, including credit lines, represent unfunded portions of authorisations to extend credit in the form of loans. These commitments expire on fixed dates and a customer is required to comply with predetermined conditions to draw funds under the commitments.

Commercial letters of credit are undertakings on behalf of customers authorising third parties to draw drafts on us up to a stipulated amount under specific terms and conditions. They are generally short-term and collateralised by the underlying shipments of goods to which they relate and therefore have less risk.

Other financial and performance guarantees are irrevocable promises to make payments to beneficiaries in the event that our customers fail to fulfil their obligations or to perform under certain contracts. Liquidity facilities to special purpose entities (“SPEs”) represent irrevocable commitments to provide contingent liquidity credit lines to SPEs established by our customers in the event that a triggering event such as shortage of cash occurs.

The commitments and guarantees do not necessarily represent our exposure since they often expire unused.

## Funding

We fund our lending and other activities using various sources, both domestic and foreign. Our primary funding strategy is to maintain stable and low-cost funding. We have in the past achieved this in part by increasing the average balances of low-cost customer deposits, in particular demand deposits and savings deposits. Customer deposits are our principal funding source. We also acquire funding through borrowings (including from other financial institutions, the Bank of Korea, other Government-affiliated funds and entities and other lenders, call money, bonds sold under repurchase agreements and bills sold) and debentures (including senior and subordinated debentures).

## Deposits

Although the majority of our deposits are short-term, it has been our experience that the majority of our depositors generally roll over their deposits at maturity, providing us with a stable source of funding. The following tables show our average balances of deposits and the average rates paid on our deposits, on a separate basis, for the periods indicated.

(1) Defined as interest expense of each deposit divided by the average of its daily ending balances.

(2) Calculated as a sum of Won-denominated deposits, foreign currency deposits and certificate of deposits.

The commitments and guarantees do not necessarily represent our exposure since they often expire unused.

### ***Maturities of Deposits***

The following table presents, on a consolidated basis, the remaining maturities of our deposits as of 30 June 2025.

|                | As of 30 June 2025          |                      |                 |                      |                     |                      |

## **RISK MANAGEMENT**

As a financial services provider, we are exposed to various risks related to our lending and trading businesses, our deposit-taking activities and our operating environment. We strive to maintain a comprehensive system of risk management to understand, measure and monitor such risks in order to ensure the soundness of our assets and stabilise long-term profitability.

Our Risk Management Group monitors and manages our risk exposure and directly implements and ensures compliance with our risk policies and guidelines at an operational level. It reports to our Risk Management Committee and our Risk Management Steering Committee and is divided into three departments:

- the credit risk management department, which is responsible for credit risk and credit concentration risk;
- the credit review department, which is responsible for planning and executing credit review policies; and
- the integrated risk management department, which is responsible for market risk, operational risk and other risks.

Our Risk Management Committee, comprised of three Outside Directors and one Non-Standing Director, is the centralised body ultimately responsible for risk management. It provides board-level direction regarding risk management strategies and policies and reports to our board of directors. Our Risk Management Steering Committee, consisting of the Heads of six Groups (Risk Management Group, Global Business Group, Marketing Group, Management Planning Group, Credit Group and Financial Markets Group), reports directly to the Risk Management Committee and our president and chief executive officer, and works with our Risk Management Group to implement the execution of these strategies and policies.

### **Credit Risk Management**

#### ***Credit Risk Assessment and Management***

Credit risk is the risk of losses in the event of borrower defaults. Our policy objectives in credit risk management are to improve asset quality, reduce non-performing loans and minimise credit concentration risk through diversified, balanced and risk-weighted loan portfolios. To this end, we manage credit risk by establishing credit risk limits, assessing current risk levels and monitoring the status of borrowers, including their compliance with risk limits, asset quality, default rate and level of risk exposure.

We assess and manage all types of credit exposures, including loans, guarantees, investment securities and derivative products. The current level of credit risk is determined by “expected” and “unexpected” loss levels. We calculate the expected loss level based on the probability of default, the loss given default and the exposure at default, and use the measured expected loss to determine interest rates and provision levels in relation to new or renewed credits. The unexpected loss level, which incorporates the possibility of fluctuations in the expected loss level, is calculated by the Advanced Internal Rating-Based method as proposed by the Basel Committee for internal control purposes and by a risk-weighted method approved by the FSS for use with regard to external regulations.

#### ***Credit Evaluation and Approval***

In general, we evaluate the credit of every loan applicant and guarantor before approving any loans. The evaluation and approval process differs depending on whether the loan is a corporate loan or a retail loan.

Our corporate credit evaluation system assigns credit risk ratings to corporate borrowers by measuring and analysing various quantitative and qualitative risk factors. After a preliminary credit rating is generated in light of the borrower’s probability of default and past ratings, the rating is adjusted based on the borrower’s ownership structure, corporate history, outlook, contingent liabilities, credit history and other special considerations to produce a final credit rating. We may apply different models tailored to specific characteristics of the potential borrower to make the rating more predictive and ensure a more stable calculation of the probability of default. Evaluation results are used to determine loan approval and loan size and to set loan limits at the industry level and the individual loan account level.

Retail exposure consists of secured exposures (consisting primarily of housing loans) and other unsecured exposures. For evaluating and approving retail credit applications, we use a probability of default segmentation system that classifies retail exposures to appropriate asset categories based on borrower- and transaction-specific

characteristics and arrears information. The system is designed to form asset categories consisting of exposures with similar risk characteristics and reclassifies exposures when there is reason for significant changes in the probability of default.

## Market Risk Management — Non-Trading Activities

### Liquidity Risk Management

Liquidity risk is the risk of insolvency, default or loss due to disparities between inflow and outflow of funds. It includes the risk of having to obtain funds at a high price or having to dispose of securities at an unfavourable price due to lack of available funds. We seek to minimise liquidity risk through early detection of risk factors related to sourcing and managing funds and by maintaining an appropriate level of liquidity through systematic management.

Our liquidity risk management covers all classes of assets and liabilities on and off the balance sheet that are related to capital inflows and outflows. Liquidity risk is managed in accordance with the risk limits and guidelines established internally and by relevant regulatory authorities. Pursuant to principal regulations applicable to banks as promulgated by the FSC, we are required to keep a specific Won currency liquidity coverage ratio (LCR) and a foreign currency liquidity coverage ratio (FLCR) and we must maintain relevant ratios above certain minimum levels. Specifically, the FSC requires us and other Korean commercial banks to maintain LCR of not less than 100% and FLCR of not less than 80%. The minimum LCR and FLCR were temporarily lowered between 2020 and 2024 due to the volatility and uncertainty facing the financial markets as a result of the COVID-19 pandemic, but as of the date of this Offering Circular, the applicable LCR and FLCR have been restored to 100% and 80%, respectively.

We use a customer behaviour model for more advanced forecasting of asset and liability maturities and manage a contingency plan for timely response to liquidity crises

The following tables show our (i) average liquidity coverage ratio and (ii) average foreign currency liquidity coverage ratio, each for the month of June 2025 in accordance with the regulations of the FSC.

### Average Liquidity Coverage Ratio

|                                                       | For the Month<br>of June 2025                           |
|-------------------------------------------------------|---------------------------------------------------------|
|                                                       | <i>(In billions of<br/>Won, except<br/>percentages)</i> |
| High liquid assets (A) . . . . .                      | ₩ 80,039                                                |
| Net cash outflows over the next 1 month (B) . . . . . | 76,236                                                  |
| Cash outflow . . . . .                                | 112,501                                                 |
| Cash inflow . . . . .                                 | 36,264                                                  |
| Liquidity coverage ratio (A/B) . . . . .              | 105.0%                                                  |

### Average Foreign Currency Liquidity Coverage Ratio

|                                                       | For the Month<br>of June 2025                            |
|-------------------------------------------------------|----------------------------------------------------------|
|                                                       | <i>(In millions of<br/>US\$, except<br/>percentages)</i> |
| High liquid assets (A) . . . . .                      | US\$14,511                                               |
| Net cash outflows over the next 1 month (B) . . . . . | 7,974                                                    |
| Liquidity coverage ratio (A/B) . . . . .              | 182.0%                                                   |

## Market Risk Management — Trading Activities

Trading activities we recognise as entailing market risk exposure include:

- trading activities for our account to realise short-term profits in debt and equity markets and foreign exchange markets based on short-term forecast of changes in the market situation; and

- trading activities involving derivatives, such as swaps, forwards, futures and option transactions, to realise profits primarily from arbitrage transactions and, to a lesser extent, from selling derivative products to our customers and to hedge market risk incurred from those activities.

Our Risk Management Committee decides the overall price risk ceiling and distributes appropriate risk limits to each trading activity.

Commencing in 2023, we replaced the use of daily value at risk (“**VaR**”) with Basel III’s standardised model to measure market risk. Under this model, we measure our market risk capital by aggregating (i) risk capital measured using the sensitivities-based method, (ii) default risk capital and (iii) residual risk add-on:

- risk capital measured using the sensitivities-based method represents the linear and non-linear losses that can result from adverse changes in interest rates, credit spreads, equity prices, foreign exchange rates and commodities prices;
- default risk capital represents the losses that can result from any unexpected default of an entity not contemplated under the sensitivities-based method; and
- residual risk add-on represents any other losses that are not contemplated under the sensitivities-based method or are not considered to result from the risk of default.

The following table shows our market risk capital (regulated capital) by market risk group as of 30 June 2025:

| <u>Risk Categories</u>  |                                                                            | <u>Risk Capital</u><br><i>(In billions of Won)</i> |
|-------------------------|----------------------------------------------------------------------------|----------------------------------------------------|
| Sensitivity Risk Change | General interest rate risk                                                 | ₩ 51                                               |

| Default Risk Change     | Non-securitisations                                                        | 34                                                 |
|                         | Securitisations (non-correlation trading<br>portfolio)                     | —                                                  |
|                         | Securitisations (correlation trading<br>portfolio)                         | —                                                  |
|                         |                                                                            | <hr/>                                              |
| Residual Risk Add-On    |                                                                            | 1                                                  |
| Total                   |                                                                            | <hr/> <b>₩428</b> <hr/>                            |

(1) Structural foreign exchange positions approved by the FSS are excluded from the calculation of regulatory capital.

### **Price Risk Management**

Price risk is the risk of holding or taking positions in equities and equity-related derivatives’ delta equivalent position. We separate price risk due to general market variables such as stock prices, exchange rates and interest rates from price risk due to events that only affect particular issuers.

Our trading equity portfolio consists of stocks listed on the KRX KOSPI Market or the KRX KOSDAQ Market and nearest-month or second nearest-month futures contracts under strict limits on diversification as well as limits on positions. We have been particularly focused on managing risk in these equities due to the level of volatility in the Korean stock market. On a separate basis, we held no equity securities denominated in Won in our trading account as of 30 June 2025.

### **Interest Rate Risk Management**

Interest rate risk arises when interest rate fluctuations cause unexpected changes in the value of rate sensitive assets and liabilities. The principal objectives of our interest rate risk management are to generate stable net interest income and to protect our net asset value against such fluctuations.

We monitor and manage our interest rate risk based on various analytical measures such as interest rate gap, duration gap and net portfolio value and net interest income simulations, and also monitor our interest rate VaR limits, interest rate earnings at risk (“**EaR**”) limits and interest rate gap ratio limits on a monthly basis. Using the standard framework established by the Bank for International Settlements, we measure our interest rate VaR and interest rate EaR based on simulated estimations of the maximum decrease in net asset value and net interest income in a one-year period based on various scenario analyses of historical interest rates. Our integrated risk management department monitors compliance with interest rate risk exposure limits set by our Risk Management Committee.

## **Operational and Other Risk Management**

### ***Operational Risk Management***

We define operational risk broadly to include all financial and non-financial risks, other than credit and market risk, resulting from inadequate internal processes, personnel and systems or from external events. Such risks include legal risk but exclude strategic and reputational risk.

Through our operational risk management, we strive to not only satisfy regulatory requirements, but also provide internal support through the cultivation of a strong risk management culture, reinforcement of internal controls, improvement of work processes and provision of timely feedback to our management members and staff. We regularly measure operational risk and refine operational risk policies and procedures to manage and control the level of risk arising from changes in operational environment and internal control. In addition, we maintain a risk and control self- assessment (RCSA) system to ensure proper monitoring and measurement of operational risk in each of our business groups and have internal control managers in all of our departments and branches to update such self-assessments on a quarterly basis.

### ***Other Risk Management***

Other risks include strategic and reputational risks. As these risks are difficult to quantify, we use qualitative risk and control self-assessments to monitor and limit the level of risk.

## MANAGEMENT AND EMPLOYEES

### Management

#### *Board of Directors*

Our board of directors has the ultimate responsibility for managing our affairs. The board currently comprises two Standing Directors, one Non-Standing Director, and six Outside Directors.

Our articles of incorporation provide that the board must have at least five and up to eleven directors. Standing directors must comprise less than 50% of the total number of directors. Each standing director is elected for a term of office up to three years as decided in the meeting of shareholders, and each outside director is elected for a term of office up to two years. These terms are subject to the Korean Commercial Code, the Bank Act, the Act on the Corporate Governance of Financial Companies (in effect since 1 August 2016) and related regulations. Each director may be re-elected, subject to these laws and regulations.

Our board of directors meets regularly on a quarterly basis to discuss and resolve various corporate matters. The board may also convene for additional extraordinary meetings at the request of any of the directors.

The names and positions of our directors are set forth below. The business address of all of the directors is our registered office at 35 Eulji-ro, Jung-gu, Seoul, Korea.

#### *Standing Directors*

As of the date of this Offering Circular, we have two Standing Directors, who are full-time employees of the Bank and hold executive positions as below.

| <u>Name</u>             | <u>Age</u> | <u>Position</u>                       | <u>Officer Since</u> | <u>Term Ends</u>                  |
|-------------------------|------------|---------------------------------------|----------------------|-----------------------------------|
| Ho Sung Lee . . . . .   | 61         | President and Chief Executive Officer | 1 January 2025       | 31 December 2026                  |
| Byung Jin Min . . . . . | 59         | Standing Member of Audit Committee    | 23 March 2023        | Annual General Meeting for FY2025 |

*Mr. Ho Sung Lee*, age 61, has served as our President and CEO since 1 January 2025. Prior to serving as our President and CEO, he served as the President and CEO of Hana Card and served at various roles with us. Mr. Lee has an undergraduate degree in asset management from Kyung Hee Cyber University.

*Mr. Byung Jin Min*, age 59, has served as our Standing Member of Audit Committee since 23 March 2023. Prior to serving as our Standing Director, he served as the Deputy Governor and the Director General at the Financial Supervisory Service. Mr. Min has an undergraduate degree from Seoul National University in business administration and an M.B.A. from Thunderbird School of Global Management at Arizona State University.

#### *Non-Standing Directors*

As of the date of this Offering Circular, we have one Non-Standing Director, who is neither a full-time employee nor an executive officer of the Bank but is otherwise affiliated with the Bank, as below.

| <u>Name</u>             | <u>Age</u> | <u>Position</u>       | <u>Director Since</u> | <u>Term Ends</u>                  | <u>Position Outside the Bank</u>       |
|-------------------------|------------|-----------------------|-----------------------|-----------------------------------|----------------------------------------|
| Jong Moo Park . . . . . | 58         | Non-Standing Director | 23 March 2023         | Annual General Meeting for FY2025 | Deputy President, Hana Financial Group |

### ***Outside Directors***

Our Outside Directors are selected based on their experience and knowledge in diverse areas, which include law, finance, economics, management and accounting. We currently have six Outside Directors, all of whom were nominated by the Officer Candidate Recommendation Committee and approved by our shareholders. As of the date of this Offering Circular, our outside directors are as follows:

| <u>Name</u>              | <u>Age</u> | <u>Position</u>  | <u>Director Since</u> | <u>Term Ends</u>                  |
|--------------------------|------------|------------------|-----------------------|-----------------------------------|
| Hyun Cha Choe . . . . .  | 63         | Outside Director | 9 July 2021           | Annual General Meeting for FY2025 |
| JinQ Jeon . . . . .      | 54         | Outside Director | 25 April 2022         | Annual General Meeting for FY2025 |
| Young Sun Kwon . . . . . | 61         | Outside Director | 20 March 2024         | Annual General Meeting for FY2025 |
| Do Jin Kim . . . . .     | 66         | Outside Director | 20 March 2024         | Annual General Meeting for FY2025 |
| Sangtai Choi . . . . .   | 69         | Outside Director | 20 March 2024         | Annual General Meeting for FY2025 |
| Young Joo Lee . . . . .  | 58         | Outside Director | 21 March 2025         | Annual General Meeting for FY2026 |

### ***Board Practices***

#### *Committees of the Board of Directors*

We currently have five management committees that serve under the board:

- Audit Committee;
- Evaluation and Compensation Committee;
- Officer Candidate Recommendation Committee;
- Risk Management Committee;
- Consumer Risk Management Committee; and
- Internal Control Committee.

The board appoints each member of the above committees except for members of the Audit Committee, who are elected by our shareholders at the annual general meeting.

#### *Audit Committee*

The Audit Committee consists of three Outside Directors, Sangtai Choi, Young Joo Lee and JinQ Jeon, and one Standing Director, Byung Jin Min. The chairperson is JinQ Jeon. This committee reviews all audit and compliance-related matters and makes recommendations to our board. It is also responsible for the following:

- establishing, executing and evaluating the results of our internal audit plan (including business, financial, management, compliance and IT audits);
- appointing and/or dismissing the general manager of our auxiliary audit division;
- evaluating our internal control system; and
- appointing and overseeing our outside auditors and setting internal procedures or making decisions on matters that are related to auditing.

The committee holds regular meetings quarterly.

Pursuant to certain amendments made to the Act on the Corporate Governance of Financial Companies aimed at strengthening the internal control systems of financial companies in Korea, which became effective in July 2024, we established an internal control committee under our board of directors on 24 December 2024. This new committee is responsible for establishing and amending our strategies and standards relating to internal control and overseeing their proper implementation, among others.

The names and positions of our executive officers as of the date of this Offering Circular are set out below. All of our executive officers are employed on a full-time basis.

| <u>Name</u>                | <u>Age</u> | <u>Position</u>                       | <u>Officer Since</u> | <u>Term Ends</u> |
|----------------------------|------------|---------------------------------------|----------------------|------------------|
| Ho Sung Lee . . . . .      | 61         | President and Chief Executive Officer | 1 January 2025       | 31 December 2026 |
| Byung Joon Park . . . . .  | 59         | Deputy President                      | 1 January 2023       | 31 December 2025 |
| Han Uk Kim . . . . .       | 57         | Deputy President                      | 1 January 2023       | 31 December 2025 |
| Jeong Taek Oh . . . . .    | 57         | Deputy President                      | 1 January 2023       | 31 December 2025 |
| Seon Yong Lee . . . . .    | 58         | Deputy President                      | 1 January 2023       | 31 December 2025 |
| Dong Won Lee . . . . .     | 58         | Deputy President                      | 1 January 2021       | 31 December 2026 |
| Young Hun Kim . . . . .    | 54         | Deputy President                      | 1 January 2024       | 31 December 2025 |
| Ho Jin Jeon . . . . .      | 57         | Deputy President                      | 1 January 2024       | 31 December 2025 |
| Eun Bae Lee . . . . .      | 57         | Deputy President                      | 1 January 2024       | 31 December 2025 |
| Young Soon Cho . . . . .   | 56         | Deputy President                      | 1 January 2024       | 31 December 2025 |
| Jae Chol Lee . . . . .     | 56         | Deputy President                      | 1 January 2024       | 31 December 2025 |
| Dong Yeol Lee . . . . .    | 54         | Deputy President                      | 1 January 2024       | 31 December 2025 |
| Seung Goo Woo . . . . .    | 57         | Deputy President                      | 1 January 2025       | 31 December 2025 |
| Jae Heon Lee . . . . .     | 57         | Deputy President                      | 1 January 2025       | 31 December 2025 |
| Jin Woo Kim . . . . .      | 57         | Deputy President                      | 1 January 2025       | 31 December 2025 |
| You Sugk Seo . . . . .     | 53         | Deputy President                      | 1 January 2025       | 31 December 2025 |
| Joon Hyung Chung . . . . . | 55         | Managing Director                     | 1 January 2024       | 31 December 2025 |
| Myeong Hwan Bang . . . . . | 54         | Managing Director                     | 1 January 2024       | 31 December 2025 |
| Kyeong Cheol Yoo . . . . . | 54         | Managing Director                     | 1 January 2024       | 31 December 2025 |
| Chang Wook Pae . . . . .   | 54         | Managing Director                     | 1 January 2024       | 31 December 2025 |
| Hee Soo Jung . . . . .     | 53         | Managing Director                     | 1 January 2024       | 31 December 2025 |
| Beom Jun Cho . . . . .     | 50         | Managing Director                     | 1 January 2024       | 31 December 2025 |
| Yong Keon Kye . . . . .    | 56         | Managing Director                     | 1 January 2025       | 31 December 2025 |
| Young Jun Lee . . . . .    | 54         | Managing Director                     | 1 January 2025       | 31 December 2025 |
| Young Ho Kim . . . . .     | 56         | Managing Director                     | 1 January 2025       | 31 December 2025 |
| Joong Gun Seo . . . . .    | 55         | Managing Director                     | 1 January 2025       | 31 December 2025 |
| Young Seok Jeong . . . . . | 55         | Managing Director                     | 1 January 2025       | 31 December 2025 |
| Yu Gun Kwak . . . . .      | 51         | Managing Director                     | 1 January 2025       | 31 December 2026 |

## Employees

As of 30 June 2025, on a separate basis, we had a total of 11,916 employees consisting of 10,600 full-time employees and 1,316 contract-based employees (including 627 part-time contract-based employees). Employee compensation is based on a combination of base salary and wages, overtime and periodic bonuses. Bonuses are paid based on individual performance and business unit performance. We grant our full-time employees annual increases in base salary. For the years ended 31 December 2022, 2023 and 2024 and the six months ended 30 June 2025, our salaries (which include regular wages, overtime and bonuses) amounted to ₩1,615 billion, ₩1,655 billion, ₩1,714 billion and ₩862 billion, which represented 48.7%, 48.0%, 49.3% and 49.6% of our total general and administrative expenses, respectively. We also provide a wide range of benefits to our full-time employees, including medical insurance, employment insurance and life insurance. We believe that our compensation package is similar to that offered by our peer financial institutions. We have not experienced any material strikes or labour disputes in recent years, and we consider labour relations with members of our workforce to be good. However, there can be no assurance that we will be able to maintain such a working relationship with our employees and will not experience labour disputes resulting from disagreements with the labour unions in the future.

As of the date of this Offering Circular, we have one labour union, which was created on 1 January 2017 upon the merger of the two existing unions, the Korea Exchange Bank branch of the Korean Financial Industry Union (established in 1960) and the Hana Bank branch of the Korean Financial Industry Union (established in 1982). Every two years, our management and labour union negotiate and enter into a new collective bargaining agreement that has a two-year duration, while annual wage adjustments are negotiated every year. On 15 October 2024, we entered into a collective bargaining agreement with the labour union and expect to negotiate the 2027 collective bargaining agreement in 2026.

In accordance with the National Pension Act, we contribute an amount equal to 4.5% of employee wages, and each employee contributes 4.5% of his or her wage into each employee's personal pension account. In addition, in accordance with the Guarantee of Worker's Retirement Benefits Act, we have adopted a retirement pension plan for our employees. Contributions under the retirement pension plan are deposited annually into a financial institution, and an employee may elect to receive a monthly pension or a lump-sum amount upon retirement. Our retirement pension plan is in the form of a defined benefit plan, which guarantees a certain payout at retirement, according to a fixed formula based on the employee's average salary and the number of years for which the employee has been a plan member. Under Korean law, we may not terminate the employment of full-time employees except under certain circumstances.

## Shareholders

The following table presents information regarding the beneficial ownership of our common shares as of 30 June 2025 by each person or entity known to us to own beneficially more than 5.0% of our outstanding common shares.

Except as otherwise indicated, each shareholder identified by name has:

- sole voting and investment power with respect to its shares; and
- record and beneficial ownership with respect to its shares.

| <u>Beneficial Owner</u>        | <u>Number of Common<br/>Shares Owned</u> | <u>% of Ownership</u> |
|--------------------------------|------------------------------------------|-----------------------|
| Hana Financial Group . . . . . | <u>1,071,915,717</u>                     | <u>100%</u>           |
| <b>Total</b> . . . . .         | <u><u>1,071,915,717</u></u>              | <u><u>100%</u></u>    |

## **CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS**

As of 30 June 2025, there were ₩897 million loans outstanding made by us to our registered directors and executive officers on a separate basis. There are no guarantees provided by us and our consolidated subsidiaries for the benefit of any of our directors or executive officers. None of the directors or executive officers has or has had any interest in any transactions effected by us which are or were unusual in their nature or conditional or significant to our business and which were effected during the current or immediately preceding year or were effected during an earlier year and remain in any respect outstanding or unperformed.

As a subsidiary of Hana Financial Group, we engage from time to time in ordinary course of business activities with other subsidiaries of Hana Financial Group, including cross-selling activities. See Note 51 of the notes to our consolidated financial statements included in this Offering Circular.

## HANA FINANCIAL GROUP

Hana Financial Group was established on 1 December 2005 through a share transfer in accordance with the Commercial Act of Korea and the Financial Holding Companies Act. After obtaining the necessary approvals from the FSC, the shareholders of Original Hana Bank, Hana Securities Co., Ltd. (“**Hana Securities**”), Hana Information & System Co., Ltd. and Hana Institute of Finance (together, the “**Original HFG Subsidiaries**”) transferred all of their common shares in the Original HFG Subsidiaries to the newly formed Hana Financial Group in exchange for common shares of Hana Financial Group in proportion to their respective shareholdings in the relevant Original HFG Subsidiaries. On 12 December 2005, the common shares of Hana Financial Group were listed on the Korea Exchange.

The Bank and Hana Securities serve as the main distribution channels for Hana Financial Group. Through the network of 607 domestic branches and sub-branches of the Bank, 20 overseas branches of the Bank and 54 domestic branches of Hana Securities, each as of 30 June 2025, Hana Financial Group delivers a wide range of financial products and services to customers, while Hana Card, Hana Capital, Hana Life, Hana Asset Trust and Finnq (all as defined below) focus their efforts on developing innovative financial products.

The following is the organisational chart of Hana Financial Group as of the date of this Offering Circular:

|           |                 |           |              |           |                |                   |                  |                                   |          |               |                         |         |       |
|-----------|-----------------|-----------|--------------|-----------|----------------|-------------------|------------------|-----------------------------------|----------|---------------|-------------------------|---------|-------|
| Hana Bank | Hana Securities | Hana Card | Hana Capital | Hana Life | Hana Insurance | Hana Savings Bank | Hana Asset Trust | Hana Alternative Asset Management | Hana F&I | Hana Ventures | Hana Investors Services | Hana TI | Finnq |
| 100%      | 100%            | 100%      | 100%         | 100%      | 91.45%         | 100%              | 100%             | 100%                              | 100%     | 100%          | 100%                    | 100%    | 100%  |

### Hana Securities

Hana Securities Co., Ltd. (renamed in 2022 from Hana Financial Investment Co., Ltd.; “**Hana Securities**”) is a wholly owned subsidiary of Hana Financial Group, engaged in the asset management and investment banking business. Hana Securities was incorporated in January 1977 as an asset management company. On 31 May 2005, Original Hana Bank acquired 100% of the outstanding common shares of Hana Securities from the Korea Deposit Insurance Corporation for ₩475 billion. In connection with the establishment of Hana Financial Group, Original Hana Bank transferred all of the outstanding common shares of Hana Securities to Hana Financial Group on 1 December 2005, for 16,278,619 common shares of Hana Financial Group. On 1 December 2008, Hana Securities expanded its business into investment banking by merging with Hana Investment Bank. Hana Futures Co., Ltd. (previously a wholly-owned subsidiary of Hana Financial Group), which provides domestic and overseas trading and brokerage services, merged with and into Hana Securities in August 2016.

### Hana Card

Hana Card Co., Ltd. (“**Hana Card**”) provides credit cards and other related services as permitted under the Specialised Credit Financial Business Act. It was incorporated in October 2009 as a result of a spin-off of Original Hana Bank’s credit card business. Pursuant to the spin-off plan, Original Hana Bank transferred to Hana Card Co., Ltd., a newly formed company, the assets and liabilities related to Original Hana Bank’s credit card business (other than those relating to corporate purchase cards, which were retained by Original Hana Bank), and all common stock of Hana Card Co., Ltd. was distributed to Hana Financial Group. On 11 December 2009, Hana Financial Group entered into a joint investment agreement with SK Telecom, a Korean telecommunications services company, pursuant to which SK Telecom acquired a 49% equity interest in Hana Card Co., Ltd. for ₩400 billion on 25 February 2010, and Hana Card Co., Ltd. was renamed Hana SK Card Co., Ltd. On 1 December 2014, Hana SK Card Co., Ltd. merged with and into the credit card business spun off from Korea Exchange Bank, and the surviving entity from the merger was renamed Hana Card. As of 30 June 2025, Hana Financial Group owned 100% of Hana Card.

### Hana Capital

Established in February 1987, Hana Capital Co., Ltd. (“**Hana Capital**”) provides facility leasing, instalments, and personal loans to consumers. Originally a member company of the Kolon Group, Hana Capital became a

subsidiary of Original Hana Bank in 2004. Following the formation of the Hana Financial Group, Original Hana Bank transferred all of its common shares of Hana Capital to Hana Financial Group. In February 2018, Hana Financial Group acquired the remaining 49.87% stake in Hana Capital from Kolon Industries Inc. and other small shareholders, and Hana Capital became a wholly-owned subsidiary of Hana Financial Group.

### **Hana Life**

Hana Life Insurance Co., Ltd. (“**Hana Life**”) engages in the life insurance business and sells life insurance products through the Bank’s branch network. Hana Life was incorporated in November 1991 under the name of France Life Insurance Company and was acquired by Allianz AG in 1998. On 21 February 2003, Original Hana Bank acquired 50.0% of the issued share capital of France Life Insurance Company and changed its name to Hana Life Insurance Co., Ltd. In 2007, Original Hana Bank acquired the remaining 50.0% stake in Hana Life from Allianz AG and subsequently contributed all of its shares of Hana Life to Hana Financial Group. In March 2008, Hana Financial Group formed a strategic alliance with HSBC Insurance (Asia-Pacific) Holdings Limited (“**HSBC Insurance**”) and sold a 50.0% minus one share stake in Hana Life to HSBC Insurance. In May 2013, following HSBC Insurance’s decision to exit the Korean market, Hana Financial Group reacquired the 50.0% minus one share stake in Hana Life from HSBC Insurance, and Hana Life again became a wholly-owned subsidiary of Hana Financial Group.

### **Hana Insurance**

In May 2020, Hana Financial Group acquired a 70% interest in The-K Non-Life Insurance from the Korea Teachers’ Credit Union, which retained the remaining 30%. In June 2020, the subsidiary was renamed as Hana Insurance Co., Ltd. Hana Financial Group subsequently increased its equity interest to 84.6% in July 2022 and further to 89.6% and to 91.5% in July 2022 and July 2024, respectively, through capital contributions. Hana Insurance is the second insurance arm of Hana Financial Group offering comprehensive non-life insurance products, such as auto, health, travel and leisure insurance.

### **Hana Savings Bank**

Hana Savings Bank was incorporated on 8 February 2012 upon Hana Financial Group’s acquisition of certain assets and liabilities of Jeil II Savings Bank and Ace Mutual Savings Bank. In September 2012, Hana Savings Bank acquired Korea Savings Bank. Hana Savings Bank provides a range of deposit products and small-loan finance services and operates eight branches located in Korea.

### **Hana Asset Trust**

Established in 2004, Hana Asset Trust Co., Ltd. (“**Hana Asset Trust**”) provides real estate trust products and related services.

### **Hana Alternative Asset Management**

Established in 2006, Hana Alternative Asset Management Co., Ltd. (renamed in 2017 from Hana Asset Management Co., Ltd.; “**Hana Alternative Asset Management**”) provides asset management and investment consulting services. Hana Alternative Asset Management became a wholly-owned subsidiary of Hana Financial Group in 2016.

### **Hana F&I**

Hana F&I was established in 1989 as a specialised finance institution. In December 2013, it was changed to a non-performing loan (“**NPL**”) investment management company and has been active in NPL markets since 2014. Hana F&I provides investment management services in connection with corporate restructuring, provision of credit services to loss-making businesses, and NPL investment and management.

### **Hana Ventures**

Hana Ventures Inc. (“**Hana Ventures**”) was established on 4 October 2018 as a wholly-owned subsidiary of Hana Financial Group. As of 30 June 2025, Hana Ventures invested over ₩70.9 billion in various start-up companies in sectors ranging from fintech and information and communications technology (ICT) to healthcare and Internet-based content.

## Hana Investors Services

Established in 2003, Hana Investors Services Co., Ltd. (“**Hana Investors Services**”) provides financial trust management and accounting services for corporations, banks or institutional investors. Hana Investors Services became a wholly-owned subsidiary of Hana Financial Group in 2015.

## Hana TI

Hana Financial TI Co., Ltd. (renamed in 2017 from Hana Information & System Co., Ltd.; “**Hana TI**”) was established in August 1990 as a subsidiary of Original Hana Bank. Hana TI develops and maintains the IT systems of the member companies of Hana Financial Group as well as other third party clients. In connection with the establishment of Hana Financial Group, Original Hana Bank transferred all of the outstanding common shares of Hana TI to Hana Financial Group on 1 December 2005, for 178,442 common shares of Hana Financial Group. In November 2019, Hana Financial Group acquired the remaining 10.02% stake in Hana TI from DPR International Investments LLC, and Hana TI became a wholly-owned subsidiary of Hana Financial Group.

## Finnq

Finnq Inc. (“**Finnq**”) was incorporated on 24 August 2016 as a joint venture with SK Telecom, a mobile service provider in Korea. Finnq provides fintech-based services such as mobile-oriented asset management, simplified payment and facilitation of overseas transactions through a mobile application launched in 2017. In 2022, Hana Financial Group acquired SK Telecom’s interest in the company and held a 100% stake as of 30 June 2025.

## Principal Shareholders of Hana Financial Group

The following table sets out certain information regarding the ownership of Hana Financial Group’s common shares. Each entity known to the Bank to beneficially own more than 5.0% of the outstanding common shares of Hana Financial Group as of 30 June 2025 is listed below.

| <u>Beneficial Owner</u>           | <u>Number of<br/>Common Shares<br/>Owned</u> | <u>% of Ownership</u> |
|-----------------------------------|----------------------------------------------|-----------------------|
| Korea National Pension Fund ..... | 25,475,124                                   | 8.95%                 |
| Capital Group .....               | 19,494,817                                   | 6.85%                 |
| BlackRock Fund Advisors .....     | 18,317,138                                   | 6.43%                 |

## REGULATION AND SUPERVISION

### Principal Regulations Applicable to Banks

#### *Capital Adequacy and Allowances*

The Bank Act requires national banks, such as the Issuer, to maintain a minimum paid-in capital of ₩100 billion and regional banks to maintain a minimum paid-in capital of ₩25 billion. All banks, including foreign bank branches in Korea, are also required to maintain a prescribed solvency position. A bank must also set aside in its legal reserve an amount equal to at least 10% of the net income after tax each time it pays dividends on net profits earned until its legal reserve reaches at least the aggregate amount of its paid-in capital.

Under the Bank Act, the capital of a bank is divided into two categories, Tier I and Tier II capital. Tier I capital (core capital) consists of shareholders' equity, capital surplus, retained earnings, the comprehensive aggregate of other profit/loss amounts and hybrid Tier I capital instruments. Tier II capital (supplementary capital) includes capital and capital surplus arisen from the issuance of supplementary capital, allowance for loan losses set aside for loans classified as normal or precautionary (up to certain limits) and certain other subordinated debt.

All banks must meet minimum ratios of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets, determined in accordance with FSC requirements that have been formulated based on BIS standards. These standards were adopted and became effective in 1996. All domestic banks and foreign bank branches must meet a minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk-weighted assets of 8%.

The FSS amended the Detailed Rules on the Supervision of the Banking Business and, as a result, the following risk-weight ratios must be applied by Korean banks in respect of home mortgage loans:

- (1) for banks which adopted a standardised approach for calculating credit risk capital requirements, to the extent that a mortgage obtained in relation to a home mortgage loan is not repaid through the cash flow of the mortgaged property, a risk-weight ratio of 20% to 70%, depending on the loan-to-value ratio, shall apply, provided that a higher risk-weight ratio may be applied to home mortgage loans subject to certain exceptions; and
- (2) for banks which adopted an internal ratings-based approach for calculating credit risk capital requirements, a risk-weight ratio calculated with reference to the probability of default, loss given default and exposure at default (each term as defined under the Detailed Rules on the Supervision of the Banking Business).

Under the Regulation on the Supervision of the Banking Business, banks must generally maintain allowances for credit losses in respect of their outstanding loans and other credits (including trust account loans) in an aggregate amount covering not less than:

- 0.85% in the case of normal credits comprising loans to corporate borrowers (0.9% in the case of normal credits comprising loans to borrowers in the “construction,” “wholesale and retail,” “accommodation and restaurant” and “real estate and rent” industries (as classified under the Korean Industry Classification Standard)), 1.0% in the case of normal credits comprising loans to individuals and households, 1.1% in the case of normal credits comprising outstanding credit card receivables and 2.5% in the case of normal credits comprising outstanding card loans and revolving loans;
- 7.0% of precautionary credits, 10% in the case of precautionary credits comprising loans to individuals and households, 40% in the case of precautionary credits comprising outstanding credit card receivables and 50% in the case of precautionary credits comprising outstanding card loans and revolving loans;
- 20% of substandard credits, 60% in the case of substandard credits comprising outstanding credit card receivables and 65% in the case of substandard credits comprising outstanding card loans and revolving loans;
- 50% of doubtful credits, 55% in the case of doubtful credits comprising loans to individuals and households and 75% in the case of doubtful credits comprising outstanding credit card receivables, card loans and revolving loans; and
- 100% of estimated loss credits.

Furthermore, under the Regulation on the Supervision of the Banking Business, Korean banks must establish allowances in respect of any confirmed guarantees (including confirmed acceptances) and outstanding unused credit lines as of the date of settlement in an aggregate amount calculated at the same rates applicable to normal, precautionary, substandard and doubtful credits comprising their outstanding loans and other credits as set out above. See “— *Regulations Relating to Retail Household Loans.*”

FSC amended the Regulations concerning the Supervision of the Banking Business as of 28 June 2007 in order to reflect the Basel II (or the new BIS standard) to the Regulations. The amendment became effective as of 1 January 2008. Under the amended Regulations, with respect to the evaluation of the credit risk for the calculation of the required capital ratio, banks may select either the Internal Rating-Based Approach (“**IRB**”) established by themselves or the Standard Approach provided by FSC. To select the IRB, a bank has to obtain the approval of the FSS. Under the new BIS standard, there is no change to the market risk, and the evaluation of the operating risk is required in addition to the credit risk and the market risk when calculating the required capital ratio. For the evaluation of the operating risk, banks may select either the Standard Approach, for which no Governmental approval is required, or Advanced Measurement Approaches, for which the FSS approval is required.

In May 2013, the FSC announced its decision, in conjunction with the Ministry of Economy and Finance, FSS and the Bank of Korea, to gradually implement Basel III by 1 December 2013. Under the regulations, which came into effect as of 1 December 2013, Korean banks were required to maintain a minimum ratio of Tier I common capital (which principally includes equity capital, capital surplus and retained earnings less reserve for credit losses) to risk weighted assets of 3.5% and Tier I capital to risk weighted assets of 4.5% from 2013. Such minimum ratios of Tier I common capital to risk weighted assets and Tier I capital to risk weighted assets were increased to 4.0% and 5.5%, respectively, from 2014 and 4.5% and 6.0%, respectively, from 2015. These requirements would be in addition to the existing requirement for a total minimum ratio of Tier I and Tier II capital (less any capital deductions) to risk weighted assets of 8.0%, which remains unchanged. The regulations also contemplate an additional capital conservation buffer of 2.5%, as well as a potential counter-cyclical capital buffer of up to 2.5%, which is determined on a quarterly basis by the FSC (currently, 1.0%).

In December 2015, the FSC approved the implementation of counter-cyclical capital buffer requirement (to range from 0% to 2.5%) to be determined by the FSC under Basel III, effective as of January 2016. The counter-cyclical capital buffer requirement was initially set at 0%, and the FSC announced an increase to 1%, effective from May 2024. Furthermore, in December 2015, the FSC designated Hana Financial Group, Shinhan Financial Group, KB Financial Group and NongHyup Financial Group as “Domestic Systemically Important Bank” holding companies and Woori Bank as a “Domestic Systemically Important Bank” and introduced more stringent capital requirements for these financial institutions. According to these regulations, such financial institutions were required to maintain an additional capital buffer of 1.00%, as of the date of this Offering Circular.

In July 2021, Hana Financial Group, Shinhan Financial Group, KB Financial Group, NongHyup Financial Group and Woori Financial Group were designated by the FSC as “Domestic Systemically Important Bank” holding companies, and Hana Bank, Shinhan Bank, Kookmin Bank, NongHyup Bank and Woori Bank were designated by FSC as “Domestic Systemically Important Banks”. In addition, in July 2021, the FSC identified “Domestic Systemically Important Bank” holding companies and “Domestic Systemically Important Banks” as domestic systemically important financial institutions under the Act on the Structural Improvement of the Financial Industry. Domestic systemically important financial institutions are required to prepare and submit their own recovery plans to the FSS within three months from the date of notification of designation pursuant to the Act on the Structural Improvement of the Financial Industry. Hana Financial Group and Hana Bank have been selected as a domestic systemically important bank holding company and “Domestic Systemically Important Bank”, respectively, since 2016.

### ***Liquidity***

All banks are required to ensure adequate liquidity by matching the maturities of their assets and liabilities in accordance with the Bank Act. Banks may not invest an amount exceeding 100% of their Tier I and Tier II capital (less any capital deductions) in stocks, derivatives linked securities and other securities with a maturity of over three years. This stipulation does not apply to Korean government bonds, to bond principal and interest payments guaranteed by the Korean government or to Monetary Stabilisation Bonds issued by the Bank of Korea. The FSC also requires each Korean bank to:

- (i) maintain a liquidity coverage ratio (defined as high liquidity assets divided by net cash outflow of the next 30 days) of not less than 100%;
- (ii) maintain a foreign currency liquidity coverage ratio (defined as high liquidity assets divided by net cash outflow of the next 30 days with respect to foreign currency assets and liabilities) of not less than 80%; and
- (iii) submit monthly reports with respect to the maintenance of these ratios.

The Monetary Policy Committee of the Bank of Korea is empowered to fix and alter minimum reserve requirements that banks must maintain against their deposit liabilities. The current minimum reserve ratio is:

- 7.0% of average balances for Won currency demand deposits outstanding;
- 0% of average balances for Won currency long-term house purchase savings deposits and asset establishment savings deposits; and
- 2.0% of average balances for Won currency time deposits, instalment savings deposits, mutual instalments, housing instalments and certificates of deposit outstanding.

Additionally, the FSC is separately empowered to establish minimum reserve ratio requirements that must be accumulated and maintained for certain types of obligations designated by the FSC from time to time.

For foreign currency deposit liabilities, a 2.0% minimum reserve ratio is applied to foreign currency time deposits which reach maturity no earlier than 1 month, foreign currency certificate of deposits which reach maturity no earlier than 30 days, foreign currency instalments savings deposits which reach maturity no earlier than 6 months and a 7.0% minimum reserve ratio is applied to other deposits. A 1.0% minimum reserve ratio applies to offshore accounts, immigrant accounts and resident accounts opened by financial institutions (other than bank holding companies) and the Export-Import Bank of Korea as well as foreign currency certificates of deposit held by account holders of such offshore accounts.

### ***Financial Exposure to Any Individual Customer and Major Shareholder***

Under the Bank Act, the sum of large exposures by a bank — in other words, the total sum of its credits to single individuals, juridical persons or business groups that exceed 10% of the sum of Tier I and Tier II capital (less any capital deductions) — generally must not exceed five times the sum of Tier I and Tier II capital (less any capital deductions). In addition, banks generally may not extend credit (including loans, guarantees, purchases of securities (only in the nature of a credit) and any other transactions that directly or indirectly create credit risk) in excess of 20% of the sum of Tier I and Tier II capital (less any capital deductions) to a single individual or juridical person, or grant credit in excess of 25% of the sum of Tier I and Tier II capital (less any capital deductions) to a single group of companies as defined in the Monopoly Regulations and Fair Trade Act.

The Bank Act also provides for certain restrictions on extending credits to a major shareholder. A “**major shareholder**” is defined as:

- a shareholder holding (together with persons who have a special relationship with that shareholder) in excess of 10% (or 15% in the case of regional banks) in the aggregate of the bank’s total issued voting shares; or
- a shareholder holding (together with persons who have a special relationship with that shareholder) in excess of 4% in the aggregate of the bank’s (excluding regional banks) total issued voting shares (excluding shares subject to the shareholding restrictions on “non-financial business group companies” as described below), where the shareholder is the largest shareholder or has actual control over the major business affairs of the bank through, for example, appointment and dismissal of the officers pursuant to the Enforcement Decree of the Bank Act. Non-financial business group companies primarily consist of: (i) any single shareholding group whose total amount of gross capital for non- financial company comprise no less than 25% of its total amount of gross capital; (ii) any single shareholding group whose non-financial company assets comprise no less than ₩2 trillion in aggregate; (iii) any investment company under the FSCMA of which any single shareholding group identified in (i) or (ii) above, owns more than 4% of the total issued and outstanding shares; or (iv) a private equity fund under the FSCMA which meets certain requirements as prescribed in the Bank Act.

In addition to the existing restrictions which prohibit banks from extending credits to a major shareholder (together with persons who have a special relationship with that shareholder) in an amount greater than the lesser of (x) 25% of the sum of the bank’s Tier I and Tier II capital (less any capital deductions) and (y) the relevant major shareholders’ shareholding ratio multiplied by the sum of the bank’s Tier I and Tier II capital (less any capital deductions) and require that the total sum of credits granted to all major shareholders must not exceed 25% of the bank’s Tier I and Tier II capital (less any capital deductions), under these amendments, banks may not extend credit to a major shareholder for the purpose of financing such shareholder’s investment in other companies or on terms more advantageous to such shareholder. Furthermore, banks may not transfer their assets and/or properties to a major shareholder without being paid a consideration.

The Financial Holding Company Act imposes limits on extending credit to single borrowers and to major capital contributors similar to the limits imposed by the Bank Act with regard to extending credit to single borrowers and major shareholders. The definition of a “**major capital contributor**” under the Financial Holding Company Act, which is similar to the definition used in the Bank Act, is as follows:

- a shareholder holding (together with persons who have a special relationship with that shareholder) in excess of 10% (or 15% in the case of regional bank holding companies) in the aggregate of a bank holding company’s total issued voting shares; or
- a shareholder holding (together with persons who have a special relationship with that shareholder) in excess of 4% in the aggregate of a bank holding company’s (excluding regional bank holding companies) total issued voting shares (excluding shares subject to the shareholding restrictions on “non-financial business group companies” under the Financial Holding Company Act), where the shareholder is the largest shareholder or has actual control over the major business affairs of a bank holding company and its subsidiaries, sub-subsidiaries and any subsidiaries thereof (and under the Financial Holding Company Act, this includes any foreign subsidiaries of sub-subsidiaries (as brought into the holding structure of the financial holding company) and companies controlled by them through, for example, appointment and dismissal of the officers, as determined pursuant to the provisions of an applicable Presidential Decree, and includes non-financial business group companies that participate in the business management of a relevant financial institution through, for example, appointment and dismissal of the officers, as determined pursuant to the provisions of an applicable Presidential Decree.

According to the Financial Holding Company Act, the total amount of credit that may be extended by a financial holding company and its subsidiaries, etc. (“**financial holding company, etc.**”) to any single individual, juridical person or business group is not permitted to exceed an amount equal to 25% of the total net capital of the financial holding company, etc.

Additionally, the total amount of credit that may be extended by a bank holding company and its subsidiaries (“**bank holding company, etc.**”) to a major capital contributor (including specially related persons thereof) is not permitted to exceed the lesser of (x) the amount equal to 25% of the total net capital of the bank holding company, etc. and (y) the relevant major capital contributors’ shareholding ratio in the bank holding company. The total amount of credit that may be extended by a bank holding company, etc. to all of major capital contributors (including specially related persons thereof) is not permitted to exceed an amount equal to 25% of the total net capital of the bank holding company, etc.

A bank holding company, etc. is not permitted to extend credit to major capital contributors (including specially related persons thereof) in support of such major capital contributors’ investments in other companies, and is not permitted to transfer assets to major capital contributors without consideration.

The above provisions will be applicable with regard to Hana Bank extending credit to any major capital contributors of Hana Financial Group, since Hana Financial Group is a bank holding company and Hana Bank is a subsidiary of Hana Financial Group.

### ***Interest Rates***

Korean banks generally depend on deposits as their primary funding source. There are no legal controls on interest rates on loans extended by the financial institutions in Korea, except for the cap of 20.0% per annum on interest rates on loans to individuals or small corporations, as defined under the Framework Act on Small and Medium Enterprises under the Act on Registration of Credit Business, Etc. and Protection of Finance Users.

### ***Lending to Small- and Medium-Sized Enterprises***

In order to obtain funding from the Bank of Korea at concessionary rates for their SME loans, banks are required to allocate a certain minimum percentage of any monthly increase in their Won currency lending to SMEs. Currently, this minimum percentage is 50% in the case of national banks and regional banks. If a bank does not comply with this requirement, the Bank of Korea may:

- require the bank to prepay all or a portion of funds provided to that bank in support of loans to SMEs; or
- lower the bank’s credit limit.

### ***Disclosure of Management Performance***

In order to assist the general public, especially depositors and shareholders, in monitoring bank management performance, the FSS requires commercial banks to make mandatory public disclosures of the following (except as may otherwise have been disclosed by a bank or its financial holding company listed on the Korea Exchange in accordance with the FSCMA):

- loans bearing no profit made to a single business group in an amount exceeding 10% of the sum of the bank's Tier I and Tier II capital (less any capital deductions) as of the end of the previous month (where the loan exposure to that borrower is calculated pursuant to the criteria under the Detailed Regulation on Supervision of the Banking Business), unless the loan exposure to that group is not more than ₩4 billion; and
- any loss due to court judgements or similar decisions in civil proceedings in an amount exceeding 1% of the sum of the bank's Tier I and Tier II capital (less any capital deductions) as of the end of the previous month, unless the loss is not more than ₩1 billion.

### ***Restrictions on Lending***

Pursuant to the Bank Act, commercial banks may not provide:

- loans directly or indirectly secured by a pledge of a bank's own shares;
- loans directly or indirectly to enable a natural or juridical person to buy the bank's own shares;
- loans to any of the bank's officers or employees, other than petty loans of up to ₩20 million in the case of a general loan, ₩50 million in the case of a general loan plus a housing loan or ₩60 million in the aggregate for general loans, housing loans and loans to pay damages arising from wrongful acts of employees in financial transactions; or
- credit (including loans) secured by a pledge of shares of a subsidiary corporation of the bank or to enable a natural or juridical person to buy shares of a subsidiary corporation of the bank.

### ***Regulations Relating to Retail Household Loans***

The FSC has implemented a number of changes to the mechanisms by which a bank evaluates and reports its retail household loan balances and has proposed implementing further changes. As a result of the rapid increase in retail household loans and related credit risks, in 2007, the FSC and the FSS increased the minimum provisioning requirements for retail household loans. These minimum requirements are set forth in the following table:

| <b>Asset Quality Classification</b> | <b>Provisioning Ratio on Retail Household Loans</b> |                |
|-------------------------------------|-----------------------------------------------------|----------------|
|                                     | <b>Before 2007</b>                                  | <b>Current</b> |
| Normal . . . . .                    | 0.75% or above                                      | 1.0% or above  |
| Precautionary . . . . .             | 8.0% or above                                       | 10.0% or above |
| Substandard . . . . .               | 20.0% or above                                      | 20.0% or above |
| Doubtful . . . . .                  | 55.0% or above                                      | 55.0% or above |
| Estimated loss . . . . .            | 100.0%                                              | 100.0%         |

In addition, due to a rapid increase in loans secured by homes and other forms of housing, the FSC and the FSS implemented regulations designed to reduce the rate of increase in these loans. Effective from the third quarter of 2002, the FSC and the FSS raised minimum provisioning requirements for new loans secured by housing located in the areas of wide-spread real property speculation, with respect to the portion of the new loan that exceeds the loan-to-value ratio of 60.0%, to 1.0% from 0.75% for normal loans and to 10.0% from 5.0% for precautionary loans. They also raised the minimum provisioning requirements for household loans classified as precautionary from 2.0% to 8.0% with effect from the fourth quarter of 2002.

In a further effort to curtail extension of new or refinanced loans secured by housing, the FSC and the FSS subsequently:

- reduced the average loan-to-value ratio (the aggregate principal amount of credit over the approval value of collateral) that Korean commercial banks must maintain for new loans secured by housing located in Korea to below 60%; and
- increased risk-weights for loans secured by housing meeting certain criteria in connection with the capital adequacy calculation for commercial banks.

On 8 November 2002, the FSC and the FSS issued guidelines that:

- require Korean commercial banks to implement stronger internal control systems and stricter credit review and approval policies with respect to loans secured by housing;
- introduce sharing of information on multiple housing loans to a single borrower within the financial industry;
- require Korean commercial banks to appoint two to three qualified market value appraisal institutions and to use the lowest of the appraisal valuations; and
- discourage the use of incentive-based compensation systems by Korean commercial banks.

Furthermore, on 29 October 2003, the FSC announced more stringent guidelines that require Korean commercial banks to maintain loan-to-value ratios equal to or less than 40% for new loans secured by real estate located in the areas of wide-spread real property speculation. On 30 August 2005, the FSC further announced another set of guidelines under which the Korean commercial banks are required to maintain the debt-to-income ratio of 40% or less for each new loan in addition to the loan-to-value ratio requirement in case such loan is borrowed for the purpose of financing each additional home exceeding the one home per household and secured by a home located in the wide-spread real property speculation areas.

Again on 30 March 2006, the FSC announced stronger guidelines that require Korean commercial banks to maintain debt-to-income ratio equal to 40% or less for any new loans secured by real estate of which value is ₩600 million or more in the areas of wide-spread real property speculation.

In addition, due to a rapid increase in the number of loans secured by homes and other forms of housing, the FSC and the FSS amended the Regulation on the Supervision of the Banking Business in July 2007, November 2008, November 2010 and May 2013 to implement measures designed to reduce the rate of increase in these loans secured by housing, including the following:

- in respect of loans secured by collateral consisting of housing located in Korea, the loan-to-value ratio (the aggregate principal amount of loans secured by such collateral over the appraised value of the collateral) should not exceed 70%;
- in respect of loans secured by collateral consisting of housing (including apartments) located in areas of excessive investment as designated by the Government, (i) the loan-to-value ratio for loans with a maturity of not more than three years should not exceed 50%, (ii) the loan-to-value ratio for loans with a maturity of more than three years should not exceed 60% and (iii) the loan-to-value ratio for loans to be amortised over the period of ten years should not exceed 70%;
- in respect of loans secured by collateral consisting of housing (excluding apartments) located in areas of high speculation as designated by the Government, (i) the loan to value ratio for loans with a maturity of not more than three years should not exceed 50%, (ii) the loan to value ratio for loans with a maturity of more than three years should not exceed 60% and (iii) the loan-to-value ratio for loans to be amortised over the period of ten years should not exceed 70%;
- in respect of loans secured by collateral consisting of apartments located in areas of high speculation as designated by the Government, (i) the loan-to-value ratio for loans with a maturity of not more than ten years should not exceed 40%; and (ii) the loan-to-value ratio for loans with a maturity of more than ten years should not exceed (a) 40%, if the price of such apartment is over ₩600 million, and (b) 60%, if the price of such apartment is ₩600 million or lower;
- in respect of loans extended for the acquisition of a new apartment and secured by such apartment with an appraisal value of more than ₩600 million in areas of high speculation as designated by the Government or in certain metropolitan areas designated as areas of excessive investment by the Government, the borrower's debt-to-income ratio (calculated as (i) the aggregate annual total payment amount of (x) the principal of and interest on loans secured by such apartment(s) and (y) the interest on other debts of the borrower over (ii) the borrower's annual income) should not exceed 40%;
- in respect of a borrower (i) whose spouse already has a loan secured by housing or (ii) who is single and under the age of 30, the debt-to-income ratio of the borrower in respect of loans secured by apartment(s) located in areas of high speculation as designated by the Government should not exceed 40%;
- in respect of apartments located in areas of high speculation as designated by the Government, a borrower is permitted to have only one new loan secured by such apartment; and

- where a borrower has two or more loans secured by apartments located in areas of high speculation as designated by the Government, the loan with the earliest maturity date must be repaid first and the number of loans must eventually be reduced to one.

Moreover, from 2017 to 2022, the Government led by then President Moon Jae-in announced and implemented a series of robust policies aimed at taming speculation and deterring the rise of housing prices. Under the Regulation on the Supervision of the Banking Business which has been revised from time to time during the above period, a bank is (i) subject to certain loan-to-value ratio and debt-to-income ratio limits of 40% each when extending home mortgage loans for the purchase of homes located in areas designated as “speculative” or “overheated speculative” (**provided that**, (1) if a borrower has no pre-existing housing, and his/her annual income combined with his/her spouse is equal to ₩80 million or less, and housing is appraised at a market value of less than ₩600 million, the loan-to-value ratio and debt-to-income ratio limits will be increased by 10% each; (2) the loan-to-value ratio and debt-to-income ratio limits will be decreased by 10% each when the purpose of extending the home mortgage (on the housing being purchased) loan is to fund the borrower’s purchase of additional housings in unregulated areas irrespective of the location of the borrower’s pre-existing housing; (3) the loan-to-value ratio and debt-to-income ratio limits will be decreased by 10% each when the purpose of extending the home mortgage (on the pre-existing housing) loan is to fund the borrower’s purchase of additional housings in unregulated areas who has pre-existing housing in unregulated areas; (4) the loan-to-value ratio of a home mortgage loan for a residential property located in speculative or overheated speculative areas which is appraised at a market value exceeding ₩900 million shall have limits of (x) 40% for a portion of such value not exceeding ₩900 million and (y) 20% for the rest of such value exceeding ₩900 million), (ii) subject to a restriction that a home mortgage loan is not permitted in areas designated as “regulated” for any borrowers who have pre-existing housing without regard to its location, **provided that**, the borrower who owns only one housing can obtain a new home mortgage loan on the condition that the borrower sells its pre-existing housing within certain periods determined by the FSC from the drawdown date of such home mortgage loan, (iii) subject to a restriction that if a borrower has no pre-existing housing, no home mortgage loan shall be made available for such borrower for housing with a market value exceeding ₩900 million, **provided that** the borrower can obtain a new home mortgage loan on the condition that the borrower will move into a newly purchased housing within certain periods determined by the FSC from the drawdown date of such home mortgage loan and (iv) subject to a restriction that if an apartment located in speculative or expressively speculative areas has a market value exceeding ₩1.5 billion, no mortgage loan shall be made available (with a few exceptions).

However, since the second half of 2022, the Government led by the former President Yoon Suk Yeol has announced and implemented a series of policies to ease the demand-side regulations in the real estate market in order to prevent the housing prices from crashing due to the recent hike in interest rates. For example, the Government has released most areas from “speculative areas”, “overheated speculative areas” and “adjustment targeted areas” (collectively, the “**regulated areas**”), and as a result, only Gangnam-Gu, Seocho-Gu, Songpa-Gu and Yongsan-Gu in the greater Seoul metropolitan area are currently left as the regulated areas. The Government also increased the loan to value ratio applicable to the regulated areas from 40% to 50%, removed the application of stricter loan to value ratio to new loans secured by high-priced houses located in the regulated areas (such as items (i)(4) and (iv) in the preceding paragraph) and allowed the extension of new loans secured by houses located in the regulated areas to a household that already owns one or more house from March 2023 with the maximum loan-to-value ratio of 30%. The Government led by newly elected President Lee Jae-myung is expected to implement stricter regulations to curb the growth of household debt, including the introduction of a tighter cap on the maximum amount of mortgage loans for home purchases in regulated areas, such as the greater Seoul metropolitan area.

On the other hand, in order to modernise credit review methods and stabilise the management of household debt, the FSC introduced a debt service ratio and a modified debt-to-income ratio. The modified debt-to-income ratio, which has been implemented beginning 31 January 2018 reflects (i) both principal and interest payments on the applicable mortgage and home equity loan and existing mortgage and home equity loans and (ii) interest payments on other loans. Previously, debt-to-income ratio had only reflected (i) both principal and interest payments on the applicable mortgage and home equity loan and (ii) interest payments on existing mortgage and home equity loans. The current debt-to-income ratio applicable to apartment units located in the greater Seoul metropolitan area which are not “speculative areas”, “overheated speculative areas” or “adjustment targeted areas” is 60%, whereas homes located in “speculative areas” or “overheated speculative areas” are subject to a debt-to-income ratio of 40% and homes located in “adjustment targeted areas” are subject to a debt-to-income ratio of 50%. The debt service ratios reflect principal and interest payments on both the applicable loan and other loans and have been fully implemented since October 2018. The modified debt-to-income ratios are used as the primary reference index in the evaluation and approval process for mortgage and home equity loans, and debt

service ratios are generally used as a supplementary reference index providing additional limits on mortgage and home equity loans. The debt service ratios applicable to the loan applicant with the total aggregate loan amount exceeding ₩100 million (including the applied but not yet extended loan amount) should not exceed 40% unless otherwise specified by the applicable regulations.

In December 2023, the Korean government decided to introduce stress debt service ratio system for household loans starting from February 2024 in order to strengthen household debt management. The FSC announced plans to implement the stress debt service ratio for variable-rate, mixed-rate and periodic loans in order to impose surplus interest to reflect potential future rate hikes. The stress interest is based on the gap between the highest household loan rate in the last five years and the current benchmark rate, ranging from 1.5% to 3%. To mitigate market impact, the implementation was phased in gradually. In the first phase, from 26 February 2024 to 30 June 2024, the stress debt service ratio was applied only to mortgage loans issued by banks, with a stress interest rate of 0.38%. In the second phase, which was initially scheduled for July 2024 but postponed to 1 September 2024, the scope was expanded to include both mortgage and credit loans from banks and non-bank financial institutions, with a stress rate of 0.75%. From 1 July 2025, the final phase was implemented, applying the full stress rate of 1.5% to all household loans subject to the debt service ratio, except for mortgages outside the Seoul metropolitan area, which will continue to be subject to the 0.75% rate until the end of 2025.

In addition, the supervising authorities in Korea from time to time issue administrative instructions to Korean banks, which have the effect of regulating the access of borrowers to housing loans and, as such, demand for real estate properties. For example, the FSS issued administrative instructions to financial institutions to (except in limited circumstances) verify the borrower's ability to repay based on proof of income prior to making a mortgage and home equity loan regardless of the type or value of the collateral or the location of the property, which has had the effect of practically barring the grant of any new mortgage and home equity loans to borrowers without verifiable income.

#### ***Restrictions on Investments in Property***

A bank may possess real estate property only to the extent necessary for the conduct of its business, unless the aggregate value of that property does not exceed 60% of the sum of the bank's Tier I and Tier II capital (less any capital deductions). Any property that a bank acquires by exercising its rights as a secured party, or which a bank is prohibited from acquiring under the Bank Act, must be disposed of within three years.

#### ***Restrictions on Shareholdings in Other Companies***

Under the Bank Act, a bank may not own more than 15% of shares outstanding with voting rights of another corporation, except where, among other reasons:

- that corporation engages in a category of financial businesses set forth by the FSC; or
- the acquisition is necessary for the corporate restructuring of the corporation and is approved by the FSC.

In the above exceptional cases, a bank must satisfy either of the following requirements:

- the total investment in corporations in which the bank owns more than 15% of the outstanding shares with voting rights does not exceed 20% of the sum of Tier I and Tier II capital (less any capital deductions); or
- if the application requirements set by the FSC are met, voting shares shall not exceed 30% of the sum of Tier I and Tier II capital.

The Bank Act provides that a bank may not acquire the shares of another corporation that is a major shareholder of the bank in excess of an amount equal to 1% of the sum of Tier I and Tier II capital (less any capital deductions).

The Financial Holding Company Act provides that a bank holding company, etc. may not acquire the shares issued by its major capital contributors in an amount greater than 1% of the total net capital of the bank holding company, etc.

#### ***Restrictions on Bank Ownership***

Under the Bank Act, a single shareholder, together with any persons who have a special relationship with that shareholder may acquire generally beneficial ownership of no more than 10% of a national bank's total issued and outstanding shares with voting rights and no more than 15% of a regional bank's total issued and outstanding

shares with voting rights. The Government, KDIC and bank holding companies qualified under the Financial Holding Company Act are not subject to this limit. However, by obtaining an approval from the FSC, a person (whether a Korean national or a foreign investor), with the exception of non-financial business group company as described below, may acquire more than 10% of a national bank's total voting shares issued and outstanding (or 15% in the case of regional banks) and such approval from the FSC is required in each instance where the total holding of such person will exceed 10% (or 15% in the case of regional banks), 25% or 33% of the bank's total voting shares issued. In addition, if (i) a person's shareholding in a national bank exceeds 4% of that bank's outstanding voting shares, (ii) such person becomes the largest shareholder of the bank, (iii) there is a change in the shareholding of such person by 1% or more or (iv) where a private equity fund or investment purpose company under the FSCMA holds in excess of 4% of that bank's outstanding voting shares and there is a change in the members and/or shareholder of the private equity fund or investment purpose company, such person or the private equity fund or the investment purpose company shall file a report to the FSC. Furthermore, according to the Financial Holding Company Act, a single shareholder is not permitted to hold more than 10% of the total issued and outstanding voting shares of a bank holding company (or 15% in the case of a regional bank holding company's shares). The Government and the KDIC are not subject to this limit. Such limit also does not apply to a financial holding company's holding of shares of a bank holding company under its control. The FSC may grant approval for exceptions to the above-referenced 10% holding limit (or 15% in the case of regional bank holding companies).

Meanwhile, a non-financial business group company is not allowed to own more than 4% (or 15% in the case of regional bank holding companies) of the total issued and outstanding shares with voting rights of a national bank or a regional bank. However, the non-financial business group company may be permitted to own up to 10% of the total issued and outstanding shares of a national bank by obtaining an approval from the FSC on condition that such non-financial business group company will not exercise voting rights in excess of the 4% threshold.

### ***Deposit Insurance System***

The Depositor Protection Act provides insurance for certain deposits of banks in Korea through a deposit insurance system. Under the Depositor Protection Act, all banks governed by the Bank Act are required to pay an insurance premium to the KDIC on a quarterly basis. The rate is determined under the Enforcement Decree to the Depositor Protection Act, and may not exceed 0.5% of the bank's insurable deposits in any given year. The current insurance premium is 0.02% of insurable deposits for each quarter. If the KDIC makes a payment on an insured amount, it will acquire the depositors' claims with respect to that payment amount. The KDIC insures a maximum of ₩50 million for deposits and interest, regardless of when the deposits were made and the size of the deposits. Such limit was increased to ₩100 million through an amendment to the Depositor Protection Act of Korea in January 2025, and is expected to become effective from 1 September 2025.

### ***The Financial Consumer Protection Act***

The Financial Consumer Protection Act (the "FCPA") was enacted on 24 March 2020 and took effect beginning 25 March 2021. The FCPA unifies the systems for the protection of consumers of financial products, which had been dispersed in various laws, while tightening the existing consumer protection systems to strengthen the rights afforded to consumers of financial products. Banks under the Banking Act are financial instrument distributors subject to the FCPA, and deposit and loan products under the Banking Act are financial instruments subject to the FCPA.

Under the FCPA, a financial instrument distributor who intends to sell financial instruments shall comply with the following requirements: (i) confirmation of suitability and adequacy of financial instruments, (ii) compliance with the duty to explain, (iii) prohibition of unfair sales activities, (iv) prohibition of undue solicitation, and (v) prohibition of false or exaggerated advertising, etc. (collectively, the "**Sales Principles**"). If a financial instrument distributor breaches any of the Sales Principles, consumers may request the termination of such financial instrument within a period to be prescribed by a Presidential Decree and are entitled to unilaterally terminate the contract if the financial instrument distributor fails to present a justifiable reason for not accepting the consumer's request. Consumers who purchased a loan product, in particular, shall be entitled to withdraw from the contract within 14 days from the later of (i) the date of receipt of the proceeds pursuant to the contract and (ii) the execution date of the contract (or the date of receipt of the documents necessary for execution of the contract (if required under the FCPA), regardless of whether the financial instrument distributor breached any of the Sales Principles. When a consumer files a lawsuit for damages against a financial instrument distributor for breach of the duty to explain, the financial instrument distributor (and not the consumer) shall bear the burden of proof to prove that no wilful conduct or negligence was involved in such breach of the duty to explain. In the

event of a dispute with a financial instrument distributor, consumers may apply for mediation to the Dispute Mediation Committee of the FSC. If a financial instrument distributor files a lawsuit with a court while such mediation is in progress, the court may suspend the litigation proceedings. For certain small-sum cases, a financial instrument distributor may not file a lawsuit with a court until the completion of such mediation. Financial instrument distributors must accept requests from its consumers to access information for purposes of litigation or mediation. In the event the FSC determines that there is a clear risk that a financial product may cause significant damage to the properties of customers, the FSC may prohibit or restrict the solicitation of, and execution of a contract for, such financial product.

### ***Restrictions on Foreign Exchange Position***

Under the Korean Foreign Exchange Transaction Regulation, each of a bank's net overpurchased and oversold positions may not exceed 50% of its shareholders' equity as of the end of the prior month.

### ***Laws and Regulations Governing Other Business Activities***

A bank must register with the Ministry of Economy and Finance to enter the foreign exchange business, which is governed by the Foreign Exchange Transaction Law. Under the FSCMA, which became effective as of 4 February 2009 (replacing the Securities and Exchange Act), a bank wishing to engage in (i) the purchase, sale or underwriting of financial investment products for its own account is required to obtain a licence for dealing business from the FSC and (ii) the purchase and sale of financial investment products for the account of another person is required to obtain a licence for brokerage business. Financial investment products are classified into two categories (securities products and derivatives products) depending on the nature of the risk involved. Securities products refer to any investment product (e.g., a stock or bond) which has a possibility of loss up to the amount of the principal invested. Derivatives products refer to any investment product which has a possibility of loss over and above the amount of the principal invested. If a bank previously had a licence to engage in the securities business from the FSC under the Securities Exchange Act, such licence will remain effective so long as the bank satisfied its reporting requirements to the FSC in accordance with the FSCMA for a certain period of time prior to the FSCMA becoming effective.

### ***Trust Business***

A bank must obtain a licence for trust business from the FSC to engage in trust business pursuant to the FSCMA (which replaced the Trust Business Act and Indirect Investment Asset Management Business Act). A licence for trust business obtained by a bank under the Trust Business Act remains effective so long as the bank satisfied its reporting requirements to the FSC in accordance with the FSCMA for a certain period of time prior to the FSCMA becoming effective.

Under the Bank Act, assets accepted in trust by a bank in Korea must be segregated from the other assets in the accounts of such bank. This requires banks engaged in both banking and trust businesses to maintain two separate sets of accounts and two separate sets of records. The depositors and other general creditors of a bank cannot obtain or assert claims against the assets comprising the trust accounts in the event such bank is liquidated or wound up.

Since January 1999, the Government has prohibited Korean banks from offering new guaranteed fixed rate trust account products that guarantee the principal invested and interest payments. In the event that a bank qualifies and operates as a collective investment business servicer, a trustee or a custodian under the FSCMA, it is required to establish relevant operation and management systems to prevent potential conflicts of interest among the banking business, the collective investment business and the trustee or custodian business. These measures include:

- prohibitions against officers, directors and employees of one particular business operation from serving as an officer, director and employee in another business operation;
- prohibitions against the joint use or sharing of computer equipment or office equipment; and
- prohibitions against the sharing of information by and among officers, directors and employees engaged in the different business operations.

### ***Financial Investment Services and Capital Markets Act***

On 3 July 2007, the National Assembly of Korea passed the FSCMA. This new legislation consolidated six Acts regulating capital markets and financial investment business and products in Korea into one Act. The FSCMA became effective as of 4 February 2009. The following is a summary of the major changes introduced by the FSCMA.

### *Consolidation of Capital Markets-Related Laws*

Prior to the effective date of the FSCMA, there were separate laws regulating each type of financial organisation (e.g., the Securities and Exchange Act for securities companies, the Futures Business Act for companies dealing in futures, the Trust Business Act for trust business companies and the Indirect Investment Asset Management Business Act for asset management companies) and subjecting financial organisations to different licencing and on-going regulatory requirements. By applying one uniform set of rules to financial businesses carrying out the same economic function, the FSCMA intends to improve the capital markets system and address issues caused by the previous regulatory system under which the same economic function relating to capital markets-related businesses was governed by several different sets of rules. To this end, the FSCMA categorises capital markets-related businesses into six different functions (collectively, the “**Financial Investment Businesses**” and each a “**Financial Investment Business**”), as follows:

- dealing (trading and underwriting of financial investment products);
- brokerage (brokerage of financial investment products);
- collective investment (establishment of collective investment schemes and the management thereof);
- investment advice;
- discretionary investment management; and
- trusts.

Therefore, all previous financial businesses relating to financial investment products have been reclassified as one or more of the Financial Investment Businesses described above and financial organisations are now subject to the regulations applicable to their relevant Financial Investment Business(es), irrespective of the type of financial organisation.

Banking and insurance are not subject to the FSCMA and continue to be regulated under separate laws. However, Korean banks and insurance companies are subject to the FSCMA if they intend to engage in Financial Investment Businesses and may need to obtain appropriate licences under the FSCMA.

### *Comprehensive Definition of Financial Investment Products*

In an effort to encompass the various types of securities and derivative products available in the capital markets, the FSCMA sets forth a comprehensive term “**financial investment products**,” defined to mean all financial products with a risk of loss in respect of the amount invested (in contrast to deposits where the principal is protected). Under the FSCMA, financial investment products are classified into two major categories: (i) “**securities**” (meaning financial investment products in respect of which the risk of loss is limited to the amount invested) and (ii) “**derivatives**” (meaning financial investment products of which the risk of loss may exceed the amount invested).

As a result of the general and open-ended manner in which financial investment products are defined, any future financial product could potentially fall within the scope of the definition of financial investment products, thereby enabling the financial organisation licenced under the FSCMA (“**Financial Investment Business Entity**”) to handle a broader range of financial products. Under the FSCMA, securities companies, asset management companies, companies dealing in futures and other entities engaging in any Financial Investment Business are classified as Financial Investment Business Entities.

### *New Licence System and the Conversion of Existing Licences*

Under the FSCMA, the financial investment business units (each being a unit of business pursuant to which financial organisations shall be licenced) are classified into numerous categories depending on the type of (i) financial investment service, (ii) financial investment product, and (iii) target customers to which financial investment products may be sold or dealt (i.e., general investors or professional investors). Financial Investment Business Entities are able to choose which Financial Investment Business(es) to engage in (via a “check the box” method set forth in the relevant licence application) by specifying the desired financial investment business unit or units. Under the FSCMA, Financial Investment Business Entities are permitted to engage in multiple types of Financial Investment Businesses, subject to satisfying relevant regulations (such as minimum capital requirements and maintaining an adequate “**Chinese Wall**”).

Financial organisations previously engaging in business activities constituting a Financial Investment Business were required to take certain steps, such as renewal of their licence or registration, in order to continue engaging in such business activities. Banks and insurance companies are permitted to engage in certain categories of Financial Investment Business upon obtaining the appropriate licence(s) under the FSCMA, to the extent permitted under the Bank Act or the Insurance Business Act, as the case may be.

### ***Expanded Business Scope of Financial Investment Business Entities***

Under the FSCMA, by integrating businesses involving financial investment products into a single Financial Investment Business and allowing Financial Investment Business Entities to choose multiple Financial Investment Businesses to engage in, the business scope and opportunities of the licenced Financial Investment Business Entities are expanded.

Under the FSCMA, Financial Investment Business Entities may engage in business(es) incidental to the Financial Investment Business (“**incidental businesses**”), including settlement and remittance services. Furthermore, under the Enforcement Decree of FSCMA, a dealer of securities investments (including underwriting services) may conduct corporate finance business; and a dealer of securities and over-the-counter derivatives (including underwriting services) may conduct payment guarantees business. Therefore, corporate finance business and payment guarantees business can be carried out by both banks and financial organisations which have received licences on respect of the relevant business units. In addition, a Financial Investment Business Entity is permitted to outsource marketing activities by contracting “introducing brokers” that are individuals but not employees of the Financial Investment Business Entity.

### ***Improvement in Investor Protection Mechanism***

While the FSCMA widens the scope of Financial Investment Businesses, a more rigorous investor protection mechanism is imposed upon Financial Investment Business Entities dealing in financial investment products. The FSCMA distinguishes general investors from professional investors and provides the former with new or enhanced protections. The FSCMA expressly provides for a strict know-your-customer rule for general investors and imposes an obligation on Financial Investment Business Entities to market financial investment products that are suitable for each general investor, using written explanatory materials. Under the FSCMA, a Financial Investment Business Entity could be liable if a general investor proves (i) the absence of the requisite written explanatory materials and (ii) damage or loss resulting from the general investor’s investment in financial investment products solicited by such Financial Investment Business Entity (without having to prove fault or causation). With respect to conflicts of interest between Financial Investment Business Entities and investors, the FSCMA expressly requires (i) disclosure of any conflict of interest to investors and (ii) mitigation of conflicts of interest to an acceptable level or abstaining from the relevant transaction.

### ***Regulations on the Class Actions Regarding Securities***

The Law on Class Actions Regarding Securities was enacted as of 20 January 2004 and an amendment to such law was enacted as of 10 March 2005, 3 August 2007, 31 March 2010 and 28 May 2013. The Law on Class Actions Regarding Securities governs class action suits instituted by one or more representative plaintiff(s) on behalf of 50 or more persons who claim to have been damaged in a capital markets transaction involving securities issued by a listed company in Korea.

Applicable causes of action with respect to such suits include:

- claims for damages caused by misleading information contained in, or material fact omitted from, a registration statement or investment prospectus;
- claims for damages caused by the filing of a misleading business report, semi-annual report, quarterly report or a document attached thereto or by an omission of a description or representation of a material fact therein;
- claims for damages caused by insider trading, market manipulation or unfair trading; and
- claims instituted against auditors for damages caused by accounting irregularities.

Any such class action may be instituted upon approval from the presiding court and the outcome of such class action will have a binding effect on all potential plaintiffs who have not joined the action, with the exception of those who have filed an opt out notice with such court.

### ***The Personal Debtor Protection Act***

The Personal Debtor Protection Act was legislated in January 2024 and enforced from 17 October 2024 in order to regulate the overall management of personal financial claims (monetary claims held by financial companies against debtors who are individuals and not corporations) after delinquency.

Under the Personal Debtor Protection Act, when a financial company intends to accelerate loans, transfer claims, or apply for a housing auction, it must notify the debtor 10 business days in advance of such fact, together with the opportunity to adjust the debt.

The Personal Debtor Protection Act prohibits the imposition of late payment charges to deferred interest for the portion of the debt that would not have been due had the loan not been accelerated, when accelerating the loan in the case of delinquency. In addition, financial companies must waive future interest claims arising from personal financial claims that are impossible or significantly improbable to recover, prior to transferring such claims.

The Act prohibits collecting personal financial claims, etc., for which the debt settlement procedure has not been completed, and mandates financial companies to keep debtors informed of the fact that collection is scheduled to commence and how to exercise the right of defence before initiating the debt collection procedure. Additionally, a limit is adopted for contacting debtors for debt collection, which should not exceed seven times a week, and in principle, if a personal financial debtor requests not to contact at a specific time or by a specific means, the financial companies must follow such request.

When a financial company transfers personal financial claims that have been overdue for more than a period prescribed by Presidential Decree of at least one month, it must evaluate whether the transferee is capable of debt collection in terms of size and expertise of personnel, and establish internal standards for the transfer of claims.

Also, when a financial company entrusts the collection of personal financial claims, it must notify the debtor of such entrustment, evaluate and supervise the debt collection company, and establish internal standards for the entrustment of debt collection.

Furthermore, a personal financial debtor may request a financial company to adjust his/her debt if the personal financial debt is overdue, and if the financial company receives a request for debt adjustment from the personal financial debtor, it must notify the personal financial debtor of the details of the decision within 10 business days from the date of receiving the request.

Meanwhile, the Addenda of the Personal Debtor Protection Act states that, in principle, regulations related to the Personal Debtor Protection Act are applied from the enforcement date, but some regulations differ in terms of the time of application and the regulation target. For example, restrictions on deferred interest apply to claims under agreements newly entered into, renewed, or extended between financial companies and personal financial debtors after the Act enters into force, and regulations related to debt settlement requests apply to cases where personal financial claims become overdue after the Act enters into force.

## TAXATION

### Korea

The Information provided below does not purport to be a complete summary of Korean tax law and practice currently applicable. Prospective investors who are in any doubt as to their tax position should consult with their own professional advisers.

The taxation of non-resident individuals and non-Korean corporations (“**Non-Residents**”) generally depends on whether they have a “**permanent establishment**” (as defined under Korean law and applicable tax treaty) in Korea to which the relevant Korean source income is attributable or with which such income is effectively connected. Non-Residents without a permanent establishment in Korea are taxed in the manner described below. Non-Residents with permanent establishments in Korea are taxed in accordance with different rules.

#### *Tax on Interest*

Interest payable to Non-Residents in respect of the Notes, if qualified as certain foreign currency-denominated bonds issued outside of Korea pursuant to the Special Tax Treatment Control Law (“**STTCL**”), is exempt from income tax and corporate tax (whether payable by withholding or otherwise) pursuant to the STTCL.

The rate of income tax or corporate tax applicable to interest on the Notes without the tax exemption under the STTCL, for a Non-Resident without a permanent establishment in Korea, is currently 14% of income. In addition, a tax called a local income tax would be imposed at the rate of 10% of the income tax or corporate tax (raising the total tax rate to 15.4%).

The tax is withheld by the payer of the interest.

The tax rates may be reduced or exempted by applicable tax treaty, convention or agreement between Korea and the country of the recipient of the income. The relevant tax treaties are discussed below.

#### *Tax on Capital Gains*

Korean tax laws currently exclude from Korean taxation gains made by a Non-Resident without a permanent establishment in Korea from the sale of Notes to Non-Residents (other than to their permanent establishments in Korea). In addition, capital gains earned by Non-Residents with or without permanent establishment in Korea from the transfer taking place outside Korea of Notes are currently exempt from taxation by virtue of the STTCL, provided that the issuance of the Notes is deemed to be an overseas issuance under the STTCL.

If the exclusion or exemption from Korean taxation referred to above were to cease to be in effect, in the absence of an applicable treaty or any other special tax laws reducing or eliminating tax on capital gains, the applicable rate of tax is the lower of 11% (including local income tax) of the gross realisation proceeds or (subject to the production of satisfactory evidence of the acquisition cost and certain direct transaction costs of the relevant Note) 22% (including local income tax) of the realised gain (i.e., the excess of the gross realisation proceeds over the acquisition cost and certain direct transaction costs) made. If such evidence shows that no gain (or a loss) was made on the sale, no Korean tax is payable. There is no provision under relevant Korean law for offsetting gains and losses or otherwise aggregating transactions for the purpose of computing the net gain attributable to sales of instruments issued by Korean companies.

The purchaser or any other designated withholding agent of Notes is obliged under Korean law to withhold the applicable amount of Korean tax and make payment thereof to the relevant Korean tax authority. Unless the seller can claim the benefit of an exemption from tax under an applicable tax treaty and on the failure of the seller to produce satisfactory evidence of his acquisition cost and certain direct transaction costs in relation to the Notes being sold, the purchaser or such withholding agent must withhold an amount equal to 11% of the gross realisation proceeds. Any amounts withheld by the purchaser or withholding agent must be paid to the relevant Korean tax authority. The purchaser or withholding agent must pay any withholding tax no later than the tenth day of the month following the month in which the payment for the purchase of the relevant Notes occurred. Failure to transmit the withheld tax to the Korean tax authorities in time subjects the purchaser or withholding agent to penalties under Korean tax laws. The Korean tax authorities may attempt to collect such tax from a Non-Resident who is liable for payment of any Korean tax, either as a seller of Notes or as a purchaser or withholding agent who is obliged to withhold such tax through proceedings against payments due to the

Non-Resident from its Korean investments and the assets or revenues of any of the Non-Resident's branch or representative offices in Korea.

### ***Inheritance Tax and Gift Tax***

Korean inheritance tax is imposed upon (a) all assets (wherever located) of the deceased if at the time of his death he was domiciled in Korea or had resided in Korea continuously for at least 183 days immediately prior to his death and (b) all property located in Korea which passes on death (irrespective of the domicile of the deceased). Gift tax is imposed in similar circumstances to the above. The taxes are imposed if the value of the relevant property is above a certain limit and the rate varies from 10% to 50% depending on the price of the assets and the nature of the relationship between the parties. At present, Korea has not entered into any tax treaties regarding its inheritance or gift taxes.

Under Korean inheritance and gift tax laws, bonds issued by Korean corporations are deemed located in Korea irrespective of where they are physically located or by whom they are owned, and consequently, the Korean inheritance and gift taxes will be imposed on transfers of the Notes by inheritance or gift. Prospective purchasers should consult their personal tax advisors regarding the consequences of the imposition of the Korean inheritance or gift tax.

### ***Stamp Duty and Securities Transaction Tax***

No stamp, issue or registration duties will be payable in Korea by the holders in connection with the issue of the Notes except for nominal amount of stamp duty on certain documents executed in Korea. No securities transaction tax will be imposed on the transfer of Notes.

### ***Tax Treaties***

At the date of this Offering Circular, Korea has tax treaties with, *inter alia*, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Ireland, Italy, Japan, Luxembourg, Malaysia, the Netherlands, New Zealand, Norway, Singapore, Sweden, Switzerland, the United Kingdom and the United States under which the rate of withholding tax on interest (including local income tax) is reduced, generally to between 5% and 16.5% and the tax on capital gains is often eliminated.

The special withholding tax system took effect 1 July 2006. Under the system, residents of Labuan, Malaysia are presumed to be tax treaty shopping, and are denied tax treaty benefits. Instead, payments made to the residents of Labuan, Malaysia will be subject to the default Korean withholding tax rates (generally 15.4% for interest and the lower of 11% of the gross realisation proceeds or 22% for capital gain (including local income tax)) rather than the reduced or exempted rate available under the Korea-Malaysia tax treaty. A Labuan taxpayer, however, will be given an opportunity to get refund by proving that it is entitled to the tax treaty benefits as a substantive owner of the income and a real resident of Labuan, Malaysia. A Labuan taxpayer may also file an application with the National Tax Service (the "NTS") for confirmation that it is entitled to the tax treaty benefits and obtain an advance confirmation from the NTS prior to receiving Korean source income.

Each holder should enquire for himself whether he is entitled to the benefit of a tax treaty with respect to any transaction involving Notes. It is the responsibility of the party claiming the benefits of a tax treaty in respect of interest payments to file with the payer or the Issuer a certificate as to his residence. In the absence of sufficient proof, the payer or the Issuer must withhold taxes in accordance with the above discussion.

In order to claim the benefit of a tax rate reduction or tax exemption available under the applicable tax treaties, a Non-Residents holder must submit to the payer of such Korean source income an application (for reduced withholding tax rate, "application for entitlement to reduced tax rate" and in the case of exemption from withholding tax, "application for exemption" under a tax treaty along with the documents proving the beneficial owner of such Korean source income including a certificate of the Non-Residents holder's tax residence issued by a competent authority of the Non-Residents holder's residence country) as the beneficial owner ("**BO Application**"). Such application should be submitted to the withholding agent prior to the payment date of the relevant income. Subject to certain exceptions, where the relevant income is paid to an overseas investment vehicle (which is not the beneficial owner of such income) ("**OIV**"), a beneficial owner claiming the benefit of an applicable tax treaty with respect to such income must submit its BO Application to such OIV, which must submit an OIV report and a schedule of beneficial owners (together with the applicable BO Application), to the withholding agent prior to the payment date of such income. Effective from 1 January 2022, an OIV is deemed to

be a beneficial owner of Korean source income for income tax purposes, if (i) under the applicable tax treaty, the OIV bears tax liabilities in the country in which it is established or the OIV is deemed to be the owner of the Korean source income; and (ii) the Korean source income is eligible for the treaty benefits under the tax treaty. The benefits under a tax treaty between Korea and the country of such OIV's residence will apply with respect to the relevant income paid to such OIV, subject to certain application requirements as prescribed by the Corporate Income Tax Law or Individual Income Tax Law. In the case of a tax exemption application, the withholding agent is required to submit such application (together with the applicable OIV report and a schedule of beneficial owners in the case of income paid to an OIV) to the relevant district tax office by the ninth day of the month following the date of the payment of such income. According to the amendment proposal released on 31 July 2025, in the case of an application for entitlement to a reduced tax rate with respect to Korean source income paid on or after 1 January 2026, the withholding agent is required to submit such application (together with the applicable OIV report and a schedule of beneficial owners in the case of income paid to an OIV) to the relevant district tax office by the end of February of the year following the year in which the relevant income payment date falls.

An application for entitlement to reduced tax rate and tax exemption submitted by a Non-Resident remains effective for three years from submission, and if any material changes occur with respect to information provided in the application, an application reflecting such change must be newly submitted.

However, this requirement does not apply to tax exemptions under Korean tax laws.

### ***Withholding and Gross Up***

As mentioned above, interest under the Notes could be exempt from any withholding or deduction on account of income tax or corporate tax pursuant to the STTCL. However, in the event that the payer or the Issuer is required by law to make any withholding or deduction for or on account of any Korean taxes (as more fully described in Condition 9), the Issuer has agreed to pay (subject to the customary exceptions as set out in such Condition 9) such additional amounts as may be necessary in order that the net amounts receivable by the holder of any Note or Coupon after such withholding or deduction shall equal the respective amounts which would have been receivable by such holder in the absence of such withholding or deduction.

### **United States**

Except where otherwise stated, the following is a summary of certain U.S. federal income tax consequences of the acquisition, ownership and disposition of Registered Notes by a U.S. Holder that acquired such Registered Notes at initial issuance, that will hold the Registered Notes as capital assets, and whose functional currency is the U.S. dollar. The discussion does not cover all aspects of U.S. federal income taxation that may be relevant to the acquisition, ownership or disposition of Registered Notes by particular investors. In particular, this summary does not discuss all of the tax considerations that may be relevant to certain types of investors subject to special treatment under the U.S. federal income tax laws (such as banks and other financial institutions, tax-exempt organisations, partnerships or other pass-through entities for U.S. federal income tax purposes and any beneficial owners of such entities, dealers in securities or currencies, traders in securities that elect to use a mark-to-market method of accounting, persons subject to special tax accounting rules as a result of gross income with respect to any Registered Note being taken into account in an applicable financial statement, corporations that accumulate earnings to avoid U.S. federal income tax, persons who have ceased to be U.S. citizens or to be taxed as U.S. lawful permanent residents, an "expatriated entity" subject to Section 7874 of the Code, and investors that will hold the Registered Notes as part of straddles, hedging or conversion transactions, or as part of a synthetic security for U.S. federal income tax purposes).

This summary is based on the Code, administrative pronouncements, judicial decisions and final, temporary and proposed Treasury regulations as of the date hereof, all of which are subject to change, possibly on a retroactive basis, and changes to any of which subsequent to the date of this Offering Circular may affect the tax consequences described herein. This discussion does not address the alternative minimum tax or the Medicare tax on certain investment income, nor does it address any aspect of state, local or non-U.S. taxation, or any U.S. federal taxes other than income taxes (such as gift and estate taxes). We have not sought, and will not seek, a ruling from the Internal Revenue Service ("IRS") as to any U.S. federal income tax consequence described herein. The IRS may disagree with the discussion herein, and its determination may be upheld by a court.

As used herein, the term "**U.S. Holder**" means a beneficial owner of Registered Notes that is, for U.S. federal income tax purposes: (i) a citizen or individual resident of the United States; (ii) a corporation (or other entity

treated as a corporation for U.S. federal income tax purposes) created or organised in or under the laws of the United States, the District of Columbia, or any State thereof; (iii) an estate, the income of which is subject to U.S. federal income tax without regard to its source; or (iv) a trust if a court within the United States is able to exercise primary supervision over the administration of the trust and one or more U.S. persons have the authority to control all substantial decisions of the trust.

If a partnership (or any other entity treated as fiscally transparent for U.S. federal income tax purposes) holds the Registered Notes, the tax treatment of a partner in such partnership generally will depend upon the status of the partner and the activities of the partnership. Any such partner or partnership should consult their tax advisers as to the U.S. federal income tax consequences to them of the acquisition, ownership and disposition of the Registered Notes.

Bearer Notes are not being offered to U.S. Holders. A U.S. Holder who owns a Bearer Note may be subject to limitations under United States income tax laws, including the limitations provided in Sections 165(j) and 1287(a) of the Code.

**INVESTORS SHOULD CONSULT THEIR OWN TAX ADVISERS TO DETERMINE THE TAX CONSEQUENCES TO THEM OF ACQUIRING, OWNING AND DISPOSING OF REGISTERED NOTES, INCLUDING THE APPLICATION TO THEIR PARTICULAR SITUATION OF THE U.S. FEDERAL INCOME TAX CONSIDERATIONS DISCUSSED BELOW, AS WELL AS THE APPLICATION OF THE MEDICARE CONTRIBUTION TAX ON INVESTMENT INCOME, ALTERNATIVE MINIMUM TAX AND ANY STATE, LOCAL, NON-U.S. OR OTHER TAX LAWS.**

The Issuer generally intends to treat Notes issued under the Programme as debt. Certain Notes, however, may be treated as equity or some other type of instrument or interest for U.S. federal income tax purposes. The tax treatment of Notes to which a treatment other than debt may apply may be discussed in a supplement to the Offering Circular. This summary does not discuss Notes with a maturity of greater than 30 years, the impact of redenomination of a Note, Notes that by their terms may be retired for an amount less than their principal amount and Notes subject to special rules. The terms and U.S. federal income tax treatment of certain Notes that the Issuer and the relevant Dealers may agree to issue under the Programme may be set out in a Pricing Supplement (if applicable).

### ***Payment of Interest***

Interest paid on a Note, whether payable in U.S. dollars or a currency other than U.S. dollars (“**foreign currency**” interest on a “**Foreign Currency Note**”), other than, for example, OID, will be taxable to a U.S. Holder as ordinary income at the time it is received or accrued, in accordance with the U.S. Holder’s method of accounting for tax purposes. Interest paid by the Issuer on the Notes and original issue discount (“**OID**”), if any, accrued with respect to the Notes (as described below under “*Original Issue Discount – General*”) generally will constitute income from sources outside the United States for the purposes of the rules regarding the foreign tax credit allowable to a U.S. Holder (and the limitations imposed thereon). Prospective purchasers should consult their tax advisers concerning the foreign tax credit implications of the payment of any foreign taxes with respect to the Notes (if applicable).

### ***Original Issue Discount***

#### ***General***

A Note that only provides for the payment of amounts that are qualified stated interest before maturity, other than a Note with a term of one year or less (a “**Short-Term Note**”), will be treated as issued with OID (a “**Discount Note**”) if the excess of the Note’s stated redemption price at maturity over its issue price is equal to or more than a *de minimis* amount (0.25% of the Note’s stated redemption price at maturity multiplied by the number of complete years to its maturity). An obligation that provides for the payment of amounts other than qualified stated interest before maturity (an “**instalment obligation**”) will be treated as a Discount Note if the excess of the Note’s stated redemption price at maturity over its issue price is greater than 0.25% of the Note’s stated redemption price at maturity multiplied by the weighted average maturity of the Note. A Note’s weighted average maturity is the sum of the following amounts determined for each payment on a Note (other than a payment of qualified stated interest): (i) the number of complete years from the issue date until the payment is made multiplied by (ii) a fraction, the numerator of which is the amount of the payment and the denominator of which is the Note’s stated redemption price at maturity. Generally, the issue price of a Note will be the first price

at which a substantial amount of Notes included in the issue of which the Note is a part is sold to persons other than bond houses, brokers or similar persons or organisations acting in the capacity of underwriters, placement agents or wholesalers. The stated redemption price at maturity of a Note is the total of all payments provided by the Note that are not payments of qualified stated interest. A qualified stated interest payment generally is any one of a series of stated interest payments on a Note that are unconditionally payable at least annually at a single fixed rate (with certain exceptions for lower rates paid during some periods), or a variable rate (in the circumstances described under “— *Variable Interest Rate Notes*”), applied to the outstanding principal amount of the Note. Solely for the purposes of determining whether a Note has OID, the Issuer will be deemed to exercise any call option that has the effect of decreasing the yield on the Note, and the U.S. Holder will be deemed to exercise any put option that has the effect of increasing the yield on the Note. If a Note has *de minimis* OID, a U.S. Holder must include the *de minimis* amount in income as stated principal payments are made on the Note, unless the U.S. Holder makes the election described under “— *Election to Treat All Interest as Original Issue Discount*”. A U.S. Holder can determine the includible amount with respect to each such payment by multiplying the total amount of the Note’s *de minimis* OID by a fraction equal to the amount of the principal payment made divided by the stated principal amount of the Note.

U.S. Holders of Discount Notes must include OID in income calculated on a constant yield method before the receipt of cash attributable to the income, and generally will have to include in income increasingly greater amounts of OID over the life of the Discount Notes. The amount of OID includible in income by a U.S. Holder of a Discount Note is the sum of the daily portions of OID with respect to the Discount Note for each day during the taxable year or the portion of the taxable year in which the U.S. Holder holds the Discount Note (“**accrued OID**”). The daily portion is determined by allocating to each day in any accrual period a *pro rata* portion of the OID allocable to that accrual period. Accrual periods with respect to a Note may be of any length selected by the U.S. Holder and may vary in length over the term of the Notes as long as: (i) no accrual period is longer than one year; and (ii) each scheduled payment of interest or principal on the Note occurs on either the final or first day of an accrual period. The amount of OID allocable to an accrual period equals the excess of: (a) the product of the Discount Note’s adjusted issue price at the beginning of the accrual period and the Discount Note’s yield to maturity (determined on the basis of compounding at the close of each accrual period and properly adjusted for the length of the accrual period) over (b) the sum of the payments of qualified stated interest on the Note allocable to the accrual period. The adjusted issue price of a Discount Note at the beginning of any accrual period is the issue price of the Note increased by: (x) the amount of accrued OID for each prior accrual period and decreased by (y) the amount of any payments previously made on the Note that were not qualified stated interest payments.

#### *Acquisition Premium*

A U.S. Holder that purchases a Discount Note for an amount less than or equal to the sum of all amounts payable on the Note after the purchase date, other than payments of qualified stated interest, but in excess of its adjusted issue price (any such excess being “**acquisition premium**”) and that does not make the election described under “— *Election to Treat All Interest as Original Issue Discount*”, is permitted to reduce the daily portions of OID by a fraction, the numerator of which is the excess of the U.S. Holder’s adjusted basis in the Note immediately after its purchase over the Note’s adjusted issue price, and the denominator of which is the excess of the sum of all amounts payable on the Note after the purchase date, other than payments of qualified stated interest, over the Note’s adjusted issue price.

#### *Election to Treat All Interest as Original Issue Discount*

A U.S. Holder may elect to include in gross income all interest that accrues on a Note using the constant yield method described under “— *General*”, with certain modifications. For the purposes of this election, interest includes stated interest, OID, *de minimis* OID, market discount, *de minimis* market discount and unstated interest, as adjusted by any amortisable bond premium (described under “— *Notes Purchased at a Premium*”) or acquisition premium. If a U.S. Holder makes this election for the Note, then, when the constant yield method is applied, the issue price of the Note will equal its cost, the issue date of the Note will be the date of acquisition, and no payments on the Note will be treated as payments of qualified stated interest. This election generally will apply only to the Note with respect to which it is made and may not be revoked without the consent of the IRS. However, if the Note has amortisable bond premium, the U.S. Holder will be deemed to have made an election to apply amortisable bond premium against interest for all debt instruments with amortisable bond premium (other than debt instruments, the interest on which is excludible from gross income) held as of the beginning of the taxable year to which the election applies or any taxable year thereafter. If the election to apply the constant yield method to all interest on a Note is made with respect to a Market Discount Note (as defined below under

“— *Market Discount*”), the electing U.S. Holder will be treated as having made the election discussed under “— *Market Discount*” to include market discount in income currently over the life of all debt instruments with market discount held or thereafter acquired by the U.S. Holder. U.S. Holders should consult their tax advisers concerning the advisability and consequences of making this election.

#### *Short-Term Notes*

A Short-Term Note will be treated as being issued at a discount, and none of the interest paid on the Note will be treated as qualified stated interest regardless of issue price. In general, an individual or other cash basis U.S. Holder of a Short-Term Note is not required to accrue OID (calculated as set forth below for the purposes of this paragraph) for U.S. federal income tax purposes unless it elects to do so (but may be required to include any stated interest in income as the interest is received). Cash basis U.S. Holders who do not elect to accrue OID should include stated interest payments on Short-Term Notes as ordinary income upon receipt. Cash basis U.S. Holders who do elect to accrue OID, accrual basis U.S. Holders and certain other U.S. Holders are required to accrue OID on Short-Term Notes on a straight line basis or, if the U.S. Holder so elects, under the constant yield method (based on daily compounding). In the case of a U.S. Holder not required and not electing to include OID in income currently, any gain realised on the sale or retirement of the Short-Term Note will be ordinary income to the extent of the OID accrued on a straight line basis (unless an election is made to accrue the OID under the constant yield method) through the date of sale or retirement. U.S. Holders who are not required and do not elect to accrue OID on Short-Term Notes will be required to defer deductions for interest on borrowings allocable to Short-Term Notes in an amount not exceeding the deferred income until the deferred income is realised.

For the purposes of determining the amount of OID subject to these rules, all interest payments on a Short-Term Note are included in the Short-Term Note’s stated redemption price at maturity. A U.S. Holder may elect to determine OID on a Short-Term Note as if the Short-Term Note had been originally issued to the U.S. Holder at the U.S. Holder’s purchase price for the Short-Term Note. This election shall apply to all obligations with a maturity of one year or less acquired by the U.S. Holder on or after the first day of the first taxable year to which the election applies, and may not be revoked without the consent of the IRS.

#### *Market Discount*

A Note, other than a Short-Term Note, that is not acquired at its original issue generally will be treated as purchased at a market discount (a “**Market Discount Note**”) if the Note’s stated redemption price at maturity or, in the case of a Discount Note, the Note’s revised issue price, exceeds the amount for which the U.S. Holder purchased the Note by at least 0.25% of the Note’s stated redemption price at maturity or revised issue price, respectively, multiplied by the number of complete years to the Note’s maturity (or, in the case of a Note that is an instalment obligation, the Note’s weighted average maturity). If this excess is not sufficient to cause the Note to be a Market Discount Note, then the excess constitutes *de minimis* market discount. For this purpose, the revised issue price of a Note generally equals its issue price, increased by the amount of any OID that has accrued on the Note and decreased by the amount of any payments previously made on the Note that were not qualified stated interest payments.

Any gain recognised on the maturity or disposition of a Market Discount Note (including any payment on a Note that is not qualified stated interest) will be treated as ordinary income to the extent that the gain does not exceed the accrued market discount on the Note. Alternatively, a U.S. Holder of a Market Discount Note may elect to include market discount in income currently over the life of the Note. This election will apply to all debt instruments with market discount acquired by the electing U.S. Holder on or after the first day of the first taxable year to which the election applies. This election may not be revoked without the consent of the IRS. A U.S. Holder of a Market Discount Note that does not elect to include market discount in income currently generally will be required to defer deductions for interest on borrowings incurred to purchase or carry a Market Discount Note that is in excess of the interest and OID on the Note includible in the U.S. Holder’s income, to the extent that this excess interest expense does not exceed the portion of the market discount allocable to the days on which the Market Discount Note was held by the U.S. Holder.

Market discount will accrue on a straight line basis unless the U.S. Holder elects to accrue the market discount on a constant yield method. This constant yield election applies only to the Market Discount Note with respect to which it is made and is irrevocable.

#### *Notes Purchased at a Premium*

A U.S. Holder that purchases a Note for an amount in excess of its principal amount (or, for a Discount Note, the sum of all amounts payable on the Note after the purchase date, other than payments of qualified stated interest)

may elect to treat the excess as amortisable bond premium, in which case the amount required to be included in the U.S. Holder's income each year with respect to interest on the Note will be reduced by the amount of amortisable bond premium allocable (based on the Note's yield to maturity) to that year. Any election to amortise bond premium shall apply to all bonds (other than bonds, the interest on which is excludable from gross income for U.S. federal income tax purposes) held by the U.S. Holder at the beginning of the first taxable year to which the election applies or thereafter acquired by the U.S. Holder, and is irrevocable without the consent of the IRS. Please see also "*— Election to Treat All Interest as Original Issue Discount*". A U.S. Holder that does not elect to take bond premium (other than acquisition premium) into account currently will generally recognise a capital loss when the Note matures.

### ***Purchase, Sale and Retirement of Notes***

A U.S. Holder's tax basis in a Note generally will be its cost, increased by the amount of any OID or market discount included in the U.S. Holder's income with respect to the Note and the amount, if any, of income attributable to *de minimis* OID and *de minimis* market discount included in the U.S. Holder's income with respect to the Note, and reduced by: (i) the amount of any payments that are not qualified stated interest payments; and (ii) the amount of any amortisable bond premium applied to reduce interest on the Note.

A U.S. Holder generally will recognise gain or loss on the sale or retirement of a Note equal to the difference between (i) the amount realised on the sale or retirement (less any amount attributable to accrued qualified stated interest, which will be taxable as such) and (ii) the U.S. Holder's tax basis of the Note. Amounts realised on the sale or retirement of a Note are taxable as interest income to the extent of accrued but unpaid interest not previously included in income. Except to the extent described under "*Original Issue Discount — Market Discount*", "*Original Issue Discount — Short-Term Notes*" or "*Contingent Payment Notes*" or attributable to accrued but unpaid interest or changes in exchange rates (as discussed below), gain or loss recognised on the sale or retirement of a Note will be capital gain or loss and generally will be treated as from U.S. sources for purposes of the U.S. foreign tax credit limitation. In the case of a U.S. Holder that is an individual, estate or trust, the maximum marginal federal income tax rate applicable to capital gains is currently lower than the maximum marginal rate applicable to ordinary income if the Notes are held for more than one year. The deductibility of capital losses is subject to significant limitations.

### **Contingent Payment Notes**

If the terms of the Notes provide for certain contingencies that affect the timing and amount of payments (including Notes with a variable rate or Notes that do not qualify as "variable rate debt instruments" for purposes of the original issue discount rules) they generally will be "contingent payment debt instruments" for U.S. federal income tax purposes. Under the rules that govern the treatment of contingent payment debt instruments, no payment on such Notes qualifies as qualified stated interest. Rather, a U.S. Holder must account for interest for U.S. federal income tax purposes based on a "comparable yield" and the differences between actual payments on the Note and the Note's "projected payment schedule" as described below. The comparable yield is determined by the Issuer at the time of issuance of the Notes. The comparable yield may be greater than or less than the stated interest, if any, with respect to the Notes. Solely for the purpose of determining the amount of interest income that a U.S. Holder will be required to accrue on a contingent payment debt instrument, the Issuer will be required to construct a "projected payment schedule" that represents a series of payments the amount and timing of which would produce a yield to maturity on the contingent payment debt instrument equal to the comparable yield.

**Neither the comparable yield nor the projected payment schedule constitutes a representation by the Issuer regarding the actual amount, if any, that the contingent payment debt instrument will pay.**

For U.S. federal income tax purposes, a U.S. Holder will be required to use the comparable yield and the projected payment schedule established by the Issuer in determining interest accruals and adjustments, unless the Holder timely discloses and justifies the use of a different comparable yield and projected payment schedule to the IRS.

A U.S. Holder, regardless of the U.S. Holder's method of accounting for U.S. federal income tax purposes, will be required to accrue interest income on a contingent payment debt instrument at the comparable yield, adjusted upward or downward to reflect the difference, if any, between the actual and the projected amount of any contingent payments on the contingent payment instrument (as set forth below).

A U.S. Holder will be required to recognise interest income equal to the amount of any net positive adjustment, i.e., the excess of actual payments over projected payments, in respect of a contingent payment debt instrument for a taxable year. A net negative adjustment, i.e., the excess of projected payments over actual payments, in respect of a contingent payment debt instrument for a taxable year:

- will first reduce the amount of interest in respect of the contingent payment debt instrument that such U.S. Holder would otherwise be required to include in income in the taxable year; and
- to the extent of any excess, will give rise to an ordinary loss equal to so much of this excess as does not exceed the excess of:
  - the amount of all previous interest inclusions under the contingent payment debt instrument over
  - the total amount of the U.S. Holder's net negative adjustments treated as ordinary loss on the contingent payment debt instrument in prior taxable years.

A net negative adjustment is not subject to the limitations imposed on miscellaneous itemised deductions (which generally cannot be deducted). Any net negative adjustment in excess of the amounts described above will be carried forward to offset future interest income in respect of the contingent payment debt instrument or to reduce the amount realised on a sale, exchange or retirement of the contingent payment debt instrument. Where a U.S. Holder purchases a contingent payment debt instrument for a price other than its adjusted issue price, the difference between the purchase price and the adjusted issue price must be reasonably allocated to the daily portions of interest or projected payments with respect to the contingent payment debt instrument over its remaining term and treated as a positive or negative adjustment, as the case may be, with respect to each period to which it is allocated.

Upon a sale, exchange or retirement of a contingent payment debt instrument, a U.S. Holder generally will recognise taxable gain or loss equal to the difference between the amount realised on the sale, exchange or retirement and the Holder's adjusted basis in the contingent payment debt instrument. A U.S. Holder's adjusted basis in a Note that is a contingent payment debt instrument generally will be the acquisition cost of the Note, increased by the interest previously accrued by the U.S. Holder on the Note under these rules, disregarding any net positive and net negative adjustments, and decreased by the amount of any noncontingent payments and the projected amount of any contingent payments previously made on the Note. A U.S. Holder generally will treat any gain as interest income, and any loss as ordinary loss to the extent of the excess of previous interest inclusions in excess of the total net negative adjustments previously taken into account as ordinary losses, and the balance as capital loss. The deductibility of capital losses is subject to limitations. In addition, if a Holder recognises loss above certain thresholds, the Holder may be required to file a disclosure statement with the IRS (as described below under "*—Reportable Transactions*").

Special rules apply to contingent payment debt instruments that are denominated, or provide for payments, in a currency other than the U.S. dollar ("**Foreign Currency Contingent Payment Notes**"). Very generally, these Notes are accounted for like a contingent payment debt instrument, as described above, but in the currency of the Foreign Currency Contingent Payment Notes. The relevant amounts must then be translated into U.S. dollars. The rules applicable to Foreign Currency Contingent Payment Notes are complex and U.S. Holders are urged to consult their own tax advisors regarding the U.S. federal income tax consequences of the acquisition, ownership and disposition of such Notes.

### ***Foreign Currency Notes***

#### ***Interest***

If an interest payment is denominated in, or determined by reference to, a foreign currency, the amount of income recognised by a cash basis U.S. Holder will be the U.S. dollar value of the interest payment, based on the exchange rate in effect on the date of receipt, regardless of whether the payment is in fact converted into U.S. dollars. An accrual basis U.S. Holder may determine the amount of income recognised with respect to an interest payment denominated in, or determined by reference to, a foreign currency in accordance with either of two methods.

Under the first method, the amount of income accrued will be based on the average exchange rate in effect during the interest accrual period (or, in the case of an accrual period that spans two taxable years of a U.S. Holder, the part of the period within the taxable year). Under the second method, the U.S. Holder may elect to determine the amount of income accrued on the basis of the exchange rate in effect on the last day of the accrual period (or, in

the case of an accrual period that spans two taxable years, the exchange rate in effect on the last day of the part of the period within the taxable year). Additionally, if a payment of interest is actually received within five business days of the last day of the accrual period, an electing accrual basis U.S. Holder may instead translate the accrued interest into U.S. dollars at the exchange rate in effect on the day of actual receipt. Any such election will apply to all debt instruments held by the U.S. Holder at the beginning of the first taxable year to which the election applies or thereafter acquired by the U.S. Holder, and will be irrevocable without the consent of the IRS.

Upon receipt of an interest payment (including a payment attributable to accrued but unpaid interest upon the sale or retirement of a Note) denominated in, or determined by reference to, a foreign currency, the U.S. Holder may recognise U.S. source exchange gain or loss (taxable as ordinary income or loss) equal to the difference between the amount received (translated into U.S. dollars at the spot rate on the date of receipt) and the amount previously accrued, regardless of whether the payment is in fact converted into U.S. dollars.

#### *OID*

OID for each accrual period on a Discount Note that is denominated in, or determined by reference to, a foreign currency, will be determined in the foreign currency and then translated into U.S. dollars in the same manner as stated interest accrued by an accrual basis U.S. Holder, as described above under “— *Interest*”. Upon receipt of an amount attributable to OID (whether in connection with a payment on the Note or a sale of the Note), a U.S. Holder may recognise U.S. source exchange gain or loss (taxable as ordinary income or loss) equal to the difference between the amount received (translated into U.S. dollars at the spot rate on the date of receipt) and the amount previously accrued, regardless of whether the payment is in fact converted into U.S. dollars.

#### *Market Discount*

Market Discount on a Note that is denominated in, or determined by reference to, a foreign currency, will be accrued in the foreign currency. If the U.S. Holder elects to include market discount in income currently, the accrued market discount will be translated into U.S. dollars at the average exchange rate for the accrual period (or portion thereof within the U.S. Holder’s taxable year). Upon the receipt of an amount attributable to accrued market discount, the U.S. Holder may recognise U.S. source exchange gain or loss (which will be taxable as ordinary income or loss) determined in the same manner as for accrued interest or OID. A U.S. Holder that does not elect to include market discount in income currently will recognise, upon the disposition or maturity of the Note, the U.S. dollar value of the amount accrued, calculated at the spot rate on that date, and no part of this accrued market discount will be treated as exchange gain or loss.

#### *Bond Premium*

Bond premium (including acquisition premium) on a Note that is denominated in, or determined by reference to, a foreign currency, will be computed in units of the foreign currency, and any such bond premium that is taken into account currently will reduce interest income in units of the foreign currency.

On the date bond premium offsets interest income, a U.S. Holder may recognise U.S. source exchange gain or loss (taxable as ordinary income or loss) measured by the difference between the spot rate in effect on that date, and on the date the Notes were acquired by the U.S. Holder.

#### *Purchase, Sale and Retirement of Notes*

A U.S. Holder generally will recognise gain or loss on the sale or retirement of a Note equal to the difference between (i) the amount realised on the sale or retirement (less any amount attributable to accrued qualified stated interest, which will be taxable as such) and (ii) its tax basis in the Note. A U.S. Holder’s tax basis in a Foreign Currency Note will be its U.S. dollar cost increased by the amount of any OID or market discount included in the U.S. Holder’s income with respect to the Note and the amount, if any, of income attributable to de minimis OID and de minimis market discount included in the U.S. Holder’s income with respect to the Note, and reduced by (i) the amount of any principal paid on the Note, and (ii) the amount of any amortisable bond premium applied to reduce interest on the Note. The U.S. dollar cost of a Note purchased with foreign currency generally will be the U.S. dollar value of the purchase price on the date of purchase or, in the case of Notes traded on an established securities market, as defined in the applicable U.S. Treasury regulations, that are purchased by a cash basis U.S. Holder (or an accrual basis U.S. Holder that so elects), on the settlement date for the purchase.

The amount realised on a sale or retirement for an amount in foreign currency will be the U.S. dollar value of this amount on the date of sale or retirement or, in the case of Notes traded on an established securities market, as

defined in the applicable U.S. Treasury regulations, sold by a cash basis U.S. Holder (or an accrual basis U.S. Holder that so elects), on the settlement date for the sale. Such an election by an accrual basis U.S. Holder must be applied consistently from year to year and cannot be revoked without the consent of the IRS.

A U.S. Holder will recognise U.S. source exchange rate gain or loss (taxable as ordinary income or loss) on the sale or retirement of a Note equal to the difference, if any, between the U.S. dollar values of the U.S. Holder's purchase price for the Note: (i) on the date of sale or retirement; and (ii) on the date on which the U.S. Holder acquired the Note. Any exchange rate gain or loss recognised on the sale or retirement of a Note (including any exchange rate gain or loss with respect to the receipt of accrued but unpaid interest and OID in the transaction) shall be realised only to the extent of the total gain or loss realised on the transaction. Except to the extent described above under "*Foreign Currency Notes — Market Discount*" above or changes in exchange rates, gain or loss recognised by a U.S. Holder on the sale or retirement of a Note will be capital gain or loss and will be long-term capital gain or loss if the Note was held by the U.S. Holder for more than one year. Gain or loss realised by a U.S. Holder on the sale or retirement of a Note generally will be U.S. source. A U.S. Holder might be required to file a disclosure statement with the IRS if the U.S. Holder recognises foreign currency loss above certain thresholds (as described below under "*Reportable Transactions*").

#### *Disposition of Foreign Currency*

Foreign currency received as interest on a Note or on the sale or retirement of a Note will have a tax basis equal to its U.S. dollar value at the time the interest is received or at the time of the sale or retirement. Foreign currency that is purchased generally will have a tax basis equal to the U.S. dollar value of the foreign currency on the date of purchase. Any gain or loss recognised on a sale or other disposition of a foreign currency (including its use to purchase Notes or upon exchange for U.S. dollars) will be U.S. source ordinary income or loss.

#### *Reportable Transactions*

A U.S. Holder that participates in a "reportable transaction" will be required to disclose its participation to the IRS. The scope and application of these rules are not entirely clear. A U.S. Holder may be required to treat a foreign currency exchange loss from a Note as a reportable transaction if the loss exceeds US\$50,000 in a single taxable year if the U.S. Holder is an individual or trust, or higher amounts for other non-individual U.S. Holders. In the event the acquisition, ownership or disposition of a Note constitutes participation in a "reportable transaction" for purposes of these rules, a U.S. Holder will be required to disclose its investment to the IRS, currently on Form 8886. A U.S. Holder that fails to timely file an information return with the IRS with respect to a transaction resulting in a loss that is treated as a reportable transaction may be subject to penalties. The Issuer might also be required to report information regarding the transaction to the IRS. Prospective purchasers should consult with their tax advisers regarding the application of these rules to the acquisition, ownership or disposition of a Note.

#### *Backup Withholding and Information Reporting*

Payments of principal, interest and accruals of OID on, and the proceeds of a sale, exchange, redemption or other disposition of, Notes, payable to a U.S. Holder by a paying agent or other intermediary, may be subject to information reporting to the IRS. In addition, certain U.S. Holders may be subject to backup withholding tax in respect of such payments if they do not provide an accurate taxpayer identification number or certification of exempt status to a paying agent or other intermediary or otherwise comply with the applicable backup withholding requirements.

Backup withholding is not an additional tax. The amount of any backup withholding from a payment to a U.S. Holder will be allowed as a credit against the U.S. Holder's U.S. federal income tax liability and may entitle the U.S. Holder to a refund, provided that the required information is timely furnished to the IRS in the manner required. Certain U.S. Holders (including, among others, corporations) are not subject to information reporting or backup withholding. U.S. Holders should consult their tax advisers as to their qualification for exemption from information reporting and/or backup withholding.

Certain U.S. Holders may be required to report to the IRS certain information with respect to their beneficial ownership of certain foreign financial assets, such as the Notes, if the aggregate value of such assets exceeds certain U.S. dollar value thresholds and the Notes are not held in an account at certain financial institutions (in which case the account maintained by the financial institution may be reportable). U.S. Holders who fail to report required information could be subject to substantial penalties.

U.S. Holders should consult their own tax advisers regarding any filing or reporting requirements that may apply to their purchase, ownership and disposition of Notes. Failure to comply with certain reporting obligations could result in the imposition of substantial penalties.

#### **Proposed Financial Transactions Tax (“FTT”)**

On 14 February 2013, the European Commission published a proposal (the “**Commission’s proposal**”) for a Directive for a common FTT in Belgium, Germany, Estonia, Greece, Spain, France, Italy, Austria, Portugal, Slovenia and Slovakia (the “**participating Member States**”). However, Estonia has since stated that it will not participate.

The Commission’s proposal has a very broad scope and could, if introduced, apply to certain dealings in the Notes (including secondary market transactions) in certain circumstances. Under the Commission’s proposal, FTT could apply in certain circumstances to persons both within and outside of the participating Member States. Generally, it would apply to certain dealings in the Notes where at least one party is a financial institution, and at least one party is established in a participating Member State. A financial institution may be, or be deemed to be, “established” in a participating Member State in a broad range of circumstances, including (a) by transacting with a person established in a participating Member State or (b) where the financial instrument which is subject to the dealings is issued in a participating Member State.

However, the FTT proposal remains subject to negotiation between participating Member States. It may therefore be altered prior to any implementation, the timing of which remains unclear. Additional EU Member States may decide to participate.

Prospective holders of the Notes are advised to seek their own professional advice in relation to the FTT.

## BOOK-ENTRY CLEARANCE SYSTEMS

*The information set out below is subject to any change in or reinterpretation of the rules, regulations and procedures of DTC, Euroclear or Clearstream, Luxembourg (together, the “**Clearing System**”) currently in effect. The information in this section concerning the Clearing System has been obtained from sources that the Issuer believes to be reliable, but none of the Issuer nor any Dealer takes any responsibility for the accuracy thereof. Investors wishing to use the facilities of any of the Clearing Systems are advised to confirm the continued applicability of the rules, regulations and procedures of the relevant Clearing System. None of the Issuer nor any other party to the Agency Agreement will have any responsibility or liability for any aspect of the records relating to, or payments made on account of, beneficial ownership interests in the Notes held through the facilities of any Clearing System or for maintaining, supervising or reviewing any records relating to such beneficial ownership interests.*

### Book-entry Systems

#### **Depository Trust Company**

DTC has advised the Issuer that it is a limited purpose trust company organised under the New York Banking Law, a “banking organisation” within the meaning of the New York Banking Law, a “clearing corporation” within the meaning of the New York Uniform Commercial Code and a “clearing agency” registered pursuant to Section 17A of the Exchange Act. DTC holds securities that its participants (“**Participants**”) deposit with DTC. DTC also facilitates the settlement among Participants of securities transactions, such as transfers and pledges, in deposited securities through electronic computerised book-entry changes in Participants’ accounts, thereby eliminating the need for physical movement of securities certificates. Direct Participants include securities brokers and dealers, banks, trust companies, clearing corporations and certain other organisations. Access to the DTC System is also available to others such as securities brokers and dealers, banks and trust companies that clear through or maintain a custodial relationship with a Direct Participant, either directly or indirectly (“**Indirect Participants**”).

Under the rules, regulations and procedures creating and affecting DTC and its operations (the “**Rules**”), DTC makes book-entry transfers of Registered Notes among Direct Participants on whose behalf it acts with respect to Notes accepted into DTC’s book-entry settlement system (“**DTC Notes**”) as described below and receives and transmits distributions of principal and interest on DTC Notes. The Rules are on file with the Securities and Exchange Commission. Direct Participants and Indirect Participants with which beneficial owners of DTC Notes (“**Owners**”) have accounts with respect to the DTC Notes similarly are required to make book-entry transfers and receive and transmit such payments on behalf of their respective Owners. Accordingly, although Owners who hold DTC Notes through Direct Participants or Indirect Participants will not possess Registered Notes, the Rules, by virtue of the requirements described above, provide a mechanism by which Direct Participants will receive payments and will be able to transfer their interest in respect of the DTC Notes.

Purchases of DTC Notes under the DTC system must be made by or through Direct Participants, which will receive a credit for the DTC Notes on DTC’s records. The ownership interest of each actual purchaser of each DTC Note (“**Beneficial Owner**”) is in turn to be recorded on the Direct and Indirect Participant’s records. Beneficial Owners will not receive written confirmation from DTC of their purchase, but Beneficial Owners are expected to receive written confirmations providing details of the transaction, as well as periodic statements of their holdings, from the Direct or Indirect Participant through which the Beneficial Owner entered into the transaction. Transfers of ownership interests in the DTC Notes are to be accomplished by entries made on the books of Participants acting on behalf of Beneficial Owners. Beneficial Owners will not receive certificates representing their ownership interests in DTC Notes, except in the event that use of the book-entry system for the DTC Notes is discontinued.

To facilitate subsequent transfers, all DTC Notes deposited by participants with DTC are registered in the name of DTC’s partnership nominee, Cede & Co. The deposit of DTC Notes with DTC and their registration in the name of Cede & Co. effect no change in beneficial ownership. DTC has no knowledge of the actual Beneficial Owners of the DTC Notes; DTC’s records reflect only the identity of the Direct Participants to whose accounts such DTC Notes are credited, which may or may not be the Beneficial Owners. The Participants will remain responsible for keeping account of their holdings on behalf of their customers.

Conveyance of notices and other communications by DTC to Direct Participants, by Direct Participants to Indirect Participants, and by Direct Participants and Indirect Participants to Beneficial Owners will be governed by arrangements among them, subject to any statutory or regulatory requirements as may be in effect from time to time.

Redemption notices shall be sent to Cede & Co. If less than all of the DTC Notes within an issue are being redeemed, selection of Notes for such partial redemption will be made in accordance of rules and procedures of DTC.

Neither DTC nor Cede & Co. will consent or vote with respect to DTC Notes. Under its usual procedures, DTC mails an Omnibus Proxy to the Issuer as soon as possible after the record date. The Omnibus Proxy assigns Cede & Co.'s consenting or voting rights to those Direct Participants to whose accounts the DTC Notes are credited on the record date (identified in a listing attached to the Omnibus Proxy).

Principal and interest payment on the DTC Notes will be made to DTC. DTC's practice is to credit Direct Participants' accounts on the due date for payment in accordance with their respective holdings shown on DTC's records unless DTC has reason to believe that it will not receive payment on the due date. Payments by Participants to Beneficial Owners will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers in bearer form or registered in "street name", and will be the responsibility of such Participant and not of DTC or the Issuer, subject to any statutory or regulatory requirements as may be in effect from time to time. Payment of principal and interest to DTC is the responsibility of the Issuer, disbursement of such payments to Direct Participants is the responsibility of DTC, and disbursement of such payments to the Beneficial Owners is the responsibility of Direct and Indirect Participants.

Under certain circumstances, including if there is an Event of Default under the Notes, DTC will exchange the DTC Notes for definitive Registered Notes, which it will distribute to its Participants in accordance with their proportionate entitlements and which, if representing interests in a Rule 144A Global Note, will be legended as set forth under "*Subscription and Sale and Transfer and Selling Restrictions*".

Since DTC may only act on behalf of Direct Participants, who in turn act on behalf of Indirect Participants, any Owner desiring to pledge DTC Notes to persons or entities that do not participate in DTC, or otherwise take actions with respect to such DTC Notes, will be required to withdraw its Registered Notes from DTC as described below.

#### ***Euroclear and Clearstream, Luxembourg***

Euroclear and Clearstream, Luxembourg each holds securities for its customers and facilitates the clearance and settlement of securities transactions by electronic book-entry transfer between their respective account holders. Euroclear and Clearstream, Luxembourg provide various services including safekeeping, administration, clearance and settlement of internationally traded securities and securities lending and borrowing. Euroclear and Clearstream, Luxembourg also deal with domestic securities markets in several countries through established depository and custodial relationships. Euroclear and Clearstream, Luxembourg have established an electronic bridge between their two systems across which their respective participants may settle trades with each other.

Euroclear and Clearstream, Luxembourg customers are world-wide financial institutions, including underwriters, securities brokers and dealers, banks, trust companies and clearing corporations. Indirect access to Euroclear and Clearstream, Luxembourg is available to other institutions that clear through or maintain a custodial relationship with an account holder of either system.

#### **Book-entry Ownership of and Payments in respect of DTC Notes**

The Issuer may apply to DTC in order to have any Tranche of Notes represented by a Registered Global Note accepted in its book-entry settlement system. Upon the issue of any such Registered Global Note, DTC or its custodian will credit, on its internal book-entry system, the respective nominal amounts of the individual beneficial interests represented by such Registered Global Note to the accounts of persons who have accounts with DTC. Such accounts initially will be designated by or on behalf of the relevant Dealer. Ownership of beneficial interests in such Registered Global Note will be limited to Direct Participants or Indirect Participants, including, in the case of any Regulation S Global Note, the respective depositories of Euroclear and Clearstream, Luxembourg. Ownership of beneficial interests in a Registered Global Note accepted by DTC will be shown on, and the transfer of such ownership will be effected only through, records maintained by DTC or its nominee (with respect to the interests of Direct Participants) and the records of Direct Participants (with respect to interests of Indirect Participants).

Payments in U.S. dollars of principal and interest in respect of a Registered Global Note accepted by DTC will be made to the order of DTC or its nominee as the registered holder of such Note. In the case of any payment in a

currency other than U.S. dollars, payment will be made to the Exchange Agent on behalf of DTC or its nominee and the Exchange Agent will (in accordance with instructions received by it) remit all or a portion of such payment for credit directly to the beneficial holders of interests in the Registered Global Note in the currency in which such payment was made and/or cause all or a portion of such payment to be converted into U.S. dollars and credited to the applicable Participants' account.

The Issuer expects DTC to credit accounts of Direct Participants on the applicable payment date in accordance with their respective holdings as shown in the records of DTC unless DTC has reason to believe that it will not receive payment on such payment date. The Issuer also expects that payments by Participants to beneficial owners of Notes will be governed by standing instructions and customary practices, as is the case with securities held for the accounts of customers, and will be the responsibility of such Participant and not the responsibility of DTC, the Principal Paying Agent, the Registrar or the Issuer. Payment of principal, premium, if any, and interest, if any, on Notes to DTC is the responsibility of the Issuer.

### **Transfers of Notes Represented by Registered Global Notes**

Transfers of any interests in Notes represented by a Registered Global Note within DTC, Euroclear and Clearstream, Luxembourg will be effected in accordance with the customary rules and operating procedures of the relevant clearing system. The laws in some States within the United States require that certain persons take physical delivery of securities in definitive form. Consequently, the ability to transfer Notes represented by a Registered Global Note to such persons may depend upon the ability to exchange such Notes for Notes in definitive form.

Similarly, because DTC can only act on behalf of Direct Participants in the DTC system who in turn act on behalf of Indirect Participants, the ability of a person having an interest in Notes represented by a Registered Global Note accepted by DTC to pledge such Notes to persons or entities that do not participate in the DTC system or otherwise to take action in respect of such Notes may depend upon the ability to exchange such Notes for Notes in definitive form. The ability of any holder of Notes represented by a Registered Global Note accepted by DTC to resell, pledge or otherwise transfer such Notes may be impaired if the proposed transferee of such Notes is not eligible to hold such Notes through a direct or indirect participant in the DTC system.

Subject to compliance with the transfer restrictions applicable to the Registered Notes described under "*Subscription and Sale and Transfer and Selling Restrictions*", cross-market transfers between DTC, on the one hand, and directly or indirectly through Clearstream, Luxembourg or Euroclear accountholders, on the other will be effected by the relevant clearing system in accordance with its rules and through action taken by the Registrar, the Principal Paying Agent and any custodian ("**Custodian**") with whom the relevant Registered Global Notes have been deposited.

On or after the Issue Date for any Series, transfers of Notes of such Series between accountholders in Clearstream, Luxembourg and Euroclear and transfers of Notes of such Series between participants in DTC will generally have a settlement date three business days after the trade date (T+3). The customary arrangements for delivery versus payment will apply to such transfers.

Cross-market transfers between accountholders in Clearstream, Luxembourg or Euroclear and DTC participants will need to have an agreed settlement date between the parties to such transfer. Because there is no direct link between DTC, on the one hand, and Clearstream, Luxembourg and Euroclear, on the other, transfers of interests in the relevant Registered Global Notes will be effected through the Registrar, the Principal Paying Agent and the Custodian receiving instructions (and, where appropriate, certification) from the transferor and arranging for delivery of the interests being transferred to the credit of the designated account for the transferee. In the case of cross-market transfers, settlement between Euroclear or Clearstream, Luxembourg accountholders and DTC participants cannot be made on a delivery versus payment basis. The securities will be delivered on a free delivery basis and arrangements for payment must be made separately.

DTC, Clearstream, Luxembourg and Euroclear have each published rules and operating procedures designed to facilitate transfers of beneficial interests in Registered Global Notes among participants and accountholders of DTC, Clearstream, Luxembourg and Euroclear. However, they are under no obligation to perform or continue to perform such procedures, and such procedures may be discontinued or changed at any time. None of the Issuer, the Agents or any Dealer will be responsible for any performance by DTC, Clearstream, Luxembourg or Euroclear or their respective direct or indirect participants or accountholders of their respective obligations under the rules and procedures governing their operations and none of them will have any liability for any aspect of the

records relating to or payments made on account of beneficial interests in the Notes represented by Registered Global Notes or for maintaining, supervising or reviewing any records relating to such beneficial interests.

### **CMU Notes**

Unless otherwise specified in the applicable Pricing Supplement, CMU Notes will initially be issued in registered form and represented by a global certificate (the “**CMU Global Note**”) registered in the name of HKMA, in its capacity as operator of the CMU Service and shall be delivered to and held by a sub-custodian nominated by the HKMA as operator of the CMU Service, or the CMU operator. The CMU Global Note will be held for the account of CMU members who have accounts with the CMU operator, or the CMU participants. For persons seeking to hold a beneficial interest in the Notes through Euroclear or Clearstream, Luxembourg, such persons will hold their interests through an account opened and held by Euroclear or Clearstream, Luxembourg with the CMU operator. Interests in the CMU Global Note will only be shown on, and transfers of interests will be effected through, records maintained by the CMU operator.

Because the CMU operator can act only on behalf of the CMU participants, who in turn may act on behalf of persons who hold interests through them, or indirect participants, the ability of persons having interests in the CMU Global Note to pledge such interests to persons or entities that are not CMU participants, or otherwise take action in respect of such interests, may be affected by the lack of definitive notes.

While the CMU Global Note representing the Notes is held by or on behalf of the CMU operator, payments of interest or principal will be made to the persons for whose account a relevant interest in the CMU Global Note is credited as being held by the CMU operator at the relevant time, as notified to the Principal Paying Agent by the CMU operator in a relevant CMU instrument position report (as defined in the rules of the CMU) or in any other relevant notification by the CMU operator. So long as the Notes are represented by the CMU Global Note that is held by or on behalf of the CMU operator, such payment by the Issuer will discharge the Issuer’s obligations in respect of that payment. Any payments by the CMU participants to indirect participants will be governed by arrangements agreed between the CMU participants and the indirect participants and will continue to depend on the inter-bank clearing system and traditional payment methods. Such payments will be the sole responsibility of such CMU participants.

Payments, transfers, exchanges and other matters relating to interests in the CMU Global Note may be subject to various policies and procedures adopted by the CMU operator from time to time. None of the Issuer, the Principal Paying Agent, the Registrar, the Paying Agents, the CMU Lodging Agent or any other Agent will have any responsibility or liability for any aspect of the CMU operator’s records relating to, or for payments made on account of, interests in the CMU Global Note, or for maintaining, supervising or reviewing any records relating to such interests.

For so long as all of the Notes are represented by the CMU Global Note and such CMU Global Note is held on behalf of the CMU operator, notices to Noteholders may be given by delivery of the relevant notice to the persons shown in a CMU instrument position report issued by the CMU operator on the business day preceding the date of dispatch of such notice as holding interests in the CMU Global Note for communication to the CMU participants. Any such notice shall be deemed to have been given to the Noteholders on the second business day on which such notice is delivered to the persons shown in the relevant CMU instrument position report as aforesaid. Indirect participants will have to rely on the CMU participants (through whom they hold the Notes, in the form of interests in the global certificate) to deliver the notices to them, subject to the arrangements agreed between the indirect participants and the CMU participants.

The CMU operator is under no obligation to maintain or continue to operate the CMU Service and the CMU operator is under no obligation to perform or continue to perform the procedures described above. Accordingly, the CMU and such procedures may be discontinued or modified at any time. None of the Issuer, the Principal Paying Agent, the Registrar, the Paying Agents, the CMU Lodging Agent or any other Agent will have any responsibility for the performance by the CMU operator or the CMU participants of their respective obligations under the rules and procedures governing their operations.

## SUBSCRIPTION AND SALE AND TRANSFER AND SELLING RESTRICTIONS

The Dealers have, in an amended and restated programme agreement dated 8 January 2016, as amended and supplemented by the First Supplemental Programme Agreement dated 5 October 2016, the Second Supplemental Programme Agreement dated 21 March 2017, the Third Supplemental Programme Agreement dated 11 January 2019, the Fourth Supplemental Programme Agreement dated 31 May 2021, the Fifth Supplemental Programme Agreement dated 16 March 2022, the Sixth Supplemental Programme Agreement dated 7 April 2023, the Seventh Supplemental Programme Agreement dated 5 April 2024 and the Eighth Supplemental Programme Agreement dated 29 September 2025 (as further amended, restated or supplemented from time to time, the “**Programme Agreement**”), agreed with the Issuer a basis upon which they or any of them may from time to time agree to purchase Notes. Any such agreement will extend to those matters stated under “*Form of the Notes*” and “*Terms and Conditions of the Notes*” above. In the Programme Agreement, the Issuer has agreed to reimburse the Dealers for certain of their expenses in connection with the establishment of the Programme and the issue of Notes under the Programme and to indemnify the Dealers against certain liabilities incurred by them in connection therewith.

In order to facilitate the offering of any Tranche of the Notes, certain persons participating in the offering of the Tranche may, to the extent permitted by applicable laws and regulations, engage in transactions that stabilise, maintain or otherwise affect the market price of the relevant Notes during and after the offering of the Tranche. Specifically, such persons may over-allot or create a short position in the Notes for their own account by selling more Notes than have been sold to them by the Issuer. Such persons may also elect to cover any such short position by purchasing Notes in the open market. In addition, such persons may stabilise or maintain the price of the Notes by bidding for or purchasing Notes in the open market and may impose penalty bids, under which selling concessions allowed to syndicate members or other broker-dealers participating in the offering of the Notes are reclaimed if Notes previously distributed in the offering are repurchased in connection with stabilisation transactions or otherwise. The effect of these transactions may be to stabilise or maintain the market price of the Notes at a level above that which might otherwise prevail in the open market. The imposition of a penalty bid may also affect the price of the Notes to the extent that it discourages resales thereof. No representation is made as to the magnitude or effect of any such stabilising or other transactions. Such transactions, if commenced, may be discontinued at any time. Stabilisation activities are subject to certain prescribed time limits in certain jurisdictions.

### **Notice to capital market intermediaries and prospective investors pursuant to paragraph 21 of the Hong Kong SFC Code — Important Notice to CMIs (including private banks)**

This notice to CMIs (including private banks) is a summary of certain obligations the SFC Code imposes on CMIs, which require the attention and cooperation of other CMIs (including private banks). Certain CMIs may also be acting as OCs for the relevant offering and are subject to additional requirements under the SFC Code. The application of these obligations will depend on the role(s) undertaken by the relevant Dealers in respect of each offering of Notes under the Programme.

Prospective investors who are the directors, employees or major shareholders of the Issuer, a CMI or its group companies would be considered under the SFC Code as having an Association with the Issuer, the CMI or the relevant group company. CMIs should specifically disclose whether their investor clients have any Association when submitting orders for the relevant Notes. In addition, private banks should take all reasonable steps to identify whether their investor clients may have any Associations with the Issuer or any CMI (including its group companies) and inform the relevant Dealers accordingly.

CMIs are informed that, unless otherwise specified in the applicable Pricing Supplement, the marketing and investor targeting strategy for such offering may include institutional investors, sovereign wealth funds, pension funds, hedge funds, family offices and high net worth individuals, in each case, subject to the selling restrictions and any MiFID II product governance language or any UK MiFIR product governance language set out elsewhere in this Offering Circular and/or the applicable Pricing Supplement.

CMIs should ensure that orders placed are bona fide, are not inflated and do not constitute duplicated orders (i.e. two or more corresponding or identical orders placed via two or more CMIs). CMIs should enquire with their investor clients regarding any orders which appear unusual or irregular. CMIs should disclose the identities of all investors when submitting orders for the relevant Notes (except for omnibus orders where underlying investor information should be provided to the OCs when submitting orders). Failure to provide underlying investor information for omnibus orders, where required to do so, may result in that order being rejected. CMIs should not place “X-orders” into the order book.

CMI should segregate and clearly identify their own proprietary orders (and those of their group companies, including private banks as the case may be) in the order book and book messages.

CMI (including private banks) should not offer any rebates to prospective investors or pass on any rebates provided by the Issuer. In addition, CMI (including private banks) should not enter into arrangements which may result in prospective investors paying different prices for the relevant Notes. CMI is informed that a private bank rebate may be payable as stated above and in the applicable Pricing Supplement, or as otherwise notified to prospective investors on or prior to the launch of an offering of Notes under the Programme.

The SFC Code requires that a CMI disclose complete and accurate information in a timely manner on the status of the order book and other relevant information it receives to targeted investors for them to make an informed decision. In order to do this, those Dealers in control of the order book should consider disclosing order book updates to all CMIs.

When placing an order for the relevant Notes, private banks should disclose, at the same time, if such order is placed other than on a “principal” basis (whereby it is deploying its own balance sheet for onward selling to investors). Private banks who do not provide such disclosure are hereby deemed to be placing their order on such a “principal” basis. Otherwise, such order may be considered to be an omnibus order pursuant to the SFC Code. Private banks should be aware that placing an order on a “principal” basis may require the relevant affiliated Dealer(s) to categorise it as a proprietary order and apply the “proprietary orders” of the SFC Code to such order and will result in that private bank not being entitled to, and not being paid, any rebate.

In relation to omnibus orders, when submitting such orders, CMIs (including private banks) are requested to provide the following underlying investor information, preferably in Excel Workbook format, in respect of each order constituting the relevant omnibus order (failure to provide such information may result in that order being rejected). Underlying investor information in relation to omnibus orders should consist of:

- the name of each underlying investor;
- the unique identification number of each investor;
- whether an underlying investor has any “associations” (as used in the SFC Code);
- whether any underlying investor order is a “proprietary order” (as used in the SFC Code); and
- whether any underlying investor order is a duplicate order.

Underlying investor information in relation to omnibus order should be sent to the Managers named in the relevant Pricing Supplement.

To the extent information being disclosed by CMIs and investors is personal and/or confidential in nature, CMIs (including private banks) agree and warrant: (A) to take appropriate steps to safeguard the transmission of such information to the OCs; (B) that they have obtained the necessary consents from the underlying investors to disclose such information to the OCs. By submitting an order and providing such information to the OCs, each CMI (including private banks) further warrants that they and the underlying investors have understood and consented to the collection, disclosure, use and transfer of such information by the OCs and/or any other third parties as may be required by the SFC Code, including to the Issuers, relevant regulators and/or any other third parties as may be required by the SFC Code, for the purpose of complying with the SFC Code, during the bookbuilding process for such offering. CMIs that receive such underlying investor information are reminded that such information should be used only for submitting orders in such offering. The Dealers may be asked to demonstrate compliance with their obligations under the SFC Code, and may request other CMIs (including private banks) to provide evidence showing compliance with the obligations above (in particular, that the necessary consents have been obtained). In such event, other CMIs (including private banks) are required to provide the relevant Dealer with such evidence within the timeline requested.

## **Transfer Restrictions**

***As a result of the following restrictions, purchasers of Notes in the United States are advised to consult legal counsel prior to making any purchase, offer, sale, resale or other transfer of such Notes.***

Each purchaser of Registered Notes (other than a person purchasing an interest in a Registered Global Note with a view to holding it in the form of an interest in the same Global Note) or person wishing to transfer an interest from one Registered Global Note to another or from global to definitive form or *vice versa*, will be required to

acknowledge, represent and agree as follows (terms used in this paragraph that are defined in Rule 144A or in Regulation S are used herein as defined therein):

- (i) that either (a) it is a QIB, purchasing (or holding) the Notes for its own account or for the account of one or more QIBs and it is aware that any sale to it is being made in reliance on Rule 144A or (b) it is an Institutional Accredited Investor which has delivered an IAI Investment Letter or (c) it is outside the United States and is not a U.S. person;
- (ii) that the Notes are being offered and sold in a transaction not involving a public offering in the United States within the meaning of the Securities Act, and that the Notes have not been and will not be registered under the Securities Act or any other applicable U.S. State securities laws and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except as set forth below;
- (iii) that, unless it holds an interest in a Regulation S Global Note and is either a person located outside the United States or not a U.S. person, if in the future it decides to resell, pledge or otherwise transfer the Notes or any beneficial interests in the Notes, it will do so, prior to the date which is one year after the later of the last Issue Date for the Series and the last date on which the Issuer or an affiliate of the Issuer was the owner of such Notes, only (a) to the Issuer or any affiliate thereof, (b) inside the United States to a person whom the seller reasonably believes is a QIB purchasing for its own account or for the account of a QIB in a transaction meeting the requirements of Rule 144A, (c) outside the United States in compliance with Rule 903 or Rule 904 under the Securities Act, (d) pursuant to the exemption from registration provided by Rule 144 under the Securities Act (if available) or (e) pursuant to an effective registration statement under the Securities Act, in each case in accordance with all applicable U.S. State securities laws;
- (iv) it will, and will require each subsequent holder to, notify any purchaser of the Notes from it of the resale restrictions referred to in paragraph (iii) above, if then applicable;
- (v) that Notes initially offered in the United States to QIBs will be represented by one or more Rule 144A Global Notes, that Notes offered to Institutional Accredited Investors will be in the form of Definitive IAI Registered Notes and that Notes offered outside the United States in reliance on Regulation S will be represented by one or more Regulation S Global Notes;
- (vi) that the Notes, other than the Regulation S Global Notes, will bear a legend to the following effect unless otherwise agreed to by the Issuer:

“THIS SECURITY HAS NOT BEEN REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE “**SECURITIES ACT**”), OR ANY OTHER APPLICABLE U.S. STATE SECURITIES LAWS AND, ACCORDINGLY, MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS EXCEPT AS SET FORTH IN THE FOLLOWING SENTENCE. BY ITS ACQUISITION HEREOF, THE HOLDER (A) REPRESENTS THAT (1) IT IS A “**QUALIFIED INSTITUTIONAL BUYER**” (AS DEFINED IN RULE 144A UNDER THE SECURITIES ACT) PURCHASING THE SECURITIES FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF ONE OR MORE QUALIFIED INSTITUTIONAL BUYERS OR (2) IT IS AN INSTITUTIONAL “**ACCREDITED INVESTOR**” (AS DEFINED IN RULE 501(A)(1), (2), (3) OR (7) UNDER THE SECURITIES ACT) (AN “**INSTITUTIONAL ACCREDITED INVESTOR**”); (B) AGREES THAT IT WILL NOT RESELL OR OTHERWISE TRANSFER THE SECURITIES EXCEPT IN ACCORDANCE WITH THE AGENCY AGREEMENT AND, PRIOR TO THE DATE WHICH IS ONE YEAR AFTER THE LATER OF THE LAST ISSUE DATE FOR THE SERIES AND THE LAST DATE ON WHICH THE ISSUER OR AN AFFILIATE OF THE ISSUER WAS THE OWNER OF SUCH SECURITIES OTHER THAN (1) TO THE ISSUER OR ANY AFFILIATE THEREOF, (2) INSIDE THE UNITED STATES TO A PERSON WHOM THE SELLER REASONABLY BELIEVES IS A QUALIFIED INSTITUTIONAL BUYER WITHIN THE MEANING OF RULE 144A UNDER THE SECURITIES ACT PURCHASING FOR ITS OWN ACCOUNT OR FOR THE ACCOUNT OF A QUALIFIED INSTITUTIONAL BUYER IN A TRANSACTION MEETING THE REQUIREMENTS OF RULE 144A, (3) OUTSIDE THE UNITED STATES IN COMPLIANCE WITH RULE 903 OR RULE 904 UNDER THE SECURITIES ACT, (4) PURSUANT TO THE EXEMPTION FROM REGISTRATION PROVIDED BY RULE 144 UNDER THE SECURITIES ACT (IF AVAILABLE) OR (5) PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT, IN EACH CASE IN ACCORDANCE WITH ALL APPLICABLE SECURITIES LAWS OF THE STATES OF THE UNITED STATES AND ANY OTHER JURISDICTION; AND (C) IT AGREES THAT IT WILL DELIVER TO

EACH PERSON TO WHOM THIS SECURITY IS TRANSFERRED A NOTICE SUBSTANTIALLY TO THE EFFECT OF THIS LEGEND.

THIS SECURITY AND RELATED DOCUMENTATION (INCLUDING WITHOUT LIMITATION, THE AGENCY AGREEMENT REFERRED TO HEREIN) MAY BE AMENDED OR SUPPLEMENTED FROM TIME TO TIME, WITHOUT THE CONSENT OF, BUT UPON NOTICE TO, THE HOLDERS OF SUCH SECURITIES SENT TO THEIR REGISTERED ADDRESSES, TO MODIFY THE RESTRICTIONS ON AND PROCEDURES FOR RESALES AND OTHER TRANSFERS OF THIS SECURITY TO REFLECT ANY CHANGE IN APPLICABLE LAW OR REGULATION (OR THE INTERPRETATION THEREOF) OR IN PRACTICES RELATING TO RESALES OR OTHER TRANSFERS OF RESTRICTED SECURITIES GENERALLY. THE HOLDER OF THIS SECURITY SHALL BE DEEMED, BY ITS ACCEPTANCE OR PURCHASE HEREOF, TO HAVE AGREED TO ANY SUCH AMENDMENT OR SUPPLEMENT (EACH OF WHICH SHALL BE CONCLUSIVE AND BINDING ON THE HOLDER HEREOF AND ALL FUTURE HOLDERS OF THIS SECURITY AND ANY SECURITIES ISSUED IN EXCHANGE OR SUBSTITUTION THEREFOR, WHETHER OR NOT ANY NOTATION THEREOF IS MADE HEREON).”;

- (vii) if it is outside the United States and is not a U.S. person, that if it should resell or otherwise transfer the Notes prior to the expiration of the distribution compliance period (defined as 40 days after the later of the commencement of the offering and the closing date with respect to the original issuance of the Notes), it will do so only (a)(i) outside the United States in compliance with Rule 903 or Rule 904 under the Securities Act or (ii) to a QIB in compliance with Rule 144A and (b) in accordance with all applicable U.S. State securities laws; and it acknowledges that the Regulation S Global Notes will bear a legend to the following effect unless otherwise agreed to by the Issuer:

“THIS SECURITY HAS NOT BEEN AND WILL NOT BE REGISTERED UNDER THE U.S. SECURITIES ACT OF 1933, AS AMENDED (THE “**SECURITIES ACT**”), OR ANY OTHER APPLICABLE U.S. STATE SECURITIES LAWS AND, ACCORDINGLY, MAY NOT BE OFFERED OR SOLD WITHIN THE UNITED STATES OR TO, OR FOR THE ACCOUNT OR BENEFIT OF, U.S. PERSONS EXCEPT IN ACCORDANCE WITH THE AGENCY AGREEMENT AND PURSUANT TO AN EXEMPTION FROM REGISTRATION UNDER THE SECURITIES ACT OR PURSUANT TO AN EFFECTIVE REGISTRATION STATEMENT UNDER THE SECURITIES ACT. THIS LEGEND SHALL CEASE TO APPLY UPON THE EXPIRY OF THE PERIOD OF 40 DAYS AFTER THE COMPLETION OF THE DISTRIBUTION OF ALL THE NOTES OF THE TRANCHE OF WHICH THIS NOTE FORMS PART.”; and

- (viii) that the Issuer and others will rely upon the truth and accuracy of the foregoing acknowledgements, representations and agreements and agrees that if any of such acknowledgements, representations or agreements made by it are no longer accurate, it shall promptly notify the Issuer; and if it is acquiring any Notes as a fiduciary or agent for one or more accounts it represents that it has sole investment discretion with respect to each such account and that it has full power to make the foregoing acknowledgements, representations and agreements on behalf of each such account.

Institutional Accredited Investors who purchase Registered Notes in definitive form offered and sold in the United States in reliance upon the exemption from registration provided by Regulation D of the Securities Act are required to execute and deliver to the Registrar an IAI Investment Letter. Upon execution and delivery of an IAI Investment Letter by an Institutional Accredited Investor, Notes will be issued in definitive registered form, see “*Form of the Notes*”.

The IAI Investment Letter will state, among other things, the following:

- (i) that the Institutional Accredited Investor has received a copy of the Offering Circular and such other information as it deems necessary in order to make its investment decision;
- (ii) that the Institutional Accredited Investor understands that any subsequent transfer of the Notes is subject to certain restrictions and conditions set forth in the Offering Circular and the Notes (including those set out above) and that it agrees to be bound by, and not to resell, pledge or otherwise transfer the Notes except in compliance with, such restrictions and conditions and the Securities Act;
- (iii) that, in the normal course of its business, the Institutional Accredited Investor invests in or purchases securities similar to the Notes;
- (iv) that the Institutional Accredited Investor is an Institutional Accredited Investor within the meaning of Rule 501(a)(1), (2), (3) or (7) of Regulation D under the Securities Act and has such knowledge and

experience in financial and business matters as to be capable of evaluating the merits and risks of its investment in the Notes, and it and any accounts for which it is acting are each able to bear the economic risk of its or any such accounts' investment for an indefinite period of time;

- (v) that the Institutional Accredited Investor is acquiring the Notes purchased by it for its own account or for one or more accounts (each of which is an Institutional Accredited Investor) as to each of which it exercises sole investment discretion and not with a view to any distribution of the Notes, subject, nevertheless, to the understanding that the disposition of its property shall at all times be and remain within its control; and
- (vi) that, in the event that the Institutional Accredited Investor purchases Notes, it will acquire Notes having a minimum purchase price of at least U.S.\$500,000 (or the approximate equivalent in another Specified Currency) and higher integral multiples of U.S.\$1,000 (or its equivalent as aforesaid).

No sale of Legended Notes in the United States to any one purchaser will be for less than U.S.\$100,000 (or its foreign currency equivalent) and higher integral multiples of U.S.\$10,000 (or its equivalent as aforesaid) principal amount or, in the case of sales to Institutional Accredited Investors, U.S.\$500,000 (or its foreign currency equivalent) and higher integral multiples of U.S.\$1,000 (or its equivalent as aforesaid) principal amount and no Legended Note will be issued in connection with such a sale in a smaller principal amount. If the purchaser is a non-bank fiduciary acting on behalf of others, each person for whom it is acting must purchase at least U.S.\$100,000 (or its foreign currency equivalent) and higher integral multiples of U.S.\$1,000 (or its equivalent as aforesaid) or, in the case of sales to Institutional Accredited Investors, U.S.\$500,000 (or its foreign currency equivalent) and higher integral multiples of U.S.\$1,000 (or its equivalent as aforesaid) principal amount of Registered Notes.

### ***Selling Restrictions***

#### *United States of America*

The Notes have not been and will not be registered under the Securities Act and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act.

The Notes in bearer form are subject to U.S. tax law requirements and may not be offered, sold or delivered within the United States or its possessions or to a United States person, except in certain transactions permitted by U.S. tax regulations. Terms used in this paragraph have the meanings given to them by the Code and regulations thereunder.

In connection with any Notes which are offered or sold outside the United States in reliance on an exemption from the registration requirements of the Securities Act provided under Regulation S ("**Regulation S Notes**") each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it will not offer, sell or deliver such Regulation S Notes (i) as part of their distribution at any time or (ii) otherwise until 40 days after the completion of the distribution, as determined and certified by the relevant Dealer or, in the case of an issue of Notes on a syndicated basis, the relevant lead manager, of all Notes of the Tranche of which such Regulation S Notes are a part, within the United States or to, or for the account or benefit of, U.S. persons. Each Dealer has further agreed, and each further Dealer appointed under the Programme will be required to agree, that it will send to each dealer to which it sells any Regulation S Notes during the distribution compliance period a confirmation or other notice setting forth the restrictions on offers and sales of the Regulation S Notes within the United States or to, or for the account or benefit of, U.S. persons.

Until 40 days after the commencement of the offering of any Series of Notes, an offer or sale of such Notes within the United States by any dealer (whether or not participating in the offering) may violate the registration requirements of the Securities Act if such offer or sale is made otherwise than in accordance with an applicable exemption from registration under the Securities Act.

Dealers may (either directly or through selling agents, which may include their respective U.S. broker-dealer affiliates) arrange for the resale of Notes to QIBs pursuant to Rule 144A and each such purchaser of Notes is hereby notified that the Dealers may be relying on the exemption from the registration requirements of the Securities Act provided by Rule 144A. The minimum aggregate principal amount of Notes which may be purchased by a QIB pursuant to Rule 144A is U.S.\$100,000 (or the approximate equivalent thereof in any other currency) and higher integral multiples of U.S.\$1,000 (or its equivalent as aforesaid). To the extent that the Issuer

is not subject to or does not comply with the reporting requirements of Section 13 or 15(d) of the Exchange Act or the information furnishing requirements of Rule 12g3-2(b) thereunder, the Issuer has agreed to furnish to holders of Notes and to prospective purchasers designated by such holders, upon request, such information as may be required by Rule 144A(d)(4).

Each issuance of Index Linked Notes or Dual Currency Notes shall be subject to such additional selling restrictions as the Issuer and the relevant Dealer may agree as a term of the issuance and purchase of such Notes, which additional selling restrictions shall be set out in the applicable Pricing Supplement.

#### *European Economic Area*

Unless the Pricing Supplement in respect of any Notes specifies the “Prohibition of Sales to EEA Retail Investors” as “Not Applicable”, each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes which are the subject of the offering contemplated by this Offering Circular as completed by the Pricing Supplement in relation thereto to any retail investor in the European Economic Area (“EEA”). For the purposes of this provision,

- (a) the expression “**retail investor**” means a person who is one (or more) of the following:
  - i. a retail client as defined in point (11) of Article 4(1) of Directive 2014/65/EU (as amended, “**MiFID II**”); or
  - ii. a customer within the meaning of Directive (EU) 2016/97 (as amended, the “**Insurance Distribution Directive**”), where that customer would not qualify as a professional client as defined in point (10) of Article 4(1) of MiFID II; or
  - iii. not a qualified investor as defined in Regulation (EU) 2017/1129 (as amended, the “**Prospectus Regulation**”); and
- (b) the expression “**offer**” includes the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes.

Consequently, no key information document required by Regulation (EU) No 1286/2014 (as amended, the “**PRIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the EEA has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the EEA may be unlawful under the PRIIPs Regulation.

If the Pricing Supplement in respect of any Notes specifies “Prohibition of Sales to EEA Retail Investors” as “Not Applicable”, each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not made and will not make an offer of Notes which are the subject of the offering contemplated by this Offering Circular as completed by the Pricing Supplement in relation thereto to the public in that Member State except that it may make an offer of such Notes to the public in that Member State:

- (i) at any time to any legal entity which is a qualified investor as defined in the Prospectus Regulation;
- (ii) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Regulation), subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
- (iii) at any time in any other circumstances falling within Article 1(4) of the Prospectus Regulation,

provided that no such offer of Notes referred to in paragraphs (i) to (iii) above shall require the Issuer or any Dealer to publish a prospectus pursuant to Article 3 of the Prospectus Regulation, or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation.

For the purposes of this provision, the expression an “**offer of Notes to the public**” in relation to any Notes in any EEA Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes and the expression “**Prospectus Regulation**” means Regulation (EU) 2017/1129.

## *United Kingdom*

Unless the Pricing Supplement in respect of any Notes specifies the “Prohibition of Sales to UK Retail Investors” as “Not Applicable”, each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered, sold or otherwise made available and will not offer, sell or otherwise make available any Notes which are the subject of the offering contemplated by this Offering Circular as completed by the Pricing Supplement in relation thereto to any retail investor in the United Kingdom. For the purposes of this provision,

- (a) the expression “**retail investor**” means a person who is one (or more) of the following:
  - i. a retail client, as defined in point (8) of Article 2 of Regulation (EU) No 2017/565 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018 (the “**EUWA**”);
  - ii. a customer within the meaning of the provisions of the Financial Services and Markets Act 2000 (the “**FSMA**”) and any rules or regulations made under the FSMA to implement the Insurance Distribution Directive, where that customer would not qualify as a professional client, as defined in point (8) of Article 2(1) of Regulation (EU) No 600/2014 as it forms part of domestic law by virtue of the EUWA; or
  - iii. not a qualified investor as defined in Article 2 of the Prospectus Regulation as it forms part of domestic law by virtue of the EUWA (the “**UK Prospectus Regulation**”); and
- (b) the expression “**offer**” includes the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes.

Consequently, no key information document required by the Regulation (EU) No 1286/2014 as it forms part of domestic law by virtue of the EUWA (the “**UK PRIIPs Regulation**”) for offering or selling the Notes or otherwise making them available to retail investors in the UK has been prepared and therefore offering or selling the Notes or otherwise making them available to any retail investor in the UK may be unlawful under the UK PRIIPs Regulation.

If the applicable Pricing Supplement in respect of any Notes specifies “Prohibition of Sales to UK Retail Investors” as “Not Applicable”, each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not made and will not make an offer of Notes which are the subject of the offering contemplated by this Offering Circular as completed by the applicable Pricing Supplement in relation thereto to the public in the UK except that it may make an offer of such Notes to the public in the UK:

- (i) at any time to any legal entity which is a qualified investor as defined in Article 2 of the UK Prospectus Regulation;
- (ii) at any time to fewer than 150 natural or legal persons (other than qualified investors as defined in Article 2 of the UK Prospectus Regulation) in the United Kingdom subject to obtaining the prior consent of the relevant Dealer or Dealers nominated by the Issuer for any such offer; or
- (iii) at any time in any other circumstances falling within section 86 of the FSMA,

provided that no such offer of Notes referred to in (i) to (iii) above shall require the Issuer or any Dealer to publish a prospectus pursuant to section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation.

For the purposes of this provision, the expression an “**offer of Notes to the public**” in relation to any Notes means the communication in any form and by any means of sufficient information on the terms of the offer and the Notes to be offered so as to enable an investor to decide to purchase or subscribe for the Notes and the expression “**UK Prospectus Regulation**” means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the EUWA.

In addition, each Dealer has represented, warranted and agreed, and each further Dealer appointed under the Programme will be required to represent, warrant and agree, that:

- (i) in relation to any Notes which have a maturity of less than one year, (i) it is a person whose ordinary activities involve it in acquiring, holding, managing or disposing of investments (as principal or agent) for the purposes of its business and (ii) it has not offered or sold and will not offer or sell any Notes other than

to persons whose ordinary activities involve them in acquiring, holding, managing or disposing of investments (as principal or as agent) for the purposes of their businesses or who it is reasonable to expect will acquire, hold, manage or dispose of investments (as principal or agent) for the purposes of their businesses where the issue of the Notes would otherwise constitute a contravention of Section 19 of the FSMA by the Issuer;

- (ii) it has only communicated or caused to be communicated and will only communicate or cause to be communicated an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) received by it in connection with the issue or sale of any Notes in circumstances in which Section 21(1) of the FSMA does not apply to the Issuer; and
- (iii) it has complied and will comply with all applicable provisions of the FSMA with respect to anything done by it in relation to any Notes in, from or otherwise involving the United Kingdom.

#### *Japan*

Each Dealer has acknowledged, and each further Dealer appointed under the Programme will be required to acknowledge, that the Notes have not been and will not be registered under the Financial Instruments and Exchange Act of Japan (Law No. 25 of 1948, as amended) (the “**FIEA**”). Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered or sold and will not offer or sell any Notes, directly or indirectly, in Japan or to, or for the benefit of, any resident of Japan (as defined under Item 5, Paragraph 1, Article 6 of the Foreign Exchange and Foreign Trade Control Law (Law No. 228 of 1949, as amended)) or to others for re-offering or resale, directly or indirectly, in Japan or to, or for the benefit of, a resident of Japan, except pursuant to an exemption from the registration requirements of, and otherwise in compliance with, the FIEA and other applicable laws, regulations and ministerial guidelines of Japan.

#### *Hong Kong*

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that:

- (a) it has not offered or sold, and will not offer or sell, in Hong Kong Special Administrative Region of the PRC (“**Hong Kong**”), by means of any document, any Notes (except for Notes which are a “**structured product**” as defined in the Securities and Futures Ordinance (Cap. 571) of Hong Kong (the “**SFO**”)) other than (i) to “**professional investors**” as defined in the SFO and any rules made under the SFO; or (ii) in other circumstances which do not result in the document being a “**prospectus**” as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong (the “**C(WUMPO)**”) or which do not constitute an offer to the public within the meaning of the C(WUMPO); and
- (b) it has not issued, or had in its possession for the purposes of issue, and will not issue or have in its possession for the purposes of issue, whether in Hong Kong or elsewhere, any advertisement, invitation or document relating to the Notes, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to the Notes which are or are intended to be disposed of only to persons outside Hong Kong or only to “**professional investors**” as defined in the SFO and any rules made under the SFO.

#### *Singapore*

Each Dealer has acknowledged, and each further Dealer appointed under the Programme will be required to acknowledge, that this Offering Circular has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, each Dealer has represented, warranted and agreed, and each further Dealer appointed under the Programme will be required to represent, warrant and agree, that it has not offered or sold any Notes or caused the Notes to be made the subject of an invitation for subscription or purchase and will not offer or sell any Notes or cause the Notes to be made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this Offering Circular or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the Notes, whether directly or indirectly, to any person in Singapore other than (i) to an institutional investor (as defined in Section 4A of the Securities and Futures Act 2001 of Singapore, as modified or amended from time to time (the “**SFA**”)) pursuant to Section 274 of the SFA or (ii) to an accredited investor (as defined in Section 4A of the SFA) pursuant to and in accordance with the conditions specified in Section 275 of the SFA.

## *Canada*

The Notes may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 Prospectus Exemptions or subsection 73.3(1) of the Securities Act (Ontario), and are permitted clients, as defined in National Instrument 31-103 Registration Requirements, Exemptions and Ongoing Registrant Obligations. Any resale of the Notes must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this Offering Circular (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser's province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser's province or territory for particulars of these rights or consult with a legal advisor.

***If applicable, pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 Underwriting Conflicts (NI 33-105), the Dealers are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection with this offering.***

## *United Arab Emirates (excluding the Dubai International Finance Centre)*

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that the Notes to be issued under the Programme have not been and will not be offered, sold or publicly promoted or advertised by it in the United Arab Emirates other than in compliance with any laws applicable in the United Arab Emirates governing the issue, offering and sale of securities.

## *Dubai International Financial Centre*

Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree, that it has not offered and will not offer the Notes to any person in the Dubai International Financial Centre unless such offer is:

- (i) an "Exempt Offer" in accordance with the Markets Rules Module of the Dubai Financial Services Authority Rulebook; and
- (ii) made only to persons who meet the Professional Client criteria set out in Rule 2.3.3 of the Conduct of Business Module of the Dubai Financial Services Authority Rulebook.

## *Switzerland*

This Offering Circular is not intended to constitute an offer or solicitation to purchase or invest in the Notes described herein. The Notes may not be publicly offered, sold or advertised, directly or indirectly, in, into or from Switzerland and will not be listed on the SIX Swiss Exchange or on any other exchange or regulated trading facility in Switzerland. Neither this Offering Circular nor any other offering or marketing material relating to the Notes constitutes a prospectus as such term is understood pursuant to article 652a or article 1156 of the Swiss Code of Obligations or a listing prospectus within the meaning of the listing rules of the SIX Swiss Exchange or any other regulated trading facility in Switzerland or a simplified prospectus or a prospectus as such term is defined in the Swiss Collective Investment Scheme Act, and neither this Offering Circular nor any other offering or marketing material relating to the Notes may be publicly distributed or otherwise made publicly available in Switzerland.

Neither this Offering Circular nor any other offering or marketing material relating to the offering, nor the Issuer nor the Notes have been or will be filed with or approved by any Swiss regulatory authority. The Notes are not subject to supervision by any Swiss regulatory authority (e.g. the Swiss Financial Markets Supervisory Authority ("FINMA")), and investors in the Notes will not benefit from protection or supervision by such authority.

## *Korea*

The Notes have not been and will not be registered with the Financial Services Commission of Korea under the FSCMA. Each Dealer has represented and agreed, and each further Dealer appointed under the Programme will be required to represent and agree that:

- (a) in respect of the Notes issued as straight bonds other than equity-linked bonds, such as convertible bonds, bonds with warrants and exchangeable bonds relying on the exemption as set out in Article 2-2-2, Paragraph 2, Item 3 of the Securities Issuance and Disclosure Regulations promulgated by the Financial Services Commission of Korea, the Notes may not be offered, sold or delivered, directly or indirectly, in Korea or to, or for the account or benefit of, any resident of Korea (as defined under the Foreign Exchange Transactions Act of Korea and the rules and regulations promulgated thereunder) or to others for re-offering or resale, directly or indirectly, in Korea or to any resident of Korea except as otherwise permitted under applicable Korean laws and regulations. In addition, during the first year after the issuance of the Notes, the Notes may not be transferred to any resident of Korea other than a “qualified institutional buyer” (a “**Korean QIB**,” as defined in the Securities Issuance and Disclosure Regulations) who is registered with the Korea Financial Investment Association as a Korean QIB, provided that (i) the Notes are denominated, and the principal and interest payments thereunder are made, in a currency other than Korean won, (ii) the amount of the Notes acquired by the Korean QIBs in the primary market is limited to not more than 20% of the aggregate principal amount of the Notes, (iii) the Notes are listed on one of the major overseas securities markets designated by the Financial Supervisory Service of Korea, or certain procedures, such as registration or report with a foreign financial investment regulator of the country in which any major overseas securities market is established, have been completed for offering of the Notes, (iv) the one-year restriction on transfer of the Notes to any resident of Korea other than the Korean QIBs is expressly stated in the Notes, the relevant purchase agreement and offering circular and (v) the Issuer and the Dealers shall individually or collectively keep the evidence of fulfilment of conditions (i) through (iv) above after having taken necessary actions therefor; and
- (b) in respect of the Notes relying on the exemption as set out in Article 2-2-2, Paragraph 2 (other than Item 3) of the Securities Issuance and Disclosure Regulations promulgated by the Financial Services Commission of Korea, the Notes may not be offered, sold or delivered, directly or indirectly, in Korea or to, or for the account or benefit of, any resident of Korea (as defined under the Foreign Exchange Transactions Act of Korea and the rules and regulations promulgated thereunder) or to others for re-offering or resale, directly or indirectly, in Korea or to any resident of Korea except as otherwise permitted under applicable Korean laws and regulations. In addition, during the first year after the issuance of the Notes, the Notes may not be transferred to any resident of Korea except as otherwise permitted under applicable Korean laws and regulations.

Each Dealer has undertaken, and each further Dealer appointed under the Programme will be required to undertake, to ensure that any securities dealer to which it sells Notes confirms that it is purchasing such Notes as principal and agrees with such Dealer that it will comply with the restrictions described above.

## **General**

Each Dealer has agreed, and each further Dealer appointed under the Programme will be required to agree, that it will (to the best of its knowledge and belief) comply with all applicable securities laws and regulations in force in any jurisdiction in which it purchases, offers, sells or delivers Notes or possesses or distributes this Offering Circular and will obtain any consent, approval or permission required by it for the purchase, offer, sale or delivery by it of Notes under the laws and regulations in force in any jurisdiction to which it is subject or in which it makes such purchases, offers, sales or deliveries and neither the Issuer nor any other Dealer shall have any responsibility therefor.

If a jurisdiction requires that any offering of Notes under the Programme be made by a licenced broker or dealer and any Dealer or any affiliate of a Dealer is a licenced broker or dealer in that jurisdiction, the offering shall be deemed to be made by such Dealer or such affiliate on behalf of the Issuer in such jurisdiction.

Neither the Issuer nor any of the Dealers represents that Notes may at any time lawfully be sold in compliance with any applicable registration or other requirements in any jurisdiction, or pursuant to any exemption available thereunder, or assumes any responsibility for facilitating such sale.

With regard to each Tranche, the relevant Dealer will be required to comply with such other additional restrictions as the Issuer and the relevant Dealer shall agree and as shall be set out in the applicable Pricing Supplement.

The Dealers and certain of their affiliates may have performed certain investment banking and advisory services for the Bank and/or its affiliates from time to time for which they have received customary fees and expenses and may, from time to time, engage in transactions with and perform services for the Bank and/or its affiliates in the ordinary course of their business.

The Dealers or certain of their affiliates may purchase the Notes and be allocated Notes for asset management and/or proprietary purposes and not with a view to distribution.

The Dealers or their respective affiliates may purchase the Notes for its or their own account and enter into transactions, including credit derivatives, such as asset swaps, repackaging and credit default swaps relating to the Notes and/or other securities of the Bank or its subsidiaries or associates at the same time as the offer and sale of the Notes or in secondary market transactions. Such transactions would be carried out as bilateral trades with selected counterparties and separately from any existing sale or resale of the Notes to which this Offering Circular relates (notwithstanding that such selected counterparties may also be purchasers of the Notes).

## GENERAL INFORMATION

### Authorisation

The establishment of the Programme and the issue of Notes under the Programme have been duly authorised by a resolution of the Board of the Issuer dated 12 May 1995.

### Listing of Notes on the Singapore Stock Exchange

Approval in-principle has been received from the Singapore Stock Exchange in connection with the Programme and application will be made for the listing and quotation of Notes that may be issued pursuant to the Programme and which are agreed at or prior to the time of issue thereof to be so listed on the Singapore Stock Exchange. Such permission will be granted when such Notes have been admitted for listing and quotation on the Singapore Stock Exchange. The Singapore Stock Exchange assumes no responsibility for the correctness of any of the statements made, opinions expressed or reports contained herein. Approval in-principle from, admission to the Official List of, and listing and quotation of any Notes on, the Singapore Stock Exchange are not to be taken as an indication of the merits of the Issuer, the Programme or the Notes.

### Documents Available

From the date hereof and so long as Notes are capable of being issued under the Programme, copies of the following documents will, when published, be available for inspection at the registered office of the Issuer (in the case of clause (iv) below, those documents will also be available at the specified office of the Principal Paying Agent):

- (i) the constitutional documents (together with English translations) of the Issuer;
- (ii) the audited consolidated and separate financial statements of the Issuer as of and for the years ended 31 December 2023 and 2022 and the audited consolidated and separate financial statements of the Issuer as of and for the years ended 31 December 2024 and 2023 (together with English translations);
- (iii) the reviewed interim consolidated and separate financial statements of the Issuer as of 30 June 2025 and for the six-month periods ended 30 June 2025 and 2024 (together with English translations);
- (iv) the most recently published (if available) audited consolidated and separate financial statements of the Issuer and the most recently published (if available) reviewed consolidated and separate interim financial statements of the Issuer (together with English translations);
- (v) the Programme Agreement, the Agency Agreement, the forms of the Temporary Global Notes, the Permanent Global Notes, the definitive Bearer Notes, the Receipts, the Coupons, the Talons, the Regulation S Global Notes, the Restricted Global Notes and the Definitive IAI Registered Notes, the Deed Poll and the Deed of Covenant;
- (vi) a copy of this Offering Circular;
- (vii) any future offering circulars, information memoranda and supplements, including Pricing Supplements (save that a Pricing Supplement relating to an unlisted Note will only be available for inspection by a holder of such Note and such holder must produce evidence satisfactory to the Issuer or the relevant Paying Agent, as the case may be, as to its holding and identity), to this Offering Circular and any other documents incorporated herein or therein by reference; and
- (viii) in the case of each issue of listed Notes subscribed pursuant to a subscription agreement, the subscription agreement (or equivalent document).

### Clearing Systems

The Notes have been accepted for clearance through Euroclear and Clearstream, Luxembourg. The appropriate Common Code and ISIN for each Tranche of Notes allocated by Euroclear and Clearstream, Luxembourg will be specified in the applicable Pricing Supplement. The Issuer may also apply to have the Notes accepted for clearance through the CMU Service. The relevant CMU instrument number will be specified in the applicable Pricing Supplement. For persons seeking to hold a beneficial interest in the CMU Notes held in a global certificate through Euroclear or Clearstream, such persons will hold their interests through an account opened and held by Euroclear or Clearstream with HKMA as the CMU operator. In addition, the Issuer will make an application for any Registered Notes to be accepted for trading in book-entry form by DTC. The CUSIP and/or

CINS numbers for each Tranche of Registered Notes, together with the relevant ISIN and Common Code, will be specified in the applicable Pricing Supplement. If the Notes are to clear through an additional or alternative clearing system, the appropriate information will be specified in the applicable Pricing Supplement.

### **Significant or Material Change**

Save as disclosed in this Offering Circular, there has been no significant change in the financial or trading position of the Issuer and its subsidiaries since 30 June 2025 and there has been no material adverse change in the financial position or prospects of the Issuer and its subsidiaries since 30 June 2025.

### **Litigation**

Other than as described in “*KEB Hana Bank — Legal and Regulatory Proceedings*”, neither the Issuer nor any of its subsidiaries (whether as defendant or otherwise) is engaged in any legal, arbitration, administrative or other proceedings, the results of which might have or have had in the recent past (covering at least the previous 12 months) a significant effect on the financial position or the operations of the Issuer and its subsidiaries nor is the Issuer aware of any such proceedings pending or being threatened.

### **Independent Auditors**

The audited consolidated financial statements of the Bank as of and for the years ended 31 December 2024, 2023 and 2022 have been audited by Deloitte Anjin LLC, independent auditors, as stated in their independent auditor’s reports appearing herein.

The unaudited interim consolidated financial statements of the Bank and its subsidiaries and the unaudited interim separate financial statements of the Bank as of and for the six-month period ended 30 June 2025 have been reviewed by Ernst & Young Han Young, independent auditors, as stated in their independent auditor’s review reports appearing or incorporated by reference herein.

With respect to the unaudited interim financial information for the six month period ended June 30, 2024, included in this offering circular, the independent auditors have reported that they applied limited procedures in accordance with professional standards for a review of such information. However, their separate review report included in this offering circular, states that they did not audit and they do not express an opinion on that interim financial information. Accordingly, the degree of reliance on their report on such information should be restricted in light of the limited nature of the review procedures applied.

## **Report on review of interim condensed consolidated financial statements**

(English translation of a report originally issued in Korean)

### **The Stockholders and Board of Directors Hana Bank Co., Ltd. and its subsidiaries**

We have reviewed the accompanying interim consolidated financial statements of Hana Bank Co., Ltd. and its subsidiaries (collectively referred to as the "Group"), which comprise the interim consolidated statement of financial position as of June 30, 2025, and the related interim consolidated statements of comprehensive income for each of the three-month and six-month periods ended June 30, 2025, the interim consolidated statement of changes in equity and interim consolidated statement of cash flows for the six-month period ended June 30, 2025, and a summary of material accounting policy information and other explanatory information.

### **Management's responsibility for the interim condensed consolidated financial statements**

Management is responsible for the preparation and presentation of these interim consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the Republic of Korea ("KIFRS") 1034 *Interim Financial Reporting*, and for such internal control as management determines is necessary to enable the preparation of interim financial statements that are free from material misstatement, whether due to fraud or error.

### **Auditor's responsibility**

Our responsibility is to express a conclusion on these interim consolidated financial statements based on our review. We conducted our review in accordance with the Review Standards for Quarterly and Semiannual Financial Statements established by the Securities and Futures Commission of the Republic of Korea. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing ("KSA") and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

### **Conclusion**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements are not prepared, in all material respects, in accordance with KIFRS 1034 *Interim Financial Reporting*.

## Other matters

The interim consolidated statements of comprehensive income for each of the three-month and six-month periods ended June 30, 2024, interim consolidated statement of changes in equity and interim consolidated statement of cash flows for the six-month period ended June 30, 2024, prepared in accordance with KIFRS 1034 and presented for comparative purposes, have been reviewed by Deloitte Anjin LLC, whose review report dated August 13, 2024 expressed an unqualified review conclusion thereon.

Moreover, the consolidated statement of financial position as of December 31, 2024 and the related consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended (not presented herein) have been audited by Deloitte Anjin LLC in accordance with KSA, whose report dated February 28, 2025 expressed an unqualified opinion thereon. The accompanying consolidated statement of financial position as of December 31, 2024, presented for comparative purposes, is not different, in all material respects, from the above audited consolidated statement of financial position.

August 14, 2025

This review report is effective as of August 14, 2025, the independent auditor's review report date. Accordingly, certain material subsequent events or circumstances may have occurred during the period from the date of the independent auditor's review report to the time this report is used. Such events and circumstances could significantly affect the accompanying interim consolidated financial statements and may result in modifications to this review report.

## Independent Accountant's Review Report

(English Translation of Independent Accountant's Review Report  
Originally Issued in Korean on August 13, 2024)

To the Shareholders and Board of Directors of

Hana Bank Co., Ltd. and its subsidiaries:

### Report on the Interim Consolidated Financial Statements

We have reviewed the accompanying interim consolidated financial statements of Hana Bank Co., Ltd. (the "Bank") and its subsidiaries (collectively, the "Group"), which comprise the interim consolidated statement of financial position as of June 30, 2024, and the related interim consolidated statements of profit or loss and other comprehensive income for the three-month and six-month periods ended June 30, 2024 and 2023, interim consolidated statements of changes in equity and interim consolidated statements of cash flows, all expressed in Korean won, for the six-month periods ended June 30, 2024 and 2023, and a summary of material accounting policies and other explanatory information.

### Management's Responsibility for the Interim Consolidated Financial Statements

Management is responsible for the preparation and presentation of these interim consolidated financial statements in accordance with Korean International Financial Reporting Standards ("K-IFRS") 1034, Interim Financial Reporting, and for such internal control as management determines is necessary to enable the preparation of the interim consolidated financial statements that are free from material misstatement, whether due to fraud or error.

## **Independent Accountant's Responsibility**

Our responsibility is to express a conclusion on these interim consolidated financial statements based on our review.

We conducted our review in accordance with the review standards for interim financial statements in the Republic of Korea. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Korean Standards on Auditing ("KSA") and, consequently, does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

## **Review Conclusion**

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim consolidated financial statements is not prepared, in all material respects, in accordance with K-IFRS 1034.

## **Other matter**

We have audited the consolidated statement of financial position of the Group as of December 31, 2023, and the related consolidated statement of profit or loss and other comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended (not presented herein) in accordance with KSA, and our report dated February 29, 2024, expressed an unqualified opinion thereon. The accompanying consolidated statement of financial position as of December 31, 2023, presented for comparative purposes is not different, in all material respects, from the above audited consolidated statement of financial position.

The accompanying notes are an integral part of the interim consolidated financial statements.

HANA BANK CO., LTD. and its subsidiaries  
Notes to the interim consolidated financial statements  
June 30, 2025 and 2024 (unaudited)

1. General information:

General information on Hana Bank Co., Ltd. (the "Bank" or the "Parent company") , previously Korea Exchange Bank, and its subsidiaries (collectively referred to as the "Group") in accordance with International Financial Reporting Standard as adopted by the Republic of Korea ("KIFRS") 1110 *Consolidated Financial Statements* is as follows:

1-1 Summary of the Parent company (the Bank)

The Bank was established on January 30, 1967, as a government-controlled bank, to engage in foreign exchange and trade finance business under the *Korea Exchange Bank Act* enacted on July 28, 1966.

On December 30, 1989, the *Korea Exchange Bank Act* was repealed, and the Bank was reorganized as a stock company under the Commercial Act of the Republic of Korea. On April 4, 1994, the Bank was listed on the Korea Exchange (previously, Korea Stock Exchange). On February 28, 2004, the Bank merged its subsidiary, Korea Exchange Bank Credit Service Co., Ltd. On August 31, 2014, the Bank spun off its credit card division.

On February 9, 2012, Hana Financial Group Inc. ("HFG") obtained control over the Bank by acquiring 57.27% equity interest in the Bank, and later on April 5, 2013 , the Bank became a wholly owned subsidiary of HFG after HFG acquired the remaining interest in the Bank through an all-inclusive exchange of the shares.

The Bank changed to its current name on September 1, 2015, following the merger of Korea Exchange Bank and the former Hana Bank.

The Bank provides commercial banking service under the Banking Act of the Republic of Korea, trust banking service under the Financial Investment Services and Capital Markets Act, merchant banking service through the merger with the Korea International Merchant Bank, foreign exchange business and other related businesses. As of June 30, 2025, the Bank's headquarters is located in Seoul, with 607 domestic branches (including 74 satellite offices) and 25 overseas branches (including one satellite office and five offices).

The Bank is authorized to issue 2,000 million shares (par value amount : ₩5,000) of common stock, and as of June 30, 2025, after a number of capital increases and decreases, stock splits and conversion of preferred shares to common shares, the Bank has 1,071,915,717 shares of common stock issued and outstanding with the total capital stock amounting to ₩5,359,578 million.

## 1-2 Scope and overview of consolidation

The Group's ownership percentages in its consolidated subsidiaries as of June 30, 2025 are summarized as follows (ownership in %):

| Investee                                                         | Country   | Major business           | Share ratio (%) | Reporting date |

### 1-2-1 Hana Bank (China) Co., Ltd. (Hana Bank China)

Hana Bank (China) Co., Ltd. (Hana Bank China) was incorporated in Beijing to engage in commercial banking, foreign currency exchanges and other related operations in China on December 14, 2007. The former Hana Bank contributed the assets and liabilities of the branches in Shanghai and Shenyang, and its interests in the International Bank of Qingdao, which is the subsidiary of the former Hana Bank, to the Hana Bank China in the form of equity contributions on December 24, 2007. The Shanghai and Shenyang branches and International Bank of Qingdao became branches of Hana Bank China. Hana Bank China acquired and merged with KEB China on December 15, 2014. (Equity interests in Hana Bank China before the merger were 59.7% for former Hana Bank and 40.3% for Korea Exchange Bank). Its paid-in capital is 3.35 billion yuan as of June 30, 2025 (share ratio : 100%).

### 1-2-2 KEB Hana Bank Canada

KEB Hana Bank Canada was established in Toronto, Canada, on October 6, 1981, to provide financial services to Korean companies and residents in Toronto and the surrounding area. Its paid-in capital is 83,400 thousand Canadian dollars as of June 30, 2025 (share ratio : 100%).

### 1-2-3 KEB Hana Bank (D) AG (KEBDAG)

KEBDAG was established in Frankfurt, Germany, on December 29, 1992, to provide financial services to Korean companies and residents in Frankfurt and the surrounding area. Paid-in capital was increased by issuance of new shares by KEBDAG in 2023. Its paid-in capital is 73,008 thousand euro as of June 30, 2025 (share ratio : 100%).

#### 1-2-4 PT Bank KEB Hana

PT Bank KEB Hana was established in Jakarta, Indonesia, on November 5, 1990, to provide financial services to Korean companies and residents in Jakarta.

In accordance with the regulations of the Bank Indonesia, two or more local banks with the same ultimate parent company are prohibited to operate as an independent entity in Indonesia. Accordingly, PT Bank KEB Indonesia, a subsidiary of the Bank, and PT Bank Hana, a subsidiary of former Hana Bank, have completed a merger process on February 20, 2014, and changed the name to PT Bank KEB Hana. PT Bank KEB Hana was incorporated into a subsidiary of KEB on February 28, 2014, since KEB owned the majority shares of PT Bank KEB Hana after the acquisition. Paid-in capital was increased by issuance of new shares by PT Bank KEB Hana in 2019. Its paid-in capital is 3,160,093 million rupiah as of June 30, 2025 (share ratio : 69.01%).

Its paid-in capital is 126,351 thousand reals as of June 30, 2025 (share ratio : 100%).

#### 1-2-6 KEB Hana NY Financial Corp. (NYFinCo)

NYFinCo was established in New York, USA, on April 8, 2004, to provide financial services to Korean companies and residents in New York and the surrounding area. Its paid-in capital is 1 dollar as of June 30, 2025 (share ratio : 100%).

#### 1-2-7 KEB Hana LA Financial Corp. (LAFinCo)

LAFinCo was established in Los Angeles, USA, on April 8, 2004, to provide financial services to Korean companies and residents in Los Angeles and the surrounding area. Its paid-in capital is 2 dollars as of June 30, 2025 (share ratio: 100%).

#### 1-2-8 KEB Hana Global Finance Limited (KHGF)

KHGF was established on July 2, 2009, in Hong Kong to provide investment finance services for foreign clients, advisory services for domestic companies that seek to invest overseas, finance arrangement and security investment trust services. Its paid-in capital is 50,000 thousand dollars as of June 30, 2025 (share ratio : 100%).

#### 1-2-9 KEB HNB RUS LLC

KEB launched a Moscow representative office in 2008 to provide financial information and consulting services for Korean and local companies in Russia. KEB HNB RUS LLC was established on August 15, 2014, after obtaining permission to operate corporation from Russian supervisory authorities in order to expand the business area. Its paid-in capital is 4.78 billion RUB as of June 30, 2025 (share ratio : 99.99%).

#### 1-2-10 Hana Bancorp, Inc.

Hana Bancorp, Inc. (previously, BNB Financial Services Corporation) was incorporated on April 8, 1988, to engage in the banking and related businesses. HFG acquired ownership of BNB Financial Services Corporation and incorporated Hana Bancorp, Inc. as its subsidiary on August 30, 2013, and changed the name to Hana Bancorp, Inc. The Bank purchased the securities from HFG on March 28, 2016. Its paid-in capital is 48,596 thousand dollars as of June 30, 2025 (share ratio : 96.77%).

#### 1-2-11 BANCO KEB HANA MEXICO S.A.

BANCO KEB HANA MEXICO S.A. was established in Mexico City on November 3, 2017, to engage in provision of financial services to Korean companies and local corporations and obtained approval for the commencement of business from the local supervisory agency on January 31, 2019. Its paid-in capital is 1,666,828 thousand Mexican pesos as of June 30, 2025 (share ratio : 99.99%).

#### 1-2-12 GLN International Co., Ltd.

GLN International Co., Ltd. was established in Korea on July 7, 2021, and primarily engages in the electronic finance business (global payment brokerage, etc.). Paid-in capital was increased by issuance of new shares by GLN International Co., Ltd. in 2023. Its paid-in capital is ₩60.8 billion as of June 30, 2025 (share ratio : 82.24%).

#### 1-3 Structured entities

##### 1-3-1 Consolidated structured entities

###### 1-3-1-1 Hana UBS Power PEF Invest Trust 21 and a set of three other private equity investment vehicles

In accordance with KIFRS 1110, Hana UBS Power PEF Invest Trust 21 and three other private equity investment vehicles were included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

###### 1-3-1-2 Sevenstar Co., Ltd. and 66 other special-purpose entities

In accordance with KIFRS 1110, Sevenstar Co., Ltd. and 66 SPCs and were included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

### 1-3-1-3 Trust accounts

In accordance with KIFRS 1110, trust accounts are included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

### 1-3-1-4 Hana Tech Value-Up Investment Fund and three other funds

In accordance with KIFRS 1110, Hana Tech Value-Up Investment Fund and three other funds are included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

### 1-3-1-5 Contractual commitments to consolidated structured entities

The consolidated structured company for the securitization of assets is established for the securitization of loans. The Group is involved in the acquisition of subordinated bonds issued by the consolidated structured company or provision of credit for the asset-backed commercial paper ("ABCP") and others, and is exposed to the risk of not being able to recover the acquisition amounts based on the investment performance. Characteristics and intentions of contractual commitments offered by the Group to the consolidated structured entities are as follows:

| Company name                       | The characteristics and purposes                                                                                                                                                                                                                                                           | Intention                                                       |
|------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|
| Development trust and other trusts | The Group offers principal guarantee commitment and principal and interest guarantee commitment to trust accounts. The Group is required to compensate the deficit amount in case the trust account stands below the principal or the principal and interest as a result of the operation. | Credit risk mitigation on financial management of trust account |
| HANA DL First Co., Ltd.            | The Group partially purchased ABCP (purchase commitment of ₩50,000 million) from H-HANA DL First Co., Ltd.                                                                                                                                                                                 | Operating activities                                            |
| DONG DAEGU TERMINAL 2nd, LLC       | The Group partially purchased ABCP (purchase commitment of ₩20,000 million) from DONG DAEGU TERMINAL 2nd, LLC                                                                                                                                                                              | Operating activities                                            |
| NAE CHON HANA 1st, LLC             | The Group partially purchased ABCP (purchase commitment of ₩49,600 million) from NAE CHON HANA 1st, LLC.                                                                                                                                                                                   | Operating activities                                            |
| DRAGON HANA 1st, LLC               | The Group partially purchased ABCP (purchase commitment of ₩30,000 million) from DRAGON HANA 1st, LLC.                                                                                                                                                                                     | Operating activities                                            |
| HANA BAEKSA LOGISTICS 1st, LLC     | The Group partially purchased ABCP (purchase commitment of ₩34,600 million)                                                                                                                                                                                                                | Operating activities                                            |

| Company name                                           | The characteristics and purposes                                                                                                         | Intention            |

## 2. Basis of preparation and changes to the Group's accounting policies:

### 2-1 Basis of preparation

The Group prepares statutory consolidated financial statements in accordance with International Financial Reporting Standards as adopted by the republic of Korea ("KIFRS") 1034 *Interim Financial Reporting* enacted by the *Act on External Audit of Stock Companies*.

The accompanying interim consolidated financial statements have been translated into English from the interim consolidated financial statements prepared in Korean. In the event of any differences in interpreting the interim consolidated financial statements or the independent auditor's review report thereon, the Korean version, which is used for regulatory reporting purposes, shall prevail.

The interim consolidated financial statements do not contain all the information and notes required to be entered in the annual financial statements and, therefore, should also be referred to information in the annual financial statements as of and for the year ended December 31, 2024.

### 2-2 Changes in material accounting policies

The material accounting policies used for preparation of the interim consolidated financial statements are the same as those adopted in preparing annual financial statements as of and for the year ended December 31, 2024, except for the adoption of new standards and interpretations effective as of January 1, 2025.

Changes in accounting policies in accordance with the adoption of new standards and interpretations for the current reporting period are as follows:

2-2-1 Amendments to KIFRS 1021 *The Effects of Changes in Foreign Exchange Rate* and KIFRS 1101 *First-time Adoption of International Financial Reporting Standards – Lack of Exchangeability*

The amendments define when a currency is considered to be exchangeable into another currency and specify how to assess whether a currency is exchangeable and how to determine a spot exchange rate if a currency lacks exchangeability. The amendments clarify the disclosure requirement of information when a currency lacks exchangeability.

When a currency is not exchangeable into another currency at the measurement date, the spot exchange rate is estimated at the measurement date as an observable exchange rate without adjustment or another estimation technique can be used.

The amendments apply to annual reporting periods beginning on or after January 1, 2025. Earlier application is permitted.

There is no material impact of the amendments on the Group's interim consolidated financial statements.

The new and amended standards and interpretations that are issued, but not yet effective up to the date of issuance of the Group's interim consolidated financial statements are disclosed below.

#### *2-2-2 Amendments to KIFRS 1109 *Financial Instruments* and 1107 *Financial Instruments: Disclosures* – Classification and Measurement of Financial Instruments*

These amendments clarify the conditions related to the pre-settlement of financial liabilities when settled using an electronic payment system, the characteristics of interest and contingent events that should be considered when evaluating whether contractual cash flows are consistent with a basic lending arrangement, the characteristics of financial assets with non-recourse features, and the characteristics of contractually linked financial instruments. Additionally, they include additional disclosure requirements for investments in equity

instruments designated as fair value through other comprehensive income (FVOCI) and for contractual terms that may change the timing or amount of contractual cash flows.

The amendments apply retrospectively to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

#### *2-2-3 KIFRS 1109 Financial Instruments – Derecognition of Lease Liabilities and Definition of Transaction Price*

These amendments clarify that any gain or loss arising from the derecognition of a lease liability should be recognized in profit or loss. Additionally, the definition of transaction price has been revised to align with KIFRS 1115.

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

#### *2-2-4 KIFRS 1110 Consolidated Financial Statements – Determination of a De Facto Agent*

These amendments relate to the determination of a de facto agent under KIFRS 1110. The amendment revises certain wording related to the assessment of a de facto agent in order to eliminate inconsistencies between paragraphs within the standard.

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

#### *2-2-5 KIFRS 1101 First-time Adoption of KIFRS – Application of Hedge Accounting*

These amendments specify that the conditions for applying hedge accounting

should refer to specific paragraphs of KIFRS 1109 *Financial Instruments* and align the related terminology accordingly.

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

#### 2-2-6 KIFRS 1107 *Financial Instruments: Disclosures – Derecognition Gains and Losses*

These amendments specify that fair value measurement should refer to KIFRS 1113 *Fair Value* and align the related terminology accordingly.

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

#### 2-2-7 KIFRS 1007 – *Cost Method*

This amendment removes the term "cost method" and replaces it with "cost."

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

There is no material impact of these amendments on the Group's interim consolidated financial statements.

### 2-3 Scope and principles of consolidation

Significant methods of accounting for consolidation when preparing interim consolidated financial statements are as follows:

#### 2-3-1 Subsidiaries

The Bank has the ability to determine the financial and operating policies of subsidiaries. Generally, the Bank classified the entity as subsidiary in case the Bank has existing rights that give it the current ability to direct the relevant

activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the investee's returns from its involvement with the investee. Subsidiaries are fully consolidated from the date on which the control is transferred to the Bank and excluded from the subsidiaries at the point when the Bank loses the control.

2-3-2 Offset of the investment accounts and the corresponding equity accounts  
The investment accounts of the Bank and the corresponding equity accounts of the subsidiaries are eliminated in consolidation.

2-3-3 Accounting for difference between the costs of investment  
The Group applies acquisition method in offsetting the Bank's investment accounts and subsidiary's equity accounts. When applying the acquisition method, if the transfer consideration, the amount of non-controlling interest in the acquiree and the total fair value of the Bank's previous holdings exceed the fair value of the subsidiary's asset liabilities, the difference is recognized as goodwill and is considered for impairment at the end of each reporting period.

Changes in the Bank's ownership interest in a subsidiary that does not lead to a loss of control after the date of acquisition of control are treated as capital transactions.

2-3-4 Elimination of intercompany transactions and the unrealized gain or loss, etc.

All significant intercompany transactions and the account balances among the consolidated companies are eliminated on consolidation. Unrealized gains or losses included in loans and borrowings arising from transactions between consolidated companies are eliminated on consolidation. The related accounts receivable and payable are also eliminated on consolidation.

2-3-5 Investments in associates and a joint venture  
Investments in entities over which the Group has control or significant influence

are accounted for using the equity method. Under the equity method of accounting, the Group's initial investment in an investee is recorded at acquisition cost. Subsequently, a share of changes in equity (the Group's share of amount of the changes in associates' net assets) is adjusted to the carrying value. The share of changes in equity is accounted for differently per sources. If the change in net asset has occurred due to net income or loss, it is accounted for as gain or loss on equity method. If it has occurred due to unappropriated retained earnings carried over from prior years, it is accounted for as changes in retained earnings under equity method. The change in net assets due to changes in equity, except those mentioned above, is accounted for as equity adjustments in equity method or negative equity changes in equity method.

If the carrying amount of investments in associates is equal to or under '0', the Group suspends equity method and carries the investments value at '0'. If the Group has investment assets, such as preferred shares and long-term bonds of associates, it continues recognizing its share of further losses to the extent of the carrying amount of such asset's value '0'. The Group resumes the application of the equity method if the Group's share of income or change in equity of an investee exceeds the Group's share of losses accumulated during the period of suspension of the equity method of accounting.

At the date of acquisition, the excess of the cost of the investment over the Group's share of the net fair value of the investee's identifiable assets and liabilities is accounted for as goodwill or negative goodwill. The goodwill is not amortized, and if there is any indication that investment shares in associates and joint ventures, including those, have been impaired, it is being considered against the recoverable value (greater of net fair value and value in use). In addition, the difference between the fair value and the carrying amount of the identifiable assets and liabilities of the investee at the time of stock acquisition is amortized or reversed according to the equity method of the investee.

The Group's share in the investee's unrealized profits and losses resulting from

transactions between the Group and its investee is eliminated to the extent of the interest in the investee.

#### 2-3-6 Special reserve on trust accounts

A special reserve provided under the arrangement of guaranteed fixed rate of return and guaranteed repayment of the principal is included under the retained earnings in the consolidated financial statements.

#### 2-3-7 Non-controlling interests

Subsidiaries' equity that is not included in the Group's share is accounted for as non-controlling interests. In case subsidiaries' non-controlling interests are below '0', negative non-controlling interests are presented as deduction of equity .

### 2-4 Foreign currency transaction

#### 2-4-1 Functional currency

When preparing the consolidated financial statements, the Group measures and recognizes all items and transactions according to the functional currency. The term functional currency is defined as the monetary unit of account of the principal economic environment in which the entity operates, and the amount of transactions made between an entity's functional currency and other currencies are converted to the Group's functional currency.

#### 2-4-2 Transactions and balances at the end of the reporting period

Transactions in foreign currencies are initially recognized as functional currency applying spot or average exchange rates. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rate of exchange at the reporting date and differences arising on settlement or translation of monetary items are recognized in profit or loss. Non-monetary assets and liabilities at fair value in a foreign currency are translated at the exchange rates at the end of the reporting date. When a gain or loss on a

non-monetary item is recognized in profit or loss, any exchange differences of that gain or loss are recognized in profit or loss and when a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange differences of that gain or loss are recognized in other comprehensive income. Non-monetary items not measured at fair value in a foreign currency are translated using the exchange rates as of the dates of the initial transactions and thus, there are no exchange differences.

However, a monetary item which will be received from or paid to foreign branches and operations but for which settlement is neither planned nor likely to occur in the foreseeable future is considered as part of the net investment in the foreign entity. Exchange differences arising on the monetary item that forms part of net investment in the foreign operation are recognized initially in other comprehensive income and reclassified from other comprehensive income to profit or loss on disposal of the net investment.

### 2-4-3 Translation of the presentation currency

As of the reporting date, the assets and liabilities of overseas branches are translated into the Group's presentation currency, Korean won ("KRW"). The Group's assets and liabilities are translated at the rate of exchange prevailing at the reporting date and the Group's profit or loss and other comprehensive income and changes in equity are translated using the exchange rates at the transaction date or the average exchange rates for the period. The exchange differences arising on translation are recognized in other comprehensive income.

### 2-5 Cash and cash equivalents

Cash and cash equivalents in the consolidated statements of financial position are composed of cash at bank and on hand, etc. The purpose of holding cash and cash equivalents is not to make short-term investments, but to meet short-term cash demands. Cash and cash equivalents are highly liquid, easily convertible and subject to an insignificant risk of changes in value.

Deposits restricted from use by the Group under contracts with third parties are included as part of cash, unless such restrictions prevent deposits from meeting the definition of cash any longer. Contractual restrictions affecting the use of cash and deposits are described in Note 10-2.

### 2-6 Financial asset classification and subsequent measurement

At initial recognition, financial assets are classified as measured at FVTPL, FVOCI and amortized cost, and financial liabilities are classified as measured at FVTPL and amortized cost and in accordance with the business model and characteristics of the contractual cash flows.

Regular-way purchase or sale of financial assets is recognized at the trade date that an entity commits itself to purchase or sell an asset. Regular-way purchase or sale of financial assets means purchase or sale of financial assets under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

Financial assets and liabilities are initially measured at fair value and the transaction costs directly attributable to the acquisition of (issuance) financial assets (liabilities) are added to (deducted from) the fair value at initial recognition if they are not measured at FVTPL. The fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial instruments is generally measured at the transaction price (the fair value of the consideration received or transferred) at initial recognition.

#### 2-6-1 Financial assets at FVTPL

Financial assets held for trading or designated as at FVTPL and financial assets that are not classified as at FVOCI or amortized cost are classified as FVTPL.

Also, the Group may designate a financial asset as measured at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on a different base.

Financial assets at FVTPL are measured at fair value and the gain or loss on valuation is recognized as profit or loss. Dividends and interest income from the financial assets are also recognized as profit or loss.

#### 2-6-2 Financial assets at FVOCI

The Group classifies debt securities, which are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and meet the assessment of contractual cash flow characteristics and equity securities designated as measured at FVOCI, which are held not with intention to sell, but for strategic purpose, as financial assets at FVOCI. Financial assets at FVOCI are measured at fair value after initial recognition. Gain or loss arising from changes in the fair value is recognized as other comprehensive income, except for interest income under the effective interest rate ("EIR")

method, dividends and foreign exchange differences on monetary assets that are directly recognized in profit or loss.

When financial assets at FVOCI are disposed of, the cumulative income recognized in other comprehensive income is transferred to the current profit or loss. However, the cumulative income recognized for equity securities designated as financial assets at FVOCI is not transferred to the current profit or loss.

The fair value of financial assets at FVOCI presented in foreign currencies is translated using the exchange rate at the end of the reporting period. Changes in the fair value from exchange differences due to changes in amortized cost are recognized in the current profit or loss, while other changes are recognized directly in equity.

#### 2-6-3 Financial assets at amortized cost

Financial assets within a business model whose objective is achieved by collecting contractual cash flows and meet the contractual cash flow characteristics are classified as financial assets at amortized cost. After initial recognition, the financial assets are measured at amortized cost using the effective interest rate method and presented by deducting the allowance for loan losses from the amortized cost. Interest income is recognized by using the effective interest rate method.

The Group defers loan origination fees ("LOF")/loan origination costs ("LOC") associated with originating loans and LOCs that have future economic benefits. Loan balances are reported net of these LOFs/LOCs. The deferred LOFs/LOCs are amortized based on the effective interest rate method, with the amortization recognized as adjustments to interest income.

## 2-7 Derivative financial instruments and hedge accounting

Derivative instruments are initially recognized at fair value on the date a derivative contract is entered into and are classified as trading derivatives or hedging derivatives depending on whether hedge accounting is applied. After initial recognition, derivative instruments are subsequently remeasured at fair value. Any gains or losses arising from changes in fair value on derivatives are taken directly to the consolidated financial statements, except for the effective portion of cash flow hedges or hedges of net investment in a foreign operation, which is recognized in other comprehensive income.

The Group applies fair value hedge accounting to hedge the changes in fair value, as a whole or some parts, of recognized assets or liabilities from particular risks or an unrecognized firm commitment. Cash flow hedge accounting is used for hedges of changes in cash flows of recognized assets or liabilities from particular risks or a highly probable forecast transaction.

The Group documents the hedge relationship, risk management objective, strategy, the nature of the risk being hedged and method to assess the effectiveness of hedge to apply hedge accounting. The effectiveness of hedge means the effect of offsetting the exposure to changes in fair value or cash flow of hedged items by changes in fair value or cash flow of derivatives attributed by the hedged risk. The Group assesses and documents whether such hedges are expected to be highly effective and if they actually have been highly effective at the end of the reporting period.

An ineffective part of the hedge may be due to differences between underlying variables, such as acquisition date, credit risk or liquidity and the hedging instruments that the entity accepts to achieve an effective cost-to-cost hedging relationship.

### 2-7-1 Fair value hedges

When fair value hedge accounting is applied, the unrealized gain or loss on hedged

items that are attributable to a hedged risk and hedging instruments is symmetrically recognized in the consolidated financial statements as current income for the same reporting period to ensure that changes in the fair value of the hedged items are offset by changes in the fair value of the hedging instruments. When the hedged item is an equity instrument designated at FVOCI, the hedging gain or loss remains in other comprehensive income. If an application of hedge accounting is no longer valid, the Group discontinues the hedge accounting prospectively. Any adjustment to the carrying amount of hedged items is amortized to profit or loss in the consolidated statements of profit or loss and other comprehensive income over the remaining maturity using the effective interest method.

#### 2-7-2 Cash flow hedges

When cash flow hedge accounting is applied, the effective portion of the unrealized gain or loss on the hedging instrument is directly recognized in other comprehensive income (loss) in the consolidated statements of financial position to ensure that changes in the cash flows of the hedged items are offset by changes in the cash flows of the hedging instruments while any ineffective portion is recognized immediately in the consolidated statements of comprehensive income. Amounts recognized as other comprehensive income are transferred to the consolidated statements of comprehensive income when the hedged transaction affects profit or loss.

If an application of hedge accounting no longer meets the criteria, the Group discontinues the hedge accounting prospectively and the cumulative gain or loss on the hedging instrument previously recognized in other comprehensive income is transferred to profit or loss in the consolidated statements of other comprehensive income.

### 2-7-3 Hedge accounting of net investment in a foreign operation

When applying hedge accounting of net investment in a foreign operation, the effective portion of changes in fair value of the hedging instrument is recognized in other comprehensive income and the ineffective portion of the hedge is recognized as current profit or loss in order to offset changes in the fair value of the hedged item caused by the hedging with changes in the fair value of the hedging instrument. The effective portion of hedge recognized in other comprehensive income will be reclassified from other comprehensive income to current profit or loss in accordance with KIFRS 1021 *The Effects of Changes in Foreign Exchange Rates*, at the time of disposal of a foreign operation or disposal of a portion of its foreign operations in the future.

### 2-7-4 Embedded derivatives

An embedded derivative is a component of a hybrid contract that also includes a non-derivative host with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. Derivatives embedded in other financial instruments or other host contracts are accounted for as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

### 2-7-5 'Day 1' profit or loss

In case of derivatives in Level 3 in the fair value hierarchy, fair value is determined using data that is not observable from markets. The difference between the transaction price and fair value at initial recognition (a 'Day 1' profit or loss) is deferred and amortized up to its maturity using the straight-line method.

### 2-7-6 Credit risk valuation adjustment

When assessing derivatives at fair value, expected loss from credit risk is measured and deducted from derivative assets to reflect credit risk of counterparties.

## 2-8 Expected credit loss ("ECL") for financial assets

Loss allowance is recognized for financial assets at FVOCI and amortized cost using the ECL model.

ECL is the weighted-average amount of possible outcomes within a certain range, reflecting the time value of money; estimates in the past, current and future situations; and information accessible without excessive cost or effort.

The ECL can be measured in following three ways:

- General approach: when financial assets do not fall into below two categories and are off-balance-sheet undrawn commitments
- Simplified approach: when financial assets are trade receivables, contract assets or lease receivables
- Credit-impaired approach: when financial assets are credit impaired at initial recognition.

The general approach is applied differently depending on the significance of the increase of the credit risk. If, at the reporting date, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group shall measure the loss allowance for that financial instrument at an amount equal to 12-month ECL. If the credit risk on that financial instrument has increased significantly since initial recognition, the Group shall measure the loss allowance for a financial instrument at an amount equal to the lifetime ECL at each reporting date.

The loss allowance is measured at an amount equal to lifetime ECL for the simplified approach and the Group shall only recognize the cumulative changes in lifetime ECL since initial recognition as a loss allowance for purchased or originated credit-impaired financial assets at each reporting date for the credit-impaired approach.

The following non-exhaustive list of information may be relevant in assessing changes in credit risk:

- significant changes in internal price indicators of credit risk as a result of a change in credit risk since inception;
- other changes in the rates or terms of an existing financial instrument that would be significantly different;
- an actual or expected significant change in the financial instrument's external credit rating;
- an actual or expected internal credit rating downgrade for the borrower or decrease in behavioral scoring used to assess credit risk internally;
- an actual or expected significant change in the operating results of the borrower; and
- past-due information..

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date.

#### 2-8-1 Reflecting forward-looking information

The Group measures the significance of the increase of the credit risk and the ECL using forward-looking information.

The Group assumes that the risk component is correlated with changes in market conditions and calculates the ECL using the forward-looking information by modelling macroeconomic variables and risk components.

The forward-looking information used to measure the ECL is derived from 'stress-case' or 'worst-case' scenarios.

#### 2-8-2 Measurement of ECL for financial assets at amortized cost

ECL for financial assets at amortized cost is measured as the present value of the difference between the contractual cash flows that are due to the Group under the contract and the cash flows that the Group expects to receive. For this purpose, the Group calculates expected contractual cash flows for individually significant financial assets (allowance for loan losses on an individual assessment). Financial assets insignificant in value individually are measured on a collective basis with financial assets with similar credit risks (allowance for loan losses on a collective assessment).

##### 2-8-2-1 Allowance for loan losses on an individual assessment basis

Allowance for loan losses on an individual assessment basis is based on the best estimates of management with regard to the present value of cash flows expected to be recovered from receivables. In estimating the cash flows, the Group uses all available information, including the financial conditions, such as the operating cash flows of counterparties and the net realizable value of collateral provided.

##### 2-8-2-2 Allowance for loan losses on a collective assessment basis

Allowance for loan losses on a collective assessment basis uses the estimation model that accounts for the forward-looking information based on the past loss rate to measure the ECL. The model considers the probability of default ("PD") and the loss-given default ("LGD") reflecting the type of instruments and borrowers, credit rating, portfolio size and collection period. Also, certain assumptions are applied to model the ECL measurement and to determine input variables based on past experiences and forward-looking information. Methodologies and assumptions for this model are regularly reviewed to minimize the difference between the allowance for loan losses and the actual loss.

The ECL for financial assets at amortized cost is recognized as the allowance for loan losses, and when the financial asset is determined to be irrecoverable, the carrying amount and the allowance for loan losses are decreased. If financial assets previously written off are recovered, the allowance for loan losses is increased, and the difference is recognized in the current profit or loss.

#### 2-8-3 ECL measurement for financial assets at FVOCI

The measurement method is the same as the one for financial assets at amortized cost, but the change in the allowance is recognized as other comprehensive income. The allowance for financial assets at FVOCI is reclassified from other comprehensive income to current profit or loss when the assets are disposed of or repaid.

#### 2-9 Derecognition of financial assets

A financial asset is derecognized when the contractual rights to the cash flows from the financial asset expire or the Group transfers substantially all the risks and rewards of ownership of the financial asset. If the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset, but has retained control, the Group recognizes the asset and the associated liability to the extent of the Group's continuing involvement in the financial asset. If most of the risks and rewards of owning a financial asset are controlled without holding or transferring it, the Group recognizes them in its consolidated statements of financial position as the Group continues to be involved in the financial asset and related liabilities to be paid.

## 2-10 Classification and measurement of financial liabilities

All financial liabilities that are classified as financial liabilities at FVTPL, borrowings or others are measured initially at their fair value, minus transaction costs, except in the case of financial liabilities recorded at FVTPL.

### 2-10-1 Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL. Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term. All derivatives, including an embedded derivative separated from the host contract, are reclassified as financial liabilities at FVTPL, except for financial liabilities designated as effective hedging instruments or financial guarantee contracts. After initial recognition, the changes in the fair value of the financial liabilities at FVTPL and the related interest expenses are recognized in profit or loss.

The Group performs securities lending and borrowing classified as held-for-trading financial liabilities. When the Group borrows securities from Korea Securities Depository, securities borrowed are managed as memorandum value and when selling them, they are recorded as securities sold. At closing, the difference between the price at which the securities are sold and the market price prevailing on the closing date is taken into account as valuation gain or loss on securities sold, and at the time of selling the securities, the difference in book value and the price at which the securities are purchased is recorded as trading gain or loss on securities sold.

### 2-10-2 Deposits, borrowings and debentures

Interest-bearing deposits, borrowings and debentures are subsequently measured at amortized cost using the effective interest method. The difference between the consideration received after deducting transaction costs and the amount repayable on maturity is amortized by the effective interest method and recognized in profit or loss for the relevant period.

## 2-11 Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, canceled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statements of profit or loss and other comprehensive income.

## 2-12 Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis or to realize the asset and settle the liability simultaneously.

## 2-13 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the obligation is expected but outflow of resources is unlikely or the amount of the loss cannot be estimated reliably, the amount is not recognized but disclosed. If the effect of the time value of money is material, provisions are stated at present value.

The Group accounts for the payment guarantee provision in the same way as accounting for allowance for loan losses on a collective assessment basis by applying the Cash Conversion Factor to the confirmed/unconfirmed payment guarantees and bills endorsed. The Group provides an allowance for loan losses on a certain portion of the unused credit line. The Group records the provision

for such unused balances as an allowance for loan losses on unused commitments , which are calculated by applying a credit conversion factor and provision rates.

## 2-14 Financial guarantee contract

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs when a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument and is measured at fair value on the date of initial recognition. After initial recognition, the Group, as an issuer of such a contract, measures it at the higher of (i) the amount determined in accordance with KIFRS 1109 *Financial instruments*, or (ii) the amount initially recognized less, when appropriate, cumulative amortization recognized in accordance with KIFRS 1115 *Revenue from Contract with Customer*.

## 2-15 Bonds purchased under resale agreements and bonds sold under repurchase agreements

Bonds purchased under resale agreements and bonds sold under repurchase agreements are included in loans and borrowings, respectively, in the accompanying consolidated statements of financial position. Interest income and expenses from purchases or sales are recognized as interest income on loans and interest expenses on borrowings, respectively.

## 2-16 Property, plant and equipment

Property, plant and equipment are measured at cost, and the carrying amount after initial recognition is presented as the amount of the acquisition cost minus the accumulated depreciation and the accumulated impairment loss. The cost of property, plant and equipment includes expenditure directly related to the purchase or construction of the asset, including the cost directly related to bringing the asset to the location and condition required to operate the asset in the manner intended by management and the cost initially estimated to be required to dismantle, remove or restore the site.

The subsequent costs are recognized as an asset when it is probable that future economic benefits associated with the asset will flow to the Group and the costs of the asset can be measured reliably. The other maintenances and repairs are expensed in the year in which they are incurred, and the carrying amount of certain parts that are replaced is derecognized.

Land is not depreciated. For depreciation of other assets, amount of acquisition cost, less residual value, is calculated on a straight-line basis and declining-balance basis over the following estimated useful life of the asset:

| Classification                                | Depreciation method      | Years   |
|-----------------------------------------------|--------------------------|---------|
| Buildings, building components and structures | Straight-line method     | 5 to 55 |
| Leasehold improvements                        | Straight-line method     | 3 to 10 |
| Equipment and vehicles                        | Declining-balance method | 3 to 20 |

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is immediately reduced to its recoverable amount.

The residual value and economic useful life are reviewed at the end of each reporting period, with the effect of any changes in estimates being accounted for, if necessary. Any gain or loss arising on the derecognition of the asset is recognized in 'Non-operating income' or 'Non-operating expenses' in the interim consolidated statements of profit or loss and other comprehensive income in the year the asset is derecognized.

## 2-17 Investment properties

Investment properties are initially measured at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated using the cost model.

Investment properties are derecognized either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in the consolidated statements of comprehensive income in the period of derecognition, and transfers are made to or from investment property only when there is a change in use. Land is not depreciated among investment properties, and the depreciation method of the buildings is the straight-line method and their useful life is 5 to 55 years. The depreciation method, residual value and useful life of investment property are reviewed at the end of each reporting period, and if it is deemed appropriate to change investment property, it is accounted for as a change in accounting estimates.

## 2-18 Intangible assets

An intangible asset, which comprises industrial property rights, software, development costs and others, is recognized as an asset only if it is probable that future economic benefits associated with the asset will flow to the Group and the costs of the asset can be measured reliably. Intangible assets acquired individually are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as of the date of acquisition in accordance with KIFRS 1103 *Business Combination*.

Amortization of intangible assets with definite useful lives is calculated using the following amortization method over the estimated useful life of the assets:

| Classification                                                    | Depreciation method  | Years   |
|-------------------------------------------------------------------|----------------------|---------|
| Industrial property rights, software and system development costs | Straight-line method | 5       |
| Core deposits                                                     | Straight-line method | 14      |
| Other intangible assets                                           | Straight-line method | 1 to 12 |

Intangible assets with indefinite useful lives are not amortized, but are tested for impairment annually or whenever there is an indication that the intangible asset may be impaired. The assessment of indefinite useful life is reviewed annually to determine whether the indefinite useful life continues to be supportable.

#### 2-19 Impairment of non-financial assets

The Group tests the depreciable asset for impairment whenever there is a change in environment or an event indicating that the carrying amount may not be recoverable. The Group recognizes an excess of the carrying amount over the recoverable amount as an impairment loss. The Group defines recoverable amount as the higher of an asset's or cash-generating unit's ("CGU") fair value, less costs to sell, or its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels (CGUs) for which there are separate and identifiable cash flows. The Group assesses the reversal of an impairment loss recognized for non-financial assets other than goodwill at the end of the reporting period.

#### 2-20 Net defined benefit liabilities (assets)

The Group calculates defined benefit liabilities and pension benefit expenses based on a defined benefit plan and defined contribution plan when an employee retires in accordance with pension-related regulations. For defined benefit plans, the cost of retirement benefits is measured by an actuary services company using the projected unit credit method. The present value of a defined benefit obligation is computed by discounting expected future cash outflows using the market rate of return measured against the yield of high-graded corporate bonds whose date of payment and maturity is similar to that of a defined benefit obligation. Actuarial gains and losses incurred from the change in actuarial assumptions and the difference between the assumptions and the actual results are recognized in other comprehensive income for the period. Past service cost is recognized immediately to the extent that the benefits are already vested; and otherwise, it is amortized on a straight-line basis over the period until the benefits become vested.

The Group has entered into retirement trust fund and retirement pension plan agreements to pay retirement benefits to its employees. The retirement benefit obligation represents the present value of the defined benefit obligation as adjusted for unrecognized past service costs and as reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to unrecognized actuarial losses and past service costs, plus the present value of available refunds and reductions in future contributions to the plan.

Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan. When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting treatment depends on whether the contributions are linked to service as follows:

- If the contributions are not linked to services (e.g., contributions are required to reduce a deficit arising from losses on plan assets or from actuarial losses), they are reflected in the remeasurement of the net defined benefit liability (asset)
- If contributions are linked to services, they reduce service costs. For the amount of contribution that is dependent on the number of years of service, the entity reduces service cost by attributing the contributions to periods of service using the attribution method required by KIFRS 1019, paragraph 70, for the gross benefits. For the amount of contribution that is independent of the number of years of service, the entity reduces service cost in the period in which the related service is rendered.

## 2-21 Share-based payment

In the case of equity-settled share-based payments, the goods or services received and the corresponding increase in equity are measured directly at the fair value of the goods or services and accounted for as compensation costs and equity. If the goods or services provided cannot be reliably measured, the endowed equity is indirectly estimated at fair value and the Group accounts for compensation costs and equity (capital adjustment). The cost of cash-settled transactions is measured initially at fair value at the grant date, taking into account the terms and conditions upon which the instruments were granted. This fair value is expensed over the period until vesting with recognition of a corresponding liability. The liability is remeasured to fair value at each reporting date up to, and including the settlement date, with changes in fair value recognized in the consolidated statements of profit or loss and other comprehensive income. Also, in the case of a selectable share-based payment transaction in which the employees have a choice between a cash-settled transaction and an equity-settled transaction, the Group records the amount depending on its substance.

## 2-22 Employee benefits

### 2-22-1 Short-term employee benefits

When employees have rendered services to the Group during an accounting period, the Group recognizes the undiscounted amount of short-term employee benefits. This amount is expected to be settled in whole before 12 months after the end of the reporting period in exchange for those services.

### 2-22-2 Termination benefits

The Group recognizes an expense for termination benefits when an employee accepts the offer or when a restriction on the Group's ability to withdraw the offer takes effect.

## 2-23 Recognition of income tax expenses and deferred tax assets and liabilities

Income taxes are composed of current and deferred taxes. All items related to taxes, other than those recognized directly in equity, are accounted for in the consolidated statements of comprehensive income. Accordingly, items recognized directly in equity and the related taxes are accounted for as other comprehensive income in the consolidated statements of comprehensive income.

The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date, in the countries where the Group operates and generates taxable income. If the applied tax laws require an interpretation, the Group calculates income tax payable expected to be paid to the taxation authorities based on the opinion made when the taxes were reported.

Deferred tax is provided on the temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

The Group measures deferred tax assets and liabilities at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted, or substantively enacted by the end of the reporting period.

The Group recognizes a deferred tax asset for all deductible temporary differences to the extent it is probable that taxable profit will be available against which the deductible temporary difference can be utilized.

The Group recognizes a deferred tax liability for all taxable temporary differences with investments in subsidiaries and associates, except to the extent that both of the following conditions are satisfied: (a) the Group is able to control the timing of the reversal of the temporary difference and (b) it is probable that the temporary difference will not reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

The Group offsets deferred tax assets and liabilities if, and only if, the Group has a legally enforceable right to set off current tax assets against current tax liabilities and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority either on the same taxable entity or different taxable entities, which intend either to settle current tax liabilities and assets on a net basis or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

## 2-24 Equity

### 2-24-1 Classification of equity

The Group classifies financial instruments at initial recognition as either financial liabilities or financial equity depending on the contractual materiality. In the case where it is possible to avoid the related contractual obligations, the financial item is classified as a financial equity. An equity is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities.

### 2-24-2 Stock issuance costs

New stock issuance costs or incremental costs related to the stock issuance for business combinations are recorded as a deduction from paid-in capital, net of tax effects.

### 2-25 Earnings per share ("EPS")

Basic and diluted EPSs are computed by dividing net income by the weighted-average number of shares of common stock outstanding during the year.

## 2-26 Accounting basis for trust accounts

The Group accounts for trust operations (the "trust accounts") separately from the Group's accounts in accordance with the *Financial Investment Services and Capital Markets Act*. In this regard, the funds lent by the Group to the trust account are accounted for as due to trust accounts of the Group's accounts, and the funds borrowed by the Group from the trust account are accounted as due from trust accounts of the Group's accounts. Trust compensation paid to the trustee (the Group) in connection with the operation, management and disposal of trust property is accounted as trust operation profits. The Group recognizes trust commissions earned from trust accounts as income from trust operations in connection with the operation, management and disposal of trust property. In addition, in the case of a joint operation money trust with a "guarantee contract of the principal or profits" of the trust account, if the operating profit falls short of the "principals to be preserved or profits to be guaranteed" and this shortage is more than covered by the trust compensation and special reserves, the Group accounts the amount paid to the trust account as the trust account's operating losses.

## 2-27 Lease accounting

Under KIFRS 1116 *Leases*, the Group applies a single recognition and measurement method for all leases, except for leases of low-value assets. This standard provides guidance on specific requirements and simplified methods applied by an entity.

The Group recognized the right-of-use assets and the lease liabilities that were previously classified as operating leases, except for leases of low-value assets. Right-of-use assets for most leases were recognized as carrying amounts measured as if they had been applying the standards from the inception of the lease, except that they were discounted at the lessee's incremental borrowing rate as of the date of initial application. In some leases, the right-of-use asset was recognized based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognized. The lease liability was measured at the present value of the remaining lease payments, discounted at the incremental borrowing rate as of the date of the initial application.

The practical expedients that the Group applied are as follows:

- application of a single discount rate to a portfolio of leases with significantly similar characteristics;
- replacement of impairment review by determining whether leases are onerous before the initial application date;
- exclusion of initial direct costs from the measurement of the right-of-use asset at the initial application date; and
- using hindsight for lessee..

Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

## 2-28 Merchant banking account

As permitted by the Restructuring of Financial Institutions Act, the Group may continue its merchant banking operations, including leasing business, until the existing contracts acquired from the Korea International Merchant Bank upon merger are terminated.

Material accounting policies applied to the Group's merchant banking operations are summarized as follows:

### 2-28-1 Revenue recognition on discounted notes

Interest income on discounted notes is accrued over the term of the notes. Income from the sale of discounted notes is recognized at the date of transaction based on the difference between the purchase prices and sales prices of the notes, adjusted for interest earned during the holding period.

### 2-28-2 Cash Management Accounts ("CMA")

The Group recognizes interest income from CMA investments and interest expenses from CMA deposits as operating income and operating expenses, respectively.

## 2-29 Interest income and interest expenses

Interest income and interest expenses are recognized over time using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and allocating the interest income or interest expenses over the relevant period. The EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the EIR, the Group estimates cash flows considering all contractual terms of the financial instrument, but does not consider future credit losses. Cash flows at the time of

the calculation include all the fees and points paid to, or received from parties to the contract that are an integral part of the EIR, including transaction costs, and all other premiums or discounts.

If income recognition on an accrual basis is deemed inappropriate due to low possibility of realizing interest income, the interest income is recognized when interest is actually received.

#### 2-30 Fees and commission income

The Group's revenue recognition standard varies depending on the type of service provided to customers. Fee income, which is an integral part of the EIR of financial instruments, is adjusted using the EIR and recognized as interest income.

Fee income is recognized using the five-stage revenue recognition model (Identification of a contract with a customer → Identification of performance obligations in the contract → Determination of the transaction price → Allocation of the transaction price to the separate performance obligations in the contract → Recognition of revenue upon satisfying the performance obligations) in accordance with KIFRS 1115.

#### 2-31 Dividend income

Dividend income is recognized when the Group's right to receive the payment is established.

#### 2-32 Government grants

Government grants are recognized at fair value when there is a reasonable assurance that the entity will comply with the conditions attached to it and that the grant will be received. Grants related to income are recognized as revenue on a systematic basis over the period necessary to match the related costs that the grant is intended to cover. On the other hand, grants related to an asset are presented by subtracting the carrying amount of the asset and accounting for by deducting depreciation expenses over the useful life of the asset.

### 3. Material judgements and accounting estimates:

In the application of the Group's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily observable from objective sources. The estimation and assumption are based on other factors that are related to historical experience. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future period if the revision affects both current period and future period.

In the process of applying the Group's accounting policies, management has made the following judgments that have a material effect on the amounts recognized in the interim consolidated financial statements:

#### 3-1 Fair value of financial instruments

The fair value of financial instruments is determined by referencing quoted market prices in active markets in the first place. For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques, including (i) between knowledgeable and willing parties in a recent arm's-length transaction, (ii) reference to the current fair value of another instrument that is substantially the same, (iii) discounted cash flow ("DCF") analysis and (iv) option-pricing models.

### 3-2 ECL of financial assets

The Group recognizes impairment losses on debt instruments, lease receivables, loan commitment and financial guarantee contracts that were accounted for at amortized cost, or at FVOCI, based on the ECL impairment model using a three-stage model for 12-month ECL, or lifetime ECL based on changes in credit risk since initial recognition of financial assets.

| Classification |                                                                                                  | Loss allowance                                                                                                                                |
|----------------|--------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| STAGE 1        | Credit risk on a financial instrument has not increased significantly since initial recognition. | 12-month ECL: ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. |
| STAGE 2        | Credit risk on a financial instrument has increased significantly since initial recognition.     | Lifetime ECL: ECLs that result from all possible default events over the expected life of a financial instrument.                             |
| STAGE 3        | Credit impaired.                                                                                 |                                                                                                                                               |

The cumulative changes in lifetime ECL since initial recognition are recognized as loss allowance for a financial asset that is considered credit impaired at initial recognition.

### 3-3 Retirement benefit

The cost of providing benefits under the defined benefit plans is determined using the actuarial valuation. Actuarial assumptions were made for the discount rate and an increase in the future pay rate. Retirement benefits include significant uncertainties in the estimates due to the longer duration of the period.

### 3-4 Impairment of non-financial assets

The Group assesses at the end of each reporting period whether there is an indication that non-financial assets may be impaired. An intangible asset with an indefinite useful life is tested for impairment annually or tested whenever there is an indication that the intangible asset may be impaired. Other non-financial assets are tested for impairment whenever there is an indication that the book value cannot be recovered. For the calculation of value in use, management estimates an expected future cash flow incurred from the asset or CGU. For the calculation of present value of the expected future cash flow, appropriate discount rate is selected.

### 3-5 Income tax

With foreign operations as its subsidiary, the Group is subject to income tax regulations of various jurisdictions. Estimation of income taxes in various jurisdictions requires significant judgement. In addition, various types of transactions and computing methods increase uncertainties associated with the final estimation of income taxes. The Group recognizes contingent liabilities for expected tax audits based on the estimation of the likelihood of additional taxes to be imposed. When the amount initially recognized is different from the final income tax amounts, the differences, if any, are recognized in current income tax and deferred tax assets and liabilities for the period.

### 4. Fair value measurement of financial assets and liabilities:

The standards that the Group applies when measuring fair values of financial assets and liabilities are described below:

- a. Quoted market prices at the settlement date in an active market are the best evidence of fair value and should be used when available.
- b. If a market for a financial instrument is not active, the Group establishes fair value using a valuation technique that makes maximum use of market inputs and includes (i) knowledgeable and willing parties in a recent arm's-length transaction, (ii) reference to the current fair value of another instrument that is substantially the same, (iii) DCF analysis and (iv) option-pricing models. An acceptable valuation technique incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments.
- c. When determining fair value using the valuation techniques, comparison with the current market transaction of another instrument that is substantially the same as the financial instrument needed to be objectively substantiated or inclusion of variables in the marketable data must be performed. Not all significant market variables are observable and in relevant cases, the reasonable estimates or assumptions are required to determine the fair value.

#### 4-1 Fair value hierarchy of financial instruments

Fair value hierarchy of financial instruments as of June 30, 2025 and December 31, 2024 is as follows (KRW in millions):

June 30, 2025:

| Classification                            | Levels of the fair value hierarchy (*1) |            |           | Total      |
|-------------------------------------------|-----------------------------------------|------------|-----------|------------|
|                                           | Level 1                                 | Level 2    | Level 3   |            |
| Financial assets                          |                                         |            |           |            |
| Financial assets at FVTPL                 |                                         |            |           |            |
| Equity securities                         | 110,285                                 | –          | 42,160    | 152,445    |
| Debt securities                           | 10,279,193                              | 7,306,960  | 1,783,854 | 19,370,007 |
| Derivative assets held for trading        | –                                       | 6,927,553  | 40,244    | 6,967,797  |
| Private convertible bonds                 | –                                       | –          | 7,782     | 7,782      |
| Subtotal                                  | 10,389,478                              | 14,234,513 | 1,874,040 | 26,498,031 |
| Financial assets at FVOCI                 |                                         |            |           |            |
| Equity securities                         | 46,051                                  | 22         | 519,093   | 565,166    |
| Debt securities                           | 7,909,129                               | 27,587,175 | –         | 35,496,304 |
| Subtotal                                  | 7,955,180                               | 27,587,197 | 519,093   | 36,061,470 |
| Derivative assets held for hedging        | –                                       | 25,147     | –         | 25,147     |
| Merchant banking account assets           | –                                       | 3,897,984  | –         | 3,897,984  |
| Total                                     | 18,344,658                              | 45,744,841 | 2,393,133 | 66,482,632 |
| Financial liabilities                     |                                         |            |           |            |
| Financial liabilities at FVTPL            |                                         |            |           |            |
| Derivative liabilities held for trading   | 6,527                                   | 6,625,758  | 44,818    | 6,677,103  |
| Securities borrowed                       | 233,908                                 | –          | –         | 233,908    |
| Financial liabilities designated at FVTPL | –                                       | 433,607    | –         | 433,607    |
| Subtotal                                  | 240,435                                 | 7,059,365  | 44,818    | 7,344,618  |
| Derivative liabilities held for hedging   | –                                       | 235,976    | 28,285    | 264,261    |
| Total                                     | 240,435                                 | 7,295,341  | 73,103    | 7,608,879  |

(\*1) The Group recognizes transfers between levels at the beginning of reporting period when events or changes in circumstances causing the transfers between levels have occurred.

December 31, 2024:

| Classification                            | Levels of the fair value hierarchy (*1) |            |           | Total      |
|-------------------------------------------|-----------------------------------------|------------|-----------|------------|
|                                           | Level 1                                 | Level 2    | Level 3   |            |

(\*1) The Group recognizes transfers between levels at the beginning of reporting period when events or changes in circumstances causing the transfers between levels have occurred.

The Group classifies and discloses the fair value of the financial instruments into the following three hierarchies:

- a. Level 1: The fair values are based on quoted prices (unadjusted) in active markets.
- b. Level 2: The fair values are based on techniques using observable market data.
- c. Level 3: The fair values are based on techniques using unobservable inputs.

Details of fair value, valuation techniques and inputs used to develop those measurements classified into Level 2 assets and liabilities that are measured at fair value as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

June 30, 2025:

| Classification                            | Fair value | Valuation techniques                                                        | Inputs                                                                                                         |
|-------------------------------------------|------------|-----------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Financial assets                          |            |                                                                             |                                                                                                                |

#### 4-3 Amount recognized in profit or loss from changes in the fair value hierarchy of financial instruments categorized as Level 3

The fair value changes of assets categorized as Level 3 in the fair value hierarchy that are recognized in profit or loss are presented in the interim consolidated statements of comprehensive income for each of the six-month periods ended June 30, 2025 and 2024 as follows (KRW in millions):

For the six-month period ended June 30, 2025:

| Classification                                          | Total gains or losses recognized in profit or loss | Profit or loss recognized related to financial instruments held at the end of reporting period |
|---------------------------------------------------------|----------------------------------------------------|------------------------------------------------------------------------------------------------|
| Loss on financial instruments at FVTPL                  | (22,964)                                           | (16,733)                                                                                       |
| Gain related to derivative instruments used for hedging | 7,416                                              | 7,416                                                                                          |
| Total                                                   | (15,548)                                           | (9,317)                                                                                        |

For the six-month period ended June 30, 2024:

| Classification                                          | Total gains or losses recognized in profit or loss | Profit or loss recognized related to financial instruments held at the end of reporting period |
|---------------------------------------------------------|----------------------------------------------------|------------------------------------------------------------------------------------------------|
| Gain on financial instruments at FVTPL                  | 69,755                                             | 52,470                                                                                         |
| Loss related to derivative instruments used for hedging | (5,852)                                            | (5,852)                                                                                        |
| Total                                                   | 63,903                                             | 46,618                                                                                         |

#### 4-4 Transfers between fair value hierarchies

There is no transfer to or from Level 3 of the fair value hierarchy for each of the six-month periods ended June 30, 2025 and 2024.

#### 4-5 Sensitivity analysis

Sensitivity analysis of the financial instruments classified as Level 3 from the changes in significant unobservable inputs as of June 30, 2025 and December 31, 2024 is as follows. The impact of fair value fluctuations on profit or loss or other comprehensive income is divided into favorable and unfavorable changes. The financial instruments classified as Level 3 which were excluded from the sensitivity analysis as it is practically impossible amount to ₩1,758,998 million and ₩1,606,475 million as of June 30, 2025 and December 31, 2024, respectively (KRW in millions):

June 30, 2025:

| Classification                               | Favorable changes | Unfavorable changes |
|----------------------------------------------|-------------------|---------------------|
| Financial assets                             |                   |                     |
| Financial assets at FVTPL                    |                   |                     |
| Equity securities (*2)                       | 407               | (178)               |
| Debt securities (*3)                         | 2,192             | (2,088)             |
| Derivative assets held for trading (*1)      | 377               | (808)               |
| Subtotal                                     | 2,976             | (3,074)             |
| Financial assets at FVOCI                    |                   |                     |
| Equity securities (*2)                       | 32,295            | (15,441)            |
| Total                                        | 35,271            | (18,515)            |
| Financial liabilities                        |                   |                     |
| Derivative liabilities held for trading (*1) | 585               | (255)               |
| Derivative liabilities held for hedging (*1) | 268               | (194)               |
| Total                                        | 853               | (449)               |

(\*1) Unfavorable and favorable changes in fair value are calculated by increasing/decreasing 10% of 1) correlation between rates of Interest Rate Swaps ("IRS") of KRW, 2) correlation between rates of IRS of KRW and USD, 3) correlation between stock index and individual stock and 4) correlation between exchange rates of KRW/USD and stock index.

(\*2) Changes in fair value of equity securities are calculated by increasing/decreasing growth rate (0.0% ~ 1.0%) and discount rate, which are main unobservable inputs.

(\*3) Changes in fair value of debt securities are calculated by increasing/

decreasing discount rate (−1.0%~1.0%), which is the main unobservable input. It is impossible in practice to assess sensitivity based on the changes in input variables of beneficiary securities, but favorable or unfavorable changes in fair value, only limited to real estate, are calculated by changing discount rate of lease cash flow (−1.0%~1.0%) and growth rate of selling price of real estate (−1.0%~1.0%).

December 31, 2024:

| Classification                               | Favorable changes | Unfavorable changes |
|----------------------------------------------|-------------------|---------------------|
| Financial assets                             |                   |                     |
| Financial assets at FVTPL                    |                   |                     |
| Equity securities (*2)                       | 257               | (106)               |
| Debt securities (*3)                         | 2,330             | (2,227)             |
| Derivative assets held for trading (*1)      | 510               | (592)               |
| Subtotal                                     | 3,097             | (2,925)             |
| Financial assets at FVOCI                    |                   |                     |
| Equity securities (*2)                       | 38,169            | (17,062)            |
| Total                                        | 41,266            | (19,987)            |
| Financial liabilities                        |                   |                     |
| Derivative liabilities held for trading (*1) | 212               | (209)               |
| Derivative liabilities held for hedging (*1) | 69                | (116)               |
| Total                                        | 281               | (325)               |

(\*1) Unfavorable and favorable changes in fair value are calculated by increasing/decreasing 10% of 1) correlation between rates of Interest Rate Swap ("IRS") of KRW, 2) correlation between rates of IRS of KRW and USD, 3) correlation between stock index and individual stock and 4) correlation between exchange rates of KRW/USD and stock index.

(\*2) Changes in fair value of equity securities are calculated by increasing/decreasing growth rate (0.0%~1.0%) and discount rate, which are main unobservable inputs.

(\*3) Changes in fair value of debt securities are calculated by increasing/decreasing discount rate (−1.0%~1.0%), which is the main unobservable input. It is impossible in practice to assess sensitivity based on the changes in input variables of beneficiary securities, but favorable or unfavorable changes in fair value, only limited to real estate, are calculated by changing discount rate of lease cash flow (−1.0%~1.0%) and growth rate of selling price of real estate (−1.0%~1.0%).

4-6 Financial assets and liabilities that are not measured at fair value

Fair value hierarchy of financial assets and liabilities at amortized cost as of June 30, 2025 and December 31, 2024 is as follows (KRW in millions):

June 30, 2025:

| Classification                            | Levels of the fair value hierarchy |            |             | Total       |
|-------------------------------------------|------------------------------------|------------|-------------|-------------|
|                                           | Level 1                            | Level 2    | Level 3     |             |
| Financial assets                          |                                    |            |             |             |
| Cash and due from banks (*1)              | 2,160,195                          | 28,460,768 | –           | 30,620,963  |
| Securities at amortized cost              | 3,288,389                          | 27,766,060 | –           | 31,054,449  |
| Loans                                     | –                                  | –          | 368,746,194 | 368,746,194 |
| Other financial assets                    | –                                  | –          | 28,448,814  | 28,448,814  |
| Total                                     | 5,448,584                          | 56,226,828 | 397,195,008 | 458,870,420 |

(\*1) Lease liabilities are included in other financial liabilities.

(\*2) The carrying amount is considered fair value without applying the DCF model because it is derived from various transactions and has relatively short or indefinite maturities.

#### 4-7 Gain and loss on deferred Day 1 profit or loss

Changes in gain (loss) on deferred Day 1 profit or loss for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

| Classification                               | For the six months period<br>ended June 30, 2025 | For the six months period<br>ended June 30, 2024 |
|----------------------------------------------|--------------------------------------------------|--------------------------------------------------|
| Beginning balance                            | (1,197)                                          | (1,461)                                          |
| Amount of new accrual                        | (1,376)                                          | 1,147                                            |
| Amounts recognized as current profit or loss | 758                                              | 858                                              |
| Ending balance                               | (1,815)                                          | 544                                              |

#### 4-8 Financial instruments transfer transaction

##### 4-8-1 Bonds sold under repurchase agreements

As of June 30, 2025 and December 31, 2024, details of financial instruments that did not meet the derecognition requirements due to the sale of securities held by the Group on condition of repurchase at a fixed price during the bonds sold under repurchase agreements are as follows (KRW in millions):

| Classification                         | June 30, 2025 |            | December 31, 2024 |            |
|----------------------------------------|---------------|------------|-------------------|------------|
|                                        | Book value    | Fair value | Book value        | Fair value |
| Transferred asset                      |               |            |                   |            |
| Financial assets at FVTPL              | 138,090       | 138,090    | –                 | –          |
| Financial assets at FVOCI              | 3,071,685     | 3,071,685  | 673,659           | 673,659    |
| Financial assets at amortized cost     | 537,452       | 530,090    | 800,420           | 785,646    |
| Total                                  | 3,747,227     | 3,739,865  | 1,474,079         | 1,459,305  |
| Related liabilities                    |               |            |                   |            |
| Bonds sold under repurchase agreements | 3,529,509     | 3,539,154  | 1,425,039         | 1,431,511  |

#### 4-8-2 Loaned securities

When lending securities held by the Group, ownership of the securities is transferred; however, the securities would be returned at the end of the rental period. Therefore, the Group continues to recognize the entire loaned securities as it retains most of the risks and rewards of the securities. Details of loaned securities as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                     | June 30, 2025  |            | December 31, 2024 |            |
|------------------------------------|----------------|------------|-------------------|------------|
|                                    | Book value (*) | Fair value | Book value (*)    | Fair value |
| Financial assets at FVTPL          | 130,103        | 130,103    | 690,390           | 690,390    |
| Financial assets at FVOCI          | 979,022        | 979,022    | 518,255           | 518,255    |
| Financial assets at amortized cost | 959,701        | 947,459    | 69,581            | 66,955     |
| Total                              | 2,068,826      | 2,056,584  | 1,278,226         | 1,275,600  |

(\*) Book value is the amount before deducting the allowance for credit losses.

#### 4-8-3 Asset-backed securitization

The Group's consolidated structured companies issued asset-backed securities by securitizing their securities and loans. The Group retains the contractual right to receive cash flows from the financial assets, but the received cash flows are effectively transferred to the holder of asset-backed securities. In addition, the Group bears related risks through purchase agreements or credit exposures.

As of June 30, 2025 and December 31, 2024, details of financial instruments that were transferred, but not derecognized in relation to asset-backed securitization transactions by the Group, are as follows (KRW in millions):

| Classification         |                                       | Book value(*) |                   |
|------------------------|---------------------------------------|---------------|-------------------|
|                        |                                       | June 30, 2025 | December 31, 2024 |
| Transferred asset sets | Financial assets at FVTPL             | 20,000        | 33,333            |
|                        | Loans at amortized cost               | 2,850,602     | 2,321,725         |
|                        | Total                                 | 2,870,602     | 2,355,058         |
| Related liabilities    | Asset-backed securitization borrowing | 2,875,787     | 2,362,269         |
|                        | Asset-backed securitization debenture | 4,500         | —                 |

| Classification |       | Book value(*) |                   |
|----------------|-------|---------------|-------------------|
|                |       | June 30, 2025 | December 31, 2024 |
|                | Total | 2,880,287     | 2,362,269         |

(\*) Carrying amount is before allowances for doubtful debts.

## 5. Fair value of financial assets and liabilities:

Book values and fair values of financial assets and liabilities as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                          | June 30, 2025 |             | December 31, 2024 |             |
|-----------------------------------------|---------------|-------------|-------------------|-------------|
|                                         | Book value    | Fair value  | Book value        | Fair value  |
| Financial assets                        |               |             |                   |             |

| Borrowings                              | 27,397,565    | 27,419,540  | 24,257,346        | 24,267,980  |
| Debentures                              | 29,978,794    | 30,151,980  | 29,779,016        | 29,835,239  |
| Derivative liabilities held for hedging | 264,261       | 264,261     | 389,173           | 389,173     |
| Other financial liabilities (*)         | 48,817,409    | 48,817,409  | 35,030,122        | 35,030,122  |
| Merchant banking account liabilities    | 3,920,693     | 3,920,693   | 3,819,886         | 3,819,886   |
| Total                                   | 493,940,406   | 493,960,872 | 495,643,369       | 495,620,220 |

(\*) Lease liabilities are included in other financial liabilities.

The following standards are applied in measuring the fair value of financial instruments:

- a. Loans: Expected cash flows, current market interest rates and discount rates, including borrowers' credit risks are factors to calculate the fair value of loans. For lines of credit available for deposit and withdrawal from time to time and loans with a short-term maturity (less than three months), it is assumed that the carrying amounts approximate their fair value.
- b. Securities at amortized cost: The fair value of securities at amortized cost is as stated by the market, broker or by credible sources. If none of the information from these entities is usable, quoted market price of financial instruments with similar credit rating, maturity and return on investment is used to estimate the fair value.
- c. Deposits: For deposits without an explicit maturity period, including deposits with no interests, deposits that have a short-term maturity (less than three months) and deposits with a floating-rate readjustment period of less than three months, it is assumed that the carrying amounts approximate their fair value. The estimated fair value of fixed interest-bearing deposits is based on discounted future cash flows using interest rates for new financial liability with similar time to maturity.
- d. Borrowings: For borrowings that have a short-term maturity (less than three months) and borrowings with floating-rate readjustment period of less than three months, it is assumed that the carrying amounts approximate their fair value. The estimated fair value of fixed interest-bearing borrowings is based on discounted future cash flows using interest rates for new financial liability with similar time to maturity.
- e. Debentures: For debentures issued, the fair values are determined based on quoted market prices in active market. For those issued where quoted market prices in active market are not available, a DCF model is used based on a current interest rate yield curve appropriate for the remaining term to maturity and credit spreads.

## 6. Categories of financial assets and financial liabilities:

6-1 The Group categorizes its financial assets as of June 30, 2025 and December 31, 2024 as follows (KRW in millions):

June 30, 2025:

| Classification                     | Financial assets<br>at FVTPL | Financial assets<br>at FVOCI | Financial assets<br>at amortized cost | Derivatives<br>used for hedging | Total       |
|------------------------------------|------------------------------|------------------------------|---------------------------------------|---------------------------------|-------------|
| Cash and due from banks            | –                            | –                            | 30,620,963                            | –                               | 30,620,963  |

(\*) Lease liabilities are included in other financial liabilities.

## 7. Offsetting financial assets and liabilities:

The Group engages in master netting agreements with counterparties through International Swaps and Derivatives Association or similar agreements in relation to over-the-counter derivatives and spot exchange transactions. Under this agreement, in the event of the counterparty's bankruptcy etc., the transaction with the counterparty will be terminated. Upon termination, the amounts to be paid or received by each party are offset and paid or received. Master netting agreements are also applied to repurchase agreements and securities lendings and borrowings.

In the case of uncollected domestic exchange receivables and unpaid domestic exchange payables between banks, as the Group holds the rights of setoff and settles in net amounts, the net amounts are presented in the interim consolidated statements of financial position. Other financial instruments include receivables and payables related to securities traded in the market, which are presented in net amounts in the consolidated statements of financial position as there is a legally enforceable right of setoff and intention to settle on a net basis.

7-1 Financial assets that are offset, effective master netting agreements and financial assets subject to a similar arrangement as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

June 30, 2025:

| Classification                                      | Gross amounts of recognized financial assets | Gross amounts of financial liabilities offset | Net amounts of financial assets presented in the consolidated financial statements | Related amounts not offset (*) |                 | Net amount |
|-----------------------------------------------------|----------------------------------------------|-----------------------------------------------|------------------------------------------------------------------------------------|--------------------------------|-----------------|------------|

(\*) The rights to offset exist only in case of default, insolvency or bankruptcy.

Accordingly, the amounts are not offset in the consolidated statements of financial position as they do not meet the criteria for offsetting.

## 8. Risk management:

The Group is exposed to credit risk, liquidity risk, market risk and various operating risks. The objectives of risk management are to pursue economic benefits by managing the associated risk in the changing financial environment and to utilize capital efficiently.

The basic principles of risk management are as follows:

- a. maximize shareholder value by appropriately balancing risk and return to minimize sharp fluctuations in profit;
- b. adhere to established procedures to ensure that all business activities are conducted within the defined risk tolerance thresholds;
- c. risk managers monitor the types and magnitude of risks arising from changes in the potential economic value of the portfolio, and establish risk management strategies to ensure the efficient use of resources and optimal allocation of capital; and
- d. foster an environment that actively attracts, develops, and retains talent to achieve its risk management objectives.

The basic policies designed to achieve the basic principles of risk management are as follows:

- a. set and comply with allowable limits for each risk type;
- b. establish an appropriate balance between profit and associated risk;
- c. when a conflict between profit opportunity and risk exists, the Group pursues profit to the extent of risk limits set by the Bank;
- d. prioritize the distribution of risk in order to avoid risk concentration in certain areas;
- e. analyze the effect of various market fluctuations on parts or the entire portfolio on a regular basis; and
- f. segregate risk management teams, business teams and transaction confirmation and settlement teams to ensure independence.

## 8-1 Strategy and procedure of risk management

### 8-1-1 Establishing and managing risk limits

The Group established and operates a limit management system to maintain the appropriate level of risk relative to the equity capital held. The Risk Management Committee approves total risk limits and limits by types of risks, taking into account capital, business plans, risk management regulations and institutional changes within the risk level that the Group can manage. The Risk Management Operation Committee sets up and allocates other operational limits (e.g., by organization, product, investment and loss) to comply with allowable limits for each type of risk, as approved by the Risk Management Committee, and periodically checks the status of limit management.

### 8-1-2 Risk measurement and management

The Group prepares the appropriate risk measurement methods considering the nature of risks and measures them by the types of risks. Risk measurement and evaluation results are regularly reviewed and reported to the Risk Management Committee, Risk Management Operation Committee and management. Risk measurement and evaluation results are also used for daily business management activities, such as establishment of business plan and management strategy.

### 8-1-3 Operation of risk management information system

In order to provide advanced risk management in a rapidly changing financial environment that meets the new Bank for International Settlements ("BIS") standards, the Group has established and adopted a credit risk-weighted assets ("RWAs") calculation system based on Basel 3 regulation since March 2021. The market/operational RWA has been calculated based on Basel 3 standard model since January 2023.

#### 8-1-4 Operation of crisis management system

The Group operates a crisis management system that can respond effectively to the crisis caused by drastic changes in the internal and external management environment. The Group operates an early warning system in order to respond to the drastic changes in the financial market in a consistent and systematic manner. In the event of an anomaly, the holding company declares the level of crisis at the group level and the Group analyzes the impact on the portfolio in accordance with the step-by-step response plan and carries out the specific countermeasures.

#### 8-2 Organization and structure of risk management

The risk management organization consists of the Risk Management Committee, the Risk Management Operation Committee under the Risk Management Committee within the board of directors, the risk management officer and the organization in charge of risk management, which are the top decision-making bodies for the risk management. The organization in charge of risk management, independent from operating segment, manages risk limits and risk management policies.

##### 8-2-1 Risk Management Committee

The Risk Management Committee regularly holds meeting once every quarter and resolves the establishment and management of allowable limits for risks, establishment and changes in risk management policies and reviews the results of the management of allowable risk limits and suitability tests of risk management system.

##### 8-2-2 Risk Management Operation Committee

The Risk Management Operation Committee is responsible for setting and allocating specific operational limits to comply with the allowable limits for each type of risk as resolved by the Risk Management Committee, adjusting the internal capital limit between business units within the same risk type and carrying out risk management policies and strategies set by the Risk

Management Committee, including preliminary deliberations on the agenda items.

### 8-2-3 Organization in charge of risk management

The Risk Management Group is composed of Comprehensive Risk Management team, Credit Risk Management team and Credit Supervision team. The Risk Management Group is independent of business and investment teams and manages the execution of risk management policies. The Comprehensive Risk Management team oversees the market, interest rate, liquidity, operational risk and middle office and supports the Risk Management Committee and the Risk Management Operation Committee. The Credit Risk Management team oversees credit risk and credit concentration risk. The Credit Supervision team oversees the loans and early warning system.

### 8-3 Credit risk

Credit risk incurs when the Group faces a loss because its customers or counterparties fail to discharge their contractual obligations. Credit risk arises from on-balance and off-balance accounts, including loans, derivatives, securities, financial guarantee agreements and other guarantees.

#### 8-3-1 Management of credit risk

##### 8-3-1-1 Loans

##### 8-3-1-1-1 Measurement of credit risk

To determine the possibility of bankruptcy for its customers or counterparties, the Group uses various methods comprehensively. Risks pertaining to the retail sector compared to those pertaining to the corporate sector are relatively easy to predict, but cyclical and seasonal factors may influence the outcomes.

The frequency of impairment loss in the overall retail sector is relatively high, but in terms of individual cases, the loss rate is lower than in the corporate sector. Based on these differences, the Group manages each sector differently in terms of credit rating, pricing and subsequent management.

As for the business customers, the branch managers and Credit Rating team carry out the credit risk assessment by using a detailed valuation model depending on the size and the nature of the industry. The corporate financial valuation model is further subdivided based on the characteristics of the loans and is a combination of statistical and expert valuation models. Also, the Loan Review team of the Credit Risk Management regularly performs the subsequent reviews in order to ensure adequacy of the credit grading. As for the retail sector, a credit scoring system is used to compute the credit scores of the borrower. The system includes an application scoring model, which is used in the application of loans, and a behavioral scoring model, which is used after providing the loans.

Expected loss is calculated using the expected default rate based upon the historical default rate and the estimated loss given default based on collection history. The measured expected loss is reflected on interest rate for the client and allowances when providing or extending a loan. Unexpected loss, which takes into account the allowance for potential volatility in the actual loss compared to the expected loss, is measured using Credit Metrics' internal rating method at 99.9% confidence level. The value measured is used as a credit risk reference value in capital allocation and is reflected as a part of the unexpected loss when deciding interest rates.

### 8-3-1-1-2 Management of credit risk

#### 8-3-1-1-2-1 Management process

Both retail and corporate sectors are developing and operating a credit risk management system appropriately designed for each sector. The Credit Risk Management Committee and the Credit Rating team measure and manage credit risks for the corporate sector; the Credit Risk Management Committee and the Personal Loans Committee measure and manage credit risks for the retail sector. The Group manages as well as controls the credit risk by setting the limits on the amount of risk acceptable for individual counterparties and for geographical and industry concentration, and by monitoring exposures relating to such limits. The Group reviews on a monthly basis in accordance with the economic conditions and industry characteristics and examines the adequacy of the limits on a quarterly basis. The Group continuously examines the adequacy of credit rating models for retail and corporate sectors, Probability of Default ("PD"), Loss Given Default ("LGD") and Exposure at Default ("EAD") and manages data related to the estimation of the credit rating models, PD, LGD and EAD.

#### 8-3-1-1-2-2 Credit limits management and capital allocation

The Group annually performs a comprehensive analysis on economic conditions and changes in the economic environment in order to appropriately assess the credit quality of financial assets by setting credit limits on same entities, industries, countries and financial instruments. In addition, in order to manage unexpected loss through risk management system, the Group regularly sets and allocates internal capital limits for each business segment of the corporate and retail sectors and for each client size category, and checks for their compliance.

#### 8-3-1-1-2-3 Risk monitoring and early warning system

The Group measures and manages the risk indicators, such as delinquency rate, roll rate and vintage. Also, in order to assess the credit quality of the assets, the Group operates an early warning system and regularly examines companies whose credit rating is likely to degrade.

#### 8-3-1-1-2-4 Credit rating system

In order to separately evaluate the characteristics of clients in the corporate sector, the Group operates a detailed rating model based on the external and non-external audit classification and ensures the stability of the corporate credit rating system through the subsequent examinations and performance improvements. For the retail sector, the Group operates detailed credit score model and activity score model tailored for each client's characteristics. The Group improves the efficiency of such models through the subsequent examinations and performance improvements. Household credit system and SOHO credit system are used not only for credit rating of new clients but also for an effective management of existing clients covering automatic extension and adjustments of the credit limits.

#### 8-3-1-1-2-5 Examination of credit

For a large amount of credit line, after the approval of credit extension, the Group regularly examines the borrower's credit status and the adequacy of the borrower's credit rating as part of the subsequent management process. In addition, the Group significantly focuses on industries with increasing credit risks based on the analysis of the risk indicators and examines the sample for smaller credit extensions.

#### 8-3-1-1-2-6 Risk mitigation policy

The Group obtains the collateral for loan receivables in order to reduce risks. Guidelines are implemented regarding the acceptability of types of collateral and valuation parameters. The main types of the collateral obtained are as follows:

- a. residential properties in relation to mortgage loans;
- b. business assets, such as equipment, plants and real estate properties; and
- c. financial instruments, such as deposits, debt and equity securities.

#### 8-3-1-2 Debt securities

The Group trades the debt securities above the investment-grade status level and monitors exposure to each credit grade in order to manage the credit risks and maintain credit quality of the assets.

#### 8-3-1-3 Derivative instruments

The credit risk arising from the derivative instruments is managed based on the net position and maintained under a strict control limit. The degree of credit risk exposure is measured based on the positive fair values of derivative instruments. The Group manages the exposure as a part of the unused commitment of loans.

#### 8-3-2 Significant increase in credit risk

The Group measures the ECL for debt instruments at amortized cost or FVOCI in three stages as described below:

##### 8-3-2-1 Stage 1: 12-month ECL

For financial assets, whose credit risk has not increased significantly since initial recognition, ECLs that result from default events that are possible within 12 months after the reporting date are recognized.

##### 8-3-2-2 Stage 2: Lifetime ECL

For financial assets whose credit risk has increased significantly, but not impaired, since initial recognition, ECLs that result from all possible default events over the expected life of the financial instrument are recognized.

##### 8-3-2-3 Stage 3: Lifetime ECL

A financial asset is credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Lifetime ECL is recognized for credit-impaired financial assets and interest income is recognized using the EIR on amortized cost.

The Group assesses at each reporting date whether the credit risk increases significantly compared to that of initial recognition, using internal and external credit rating information, early warning system and number of days past due.

#### 8-3-2-4 Occurrence of default

The Group considers that a default has occurred for financial assets on the following situations:

- a. when receivables are sold despite an economic loss;
- b. when receivables have decreased due to adjustments resulting in an exemption of principal, interest or related fees or delayed payments; and
- c. when the borrower has been declared bankrupt or has declared bankruptcy or has taken other similar measures to delay or avoid repayments.

#### 8-3-2-5 Method for determining whether a financial asset is credit impaired

A financial asset is deemed impaired if, and only if, there is objective evidence of impairment as a result of one or more events, which have occurred after the initial recognition of the item (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows, such as changes in arrears or economic conditions, which correlate with defaults, delinquency in interest for more than 90 days, credit information management rules and damages incurred due to poor exposure.

### 8-3-3 Measurement of ECL

ECL is measured at the probability-weighted amounts of the present value of all cash shortfalls over the expected life of the financial instrument. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the Group expects to receive.

However, the Group adjusts historical data, such as credit loss experience, on the basis of current observable data to reflect the effects of the current conditions and its forecasts of future conditions that did not affect the period on which the historical data is based and to remove the effects of the conditions in the historical period that are not relevant to the future contractual cash flows. Also, the Group measures ECL using the macroeconomic factors, such as the growth rate, interest rate and stock indices. The methodology for future economic forecasts is regularly reviewed.

If the credit risk on financial instruments, for which lifetime ECLs have been recognized, subsequently improves so that the requirement for recognizing lifetime ECL is no longer met, the loss allowance should be measured at an amount equal to 12-month ECL.

### 8-3-4 Write-off policy

Financial assets are written off when an entity has no reasonable expectations of recovering the contractual cash flows on a financial asset in its entirety or a portion thereof. Generally, financial assets are written off when it is determined that the Group is not able to generate sufficient cash flows to make repayments. However, financial assets written off can be recovered by the Group.

### 8-3-5 The maximum exposure to credit risk

The maximum exposure to credit risk as of June 30, 2025 and December 31, 2024 is as follows. The following table shows the maximum exposure to credit risk before the effect of mitigation through credit enhancement and collateral agreements and reflects the impairment losses and offsetting. Equity securities in financial assets at FVTPL and financial assets at FVOCI are excluded (KRW in millions):

| Classification                      | June 30, 2025 | December 31, 2024 |
|-------------------------------------|---------------|-------------------|
| On-balance sheet items              |               |                   |
| Due from banks                      | 28,460,768    | 32,867,673        |
| Financial assets at FVTPL           |               |                   |
| Debt securities                     | 19,370,007    | 16,040,603        |
| Derivative assets held for trading  | 6,967,797     | 14,733,205        |
| Private convertible bonds           | 7,782         | 8,350             |
| Subtotal                            | 26,345,586    | 30,782,158        |
| Financial assets at FVOCI           | 35,496,304    | 37,399,721        |
| Securities at amortized cost        | 31,127,711    | 33,966,179        |
| Derivative assets held for hedging  | 25,147        | 20,774            |
| Loans                               | 366,582,996   | 367,214,258       |
| Other financial assets              | 28,448,814    | 14,654,073        |
| Merchant banking account assets     | 3,897,984     | 4,233,336         |
| Total                               | 520,385,310   | 521,138,172       |
| Off-balance sheet items             |               |                   |
| Financial guarantee contracts       | 814,243       | 502,593           |
| Payment guarantee                   | 24,152,346    | 24,353,746        |
| Commitments                         | 113,792,223   | 114,936,363       |
| Merchant banking account-commitment | 760,000       | 660,000           |
| Total                               | 139,518,812   | 140,452,702       |

### 8-3-6 Details of effects of credit risk mitigation by collateral and other credit enhancements

The financial effects related to credit risk mitigated by collateral and other credit enhancements as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

June 30, 2025:

| Classification | Impaired loan         |                       |
|----------------|-----------------------|-----------------------|
|                | Individual assessment | Collective assessment |
| Guarantees     | 70,208                | 341,322               |
| Deposits       | 1,017                 | 21,863                |
| Real estates   | 328,456               | 508,993               |
| Securities     | –                     | 4                     |
| Others         | 2,474                 | 23,341                |
| Total          | 402,155               | 895,523               |

December 31, 2024:

| Classification | Impaired loan         |                       |
|----------------|-----------------------|-----------------------|
|                | Individual assessment | Collective assessment |
| Guarantees     | 59,723                | 360,920               |
| Deposits       | –                     | 19,706                |
| Real estates   | 247,784               | 405,828               |
| Securities     | –                     | 21                    |
| Others         | 6,757                 | 16,687                |
| Total          | 314,264               | 803,162               |

8-3-6-1 The amount of financial assets for which loss allowance is not recognized due to sufficient collaterals is ₩1,027,551 million and ₩1,019,090 million as of June 30, 2025 and December 31, 2024, respectively.

8-3-6-2 There is no change in the collateral policy of the Group.

## 8-3-7 Credit risk exposure

### 8-3-7-1 Loans

As of June 30, 2025 and December 31, 2024, gross carrying amounts of loans by internal credit rating in accordance with the loss allowance measurement method are as follows (KRW in millions):

June 30, 2025:

| Classification  | 12-month ECL | Lifetime ECL              |                       | Total       |
|-----------------|--------------|---------------------------|-----------------------|-------------|
|                 |              | Non-credit-impaired loans | Credit-impaired loans |             |
| Household loans |              |                           |                       |             |
| Grade 1         | 110,037,151  | 11,737,879                | –                     | 121,775,030 |
| Grade 2         | 12,077,283   | 6,909,681                 | –                     | 18,986,964  |
| Grade 3         | 123,514      | 461,666                   | 595,515               | 1,180,695   |
| Subtotal        | 122,237,948  | 19,109,226                | 595,515               | 141,942,689 |
| Corporate loans |              |                           |                       |             |
| Grade 1         | 125,109,323  | 4,354,449                 | –                     | 129,463,772 |
| Grade 2         | 75,425,638   | 15,965,857                | –                     | 91,391,495  |
| Grade 3         | 356,291      | 3,776,100                 | 1,152,028             | 5,284,419   |
| Subtotal        | 200,891,252  | 24,096,406                | 1,152,028             | 226,139,686 |
| Total           | 323,129,200  | 43,205,632                | 1,747,543             | 368,082,375 |

December 31, 2024:

| Classification  | 12-month ECL | Lifetime ECL              |                       | Total       |
|-----------------|--------------|---------------------------|-----------------------|-------------|
|                 |              | Non-credit-impaired loans | Credit-impaired loans |             |
| Household loans |              |                           |                       |             |
| Grade 1         | 108,007,233  | 12,181,951                | —                     | 120,189,184 |
| Grade 2         | 11,810,179   | 6,603,980                 | —                     | 18,414,159  |

#### 8-4 Liquidity risk

The Group defines liquidity risk as the possibility of incurring losses due to a temporary shortage in funds caused by a maturity mismatch or an unexpected capital outlay leading to rise in interest or sale of assets at a price below normal price.

##### 8-4-1 Measurement of liquidity risk

The Group establishes limit management indicators, including the liquidity coverage ratio, liquidity ratio in foreign currency, net stable funding ratio, foreign currency maturity mismatch ratio and long-term access to financing ratio in foreign currency, in accordance with the guidelines and standards of the Financial Supervisory Service. In addition, the Group also uses indicators such as concentration of funding to monitor and manage the liquidity risk, and establishes early warning indicators in order to early identify worsening liquidity risk and to respond in a timely manner.

##### 8-4-2 Management of liquidity risk

At an early stage, the Group identifies factors affecting liquidity in order to manage liquidity risks and thereby has maintained an adequate level of liquidity through a systematic management of those factors.

The Group has the following basic principles for liquidity risk management:

- a. set and comply with liquidity risk limits, and coordinate and manage early warning indicators to identify liquidity risk at an early stage;
- b. regularly execute an analysis of stress tests and prepare an emergency financing plan in case of liquidity distress;
- c. focus on maintaining a diversified portfolio in order to avoid excessive concentrations of risks; and
- d. preemptively evaluate and manage the effect of a large amount of loans, investments and financing on liquidity risks.

In order to manage liquidity risk, the Group builds internal control systems for each department. In order to comply with liquidity ratios set by the Financial Supervisory Service, the Comprehensive Risk Management department conducts daily monitoring. Liquidity risk status is reported to the Risk Management Operation Committee on a monthly basis and to the Risk Management Committee on a quarterly basis.

In order to maintain the liquidity risk management indicators to stay within acceptable limits, the Treasury department recommends the necessary measures in relation to the financing and management of the assets and liabilities traded in the capital market. In addition, stages of emergency planning have been established in order to respond to liquidity emergencies.

#### 8-4-3 Analysis of contract maturity

##### 8-4-3-1 Analysis criteria

The details of the remaining contractual maturities of financial liabilities are analyzed by the earliest maturity date when the Group would be required to pay based on the undiscounted cash outflows of the Group's financial liabilities. In addition, financial liabilities at FVTPL and depository liabilities (payment on demand) are presented at fair value in the immediate payment column. All derivatives used for hedging are presented based on the net cash flows, as all products are paid in the net amount. A contract maturity exists in payment guarantees that correspond to financial guarantees, such as bond issuance and loan security provided by the Group, loan commitment and other credit granting. However, payment must be made immediately once the counterparty requests payment. As such, they are included in the immediate payment column.

8-4-3-2 The remaining contractual maturities of financial liabilities and off-balance-sheet items

The remaining contractual maturities of financial liabilities and off-balance-sheet items as of June 30, 2025 and December 31, 2024 are as follows

(KRW in millions):

June 30, 2025:

| Classification                          | On demand   | Less than 1 month | 1 month ~ 3 months | 3 months ~ 1 year | 1 year ~ 5 years | More than 5 years | Total       |
|-----------------------------------------|-------------|-------------------|--------------------|-------------------|------------------|-------------------|-------------|

Assets available for use to execute unused loan commitments after redeeming all financial liabilities are cash and bank deposits, debt securities, equity securities and loans. In addition, the Group is able to cope with unexpected cash outflows through the sale of securities and additional sources of funding, such as asset-backed securitization.

## 8-5 Market risk

Market risk is a risk that loss could be incurred on assets and liabilities under management due to changes in market prices, such as interest rate, stocks, foreign exchange, etc.

### 8-5-1 Market risk management

The purpose of market risk management is to manage and contain the loss of assets and liabilities incurred due to changes in market variables, such as interest rates, foreign exchanges and equity prices within the allowable limits in order to ensure profitability and stability.

### 8-5-2 Market risk management targets

Market risk management targets include marketable securities, foreign currency net positions, derivatives and other assets and liabilities with embedded market risks. The Group classifies exposures to market risk into either trading or non-trading positions and manages each of those portfolios separately.

### 8-5-3 Management of market risk related to trading position

#### 8-5-3-1 Trading account classification

A trading account refers to a set of products held for short-term trading purposes, etc., like Trading Book, and there should be no legal restrictions on selling or completely hedging products that are to be classified as trading accounts.

Specifically, the following financial products are classified as trading accounts, excluding products that cannot be classified as trading accounts and bank account products:

- a. financial instruments for the short-term trading;
- b. financial instruments for the purpose of hedging risks;
- c. financial instruments for the purpose of acquiring arbitrages;
- d. hedge of other instruments held for the purposes of a, b, or c;
- e. financial instruments included in the Correlation Trading Portfolio ("CTP");
- f. financial instruments that generate credit or stock net selling positions in bank accounts (\*);

and

(\*) Credit or stock net selling positions in bank accounts: Bank account positions whose current value rises as issuer credit spreads of debt instruments expand or share prices fall

g underwriting arrangements for securities that are actually expected to be purchased on the settlement date.

#### 8-5-3-2 Management of the trading position limits

The Risk Management Committee allocates capital, annual loss and exposure limits in relation to market risks of the trading position for each business unit (division) annually. Within the given limit, the Risk Management Operation Committee further allocates the limits for each business units (divisions) and desks. The Risk Management Group provides information necessary for deliberation and review by the Committee, reports trading limits and measures risks.

The middle office performs mark-to-market measures and monitors trade violations and compliance with the limits. The middle office establishes trading policy regulations, ensures compliance with the regulations, measures market risk for trading positions and checks daily compliance within the acceptable limits for each risk. The office also conducts daily inspections of changes in the management exposure, compliance with the limit, post verification and crisis analysis and reports the results to the management team every day.

#### 8-5-3-3 Market Risk Measurement (Basel 3 Standard)

The basic calculation method for managing and measuring the exposure of trading account products to market risks is measuring risks separately for sensitivity risk, default risk and residual risk and then aggregating the risk measures. Sensitivity risk refers to the risk of loss due to changes in market risk factors, such as exchange rates, interest rates and stock prices. The risk of default refers to the risk of loss due to bankruptcy of bonds or stock issuers.

The Group excludes structural foreign exchange positions approved by the

Governor of the Financial Supervisory Service from the scope of market risk capital requirements from December 31, 2024. The currencies designated as structural foreign exchange positions are AED (United Arab Emirates), BRL (Brazil), CNY (China), IDR (Indonesia), INR (India), MXN (Mexico), PHP (Philippines), RUB (Russia), and TWD (Taiwan).

#### 8-5-3-4 Amount of risk by risk type

The details of regulated capital by market risk group as of June 30, 2025 are as follows (KRW in millions):

| Classification                   | Risk type                                        | June 30,<br>2025 | December 31,<br>2024 |
|----------------------------------|--------------------------------------------------|------------------|----------------------|
| Sensitivity Risk Charge          | General interest rate risk                       | 51,220           | 41,732               |
|                                  | Credit spread risk ("CSR") (Non-securitizations) | 52,580           | 33,871               |

|                                  | CSR (securitization (CTP))                       | –                | –                    |
|                                  | Equity risk                                      | 40,753           | 20,548               |
|                                  | Foreign exchange risk (*)                        | 248,202          | 269,426              |
|                                  | Commodity risk                                   | –                | –                    |
| Default Risk Charge              | Non-securitizations                              | 34,004           | 34,343               |
|                                  | Securitizations (Non-CTP)                        | –                | –                    |
|                                  | Securitizations (CTP)                            | –                | –                    |
| Residual Risk Add-On<br>("RRAO") | RRAO                                             | 1,086            | 760                  |
| Total                            |                                                  | 427,845          | 400,680              |

(\*) Structural foreign exchange positions approved by the FSS are excluded from the calculation of regulatory capital.

#### 8-5-4 Management of market risk related to non-trading position

##### 8-5-4-1 Interest rate risk

Interest rate risk of non-trading position is a risk of losses in financial assets and liabilities with interest rates due to adverse changes in interest rates and is incurred when maturity structure does not match interest rate setting cycle of the related assets and liabilities. The Group manages the interest rate risks of non-trading position in order to maintain the stability of net interest income and net asset value based on changes in interest rates. The following is subject to the Group's management of interest rate risk:

- a. financial assets with interest rates, such as bank deposits, debt securities and loans;
- b. financial liabilities with interest rates, such as depository liabilities, borrowings and debentures; and
- c. financial derivatives, such as interest rate swaps.

Interest rate risk is calculated using the gap between interest-sensitive assets and liabilities. The interest rate risks measure the interest rate gap ratio as a primary indicator, while Economic value of equity (" $\Delta$ EVE"), Net interest income (" $\Delta$ NII") ratio and duration are used as secondary indicators. The Risk Management Committee and the Risk Management Operation Committee establish the interest rate risk limits on an annual basis; the compliance thereof is reported to Risk Management Operation Committee as well as the Risk Management Committee on a monthly and quarterly basis, respectively.

△EVE refers to changes in the economic value of equity capital, indicating the effect of adverse changes in interest rates on the present value of assets, liabilities and others. As of June 30, 2025 and December 31, 2024, the Group's △EVE is as follows (KRW in millions):

| Classification | June 30,<br>2025 | Average   | Minimum   | Maximum   | December 31,<br>2024 |
|----------------|------------------|-----------|-----------|-----------|----------------------|
| △EVE           | 2,025,949        | 1,931,923 | 1,787,618 | 2,025,949 | 2,097,932            |

△EVE calculates the maximum value compared to the default scenario by applying six interest rates (parallel rise, parallel fall, short-term fall and long-term rise, short-term rise and long-term fall and short-term rise and short-term fall) after generating cash flows for interest-sensitive assets and liabilities under the Supervision of Banking Business Appendix 9-1.

## 8-5-5 Currency risk concentration

Currency risk is a risk incurred when the value of a financial instrument or future cash flows fluctuates due to the changes in foreign exchange rates. Currency risk arises from the financial instruments presented in currencies other than the functional currency. Currency risk does not arise from the financial instruments presented in the functional currency or in non-monetary items. In order to establish the stop loss and limits, the Group manages the foreign exchange net exposure amount of the trading and non-trading positions by each currency.

The equivalent Korean won amount of significant foreign currency assets and liabilities as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

### June 30, 2025:

## 8-6 Operating risk

Operational risk is the risk of loss arising from system failure, human error, fraud or other external events. Risks related to legal or regulatory implications are identified as operational risks, but risks related to the strategy of damaging reputation are excluded from operational risks. Operational risk includes losses from internal operational problems and externalities, such as natural disasters, etc., and legal lawsuit, but excludes losses from policy decision errors or unmeasurable reputation damage, etc. Operational risk does not have a direct correlation with income and the Group needs to mitigate such risk through internal controls and insurance.

Operating risk capital is calculated by multiplying the Business Indicator Component ("BIC") based on consolidated financial statements and the internal loss multiplier ("ILM"). The BIC is calculated based on the consolidated financial statements by multiplying the annual average of interest-lease dividend factors, service factors and financial transaction factors over the past three years by the factor of each section. The ILM is the log function value of the loss element and the BIC, and the loss element is calculated by multiplying the average annual loss amount generated internally by the Bank over the past 10 years by 15.

The Risk Management Committee determines the operational risk limits. In case, the excess of limit is expected, the management plan for the excess of internal capital limits should be reported to the Risk Management Operation Committee and if additional limits are given, an approval from the Risk Management Committee is needed beforehand. If the limit is exceeded due to the occurrence of an exceptional situation, an ex post facto approval from the Risk Management Committee is needed for the information on exceeded amount and post hoc results, as well as the subsequent plans.

## 8-7 Capital management

The Group implements the BIS capital requirement system in order to secure the capital adequacy and comply with the supervisory regulations. By BIS regulation, the Group keeps its BIS capital adequacy ratio (hereinafter, "BIS ratio") above the minimum BIS ratio for the RWAs. In addition, the Group performs a capital adequacy assessment in order to cope with an unexpected loss.

RWAs, which are calculated per each risk type when calculating BIS ratio, are as follows:

- a. RWAs of credit risk are calculated using the basic internal ratings-based approach. The Group uses the standardized approach for governments, banks, public institutes, overseas exposure, other assets, etc. ;
- b. RWAs of the market risk are calculated by multiplying 12.5 to the amount of capital required for market risk calculated by the standard model; and
- c. RWAs of the operational risk are calculated by multiplying 12.5 to the amount of capital required for operational risk calculated by the standard model.

Regulatory capital in accordance with the Regulations on the Supervision of Banking Business for calculating BIS ratio is as follows:

- a. Common equity: Capital incurred in connection with common stock issued to meet the eligible requirement, capital surplus and capital adjustments, retained earnings, accumulated other comprehensive income and other capital surplus, capital adjustments, non-controlling interest on common shares issued by banks, affiliated subsidiaries, etc.
- b. Other basic capital: The capital securities to meet accreditation requirements of other basic capital, capital surplus associated with the issuance of the other basic capital, non-qualifying capital securities and the accredited amount as other basic capital of a non-controlling interest on equity securities issued by a subsidiary, etc.
- c. Supplementary capital: The capital securities to meet supplementary capital accreditation requirements, capital surplus associated with the issuance of supplementary capital, the accredited amount of supplementary capital of non-qualifying capital securities, the accredited amount as supplementary capital of a non-controlling interest on equity securities issued by a subsidiary, eligible allowance for possible loan losses on "normal" or "precautionary" category assets, allowance for possible loan losses in excess of the total amount of expected losses, etc.

#### 8-7-1 Internal capital adequacy assessment and management

Internal capital is the amount that allows for continuous operation of business while accounting for all risks. Internal capital is defined as the size of capital needed to cope with an unexpected loss under a certain probability. The purpose of managing the internal capital is to compare the size of internal capital and available capital (Tier 1) and to use it as a measure of financial strength.

Managing the internal capital also provides the basis of measuring risk-adjusted performance. The indicators are composed of the risk appetite ratio as well as exhaustion ratio of foreign holding limits. The risk appetite ratio is an internal capital ratio established after taking into consideration a capital buffer in Tier 1 capital. The exhaustion ratio of foreign holding limits is a ratio used to measure the amount of internal capital used against the internal capital limits.

Internal capital limits are established after accounting for the size of current and subsequent Tier 1 capital, as well as the components, quality, risk appetite, target credit rating, operational strategy and business plans. The Risk Management Committee determines risk types and the internal capital limits for the Group more than once a year. In the case where new operations or the expansion of operations results in the amount exceeding the internal capital limits, an approval from the Risk Management Committee is needed beforehand. If such a situation occurs in cases outlined as exceptions, an approval from the Risk Management Committee is needed for the information on exceeded amount and post hoc results, as well as the subsequent plans.

### 9. Operating segment information:

#### 9-1 General information

In order to set strategies to achieve goal and efficiently conduct performance assessment, the business sectors of the Group are divided by the operations as follows:

- a. Operating bank segment: It consists of four banks (Center, Yeongnam,

Chungcheong and Honam). It offers household loan and deposit, retirement pension, company loan, deposit, etc.

- b. Capital market segment: This segment offers investment and operation of securities, buying and selling of public bonds and development and operation of derivatives.
- c. Other segment: It consists of the overseas business segment, headquarters supporting segment, trust segment, risk segment, audit segment and after-management segment.

## 9-2 Profit or loss by operating segment

9-2-1 Details of net income by operating segments for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

For the six-month period ended June 30, 2025:

| Classification                        | Operating group segments |             |             |           | Finance sector and other sectors | Subtotal    | Adjustments | Total       |
|---------------------------------------|--------------------------|-------------|-------------|-----------|----------------------------------|-------------|-------------|-------------|
|                                       | Center                   | Yeongnam    | Chungcheong | Honam     |                                  |             |             |             |
| Net interest income                   | 2,218,578                | 359,730     | 327,788     | 102,188   | 889,454                          | 3,897,738   | 585         | 3,898,323   |
| Interest income (expenses)            | 8,501,774                | 1,695,012   | 1,203,560   | 460,392   | (2,424,476)                      | 9,436,262   | (71,165)    | 9,365,097   |
| Interest expenses (income)            | (6,283,196)              | (1,335,282) | (875,772)   | (358,204) | 3,313,930                        | (5,538,524) | 71,750      | (5,466,774) |

| Transfer to credit-impaired loan      | (446,695)    | (927,715)                | 1,374,410            | –           |
| Net increase (decrease)               | 23,594,781   | (4,373,481)              | (444,580)            | 18,776,720  |
| Write-offs                            | –            | –                        | (192,518)            | (192,518)   |
| Disposal of non-performing loans, etc | –            | –                        | (573,640)            | (573,640)   |
| Ending balance                        | 324,379,745  | 41,109,042               | 1,430,061            | 366,918,848 |

Net deferred origination fees and costs are not reflected in the gross carrying amounts above.

15-5 Among loan receivables for which loss allowance has been measured based on lifetime ECL, the amortized cost of the loan receivables whose contractual cash flows have changed during each of the six-month periods ended June 30, 2025 and 2024 and net gain from the change are as follows (KRW in millions):

| Classification                   | For the six months period ended June 30, 2025 | For the six months period ended June 30, 2024 |
|----------------------------------|-----------------------------------------------|-----------------------------------------------|
| Amortized cost before change     | 624                                           | 104,091                                       |
| Allowances before change         | 8                                             | 102,270                                       |
| Amount after deducting allowance | 616                                           | 1,821                                         |
| Net gain due to change           | (8)                                           | 16,595                                        |

15-6 Loans whose contractual cash flows changed for which the measurement of allowance for loan losses changed from the lifetime ECL to 12-month ECL on initial recognition during the reporting period do not exist as of June 30, 2025 and December 31, 2024.

15-7 The contractual amount of the uncollected loans that have been fully written off at the end of the reporting period but for which collection activities are continuing is ₩3,933,220 million and ₩3,906,403 million as of June 30, 2025 and December 31, 2024, respectively.

## 16. Derivative instruments:

16-1 Details of amounts of the unsettled derivative contract and fair value of derivatives held by the Group as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification           | Amounts of unsettled contract |                   | Accumulated valuation gain (loss) |             |                   |             |
|--------------------------|-------------------------------|-------------------|-----------------------------------|-------------|-------------------|-------------|

- (\*1) These companies were included in associates because the Group has significant influence over them by participating in the Board of Directors' meeting, the decision-making organization.
- (\*2) As the interim consolidated financial statements as of June 30, 2025 could not be obtained, the most recent interim consolidated financial statements available from the closing date were used. The effect of significant transactions or events incurred between the end of the reporting period of the associate and that of the Group was reviewed and reflected.
- (\*3) As of June 30, 2025, the Group classified the investees as associates because it could not exercise control over the investees.
- (\*4) As of June 30, 2025, the application of the equity method has been suspended because the balance of the investment account is below "0".
- (\*5) Since more than one investor must act together to direct related activities, the equity method was applied because the Group could not control the investee individually.
- (\*6) Changed its name from NPX-Welcome Metaverse Contents New Technology Association.
- (\*7) Due to the disposal of interests or the decrease in ownership to less than 20%, the Group no longer exercises significant influence, and the investment has been excluded from investments in associates and joint ventures

17-2 Consolidated financial statements as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

June 30, 2025:

| Classification                                                            | Assets      | Liabilities | Equity     | Operating income | Net income (loss) | Total comprehensive income (loss) | Dividends received |

| Total          | 870,458          | (188,104)                | (4,350)                     | (980)             | 677,024    |

19-2 Changes in investment property for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

For the six-month period ended June 30, 2025:

| Classification    | Beginning balance | disposal | Depreciation | Transfer (*) | Ending balance |
|-------------------|-------------------|----------|--------------|--------------|----------------|
| Land              | 461,972           | (4,556)  | –            | (15,652)     | 441,764        |
| Buildings         | 216,032           | (2,104)  | (7,945)      | (863)        | 205,120        |
| Government grants | (980)             | –        | 234          | –            | (746)          |
| Total             | 677,024           | (6,660)  | (7,711)      | (16,515)     | 646,138        |

(\*) The amount represents the change in the carrying amount of investment properties held by the Group due to the change in the ratio of lease occupancy.

For the six-month period ended June 30, 2024:

| Classification    | Beginning balance | disposal | Depreciation | Transfer (*) | Ending balance |
|-------------------|-------------------|----------|--------------|--------------|----------------|
| Land              | 463,948           | (1,361)  | –            | 7,106        | 469,693        |
| Buildings         | 213,460           | (1,289)  | (7,968)      | 9,005        | 213,208        |
| Government grants | (1,885)           | –        | 491          | –            | (1,394)        |
| Total             | 675,523           | (2,650)  | (7,477)      | 16,111       | 681,507        |

(\*) The amount represents the change in the carrying amount of investment properties held by the Group due to the change in the ratio of lease occupancy.

19-3 Rental income and operating expenses arising from the Group's investment properties for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

| Classification                                                                       | For the three months ended | For the six months ended | For the three months ended | For the six months ended |
|--------------------------------------------------------------------------------------|----------------------------|--------------------------|----------------------------|--------------------------|
|                                                                                      | June 30, 2025              |                          | June 30, 2024              |                          |
| Rental income                                                                        | 2,460                      | 4,776                    | 4,278                      | 6,878                    |
| Operating cost directly related to investment properties that generate rental income | 140                        | 279                      | 141                        | 284                      |

| Total                         | 428,880           | 174,853     | (77,955)     | 2,617  | 528,395        |

(\*) Of the other intangible asset amortization costs, ₩16,056 million is included in other operating expenses.

## 21. Non-current assets held for sale:

Details of non-current assets held for sale as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification              | June 30, 2025 | December 31, 2024 |
|-----------------------------|---------------|-------------------|
| Acquisition cost (*)        | 26,704        | 31,738            |
| Accumulated impairment loss | (3,683)       | (4,008)           |
| Book value                  | 23,021        | 27,730            |
| Net fair value              | 23,021        | 27,730            |

(\*) Acquisition cost is presented as net of accumulated depreciation before classification as non-current assets held for sale.

Non-current assets held for sale are composed of 115 collaterals acquired for the purpose of repayment of loans and one other of which the sale is currently in progress as of June 30, 2025.

22. Other assets and merchant banking account assets:

22-1 Details of other assets as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                     | June 30, 2025 | December 31, 2024 |
|------------------------------------|---------------|-------------------|
| Guarantee deposits paid            | 605,124       | 603,392           |
| Accounts receivable                | 23,961,947    | 9,246,077         |
| Accrued income                     | 1,728,539     | 1,753,111         |
| Prepaid expenses                   | 341,642       | 209,089           |
| Suspense payments                  | 359,598       | 370,747           |
| Expenditures                       | 2,585         | 2,379             |
| Deposit money to court             | 6,781         | 8,973             |
| Domestic exchange settlement debit | 2,133,665     | 3,028,351         |
| Other miscellaneous assets         | 194,832       | 187,501           |
| Allowance for other assets         | (42,869)      | (33,364)          |
| Total                              | 29,291,844    | 15,376,256        |

22-2 Changes in the allowance for loss of other assets for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

| Classification                                | For the six months period ended June 30, 2025 | For the six months period ended June 30, 2024 |
|-----------------------------------------------|-----------------------------------------------|-----------------------------------------------|
| Beginning balance                             | 33,364                                        | 11,503                                        |
| Write-offs                                    | 2,777                                         | 4,879                                         |
| Sales of non-performing loans, etc.           | (251)                                         | (230)                                         |

### 23. Deposits:

Details of deposit liabilities as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                                  | June 30, 2025 | December 31, 2024 |
|-------------------------------------------------|---------------|-------------------|
| Demand deposits                                 |               |                   |
| Demand deposits in Korean won                   | 22,026,769    | 16,543,045        |
| Demand deposits in foreign currencies           | 29,744,481    | 32,704,649        |
| Subtotal                                        | 51,771,250    | 49,247,694        |
| Time and savings deposits                       |               |                   |
| Time and savings deposits in Korean won (*)     | 286,470,867   | 289,087,164       |
| Time and savings deposits in foreign currencies | 25,557,416    | 28,936,174        |
| Subtotal                                        | 312,028,283   | 318,023,338       |
| Certificate of deposits                         | 12,417,533    | 19,921,128        |
| Total                                           | 376,217,066   | 387,192,160       |

(\*) Time and savings deposits in Korean won include savings deposits (₩44,554,940 million as of June 30, 2025 and ₩42,903,649 million as of December 31, 2024) and corporate savings deposits (₩53,570,047 million as of June 30, 2025 and ₩59,772,612 million as of December 31, 2024).

24. Financial liabilities at FVTPL:

24-1 Details of financial liabilities at FVTPL as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                          | June 30, 2025 | December 31, 2024 |
|-----------------------------------------|---------------|-------------------|
| Securities borrowed                     | 233,908       | 460,301           |
| Derivative liabilities held for trading | 6,677,103     | 14,342,968        |
| Total                                   | 6,911,011     | 14,803,269        |

24-2 Details of financial liabilities designated at FVTPL as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification           | June 30, 2025 | December 31, 2024 |
|--------------------------|---------------|-------------------|
| Deposits                 | 382,949       | 321,777           |
| Debentures in Korean won | 50,658        | 50,620            |
| Total                    | 433,607       | 372,397           |

Financial liabilities are measured at FVTPL in order to eliminate or significantly reduce a measurement or recognition mismatch.

24-3 Difference between the book value and maturity amount of the financial liabilities designated at FVTPL as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification               | June 30, 2025 | December 31, 2024 |
|------------------------------|---------------|-------------------|
| Book value                   | 433,607       | 372,397           |
| Repayment amount at maturity | 460,000       | 400,000           |
| Difference                   | (26,393)      | (27,603)          |

## 25. Borrowings:

Details of borrowings as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                                               | Lenders                                   | Annual interest rate (%) | June 30, 2025 | December 31, 2024 |
|--------------------------------------------------------------|-------------------------------------------|--------------------------|---------------|-------------------|
| Borrowings in Korean won                                     |                                           |                          |               |                   |
| BOK borrowings                                               | BOK                                       | 1.00~1.25                | 4,519,313     | 4,001,857         |

## 27-2-2 Total costs recognized in accordance with defined benefit plans

Total costs incurred in relation to defined benefit pension plans for each of the six-month periods ended June 30, 2025 and 2024 are as follows

(KRW in millions):

| Classification                 | For the three months ended | For the six months ended | For the three months ended | For the six months ended |
|--------------------------------|----------------------------|--------------------------|----------------------------|--------------------------|
|                                | June 30, 2025              |                          | June 30, 2024              |                          |
| Current service cost           | 36,830                     | 73,922                   | 33,798                     | 67,385                   |
| Interest cost                  | 21,653                     | 43,306                   | 22,635                     | 45,270                   |
| Interest income on plan assets | (17,354)                   | (34,442)                 | (20,886)                   | (41,032)                 |
| Total                          | 41,129                     | 82,786                   | 35,547                     | 71,623                   |

## 27-3 Plan assets

Changes in the fair value of plan assets for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

| Classification                                        | For the six months ended June 30, 2025 | For the six months ended June 30, 2024 |
|-------------------------------------------------------|----------------------------------------|----------------------------------------|
| Beginning balance                                     | 2,011,738                              | 2,048,061                              |
| Employer contributions                                | 100,000                                | —                                      |
| Interest income on plan assets                        | 34,442                                 | 41,032                                 |
| Remeasurements of the net defined benefit liabilities | (3,131)                                | (6,954)                                |
| Benefit paid                                          | (105,755)                              | (71,569)                               |
| Changes due to transfers between affiliates           | 1,925                                  | 976                                    |
| Ending balance                                        | 2,039,219                              | 2,011,546                              |

28. Contingent liabilities, agreements and provisions:

28-1 Details of provisions as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                    | June 30, 2025 | December 31, 2024 |
|-----------------------------------|---------------|-------------------|
| Provision for payment guarantees: |               |                   |
| Financial guarantee contracts (*) | 433           | 645               |
| Non-financial guarantee contracts | 44,803        | 49,615            |
| Bills endorsed                    | 10            | 10                |
| Subtotal                          | 45,246        | 50,270            |
| Provision for unused commitments  | 80,285        | 83,980            |
| Other provisions:                 |               |                   |
| Provision for restoration         | 71,055        | 69,999            |
| Provision for litigation          | 63,070        | 61,370            |
| Others                            | 337,904       | 369,092           |
| Subtotal                          | 472,029       | 500,461           |
| Total                             | 597,560       | 634,711           |

(\*) The Group recognizes the amount exceeding the unamortized amount of the initial fair value at subsequent measurement of the financial guarantee contracts as provisions for payment guarantees. The Group recognizes the unamortized amount as financial guarantee contract liabilities in the amount of ₩ 48,789 million and ₩19,911 million as of June 30, 2025 and December 31, 2024, respectively.

28-2 Changes in provision for unused commitments for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

For the six-month period ended June 30, 2025:

| Classification                       | Unused commitments |                          |                      | Total   |
|--------------------------------------|--------------------|--------------------------|----------------------|---------|
|                                      | 12-month ECL       | Lifetime ECL             |                      |         |

28-8 The Fair Trade Commission's investigation into whether commercial banks, including the Group, engaged in unfair collaborative practices related to LTV regulation and government bond yields is ongoing, and the results cannot be predicted as of June 30, 2025.

28-9 In connection with the Ukraine crisis in February 2022, international sanctions against the Russian Federation of the international community could affect companies and individuals subject to the sanctions, as well as companies, industries and economies that do business directly or indirectly with Russia. As of the reporting date, the Group expects the sanctions will have a financial impact on the business of KEB Hana Bank Russia, a subsidiary of the Group, but cannot reasonably predict the estimate of the impact.

### 30. Capital stock and other paid-in capital:

30-1 Details of capital stock as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions and shares):

| Classification                      | June 30, 2025 | December 31, 2024 |
|-------------------------------------|---------------|-------------------|
| Number of shares authorized         | 2,000,000,000 | 2,000,000,000     |
| Par value per share (in Korean won) | 5,000         | 5,000             |
| Number of shares issued             | 1,071,915,717 | 1,071,915,717     |
| Common stock                        | 5,359,578     | 5,359,578         |

30-2 Details of capital surplus and capital adjustments as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification      | June 30, 2025 | December 31, 2024 |
|---------------------|---------------|-------------------|
| Capital surplus (*) | 6,161,303     | 6,161,303         |
| Capital adjustments |               |                   |
| Others              | (37,652)      | (37,652)          |
| Total               | 6,123,651     | 6,123,651         |

(\*) As of June 30, 2025, the Group's capital surplus includes the amount recognized at the time of the business combination under common control.

30-3 Details of hybrid securities as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                          | Issuance date | Expiry date | Annual interest rate (%) | June 30, 2025 | December 31, 2024 |
|-----------------------------------------|---------------|-------------|--------------------------|---------------|-------------------|
| Hybrid securities in foreign currencies | Oct. 19, 2021 | –           | 3.50                     | 353,738       | 353,738           |

The Group can early repay the above hybrid securities in foreign currencies at the time of five years from the issuance date or at every interest payment date (every six months) after five years from the issuance date if the Group receives the approval from the Governor of Financial Supervisory Service.

### 31. Accumulated other comprehensive income (loss):

Changes in accumulated other comprehensive income (loss) for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

For the six-month period ended June 30, 2025:

| Classification                                                          | Beginning balance | Increase (decrease) (excluding reclassification and transfer of retained earnings) | Transfer of retained earnings | Reclassification (*) | Tax effects | Ending balance |
|-------------------------------------------------------------------------|-------------------|------------------------------------------------------------------------------------|-------------------------------|----------------------|-------------|----------------|
| Gain (Loss) on valuation of financial assets at FVOCI                   | (274,944)         | 315,671                                                                            | 614                           | (97,117)             | (58,837)    | (114,613)      |
| Changes in equity of investments in associates                          | 270,094           | (301,913)                                                                          | —                             | —                    | 79,705      | 47,886         |
| Gain (Loss) on valuation of net investment hedges of foreign operations | (213,800)         | 113,216                                                                            | —                             | —                    | (29,889)    | (130,473)      |
| Exchange differences on translation of foreign operations               | 350,881           | (252,787)                                                                          | —                             | —                    | 29,682      | 127,776        |
| Loss on valuation of fair value hedges                                  | (24,984)          | —                                                                                  | —                             | —                    | —           | (24,984)       |
| Remeasurement of defined benefit plans                                  | (769,700)         | (2,810)                                                                            | —                             | —                    | 828         | (771,682)      |
| Total                                                                   | (662,453)         | (128,623)                                                                          | 614                           | (97,117)             | 21,489      | (866,090)      |

(\*) Gain (Loss) on valuation of debt securities at FVOCI that was recognized in accumulated other comprehensive income (loss) was reclassified as profit or loss due to disposal of the debt securities.

For the six-month period ended June 30, 2024:

| Classification                                                          | Beginning balance | Increase (decrease) (excluding reclassification and transfer of retained earnings) | Transfer of retained earnings | Reclassification (*) | Tax effects | Ending balance |
|-------------------------------------------------------------------------|-------------------|------------------------------------------------------------------------------------|-------------------------------|----------------------|-------------|----------------|
| Gain (Loss) on valuation of financial assets at FVOCI                   | (439,719)         | 185,826                                                                            | 3,491                         | (99,918)             | (25,268)    | (375,588)      |
| Changes in equity of investments in associates                          | 66,829            | 107,533                                                                            | —                             | —                    | (28,389)    | 145,973        |

| Total                                                                   | (1,104,045)       | 421,505                                                                            | 3,491                         | (99,918)             | (53,005)    | (831,972)      |

(\*) Gain (Loss) on valuation of debt securities at FVOCI that was recognized in accumulated other comprehensive income (loss) was reclassified as profit or loss due to disposal of the debt securities.

### 32. Retained earnings:

32-1 Details of retained earnings as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                                             | June 30, 2025 | December 31, 2024 |
|------------------------------------------------------------|---------------|-------------------|
| Legal reserve                                              |               |                   |
| Earned surplus reserve (*1)                                | 2,991,500     | 2,678,700         |
| Voluntary reserve                                          |               |                   |
| Revaluation reserves on property, plant and equipment (*2) | 203,898       | 203,898           |
| Other reserves (*3)                                        | 123,919       | 116,594           |
| Regulatory reserve for bad debts (*4)                      | 2,678,944     | 2,492,716         |
| Other voluntary reserves                                   | 5,450,200     | 5,450,200         |
| Subtotal                                                   | 8,456,961     | 8,263,408         |
| Unappropriated retained earnings                           | 12,360,279    | 11,789,424        |
| Total                                                      | 23,808,740    | 22,731,532        |

(\*1) Article 40 of the Banking Law of the Republic of Korea requires the Group to appropriate at least 10% of net income after income tax to legal reserve every time it pays dividends, until such reserve equals 100% of its paid-in capital. This reserve is restricted in use except for reducing deficit or being transferred to capital.

(\*2) The Group had recognized gains on revaluation of property, plant and equipment in other comprehensive income. At the first-time adoption of KIFRS, the revaluation amount under the previous accounting standard was recognized as deemed cost and the revaluation gain was recorded in revaluation reserves. The reserve is recognized in distributable retained earnings when the relevant property, plant and equipment are disposed of.

(\*3) Relevant Japanese regulations require the Group's overseas branches located in Japan to appropriate a minimum of 10% of net income for the period as a legal reserve, until the reserve equals one-fourth of its capital. This reserve is restricted in use until liquidation of the Japanese branches. In addition, the

legal reserves of the Group's overseas branches located in Chennai, Panama, Singapore, Hanoi, Ho Chi Minh, Abu Dhabi and Hong Kong are appropriated in accordance with the relevant regulation of each country.

(\*4) The Group has provided allowances for possible loan losses in accordance with KIFRS. The difference between this amount and the mandatory allowance reserves under the minimum accumulation ratio required by Financial Supervisory Service ("FSS") is reserved as regulatory reserve for bad debts.

32-2 Changes in retained earnings for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

| Classification                                                                                    | For the six months<br>ended June 30, 2025 | For the six months<br>ended June 30, 2024 |
|---------------------------------------------------------------------------------------------------|-------------------------------------------|-------------------------------------------|
| Beginning balance                                                                                 | 22,731,532                                | 21,050,087                                |

### 33. Regulatory reserve for bad debts:

Regulatory reserve for bad debt is calculated and disclosed in accordance with Article 29, Section 1 and 2 of *Regulation on Supervision of Banking Business* of the Republic of Korea.

33-1 Details of regulatory reserve for bad debts as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                                         | June 30, 2025 | December 31, 2024 |
|--------------------------------------------------------|---------------|-------------------|
| Beginning balance                                      | 2,799,116     | 2,577,402         |
| Planned provision for (reversal of) regulatory reserve | 43,009        | 221,714           |
| Ending balance                                         | 2,842,125     | 2,799,116         |

33-2 Required provisions for regulatory reserve and income adjusted for the regulatory reserve for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

| Classification                                                                                         | For the three months ended | For the six months ended | For the three months ended | For the six months ended |
|--------------------------------------------------------------------------------------------------------|----------------------------|--------------------------|----------------------------|--------------------------|
|                                                                                                        | June 30, 2025              |                          | June 30, 2024              |                          |
| Net income attributable to equity holders of the parent company before regulatory reserve for bad debt | 1,092,215                  | 2,085,109                | 907,738                    | 1,750,891                |
| Required provision for regulatory reserve                                                              | (47,477)                   | (43,009)                 | (166,077)                  | (244,104)                |
| Adjusted income after regulatory reserve for bad debt                                                  | 1,044,738                  | 2,042,100                | 741,661                    | 1,506,787                |
| Basic EPS adjusted after reflecting reserve for bad debt (*1) (In Korean won)                          | 968                        | 1,898                    | 685                        | 1,399                    |
| Diluted EPS adjusted after reflecting reserve for bad debt (*2) (In Korean won)                        | 968                        | 1,898                    | 685                        | 1,399                    |

(\*1) The amounts deducted from the adjusted income after regulatory reserve in the calculation of EPS after regulatory reserve for bad debt for each of the six-month period ended June 30, 2025 and 2024 are ₩7,449 million and 7,223 million, respectively.

(\*2) Since the Group does not have dilutive potential ordinary stock, basic EPS is the same as diluted EPS.

34. Operating income and operating expenses:

34-1 Operating income for each of the six-month periods ended June 30, 2025 and 2024 is as follows (KRW in millions):

| Classification                                     | For the three months ended | For the six months ended | For the three months ended | For the six months ended |
|----------------------------------------------------|----------------------------|--------------------------|----------------------------|--------------------------|
|                                                    | June 30, 2025              |                          | June 30, 2024              |                          |

| Tax credits                                     | (10,031)                                  | (9,710)                                   |
| Income tax for overseas portions                | 41,327                                    | 43,134                                    |
| Changes due to consolidated tax payment         | (59,375)                                  | (3,646)                                   |
| Adjustments                                     | (31,009)                                  | 1,919                                     |
| Other (tax rate fluctuation, etc.)              | (4,641)                                   | (13,977)                                  |
| Income tax expense                              | 657,273                                   | 636,524                                   |
| Effective tax rate (%)                          | 23.89                                     | 26.59                                     |

(\*) 9.9% is applied to income under ₩200 million, 20.9% is applied to income exceeding ₩200 million and under ₩20 billion, 23.1% is applied to income exceeding ₩20 billion and under ₩300 billion and 26.4% is applied to income above ₩300 billion.

#### 47-3 Implementation of the global minimum tax

The implementation of the global minimum tax under OECD's Pillar 2 applies to constituent entities (subsidiaries in the consolidation scope that have a permanent establishment and meet certain criteria) of a multinational group with sales exceeding 750 million euros in the consolidated financial statements for at least two of the four preceding years. If the effective tax rate of a constituent entity is below 15%, the corresponding amount shall be paid to the tax authority of the jurisdiction where the parent company that meets certain criteria is located. The Republic of Korea introduced a legislation related to the Pillar 2 taxation in 2023, and the legislation takes effect from fiscal years beginning on or after January 1, 2024. Accordingly, the Group has analyzed the impact of the Pillar 2 taxation on its income tax and it is not expected to have a material impact on current income tax expense as of June 30, 2025.

48. Earnings per share:

48-1 Weighted-average number of common stocks for each of the six-month periods ended June 30, 2025 and 2024 are as follows (shares):

| Classification                         | Periods                      | Number of shares | Weights | Weighted-average number of ordinary shares |
|----------------------------------------|------------------------------|------------------|---------|--------------------------------------------|
| For the six months ended June 30, 2025 | Jan. 1, 2025 – Jun. 30, 2025 | 1,071,915,717    | 181/181 | 1,071,915,717                              |
| For the six months ended June 30, 2024 | Jan. 1, 2024 – Jun. 30, 2024 | 1,071,915,717    | 182/182 | 1,071,915,717                              |

Since the Group does not have potentially dilutive common stock, the weighted-average number of common stock outstanding per basic share is the same as the weighted-average number of shares of common stock outstanding per diluted share.

48-2 The Parent company's basic EPS for each of the six-month periods ended June 30, 2025 and 2024 is calculated as follows (KRW in millions except per share amounts):

| Classification                                                 | For the three months ended | For the six months ended | For the three months ended | For the six months ended |

(\*) Basic EPS is the same as diluted EPS for each of the six-month periods ended June 30, 2025 and 2024.

#### 49. Share-based payment:

The Group operates a Performance Share Plan (PSP). The PSP is a cash-settled share-based compensation scheme linked to the shares of its parent company, Hana Financial Group Inc. Under the plan, the number of shares to be paid in cash is determined based on performance over a six-year period from the grant date.

49-1 Details of liabilities related to share-based payment and total intrinsic value of rights accounted for as accounts payable in case that option holders achieve rights to receive cash or other assets as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                                           | June 30, 2025 | December 31, 2024 |
|----------------------------------------------------------|---------------|-------------------|
| Book value of liabilities related to share-based payment |               |                   |
| Performance share (granted by the Group)                 | 38,593        | 29,950            |

49-2 The costs recognized in relation to share-based payment for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

| Classification                              | For the three months ended | For the six months ended | For the three months ended | For the six months ended |
|---------------------------------------------|----------------------------|--------------------------|----------------------------|--------------------------|
|                                             | June 30, 2025              |                          | June 30, 2024              |                          |
| Costs recognized due to share-based payment |                            |                          |                            |                          |
| Performance share (granted by the Bank)     | 11,421                     | 16,134                   | 2,671                      | 10,927                   |

49-3 Details of performance shares granted to the executives and department head of the Group as of June 30, 2025 are as follows:

| Classification                 | 12th                         | 13th                         | 14th                         | 15th                         |

| Payment method                 | Market-based compensation    | Market-based compensation    | Market-based compensation    | Market-based compensation    |
| Shares at settlement date (*1) | 131,567 shares               | 197,310 shares               | 142,894 shares               | 41,006 shares                |

(\*1) The Bank provides the executives and department head of the Bank with the right to receive stocks. The number of stocks granted is adjusted based on the performance. The number of stocks granted is adjusted based on the assessment criteria consisting of the Group's performance (relative shareholders' rate of return) of 40% and the Bank's performance (ROE, net income, soundness) of 60%. As of June 30, 2025, for a total of 2,456 shares (8th grant), 6,784 shares (9th grant), and 3,600 shares (10th grant) of performance-based stock awards, payment has not been made.

49-4 As of June 30, 2025, there are no exercisable stock options

50. Cash flow information:

50-1 Details of cash and cash equivalents as of June 30, 2025 and December 31, 2024 are as follows (KRW in millions):

| Classification                                                                | June 30, 2025 | December 31, 2024 |
|-------------------------------------------------------------------------------|---------------|-------------------|
| Cash                                                                          | 2,160,195     | 2,165,192         |
| Due from banks in Korean won                                                  | 14,839,920    | 11,930,280        |
| Due from banks in foreign currencies                                          | 13,620,848    | 20,937,392        |
| Subtotal                                                                      | 30,620,963    | 35,032,864        |
| Deposits with restriction on use (*)                                          | 1,607,487     | 3,763,074         |
| Deposits with a maturity of more than three months at the time of acquisition | 202,870       | 314,597           |
| Net amount                                                                    | 28,810,606    | 30,955,193        |

(\*) Deposits with restriction on use exclude reserve deposits that meet the definition of cash equivalents.

50-2 Significant non-cash transactions for each of the six-month periods ended June 30, 2025 and 2024 are as follows (KRW in millions):

| Classification                                                       | For the six months ended June 30, 2025 | For the six months ended June 30, 2024 |

**Independent Auditor's Report**  
(English Translation of Independent Auditor's Report  
Originally Issued in Korean on February 28, 2025)

To the Shareholders and Board of Directors of  
Hana Bank Co., Ltd. and its subsidiaries:

**Report on the Audited Consolidated Financial Statements**  
**Audit Opinion**

We have audited the accompanying consolidated financial statements of Hana Bank Co., Ltd. (the "Bank") and its subsidiaries (collectively, the "Group"), which comprise the consolidated statement of financial position as of December 31, 2024 and 2023, and the related consolidated statements of profit or loss and comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years then ended, and notes to consolidated financial statements, including a summary of material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as of December 31, 2024 and 2023, and its financial performance and its cash flows for the years then ended in accordance with Korean International Financial Reporting Standards ("K-IFRSs").

## **Basis for Audit opinion**

We conducted our audits in accordance with Korean Standards on Auditing ("KSAs"). Our responsibilities under those standards are further described in the Auditor's responsibility for the Audits of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audits of the consolidated financial statements in the Republic of Korea, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Management's Responsibility for the Consolidated Financial Statements**

Management is responsible for the preparation and presentation of these consolidated financial statements in accordance with K-IFRSs, and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern; disclosing, as applicable, matters related to going concern; and using the going-concern basis of accounting, unless management either intends to liquidate the Group or cease operations, or has no realistic alternative, but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

## Auditor's responsibility for the Audits of Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with KSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with KSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going-concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audits and significant audit findings, including any significant deficiencies in internal control that we identify during our audits.

**Deloitte.**

February 28, 2025

This audit report is effective as of February 28, 2025, the independent auditor's report date. Accordingly, certain material subsequent events or circumstances may have occurred during the period from the date of the independent auditor's report to the time this report is used. Such events and circumstances could significantly affect the accompanying consolidated financial statements and may result in modifications to this report.

**HANA BANK CO., LTD. and its subsidiaries**  
**Notes to consolidated Financial Statements**

As of and for the years ended December 31, 2024 and 2023

1. GENERAL INFORMATION:

General information on Hana Bank Co., Ltd., previously Korea Exchange Bank (the "Bank" or the "Parent company") and its subsidiaries (collectively, the "Group") in accordance with Korean International Financial Reporting Standard ("K-IFRS") 1110, *Consolidated Financial Statements*, is as follows:

1-1 Summary of the Parent company (the Bank)

The Bank was established on January 30, 1967, as a government-controlled bank, to engage in foreign exchange and trade finance business under the *Korea Exchange Bank Act* enacted on July 28, 1966.

On December 30, 1989, the *Korea Exchange Bank Act* was repealed, and the Bank was reorganized as a stock company under the Commercial Act of the Republic of Korea. On April 4, 1994, the Bank was listed on the Korea Exchange (previously, Korea Stock Exchange). On February 28, 2004, the Bank merged its subsidiary, Korea Exchange Bank Credit Service Co., Ltd. On August 31, 2014, the Bank spun off its credit card division.

On February 9, 2012, Hana Financial Group Inc. ("HFG") had control over the Bank by acquiring 57.27% equity interest in the Bank and later on April 5, 2013, the Bank became a wholly owned subsidiary of HFG after HFG acquired the remaining interest in the Bank through an all-inclusive exchange of the shares.

The Bank changed to its current name on September 1, 2015, following the merger of Korea Exchange Bank and Hana Bank.

The Bank provides commercial banking service under the Banking Act of the Republic of Korea, trust banking service under the Financial Investment Services and Capital Markets Act, merchant banking service due to the merger with the Korea International Merchant Bank, foreign exchange business and other related businesses. As of December 31, 2024, the Bank's headquarters is located at Seoul, with 602 domestic branches (including 68 satellite offices) and 25 overseas branches (including one satellite office and five offices).

The Bank is authorized to issue 2,000 million shares (par value amount: ₩5,000) of common stock, and as of December 31, 2024, after a number of capital increases and decreases, stock splits and conversion of preferred shares to common shares, the Bank has 1,071,915,717 shares of common stock issued and outstanding with the total capital stock amounting to ₩5,359,578 million.

The consolidated financial statements of the Bank as of and for the year ended December 31, 2024, were approved by the board of directors on February 3, 2025, and will be approved finally at the shareholders' meeting to be held on March 21, 2025.

## 1-2 Scope and overview of consolidation

The Group's ownership percentages in its consolidated subsidiaries as of December 31, 2024, are summarized as follows (ownership in %):

| Investee                        | Country   | Major business     | Share ratio (%) | Reporting date |
|---------------------------------|-----------|--------------------|-----------------|----------------|
| Subsidiaries of Hana Bank:      |           |                    |                 |                |

(\*) The company was newly acquired and then disposed of again during the current period, and was prepared by including both the companies newly included in the consolidated list and those excluded from the consolidated list.

#### 1-2-1 Hana Bank (China) Co., Ltd. ("Hana Bank China")

Hana Bank China was incorporated in Beijing to engage in commercial banking, foreign currency exchanges and other related operations in China on December 14, 2007. The Bank contributed the assets and liabilities of the branches in Shanghai and Shenyang, and its interests in the International Bank of Qingdao, which is the subsidiary of the Bank, to the Hana Bank China in the form of equity contributions on December 24, 2007. Hana Bank China, one of the subsidiaries in China, acquired and merged with KEB China, one of the affiliates in the HFG, on December 15, 2014. (Before the merge, equity interests in Hana Bank China were 59.7% for Hana Bank and 40.3% for Korea Exchange Bank). Its paid-in capital is 3.35 billion yuan as of December 31, 2024 (share ratio : 100%).

#### 1-2-2 KEB Hana Bank Canada

KEB Hana Bank Canada was established in Toronto, Canada, on October 6, 1981, to provide financial services to Korean companies and residents in Toronto and the surrounding area. Its paid-in capital is 83,400 thousand Canadian dollars as of December 31, 2024 (share ratio : 100%).

#### 1-2-3 KEB Hana Bank (D) AG ("KEBDAG")

KEBDAG was established in Frankfurt, Germany, on December 29, 1992, to provide financial services to Korean companies and residents in Frankfurt and the surrounding area. Paid-in capital is increased by issuing new shares by KEBDAG in 2023. Its paid-in capital is 73,008 thousand euro as of December 31, 2024 (share ratio : 100%).

#### 1-2-4 PT Bank KEB Hana

PT Bank KEB Hana was established in Jakarta, Indonesia, on November 5, 1990, to provide financial services to Korean companies and residents in Jakarta.

In accordance with the regulations of the Bank of Indonesia, two or more local banks with the same ultimate parent company are prohibited to operate as an independent entity in Indonesia. Accordingly, PT Bank KEB Indonesia, a subsidiary of the Bank, and PT Bank Hana, a subsidiary of Hana Bank, have completed a merger process on February 20, 2014, and changed the name to PT Bank KEB Hana. PT Bank KEB Hana was incorporated into a subsidiary of KEB on February 28, 2014, since KEB owned the major shares of PT Bank KEB Hana after the acquisition. Paid-in capital is increased by issuing new shares by PT Bank KEB Hana in 2019. Its paid-in capital is 3,160,093 million rupiah as of December 31, 2024 (share ratio : 69.01%).

KEBB was incorporated on May 21, 1999, to provide investment finance services for foreign clients, advisory services for domestic companies that seek to invest overseas, finance arrangement and security investment trust services. Its paid-in capital is 126,351 thousand reais as of December 31, 2024 (share ratio : 100%).

#### 1-2-6 KEB Hana NY Financial Corp. ("NYFinCo")

NYFinCo was established in New York, USA, on April 8, 2004, to provide financial services to Korean companies and residents in New York and the surrounding area. Its paid-in capital is 1 dollar as of December 31, 2024 (share ratio : 100%).

#### 1-2-7 KEB Hana LA Financial Corp. ("LAFinCo")

LAFinCo was established in Los Angeles, USA, on April 8, 2004, to provide financial services to Korean companies and residents in Los Angeles and the surrounding area. Its paid-in capital is 2 dollars as of December 31, 2024 (share ratio :100%).

#### 1-2-8 KEB Hana Global Finance Limited ("KHGF")

KHGF was established on July 2, 2009, in Hong Kong to provide investment finance services for foreign clients, advisory services for domestic companies that seek to invest overseas, finance arrangement and security investment trust services. Its paid-in capital is 50,000 thousand dollars as of December 31, 2024 (share ratio : 100%).

#### 1-2-9 KEB Hana Bank Russia

KEB Hana Bank Russia launched a Moscow representative office in 2008 to provide financial information and consulting services for Korean and local companies in Russia. KEB Hana Bank Russia was established on August 15, 2014 after obtaining permission to operate corporation from Russian supervisory authorities in order to expand the business area. Its paid-in capital is 4.78 billion RUB as of December 31, 2024 (share ratio : 99.99%).

#### 1-2-10 Hana Bancorp, Inc.

Hana Bancorp, Inc. (previously, BNB Financial Services Corporation) was incorporated on April 8, 1988, to engage in the bank and related businesses. HFG acquired ownership of BNB Financial Services Corporation and incorporated Hana Bancorp, Inc. as its subsidiary on August 30, 2013, and changed the name to Hana Bancorp, Inc. The Bank purchased the securities from HFG on March 28, 2016. Its paid-in capital is 48,596 thousand dollars as of December 31, 2024 (share ratio : 96.77%).

#### 1-2-11 KEB Hana Bank Mexico

KEB Hana Bank Mexico was established in Mexico City on November 3, 2017, to engage in provision of financial services to Korean companies and local corporations and obtained approval for the commencement of business from the local supervisory agency on January 31, 2019. Its paid-in capital is 1,666,828 thousand Mexican pesos as of December 31, 2024 (share ratio : 99.99%).

#### 1-2-12 GLN International Co., Ltd.

GLN International Co., Ltd. was established in Korea on July 7, 2021, and primarily engages in the electronic finance business (global payment brokerage, etc.). Paid-in capital is increased by issuing new shares by GLN International Co., Ltd. in 2023. Its paid-in capital is ₩60.8 billion as of December 31, 2024 (share ratio : 82.24%).

#### 1-3 Structured entities

##### 1-3-1 Consolidated structured entities

###### 1-3-1-1 Hana UBS Power PEF Invest Trust 21 and a set of three other private equity investment vehicles

In accordance with K-IFRS 1110, three other private equity investment vehicles and Hana UBS Power PEF Invest Trust 21 were included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

###### 1-3-1-2 Sevenstar Co., Ltd. and 54 other special-purpose entities

In accordance with K-IFRS 1110, 54 SPCs and Sevenstar Co., Ltd. were included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

#### 1-3-1-3 Trust accounts

In accordance with K-IFRS 1110, trust accounts are included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

#### 1-3-1-4 Hana Tech Value-Up Investment Fund and three other funds

In accordance with K-IFRS 1110, Hana Tech Value-Up Investment Fund and three other funds are included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

#### 1-3-1-5 Contractual commitments to consolidated structured entities

The consolidated structured company for the securitization of assets is established for the securitization of loans. The Group is involved in the acquisition of subordinated bonds issued by the consolidated structured company or provide credit for the asset-backed commercial paper ("ABCP") and others, and is exposed to the risk of not being able to recover the acquisition amounts based on the investment performance. Characteristics and intentions of contractual commitments offered by the Group to the consolidated structured entities are as follows:

| Company name                       | The characteristics and purposes                                                                                                                                                                              | Intention                                                       |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|
| Development trust and other trusts | The Group offers principal conservation commitment to trust accounts. The Group is required to conserve the deficit amount in case the trust account stands below the principal as a result of the operation. | Credit risk mitigation on financial management of trust account |

## 2. BASIS OF PREPARATION AND MATERIAL ACCOUNTING POLICIES:

### 2-1 Basis of preparation

The Group prepares statutory consolidated financial statements in accordance with K-IFRS 1034 enacted by the *Act on External Audit of Stock Companies*. The accompanying consolidated financial statements have been translated into English from Korean consolidated financial statements prepared in Korean. In the event of any differences in interpreting the consolidated financial statements or the independent auditor's report thereon, the Korean version, which is used for regulatory reporting purposes, shall prevail.

The directors have, at the time of approving the consolidated financial statements, a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. Thus, they continue to adopt the going-concern basis of accounting in preparing the consolidated financial statements

### 2-2 Changes in material accounting policies

The material accounting policies used for the preparation of the consolidated financial statements are the same as those adopted in preparing the annual financial statements as of and for the year ended December 31, 2023, except for the adoption of new standards and interpretations effective as of January 1, 2024.

Changes in accounting policies in accordance with the adoption of new standards and interpretations for the current reporting period are as follows:

2-2-1 K-IFRS 1001, *Presentation of Financial Statements – Classification of Liabilities as Current or Non-Current (Amendments of 2020)*

The amendments clarify that the classification of liabilities as current or non-current is based on the entity's right to defer settlement of liabilities at the end of the reporting period, not by the likelihood that the entity will exercise the right or not. The amendments highlight that the right exists if the entity complies with the borrowing agreement at the end of the reporting period and the definition of settlement is transferring cash, equity instruments, other assets or services to the counterparty.

There is no material impact of this amendment on the Bank's consolidated financial statements.

2-2-2 K-IFRS 1001, *Presentation of Financial Statements – Non-Current Liabilities with Covenants (Amendments of 2023)*

Only the borrowing agreement to be complied within the end of the reporting period ("Agreement") affects the entity's right to defer settlement of liabilities at least 12 months after the reporting period.

Even if compliance of Agreement is assessed only after the reporting period, Agreement defines the existence of rights at the end of the reporting period. Agreement to be complied with only after the reporting period does not affect the right to defer settlement. However, if the deferral right depends on Agreement complied within 12 months after the reporting period, the entity should disclose information about the risk that the liability may be settled within 12 months. Disclosure includes information about Agreement (including the nature and the time for the entity to comply with Agreement), the carrying amount of the liability and the facts and circumstances indicating that the arrangement may be difficult to comply with.

There is no material impact of this amendment on the Bank's consolidated financial statements.

2-2-3 K-IFRS 1007, *Statement of Cash Flows* and K-IFRS 1107, *Financial Instruments: Disclosures– Supplier Finance Arrangements (Amendments)*

These amendments add a requirement to disclose information about financing arrangements to enable financial statement users of K-IFRS 1007 to assess the impact of financing arrangements on the entity's liabilities and cash flows.

Additionally, K-IFRS 1107 has been amended to include financing arrangements as an example of requirements to disclose information related to exposure to liquidity concentration. This aims to ensure that users can evaluate the impact of financing arrangements on the entity's financial position accurately.

The term 'supplier finance arrangements' is not defined. Instead, the amendments describe the characteristics of an arrangement for which an entity would be required to provide the information.

To meet the disclosure objective, an entity will be required to disclose in aggregate for its supplier finance arrangements:

- The terms and conditions of the arrangements
- The carrying amount and associated line items presented in the entity's statements of financial position of the liabilities that are part of the arrangements
- The carrying amount and associated line items for which the suppliers have already received payment from the finance providers
- Ranges of payment due dates for both those financial liabilities that are part of a supplier finance arrangement and comparable trade payables that are not part of a supplier finance arrangement
- Types and effects of non-cash changes in the carrying amount of financial liabilities that are part of a supplier finance arrangement
- Liquidity risk information

There is no material impact of this amendment on the Bank's consolidated financial statements.

2-2-4 K-IFRS 1116 *Leases- Lease Liability in a Sale and Leaseback (Amendments)*

The amendments add subsequent measurement requirements for sale and leaseback transactions that satisfy the requirements in K-IFRS 1115 to be accounted for as a sale. The amendments require the seller-lessee to determine 'lease payments' or 'revised lease payments' such that the seller-lessee does not recognize a gain or loss that relates to the right of use retained by the seller-lessee after the commencement date.

There is no material impact of this amendment on the Bank's consolidated financial statements.

2-2-5 K-IFRS 1001 *Presentation of Financial Statements- Disclosure of Virtual Assets (Amendments of 2023)*

The amendments add additional disclosure requirements required by other standards for transactions related to virtual assets, and setting out disclosure requirement for each case of 1) holding virtual assets, 2) holding virtual assets on behalf of customer and 3) issuing virtual assets.

When holding a virtual asset, disclosure on the general information about virtual assets, the accounting policy applied and each virtual assets's acquisition method, cost and the fair value at the end of the reporting period are required. Also, when issuing a virtual asset, the entity's obligations and status of fulfilment of the obligation related to the issued virtual asset, the timing and amount of the recognized revenue of the sold virtual asset, the number of virtual assets held after issuance and important contract details shall be disclosed.

There is no material impact of this amendment on the Bank's consolidated financial statements.

The new and amended standards and interpretations that are issued, but not yet effective up to the date of issuance of the Bank's consolidated financial statements, are disclosed below.

2-2-6 K-IFRS 1021, *The Effects of Changes in Foreign Exchange Rate* and K-IFRS 1101, *First-Time Adoption of International Financial Reporting Standards (Amendments) – Lack of Exchangeability*

The amendments define when a currency is considered to be exchangeable into another currency and specify how to assess whether a currency is exchangeable and how to determine a spot exchange rate if a currency lacks exchangeability.

When a currency is not exchangeable into another currency at the measurement date, the spot exchange rate is estimated at the measurement date as which an observable exchange rate without adjustment or another estimation technique can be used.

The amendments apply to annual reporting periods beginning on or after January 1, 2025. Earlier application is permitted.

2-2-7 K-IFRS 1109 *Financial Instruments* and 1107 *Financial Instruments: Disclosures' (Amendment) – Classification and Measurement of Financial Instruments*

These amendments clarify the conditions related to the pre-settlement performance of financial liabilities when settled using an electronic payment system, the characteristics of interest and contingent events that should be considered when evaluating whether contractual cash flows are consistent with a basic lending arrangement, the characteristics of financial assets with non-recourse features and the characteristics of contractually linked financial instruments. Additionally, they include additional disclosure requirements for investments in equity instruments designated as fair value through other

comprehensive income ("FVOCI") and for contractual terms that may change the timing or amount of contractual cash flows.

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

#### *2-2-8 K-IFRS 1109 Financial Instruments – Derecognition of Lease Liabilities and Definition of Transaction Price*

These amendments clarify that any gain or loss arising from the derecognition of a lease liability should be recognized in profit or loss. Additionally, the definition of transaction price has been revised to align with K-IFRS 1115.

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

#### *2-2-9 K-IFRS 1110 Consolidated Financial Statements – Determination of 'de facto agent'*

The amendments are amended the wording of standard K-IFRS 1110 in relation to 'de facto agent judgment' to resolve discrepancies between the paragraphs of the standard.

The amendments are effective for annual reporting periods beginning on or after January 1, 2026, with earlier application permitted.

2-2-10 K-IFRS 1101 *First-Time Adoption of Korean International Financial Reporting Standards – Application of Hedge Accounting*

These amendments specify that the conditions for applying hedge accounting should refer to specific paragraphs of K-IFRS 1109 *Financial Instruments* and align the related terminology accordingly.

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

2-2-11 K-IFRS 1107 *Financial Instruments: Disclosures – Derecognition Gains and Losses*

These amendments specify that fair value measurement should refer to K-IFRS 1113 *Fair Value* and align the related terminology accordingly.

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

2-2-12 K-IFRS 1007 – *Cost Method*

This amendment removes the term "cost method" and replaces it with "cost."

The amendments apply to annual reporting periods beginning on or after January 1, 2026. Earlier application is permitted.

There is no material impact of this amendment on the Bank's consolidated financial statements.

2-3 Scope and principles of consolidation

Significant methods of accounting for consolidation when preparing consolidated financial statements are as follows:

### 2-3-1 Subsidiaries

The Bank has the ability to determine the financial and operating policies of subsidiaries. Generally, the Bank classified the entity as subsidiary in case the Bank has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee. Subsidiaries are fully consolidated from the date on which the control is transferred to the Group and excluded from the subsidiaries at the point when the Group loses the control.

### 2-3-2 Offset of the investment accounts of the Group and the corresponding equity accounts

The investment accounts of the Group and the corresponding equity accounts of the subsidiaries are eliminated in consolidation.

### 2-3-3 Process of difference between the costs of investment

The consolidated financial statements reflect on only the share of the consolidated subsidiaries post application of purchase accounting method. When applying the acquisition method, if the transfer consideration, the amount of non-controlling interest in the acquiree and the total fair value of the parent's previous holdings exceed the fair value of the subsidiary's asset liabilities, the difference is recognized as goodwill and is considered for impairment at the end of each reporting period.

Changes in the parent's ownership interest in a subsidiary that does not lose control after the date of acquisition of control are treated as capital transactions.

2-3-4 Elimination of intercompany transactions and the unrealized gain or loss, etc.

All significant intercompany transactions and the account balances among the consolidated companies are eliminated on consolidation. Unrealized gains or losses included in loans and borrowings arising from transactions between consolidated companies are eliminated on consolidation. The related accounts receivable and payable are also eliminated on consolidation.

#### 2-3-5 Investments in associates and a joint venture

Investments in entities over which the Group has control or significant influence are accounted for using the equity method. Under the equity method of accounting, the Group's initial investment in an investee is recorded at acquisition cost. Subsequently, a share of changes in equity (the Group's share of amount of the changes in associates' net assets) is adjusted to reflect in the carrying value. The share of changes in equity is accounted differently per sources. If the change in net asset has occurred due to net income or loss, it is accounted for as gain or loss on equity method. If it has occurred due to unappropriated retained earnings carried over from prior years, it is accounted for as changes in retained earnings under equity method. The change in net assets due to changes in equity, except those mentioned above, is accounted for as equity adjustments in equity method or negative equity changes in equity method.

If the carrying amount of investments in associates is equal to or under '0,' it suspends equity method and carries the investments value at '0.' If the Group has investment assets, such as preferred shares and long-term bonds of associates, it continues recognizing its share of further losses to the extent of the carrying amount of such asset's value at '0.' The Group resumes the application of the equity method if the Group's share of income or change in equity of an investee exceeds the Group's share of losses accumulated during the period of suspension of the equity method of accounting.

At the date of acquisition, the excess of the cost of the investment over the Group's share of the net fair value of the investee's identifiable assets and liabilities is accounted for as goodwill or negative goodwill. The goodwill is not amortized, and if there is any indication that investment shares in associates and joint ventures, including those, have been impaired, it is being considered against the recoverable value (greater of net fair value and value in use). In addition, the difference between the fair value and the carrying amount of the identifiable assets and liabilities of the investee at the time of stock acquisition is amortized or reversed according to the equity method of the investee.

The Group's share in the investee's unrealized profits and losses resulting from transactions between the Group and its investee is eliminated to the extent of the interest in the investee.

#### 2-3-6 Special reserve on trust accounts

A special reserve provided under the arrangement of guaranteed fixed rate of return and guaranteed repayment of the principal is included under the retained earnings in the consolidated financial statements.

#### 2-3-7 Non-controlling interests

Subsidiaries' equity that is not included in the Group's share is accounted as non-controlling interests. In case subsidiaries' non-controlling interests are below '0,' negative non-controlling interests are presented as deduction of equity.

## 2-4 Foreign currency transaction

### 2-4-1 Functional currency

When preparing the consolidated financial statements, the Group measures and recognizes all items and transactions according to the functional currency.

The term functional currency is defined as the monetary unit of account of the principal economic environment in which the entity operates and trades between entities using its own functional currency and other currencies that are converted to the Group's functional currency to be measured and recognized.

### 2-4-2 Transactions and balances at the end of the reporting period

Transactions in foreign currencies are initially recognized as functional currency, applying spot or average exchange rates. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rate of exchange at the reporting date and differences arising on settlement or translation of monetary items are recognized in profit or loss. Non-monetary assets and liabilities at fair value in a foreign currency are translated at the exchange rates at the end of the reporting date. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange differences of that gain or loss are recognized in profit or loss and when a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange differences of that gain or loss are recognized in other comprehensive income. Non-monetary items not measured at fair value in a foreign currency are translated using the exchange rates as of the dates of the initial transactions and thus, there are no exchange differences.

However, an item for which settlement is neither planned nor likely to occur in the foreseeable future is, in substance, a part of the entity's net investment in that foreign operation. Exchange differences arising on a monetary item that forms a part of a reporting entity's net investment in a foreign operation are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

#### 2-4-3 Translation of the presentation currency

As of the reporting date, the assets and liabilities of overseas branches are translated into the Group's presentation currency, Korean won ("KRW").

The Group's assets and liabilities are translated at the rate of exchange prevailing at the reporting date and the Group's consolidated statements of profit or loss and other comprehensive income and changes in equity are translated using the exchange rates at the transaction date or the average exchange rates for the period. The exchange differences arising on translation are recognized in other comprehensive income.

#### 2-5 Cash and cash equivalents

Cash and cash equivalents in the consolidated statements of financial position are composed of cash at bank and on hand, etc. The purpose of cash and cash equivalents is not to make short-term investments, but to meet short-term cash demands. Cash and cash equivalents are highly liquid, easily convertible and subject to an insignificant risk of changes in value.

Deposits restricted from use by the Group under contracts with third parties are included as part of cash, unless such restrictions prevent deposits from meeting the definition of cash any longer. Contractual restrictions affecting the use of cash and deposits are described in Note 10-2.

#### 2-6 Financial asset classification and subsequent measurement

At initial recognition, financial assets are classified as measured at fair value through profit or loss ("FVTPL"), fair value through other comprehensive income ("FVOCI") and amortized cost ("AC"), and financial liabilities are classified as measured at FVTPL and AC and in accordance with the business model and characteristics of the contractual cash flows.

Regular-way purchase or sale of financial assets is recognized at the trade date that an entity commits itself to purchase or sell an asset. Regular-way purchase or sale of financial assets means purchase or sale of financial assets under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

Financial assets and liabilities are initially measured at fair value and the transaction costs directly attributable to the acquisition (issuance) of financial assets (liabilities) are added to (deducted from) the fair value at initial recognition if they are not measured at FVTPL. The fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial instruments is generally measured at the transaction price (the fair value of the consideration received or transferred) at initial recognition.

#### 2-6-1 Financial assets at FVTPL

Financial assets held for trading or designated as at FVTPL and financial assets that are not classified as at FVOCI or AC are classified as FVTPL.

Also, the Group may designate a financial asset as measured at FVTPL, if doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on a different base.

Financial assets at FVTPL are measured at fair value and the gain or loss on valuation is recognized as profit or loss. Dividends and interest income from the financial assets are also recognized as profit or loss.

## 2-6-2 Financial assets at FVOCI

The Group classifies debt securities, which are held within a business model, whose objective is achieved by both collecting contractual cash flows and selling financial assets and meet the assessment of contractual cash flow characteristics and equity securities designated as measured at FVOCI, which are held not with intention to sell, but for strategic purpose, as financial assets at FVOCI. Financial assets at FVOCI are measured at fair value after initial recognition. Gain or loss arising from changes in the fair value is recognized as other comprehensive income, except for interest income under the effective interest rate ("EIR") method, dividends and foreign exchange differences on monetary assets that are directly recognized in profit or loss.

When financial assets at FVOCI are disposed of, the cumulative income recognized in other comprehensive income is transferred to the current profit or loss. However, the cumulative income recognized for equity securities designated as financial assets at FVOCI is not transferred to the current profit or loss.

The fair value of financial assets at FVOCI presented in foreign currencies is translated using the exchange rate at the end of the reporting period. Changes in the fair value from exchange differences due to changes in AC are recognized in the current profit or loss, while other changes are recognized directly in equity.

## 2-6-3 Financial assets at AC

Financial assets within a business model whose objective is achieved by collecting contractual cash flows, which meet the contractual cash flow characteristics, are classified as financial assets at AC. After initial recognition, the financial assets are measured at AC using the EIR method and presented by deducting from the AC the allowance for loan losses. Interest income is recognized using the effective interest method.

The Group defers loan origination fees ("LOF")/loan origination costs ("LOC") associated with originating loans and LOCs that have future economic benefits. Loan balances are reported net of these LOF/LOCs. The deferred LOF/LOCs are amortized based on the effective interest method, with the amortization recognized as adjustments to interest income.

## 2-7 Derivative financial instruments and hedge accounting

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are classified as trading derivatives or hedging derivatives depending on whether hedge accounting is applied. After initial recognition, derivative instruments are subsequently remeasured at fair value. Any gains or losses arising from changes in fair value on derivatives are taken directly to the consolidated financial statements, except for the effective portion of cash flow hedges or hedges of net investment in a foreign operation, which is recognized in other comprehensive income.

The Group applies fair value hedge accounting to hedge the changes in fair value, as a whole or some parts, of recognized assets or liabilities from particular risks or an unrecognized firm commitment. Cash flow hedge is accounted to hedge the changes in cash flows of recognized assets or liabilities from particular risks or a highly probable forecast transaction.

The Group documents the hedge relationship, risk management objective, strategy, the nature of the risk being hedged and method to assess the effectiveness of hedge to apply hedge accounting. The effectiveness of hedge means the effect of offsetting the exposure to changes in fair value or cash flow of hedged items by changes in fair value or cash flow of derivatives attributed by the hedged risk. The Group assesses and documents whether such hedges are expected to be highly effective at the end of the reporting period.

An ineffective part of the hedge may be due to differences between underlying variables, such as acquisition date, credit risk or liquidity and the hedging instruments that the entity accepts to achieve an effective cost-to-cost hedging relationship.

#### 2-7-1 Fair value hedges

When fair value hedge accounting is applied, the unrealized gain or loss on hedged items that are attributable to a hedged risk and hedging instruments is symmetrically recognized in the consolidated financial statements as current income for the same reporting period to ensure that changes in the fair value of the hedged items are offset by changes in the fair value of the hedging instruments. When the hedged item is an equity instrument designated at FVOCI, the hedging gain or loss remains in other comprehensive income. If an application of hedge accounting is no longer valid, the Group discontinues the hedge accounting prospectively. Any adjustment to the carrying amount of hedged items is amortized to profit or loss in the consolidated statements of profit or loss and other comprehensive income over the remaining maturity using the effective interest method.

#### 2-7-2 Cash flow hedges

When cash flow hedge accounting is applied, the effective portion of the unrealized gain or loss on the hedging instrument is directly recognized in other comprehensive income (loss) in the consolidated statements of financial position to ensure that changes in the cash flows of the hedged items are offset by changes in the cash flows of the hedging instruments while any ineffective portion is recognized immediately in the consolidated statements of profit or loss and other comprehensive income. Amounts recognized as other comprehensive income are transferred to the consolidated statements of profit or loss and comprehensive income when the hedged transaction affects profit or loss.

If an application of hedge accounting no longer meets the criteria, the Group discontinues the hedge accounting prospectively and the cumulative gain or loss on the hedging instrument previously recognized in other comprehensive income is transferred to profit or loss in the consolidated statements of profit or loss and other comprehensive income.

#### 2-7-3 Hedge accounting of net investment in a foreign operation

When applying hedge accounting of net investment in a foreign operation, the effective portion of changes in fair value of the hedging instrument is recognized in other comprehensive income and the ineffective portion of the hedge is recognized as current profit or loss in order to offset changes in the fair value of the hedged item caused by the hedging with changes in the fair value of the hedging instrument. The effective portion of hedge recognized in other comprehensive income will be reclassified from other comprehensive income to current profit or loss in accordance with K-IFRS 1021, *The Effects of Changes in Foreign Exchange Rates*, at the time of disposal of a foreign operation or disposal of a portion of its foreign operations in the future.

#### 2-7-4 Embedded derivatives

An embedded derivative is a component of a hybrid contract that also includes a non-derivative host with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. Derivatives embedded in other financial instruments or other host contracts are accounted for as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

#### 2-7-5 'Day 1' profit or loss

In case of derivatives in Level 3, fair value is determined using data that is not observable from markets. The difference between the transaction price and fair value at initial recognition (a 'Day 1' profit or loss) is deferred and amortized up to its maturity using the straight-line method.

## 2-7-6 Credit risk valuation adjustment

When assessing derivatives at fair value, expected loss from credit risk is measured and deducted from derivative assets to reflect credit risk of counterparties.

## 2-8 Expected credit loss ("ECL") for financial assets

Loss allowance is recognized for financial assets at FVOCI and AC using the ECL model.

ECL is the weighted-average amount of possible outcomes within a certain range, reflecting the time value of money; estimates in the past; current and future situations; and information accessible without excessive cost or effort.

The ECL can be measured in following three ways:

- General approach: When financial assets do not fall into below two categories and are off-balance-sheet undrawn commitments
- Simplified approach: When financial assets are trade receivables, contract assets or lease receivables
- Credit-impaired approach: When financial assets are credit impaired at initial recognition

The general approach is applied differently depending on the significance of the increase of the credit risk. If, at the reporting date, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group shall measure the loss allowance for that financial instrument at an amount equal to 12-month ECL. If the credit risk on that financial instrument has increased significantly since initial recognition, the Group shall measure the loss allowance for a financial instrument at an amount equal to the lifetime ECL at each reporting date.

The loss allowance is measured at an amount equal to lifetime ECL for the simplified approach and the Group shall only recognize the cumulative changes in lifetime ECL since initial recognition as a loss allowance for purchased or originated credit-impaired financial assets at each reporting date for the credit-impaired approach.

The following non-exhaustive list of information may be relevant in assessing changes in credit risk:

- Significant changes in internal price indicators of credit risk as a result of a change in credit risk since inception.
- Other changes in the rates or terms of an existing financial instrument that would be significantly different.
- An actual or expected significant change in the financial instrument's external credit rating.
- An actual or expected internal credit rating downgrade for the borrower or a decrease in behavioral scoring used to assess credit risk internally.
- An actual or expected significant change in the operating results of the borrower.
- Past-due information, etc.

#### 2-8-1 Reflecting forward-looking information

The Group measures the significance of the increase in credit risk and the ECL using forward-looking information.

The Group assumes that the risk component is correlated with changes in market conditions and calculates the ECL using the forward-looking information by modeling macroeconomic variables and risk components.

The forward-looking information used to measure the ECL is derived from 'stress-case' or 'worst-case' scenarios.

#### 2-8-2 Measurement of ECL for financial assets at AC

ECL for financial assets at AC is measured as the present value of the difference between the contractual cash flows that are due to the Group under the contract and the cash flows that the Group expects to receive. For this purpose, the Group calculates expected contractual cash flows for individually significant financial assets (allowance for loan losses on an individual assessment). Financial assets insignificant in value individually are measured on a collective basis with financial assets with similar credit risks (allowance for loan losses on a collective assessment).

##### 2-8-2-1 Allowance for loan losses on an individual assessment basis

Allowance for loan losses on an individual assessment basis is based on the best estimates of management with regard to the present value of cash flows expected to be recovered from receivables. In estimating the cash flows, the Group uses all available information, including the financial conditions, such as the operating cash flows of counterparties and the net realizable value of collateral provided.

##### 2-8-2-2 Allowance for loan losses on a collective assessment basis

Allowance for loan losses on a collective assessment basis uses the estimation model that accounts for the forward-looking information based on the past loss rate to measure the ECL. The model considers the Probability of Default ("PD") and the loss-given default ("LGD") reflecting the type of instruments and borrowers, credit rating, portfolio size and collection period. Also, certain assumptions are applied to model the ECL measurement and to determine input variables based on past experiences and forward-looking information.

Methodologies and assumptions for this model are regularly reviewed to minimize the difference between the allowance for loan losses and the actual loss.

The ECL for financial assets at AC is recognized as the allowance for loan losses, and when the financial asset is determined to be irrecoverable, the carrying amount and the allowance for loan losses are decreased. If financial assets previously written off are recovered, the allowance for loan losses is increased and the difference is recognized in the current-period profit or loss.

#### 2-8-3 ECL measurement for financial assets at FVOCI

The measurement method is the same as the one for financial assets at AC, but the change in the allowance is recognized as other comprehensive income. The allowance for financial assets at FVOCI is reclassified from other comprehensive income to current profit or loss when the assets are disposed of or repaid.

#### 2-9 Derecognition of financial assets

A financial asset is derecognized when the contractual rights to the cash flows from the financial asset expire, or the Group transfers substantially all the risks and rewards of ownership of the financial asset. If the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset, but has retained control, the Group recognizes the asset and the associated liability to the extent of the Group's continuing involvement in the financial asset. If most of the risks and rewards of owning a financial asset are controlled without holding or transferring it, the Group recognizes them in its consolidated statements of financial position as the Group continues to be involved in the financial asset and related liabilities to be paid.

On derecognition of a financial asset measured at AC, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in an equity instrument that the Group has elected on initial recognition to measure at FVOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to retained earnings.

## 2-10 Classification and measurement of financial liabilities

All financial liabilities that are classified as financial liabilities at FVTPL, borrowings or others are measured initially at their fair value, minus transaction costs, except in the case of financial liabilities recorded at FVTPL.

### 2-10-1 Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL. Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term. All derivatives, including an embedded derivative separated from the host contract, are reclassified as financial liabilities at FVTPL, except for financial liabilities designated as effective hedging instruments or financial guarantee contracts. After initial recognition, the changes in the fair value of the financial liabilities at FVTPL and the related interest expenses are recognized as profit or loss.

The Group performs securities lending and borrowing classified as held-for-trading financial liabilities. When the Group borrows securities from Korea Securities Depository, securities borrowed are managed as memorandum value, and when selling them, they are recorded as securities sold. At closing, the difference between the price securities are sold and the market price prevailing on the closing date is taken into account as valuation gain or loss on securities sold, and at the time of selling the securities, the difference between book value and the price at which securities are purchased is recorded as trading gain or loss on securities sold.

#### 2-10-2 Deposits, borrowings and debentures

Interest-bearing deposits, borrowings and debentures are subsequently measured at AC using the effective interest method. The difference between the consideration received after deducting transaction costs and the amount repayable on maturity is amortized by the effective interest method and recognized in profit or loss for the relevant period.

#### 2-11 Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, canceled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statements of profit or loss and other comprehensive income. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, discounted using the original EIR, is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability.

## 2-12 Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset, and the net amount is reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis or to realize the asset and settle the liability simultaneously.

## 2-13 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the obligation is expected, it is unlikely or the amount of the loss cannot be estimated reliably, the amount is disclosed. If the effect of the time value of money is material, provisions are stated at present value.

The Group accounts for the payment guarantee provision in the same way as accounting allowance for loan losses on a collective assessment basis by applying the Cash Conversion Factor to the confirmed/unconfirmed payment guarantees and bills endorsed. The Group provides an allowance for loan losses on a certain portion of the unused credit line. The Group records the provision for such unused balances as an allowance for loan losses on unused commitments, which are calculated by applying a credit conversion factor and provision rates.

## 2-14 Financial guarantee contract

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument and is measured at fair value on the date of initial recognition. After initial recognition, the Group, as an issuer of such a contract, measures it at the higher of (i) the amount determined in accordance with K-IFRS 1109, *Financial Instruments*, or (ii) the amount initially recognized less, when appropriate, cumulative amortization recognized in accordance with K-IFRS 1115, *Revenue from Contract with Customer*.

## 2-15 Bonds purchased under resale agreements and bonds sold under repurchase agreements

Bonds purchased under resale agreements and bonds sold under repurchase agreements are included in loans and borrowings, respectively, in the accompanying consolidated statements of financial position. Interest income and expenses from purchases or sales are recognized as interest income on loans and interest expenses on borrowings, respectively.

## 2-16 Property, plant and equipment

Property, plant and equipment are measured at cost, and the carrying amount after initial recognition is expressed as the amount of the acquisition cost minus the accumulated depreciation and the accumulated impairment loss. The cost of property, plant and equipment includes expenditure directly related to the purchase or construction of the asset, including the cost directly related to the location and condition required to operate the asset in the manner intended by management and the cost initially estimated to be required to dismantle, remove or restore the site.

The subsequent costs are recognized as an asset when it is probable that future economic benefits associated with the asset will flow to the Group and the costs of the asset can be measured reliably. The other maintenances and repairs are expensed in the year in which they are incurred, and the carrying amount of certain parts that are replaced is derecognized.

Land is not depreciated. For depreciation of other assets, amount of acquisition cost, less residual value, is calculated on a straight-line basis and declining-balance basis over the following estimated useful life of the asset:

| Classification                                | Depreciation method      | Years   |
|-----------------------------------------------|--------------------------|---------|
| Buildings, building components and structures | Straight-line method     | 5 to 55 |
| Leasehold improvements                        | Straight-line method     | 3 to 10 |
| Equipment and vehicles                        | Declining-balance method | 3 to 20 |

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is immediately reduced to its recoverable amount.

The residual value and economic useful life are reviewed at the end of each reporting period, with the effect of any changes in estimates being accounted for, if necessary. Any gain or loss arising on the derecognition of the asset is recognized in 'Non-operating income' or 'Non-operating expenses' in the consolidated statements of profit or loss and other comprehensive income in the year the asset is derecognized.

## 2-17 Investment properties

Investment properties are initially measured at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated using the cost model.

Investment properties are derecognized either when they have been disposed of or when the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in the consolidated statements of profit or loss and other comprehensive income in the period of derecognition, and transfers are made to or from investment property only when there is a change in use. Land is not depreciated among investment properties, and the depreciation method for buildings is the straight-line method, and their useful life is 5 to 55 years. The depreciation method, residual value and useful life of investment property are reviewed at the end of each reporting period, and if it is deemed appropriate to change them, it is accounted for as a change in accounting estimates.

## 2-18 Intangible assets

An intangible asset, which comprises industrial property rights, software, development costs and others, is recognized as an asset only if it is probable that future economic benefits associated with the asset will flow to the Group and the costs of the asset can be measured reliably. Intangible assets acquired individually are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as of the date of acquisition in accordance with K-IFRS 1103, *Business Combination*.

Amortization of intangible assets with definite useful lives is calculated using the following amortization method over the estimated useful life of the assets:

| Classification                                                    | Depreciation method  | Years   |
|-------------------------------------------------------------------|----------------------|---------|
| Industrial property rights, software and system development costs | Straight-line method | 5       |
| Core deposits                                                     | Straight-line method | 14      |
| Other intangible assets                                           | Straight-line method | 1 to 12 |

Intangible assets with indefinite useful lives are not amortized, but are annually tested for impairment or whenever there is an indication that the intangible asset may be impaired. The assessment of indefinite useful life is reviewed annually to determine whether the indefinite useful life continues to be supportable.

## 2-19 Impairment of non-financial assets

The Group tests depreciable asset for impairment whenever there is a change in environment or an event indicating that the carrying amount may not be recoverable. The Group recognizes an excess of the carrying amount over the recoverable amount as an impairment loss. The Group defines recoverable amount as the higher of an asset's or cash-generating unit ("CGU")'s fair value, less costs to sell, or its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels (CGUs) for which there are separate and identifiable cash flows. The Group assesses the reversal of an impairment loss recognized for non-financial assets other than goodwill at the end of the reporting period.

## 2-20 Net defined benefit liabilities (assets)

The Group calculates defined benefit liabilities and pension benefit expenses based on a defined benefit plan and defined contribution plan when an employee retires in accordance with pension-related regulations. For defined benefit plans, the cost of retirement benefits is measured by an actuary services company using the projected unit credit method. The present value of a defined benefit obligation is computed by discounting expected future cash outflows using the market rate of return measured against the yield of high-graded corporate bonds whose date of payment and maturity is similar to that of a defined benefit obligation. Actuarial gains and losses, incurred from the change in actuarial assumptions and the difference between the assumptions and the actual results, are recognized in other comprehensive income for the period. Past service cost is recognized immediately to the extent that the benefits are already vested; otherwise, it is amortized on a straight-line basis over the period until the benefits become vested.

The Group has entered into retirement trust fund and retirement pension plan agreements to pay retirement benefits to its employees. The retirement benefit obligation represents the present value of the defined benefit obligation as adjusted for unrecognized past service costs and as reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to unrecognized actuarial losses and past service costs, plus the present value of available refunds and reductions in future contributions to the plan.

Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan. When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting treatment depends on whether the contributions are linked to service, as follows:

- If the contributions are not linked to service (e.g., contributions are required to reduce a deficit arising from losses on plan assets or from actuarial losses), they are reflected in the remeasurement of the net defined benefit liability (asset).
- If contributions are linked to service, they reduce service costs. For the amount of contribution that is dependent on the number of years of service, the entity reduces service cost by attributing the contributions to periods of service using the attribution method required by K-IFRS 1019, paragraph 70, for the gross benefits. For the amount of contribution that is independent of the number of years of service, the entity reduces service cost in the period in which the related service is rendered.

## 2-21 Share-based payment

In the case of equity-settled share-based payments, the goods or services received and the corresponding increase in equity are measured directly at the fair value of the goods or services and accounted for as compensation costs and equity. If the goods or services provided cannot be reliably measured, the endowed equity is indirectly estimated at fair value and the Group accounts for compensation costs and equity (capital adjustment). The cost of cash-settled transactions is measured initially at fair value at the grant date, taking into account the terms and conditions upon which the instruments were granted. This fair value is expensed over the period until vesting with recognition of a corresponding liability. The liability is remeasured to fair value at each reporting date up to, including the settlement date, with changes in fair value recognized in the consolidated statements of profit or loss and other comprehensive income. Also, in the case of a selectable share-based payment transaction in which the employees have a choice between a cash-settled transaction and an equity-settled transaction, the Group records the amount depending on its substance.

## 2-22 Employee benefits

### 2-22-1 Short-term employee benefits

When employees have rendered services to the Group during an accounting period, the Group recognizes the undiscounted amount of short-term employee benefits. This amount is expected to be settled in whole before 12 months after the end of the reporting period, in exchange for those services.

## 2-22-2 Termination benefits

The Group recognizes an expense for termination benefits when an employee accepts the offer or when a restriction on the Group's ability to withdraw the offer takes effect.

## 2-23 Recognition of income tax expenses and deferred tax assets and liabilities

Income taxes are composed of current and deferred taxes. All items related to taxes, other than those recognized directly in equity, are accounted for in the consolidated statements of profit or loss and other comprehensive income. Accordingly, items recognized directly in equity and the related taxes are accounted for as other comprehensive income in the consolidated statements of profit or loss and other comprehensive income.

The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted, by the reporting date, in the countries where the Group operates and generates taxable income. If the applied tax laws require interpretation, the Group calculates the income tax payable expected to be paid to the taxation authorities based on the opinion formed when the taxes were reported.

Deferred tax is provided on the temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

The Group measures deferred tax assets and liabilities at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted, or substantively enacted, by the end of the reporting period.

The Group recognizes a deferred tax asset for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized.

The Group recognizes a deferred tax liability for all taxable temporary differences related to investments in subsidiaries and associates, except to the extent that both of the following conditions are satisfied: (a) the Group is able to control the timing of the reversal of the temporary difference and (b) it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences, and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

The Group offsets deferred tax assets and liabilities if, and only if, the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities, which intend either to settle current tax liabilities and assets on a net basis or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

The Group has adopted K-IFRS 1012 Income Taxes, which applies to income taxes arising from tax laws enacted or substantively enacted to implement the Pillar Two model rules published by the Organization for Economic Co-operation and Development. The amendment introduces a temporary exception to the requirements to recognize and disclose information about deferred tax assets and liabilities and requires the disclosure of current tax expense (income) related to Pillar Two income taxes. The Group applies the exceptional provision about deferred tax requirement. The tax law has been in effect since January 1, 2024.

## 2-24 Equity

### 2-24-1 Classification of equity

The Group classifies financial instruments at initial recognition as either financial liabilities or financial equity depending on the contractual materiality. In cases where it is possible to avoid the related contractual obligations, the financial item is classified as financial equity. An equity is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities.

### 2-24-2 Stock issuance costs

New stock issuance costs or incremental costs related to stock issuance for business combinations are recorded as a deduction from paid-in capital, net of tax effects.

## 2-25 Earnings per share

Basic and diluted earnings per share ("EPS") are computed by dividing net income by the weighted-average number of shares of common stock outstanding during the year.

## 2-26 Accounting basis for trust accounts

The Group accounts for trust operations (the "trust accounts") separately from the Group's accounts in accordance with the *Financial Investment Services and Capital Markets Act*. In this regard, the funds lent by the Group to the trust accounts are accounted for as due to trust accounts in the Group's accounts, and the funds borrowed by the Group from the trust account are accounted as due from trust accounts of the Group's accounts. Trust compensation paid to the trustee (the Group) in connection with the operation, management and disposal of trust property is accounted as trust operation profits. The Group recognizes trust commissions earned from trust accounts as income from trust operations in connection with the operation, management and disposal of trust property. In addition, in the case of a joint operation money trust with a "guarantee contract of the principal or profits" of the trust account, if the operating profit falls short of the "principals to be preserved or profits to be guaranteed" and this shortage is more than covered by the trust compensation and special reserves, the Group accounts for the amount paid to the trust account as the trust account's operating losses.

## 2-27 Lease accounting

Under K-IFRS 1116, *Leases*, the Group applies a single recognition and measurement method for all leases, except for leases of low-value assets. This standard provides guidance on specific requirements and simplified methods applied by the entity.

The Group recognized the right-of-use assets and the lease liabilities that were previously classified as operating leases, except for leases of low-value assets. Right-of-use assets for most leases were recognized at carrying amounts measured as if they had been applying the standards from the inception of the lease, except that they were discounted at the lessee's incremental borrowing rate as of the date of initial application. In some leases, the right-of-use asset was recognized based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognized. The lease

liability was measured at the present value of the remaining lease payments, discounted at the incremental borrowing rate as of the date of the initial application.

The practical expedients that the Group applied are as follows:

- Application of a single discount rate to a portfolio of leases with significantly similar characteristics
- Replacement of impairment review by determining whether leases are onerous before the initial application date
- Exclusion of initial direct costs from the measurement of the right-of-use asset at the initial application date
- Using hindsight for lessee

Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

#### 2-28 Merchant banking account

As permitted by the Restructuring of Financial Institutions Act, the Group may continue its merchant banking operations, including leasing business, until the existing contracts acquired from the Korea International Merchant Bank upon merger are terminated.

Material accounting policies applied to the Group's merchant banking operations are summarized as follows:

## 2-28-1 Revenue recognition on discounted notes

Interest income on discounted notes is accrued over the term of the notes. Income from the sale of discounted notes is recognized at the date of transaction based on the difference between the purchase prices and sales prices of the notes, adjusted for interest earned during the holding period.

## 2-28-2 Cash Management Accounts ("CMA")

The Group recognizes interest income from CMA investments and interest expenses from CMA deposits as operating income and operating expenses, respectively.

## 2-29 Interest income and interest expenses

Interest income and interest expenses are recognized over time using the effective interest method.

The effective interest method is a method of calculating the AC of a financial asset or a financial liability and allocating the interest income or interest expenses over the relevant period. The EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the EIR, the Group estimates cash flows considering all contractual terms of the financial instrument, but does not consider future credit losses. Cash flows at the time of the calculation include all the fees and points paid to or received from parties to the contract that are an integral part of the EIR, including transaction costs, and all other premiums or discounts.

## 2-30 Fees and commission income

The Group's revenue recognition standard varies depending on the type of service provided to customers. Fee income, which is an integral part of the EIR of financial instruments, is adjusted using the EIR and recognized as interest income.

Fee income is recognized using the five-stage revenue recognition model (Identification of a contract with a customer → Identification of performance obligations in the contract → Determination of the transaction price → Allocation of the transaction price to the separate performance obligations in the contract → Recognition of revenue upon satisfying the performance obligations) in accordance with K-IFRS 1115.

## 2-31 Dividend income

Dividend income is recognized when the Group's right to receive the payment is established.

## 2-32 Government grants

Government grants are recognized at fair value when there is a reasonable assurance that the entity will comply with the conditions attached to it and that the grant will be received. Grants related to income are recognized as revenue on a systematic basis over the period necessary to match the related costs that the grant is intended to cover. On the other hand, grants related to an asset are presented by subtracting the carrying amount of the asset and accounting for by deducting depreciation expenses over the useful life of the asset.

### 3. MATERIAL JUDGMENTS AND ACCOUNTING ESTIMATES:

In the application of the Group's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily observable from objective sources. The estimations and assumptions are based on other factors that are related to historical experience. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current period and future periods.

In the process of applying the Group's accounting policies, management has made the following judgments that have a material effect on the amounts recognized in the consolidated financial statements:

#### 3-1 Fair value of financial instruments

The fair value of financial instruments is determined by referencing quoted market prices in active markets in the first place. For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques, including (i) between knowledgeable and willing parties in a recent arm's-length transaction, (ii) reference to the current fair value of another instrument that is substantially the same, (iii) discounted cash flow ("DCF") analysis and (iv) option-pricing models.

### 3-2 ECL of financial assets

The Group recognizes impairment losses on debt instruments, lease receivables, loan commitment and financial guarantee contracts that are accounted for at AC, or at FVOCI, based on the ECL impairment model using a three-stage model for 12-month ECL or lifetime ECL, based on changes in credit risk since initial recognition of financial assets.

| Classification |                                                                                                  | Loss allowance                                                                                                                                |
|----------------|--------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| STAGE 1        | Credit risk on a financial instrument has not increased significantly since initial recognition. | 12-month ECL: ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. |
| STAGE 2        | Credit risk on a financial instrument has increased significantly since initial recognition.     | Lifetime ECL: ECLs that result from all possible default events over the expected life of a financial instrument.                             |
| STAGE 3        | Credit impaired.                                                                                 |                                                                                                                                               |

The cumulative changes in lifetime ECL since initial recognition are recognized as a loss allowance for a financial asset that is considered credit impaired at initial recognition.

### 3-3 Retirement benefit

The cost of providing benefits under the defined benefit plans is determined using actuarial valuation. Actuarial assumptions are made for the discount rate and an increase in the future pay rate. Retirement benefits include significant uncertainties in the estimates due to the longer duration of the period.

### 3-4 Impairment of non-financial assets

The Group assesses at the end of each reporting period whether there is an indication that non-financial assets may be impaired. An intangible asset with an indefinite useful life is tested for impairment annually or whenever there is an indication that the intangible asset may be impaired. Other non-financial assets are tested for impairment whenever there is an indication that the book value cannot be recovered. For the calculation of value in use, management estimates the expected future cash flows incurred from the asset or CGU. For the calculation of present value of the expected future cash flow, appropriate discount rate is selected.

### 3-5 Income tax

There have been various transactions and tax accounting methods that have made computing the final tax expenses for the period uncertain. The contingent liability from any future tax assessments is based on estimates of the likelihood of additional taxes being imposed and has been included in the Group's consolidated financial statements for the current period. When the finalized tax expense assessments differ from the appropriated amounts, the differences, if any, are recognized in current deferred tax assets, liabilities and expenses for the period.

### 4. FAIR VALUE MEASUREMENT OF FINANCIAL ASSETS AND LIABILITIES:

The standards that the Group applies when measuring the fair values of financial assets and liabilities are described below:

- a. Quoted market prices at the settlement date in an active market are the best evidence of fair value and should be used when available.
- b. If a market for a financial instrument is not active, the Group establishes fair value using a valuation technique that makes maximum use of market inputs and includes (i) between knowledgeable and willing parties in a recent arm's-length transaction, (ii) reference to the current fair value of another instrument that is substantially the same, (iii) DCF analysis and (iv) option-pricing models. An acceptable valuation technique incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments.
- c. When determining fair value using the valuation techniques, comparison with the current market transaction of another instrument that is substantially the same as the financial instrument needed to be objectively substantiated or inclusion of variables in the marketable data must be performed. Not all significant market variables are observable, and in relevant cases, the reasonable estimates or assumptions are required to determine the fair value.

#### 4-1 Fair value hierarchy of financial instruments

Fair value hierarchy of financial instruments as of December 31, 2024 and 2023, is as follows (KRW in millions):

December 31, 2024:

| Classification                            | Levels of fair value hierarchy (*1) |            |           | Total      |
|-------------------------------------------|-------------------------------------|------------|-----------|------------|
|                                           | Level 1                             | Level 2    | Level 3   |            |
| Financial assets                          |                                     |            |           |            |
| Financial assets at FVTPL                 |                                     |            |           |            |
| Equity securities                         | 41,697                              | –          | 41,472    | 83,169     |
| Debt securities                           | 8,114,420                           | 6,271,745  | 1,654,438 | 16,040,603 |
| Derivative assets held for trading        | –                                   | 14,682,700 | 50,505    | 14,733,205 |
| Private convertible bonds, etc.           | –                                   | –          | 8,350     | 8,350      |
| Subtotal                                  | 8,156,117                           | 20,954,445 | 1,754,765 | 30,865,327 |
| Financial assets at FVOCI                 |                                     |            |           |            |
| Equity securities                         | 40,067                              | 37         | 471,335   | 511,439    |
| Debt securities                           | 8,915,997                           | 28,483,724 | –         | 37,399,721 |
| Subtotal                                  | 8,956,064                           | 28,483,761 | 471,335   | 37,911,160 |
| Derivative assets used for hedging        | –                                   | 20,774     | –         | 20,774     |
| Merchant banking account assets           | –                                   | 4,233,336  | –         | 4,233,336  |
| Total                                     | 17,112,181                          | 53,692,316 | 2,226,100 | 73,030,597 |
| Financial liabilities                     |                                     |            |           |            |
| Financial liabilities at FVTPL            |                                     |            |           |            |
| Derivative liabilities held for trading   | 5,525                               | 14,289,787 | 47,656    | 14,342,968 |
| Securities borrowed                       | 460,301                             | –          | –         | 460,301    |
| Financial liabilities designated at FVTPL | –                                   | 372,397    | –         | 372,397    |
| Subtotal                                  | 465,826                             | 14,662,184 | 47,656    | 15,175,666 |
| Derivative liabilities used for hedging   | –                                   | 353,472    | 35,701    | 389,173    |

(\*1) The Group recognizes transfers between levels at the beginning of reporting period when events or changes in circumstances causing the transfers between levels have occurred.

The Group classifies and discloses the fair value of the financial instruments into the following three hierarchies:

- a. Level 1: The fair values are based on quoted prices (unadjusted) in active markets.
- b. Level 2: The fair values are based on techniques using observable market data.
- c. Level 3: The fair values are based on techniques using unobservable inputs.

Details of fair value, valuation techniques and inputs used to develop those measurements classified into Level 2 assets and liabilities that are measured at fair value as of December 31, 2024 and 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification                            | Fair value | Valuation techniques                                                        | Inputs                                                                                                         |
|-------------------------------------------|------------|-----------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------|
| Financial assets                          |            |                                                                             |                                                                                                                |
| Financial assets at FVTPL                 |            |                                                                             |                                                                                                                |

(\*) Changes in the availability of observable market data for the financial instrument have resulted in a transfer between fair value hierarchies.

4-3 Amount recognized in profit or loss from changes in the fair value hierarchy of financial instruments categorized as Level 3

The amount recognized in profit or loss from changes in the fair value hierarchy of financial instruments categorized as Level 3 for the years ended December 31, 2024 and 2023, is recorded in the consolidated financial statements as follows (KRW in millions):

For the year ended December 31, 2024:

| Classification                                          | Total gains or losses recognized in profit or loss | Profit or loss recognized related to financial instruments held at the end of reporting period |
|---------------------------------------------------------|----------------------------------------------------|------------------------------------------------------------------------------------------------|
| Gain on financial instruments at FVTPL                  | 76,941                                             | 83,860                                                                                         |
| Loss related to derivative instruments used for hedging | (7,896)                                            | (7,896)                                                                                        |
| Total                                                   | 69,045                                             | 75,964                                                                                         |

For the year ended December 31, 2023:

| Classification                                          | Total gains or losses recognized in profit or loss | Profit or loss recognized related to financial instruments held at the end of reporting period |
|---------------------------------------------------------|----------------------------------------------------|------------------------------------------------------------------------------------------------|
| Gain on financial instruments at FVTPL                  | 10,816                                             | 7,276                                                                                          |
| Gain related to derivative instruments used for hedging | 3,033                                              | 3,033                                                                                          |
| Total                                                   | 13,849                                             | 10,309                                                                                         |

#### 4-4 Transfers between fair value hierarchies

The transfers out of Level 3 of the fair value hierarchy for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                          | For the year<br>ended December 31, 2024 | For the year<br>ended December 31, 2023 |
|-----------------------------------------|-----------------------------------------|-----------------------------------------|
| The transfers out of Level 3 to Level 1 | –                                       | (1,000)                                 |

#### 4-5 Sensitivity analysis

Sensitivity analysis of the financial instruments classified as Level 3 from the changes in significant unobservable inputs as of December 31, 2024 and 2023, is as follows. The impact of fair value fluctuations on profit or loss or other comprehensive income is divided into favorable and unfavorable changes.

The financial instruments classified as Level 3, which were excluded from the sensitivity analysis as it is practically impossible, amount to ₩1,606,475 million and ₩1,343,558 million as of December 31, 2024 and 2023, respectively (KRW in millions):

December 31, 2024:

| Classification                               | Favorable changes | Unfavorable changes |
|----------------------------------------------|-------------------|---------------------|
| Financial assets                             |                   |                     |
| Financial assets at FVTPL                    |                   |                     |
| Equity securities (*2)                       | 257               | (106)               |
| Debt securities (*3)                         | 2,330             | (2,227)             |
| Derivative assets held for trading (*1)      | 510               | (592)               |
| Subtotal                                     | 3,097             | (2,925)             |
| Financial assets at FVOCI                    |                   |                     |
| Equity securities (*2)                       | 38,169            | (17,062)            |
| Total                                        | 41,266            | (19,987)            |
| Financial liabilities                        |                   |                     |
| Derivative liabilities held for trading (*1) | 212               | (209)               |
| Derivative liabilities used for hedging (*1) | 69                | (116)               |
| Total                                        | 281               | (325)               |

(\*1) Unfavorable and favorable changes in fair value are calculated by increasing/decreasing 10% of 1) correlation between rates of Interest Rate Swap ("IRS") of KRW, 2) correlation between rates of IRS of KRW and USD, 3) correlation between stock index and individual stock and 4) correlation between exchange rates of KRW/USD and stock index.

(\*2) Changes in fair value of equity securities are calculated by increasing/decreasing growth rate (0.0% ~ 1.0%) and discount rate, which are main unobservable inputs.

(\*3) Changes in fair value of debt securities are calculated by increasing/decreasing discount rate (-1.0% ~ 1.0%), which is the main unobservable input. It is impossible in practice to assess sensitivity based on the changes in input variables of beneficiary securities, but favorable or unfavorable changes in fair value, only limited to real estate, are calculated by changing discount rate of lease cash flow (-1.0% ~ 1.0%) and growth rate of selling price of real estate (-1.0% ~ 1.0%).

December 31, 2023:

| Classification                               | Favorable changes | Unfavorable changes |
|----------------------------------------------|-------------------|---------------------|
| Financial assets                             |                   |                     |
| Financial assets at FVTPL                    |                   |                     |
| Debt securities (*3)                         | 1,419             | (1,331)             |
| Derivative assets held for trading (*1)      | 118               | (164)               |
| Subtotal                                     | 1,537             | (1,495)             |
| Financial assets at FVOCI                    |                   |                     |
| Equity securities (*2)                       | 19,012            | (10,743)            |
| Total                                        | 20,549            | (12,238)            |
| Financial liabilities                        |                   |                     |
| Derivative liabilities held for trading (*1) | 122               | (98)                |
| Derivative liabilities used for hedging (*1) | 9                 | (23)                |
| Total                                        | 131               | (121)               |

(\*1) Unfavorable and favorable changes in fair value are calculated by increasing/decreasing 10% of 1) correlation between rates of Interest Rate Swap of KRW, 2) correlation between rates of IRS of KRW and USD, 3) correlation between stock index and individual stock and 4) correlation between exchange rates of KRW/USD and stock index.

(\*2) Changes in fair value of equity securities are calculated by increasing/decreasing growth rate (0.0%~1.0%) and discount rate, which are main unobservable inputs.

(\*3) Changes in fair value of debt securities are calculated by increasing/decreasing discount rate (-1.0%~1.0%), which is the main unobservable input. It is impossible in practice to assess sensitivity based on the changes in input variables of beneficiary securities, but favorable or unfavorable changes in fair value, only limited to real estate, are calculated by changing discount rate of lease cash flow (-1.0%~1.0%) and growth rate of selling price of real estate (-1.0%~1.0%).

4-6 Financial assets and liabilities that are not measured at fair value

Fair value hierarchy of financial assets and liabilities at AC as of December 31, 2024 and 2023, is as follows (KRW in millions):

December 31, 2024:

| Classification                            | Levels of fair value hierarchy |            |             | Total       |
|-------------------------------------------|--------------------------------|------------|-------------|-------------|
|                                           | Level 1                        | Level 2    | Level 3     |             |

(\*1) Lease liabilities are included in other financial liabilities.

(\*2) The carrying amount is considered fair value without applying the DCF model because it is derived from various transactions and has relatively short or indefinite maturities.

#### 4-7 Gain and loss on deferred Day 1

Changes in gain (loss) on deferred Day 1 for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                               | 2024    | 2023    |
|----------------------------------------------|---------|---------|
| Beginning balance                            | (1,461) | (2,130) |
| Amount of new accrual                        | 436     | (3,080) |
| Amounts recognized as current profit or loss | (172)   | 3,749   |
| Ending balance                               | (1,197) | (1,461) |

#### 4-8 Financial instruments transfer transaction

##### 4-8-1 Bonds sold under repurchase agreements

As of December 31, 2024 and 2023, details of financial instruments that did not meet the derecognition requirements due to the sale of securities held by the Group on condition of repurchase at a fixed price under the bonds sold under repurchase agreements are as follows (KRW in millions):

| Classification                         | December 31, 2024 |            | December 31, 2023 |            |
|----------------------------------------|-------------------|------------|-------------------|------------|
|                                        | Book value        | Fair value | Book value        | Fair value |
| Transferred asset sets                 |                   |            |                   |            |
| Financial assets at FVOCI              | 673,659           | 673,659    | 532,760           | 532,760    |
| Financial assets at AC                 | 800,420           | 785,646    | 801,692           | 770,167    |
| Total                                  | 1,474,079         | 1,459,305  | 1,334,452         | 1,302,927  |
| Related liabilities                    |                   |            |                   |            |
| Bonds sold under repurchase agreements | 1,425,039         | 1,431,511  | 1,140,937         | 1,119,671  |

#### 4-8-2 Loaned securities

When lending securities held by the Group, ownership of the securities is transferred; however, the securities will be returned at the end of the rental period. Therefore, the Group continues to recognize the entire loaned securities as it retains most of the risks and rewards of the securities. Details of loaned securities as of the end of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification            | December 31, 2024 |            | December 31, 2023 |            |
|---------------------------|-------------------|------------|-------------------|------------|
|                           | Book value(*)     | Fair value | Book value(*)     | Fair value |
| Financial assets at FVTPL | 690,390           | 690,390    | 9,936             | 9,936      |
| Financial assets at FVOCI | 518,255           | 518,255    | 1,051,270         | 1,051,270  |
| Financial assets at AC    | 69,581            | 66,955     | 194,312           | 188,457    |
| Total                     | 1,278,226         | 1,275,600  | 1,255,518         | 1,249,663  |

(\*) Book value is before deducting the allowance for doubtful accounts.

#### 4-8-3 Asset-backed securitization

The Group's consolidated structured companies issued asset-backed securities by securitizing their securities and loans. The Group retains the contractual right to receive cash flows from the financial assets, but the received cash flows are effectively transferred to the holders of asset-backed securities. In addition, the Group bears related risks through purchase agreements or credit exposures.

As of the end of December 31, 2024 and 2023, details of financial instruments that were transferred, but not derecognized in relation to asset-backed securitization transactions by the Group, are as follows (KRW in millions):

| Classification         |                                       | Book value (*)    |                   |
|------------------------|---------------------------------------|-------------------|-------------------|
|                        |                                       | December 31, 2024 | December 31, 2023 |
| Transferred asset sets | Financial assets at FVTPL             | 33,333            | 40,000            |
|                        | Loans at AC                           | 2,321,725         | 2,482,508         |
|                        | Total                                 | 2,355,058         | 2,522,508         |
| Related liabilities    | Asset-backed securitization borrowing | 2,362,269         | 2,537,828         |

(\*) Book value is before deducting the allowance for doubtful debts.

## 5. FAIR VALUE OF FINANCIAL ASSETS AND LIABILITIES:

Book values and fair values of financial assets and liabilities as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                          | December 31, 2024 |             | December 31, 2023 |             |
|-----------------------------------------|-------------------|-------------|-------------------|-------------|
|                                         | Book value        | Fair value  | Book value        | Fair value  |

(\*) Lease liabilities are included in other financial liabilities.

The following standards are applied in measuring the fair value of financial instruments:

- a. Loans: Expected cash flows, current market interest rates and discount rates, including borrowers' credit risks are factors to calculate the fair value of loans. For lines of credit available for deposit and withdrawal from time to time and loans with a short-term maturity (less than three months), it is assumed that the carrying amounts approximate their fair value.
- b. Securities at AC: The fair value of securities at AC is as stated by the market, broker or by credible sources. If none of the information from these entities is usable, quoted market price of financial instruments with similar credit ratings, maturity and return on investment is used to estimate the fair value.
- c. Deposits: For deposits without an explicit maturity period, including deposits with no interest, deposits that have a short-term maturity (less than three months) and deposits with a floating-rate readjustment period of less than three months, it is assumed that the carrying amounts approximate their fair value. The estimated fair value of fixed interest-bearing deposits is based on discounted future cash flows using interest rates for new financial liabilities with similar time to maturity.
- d. Borrowings: For borrowings that have a short-term maturity (less than three months) and borrowings with floating-rate readjustment period of less than three months, it is assumed that the carrying amounts approximate their fair value. The estimated fair value of fixed interest-bearing borrowings is based on discounted future cash flows using interest rates for new financial liabilities with similar time to maturity.
- e. Debentures: For debentures issued, the fair values are determined based on quoted market prices in active market. For those issued where quoted market prices in active markets are not available, a DCF model is used based on a current interest rate yield curve appropriate for the remaining term to maturity and credit spreads.

## 6. CATEGORIES OF FINANCIAL ASSETS AND FINANCIAL LIABILITIES:

6-1 The Group categorizes its financial assets as of December 31, 2024 and 2023, as follows (KRW in millions):

December 31, 2024:

| Classification                     | Financial assets<br>at FVTPL | Financial assets<br>at FVOCI | Financial assets<br>at AC | Derivatives<br>used for hedging | Total       |
|------------------------------------|------------------------------|------------------------------|---------------------------|---------------------------------|-------------|
| Cash and due from banks            | –                            | –                            | 35,032,864                | –                               | 35,032,864  |

(\*) Lease liabilities are included in other financial liabilities.

## 7. OFFSETTING FINANCIAL ASSETS AND LIABILITIES:

The Group engages in master netting agreements with counterparties through the International Swaps and Derivatives Association or similar agreements in relation to over-the-counter derivatives and spot exchange transactions. Under this agreement, in the event of the counterparty's bankruptcy, etc., the transaction with the counterparty will be terminated. Upon termination, the amounts to be paid or received by each party are offset and paid or received. Repurchase agreements for trade and securities lending and borrowing of securities have been made by offsetting arrangement, which is similar to the arrangements for derivatives.

In the case of uncollected domestic exchange bonds and unpaid domestic exchange obligations between banks, as the Group holds the rights of setoff and settles in net amounts, the net amounts are presented in the consolidated statements of financial position. Other financial instruments include bonds and debts related to securities traded in the market, which are presented in net amounts in the consolidated statements of financial position as there is a legally enforceable right of setoff and intention to settle on a net basis.

7-1 Financial assets offset, the executable master netting agreement and financial assets subject to a similar arrangement as of December 31, 2024 and 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification                                      | Gross amounts of recognized financial assets | Gross amounts of financial liabilities offset | Net amounts of financial assets presented in the consolidated financial statements | Related amounts not offset (*) |                 | Net amount |

| Total                                               | 62,314,642                                        | 36,751,610                               | 25,563,032                                                                              | (17,093,335)                   | (251,013)       | 8,218,684  |

(\*) The rights to offset exist only in case of default, insolvency or bankruptcy.

Accordingly, the amounts are not offset in the consolidated statements of financial position as they do not meet the criteria for offsetting.

## 8. RISK MANAGEMENT:

The Group is exposed to credit risk, liquidity risk, market risk and various operating risks. The objectives of risk management are to pursue economic benefits by managing the associated risks in the changing financial environment and to utilize capital efficiently.

The basic principles of risk management are as follows:

- a. Minimize the rapid fluctuation in profit by balancing the risks and the income.
- b. Maximize long-term shareholders' value.
- c. Comply with procedures to ensure operating activities are confined to allowable risk limits.
- d. Examine the type and size of risks along with the changes in potential economic value of portfolios, and establish risk management strategy in order to utilize assets and distribute capital efficiently.

The basic policies in order to realize the basic principles of risk management are as follows:

- a. Set and comply with allowable limits for each risk type.
- b. Establish an appropriate balance between income and associated risk.
- c. When a conflict between income and associated risk exists, the Group pursues income while complying with the allowable risk limits.
- d. Prioritize the distribution of risk in order to avoid risk concentration in certain areas.
- e. Analyze the effect of various market fluctuations on parts or the entire portfolio on a regular basis.
- f. Separate risk management segments, operational segments and other segments that deal with trade confirmations and payments in order to maintain independence.

## 8-1 Strategy and procedure of risk management

### 8-1-1 Operation of and setting risk limits

The Group established and operates a limit management system to maintain an appropriate level of risk relative to the equity capital held. The Risk Management Committee approves total risk limits and limits by types of risks, taking into account capital, business plans, risk management regulations and institutional changes within the risk level that the Group can manage. The Risk Management Operation Committee sets up and allocates other operational limits (e.g., by organization, product, investment and loss) to comply with allowable limits for each type of risk, as approved by the Risk Management Committee, and periodically checks the status of limit management.

### 8-1-2 Risk measurement and management

The Group prepares appropriate risk measurement methods considering the nature of risks and measures them by the types of risks. Risk measurement and evaluation results are regularly reviewed and reported to the Risk Management Committee, Risk Management Operation Committee and management. Risk measurement and evaluation results are also used for daily business management activities, such as establishment of business plan and management strategy.

### 8-1-3 Operation of risk management information system

In order to provide advanced risk management in a rapidly changing financial environment that meets the new Bank for International Settlements ("BIS") standards, the Group has established and adopted a credit risk-weighted assets ("RWA") calculation system based on Basel 3 regulation since March 2021. The market/operational RWA has been calculated based on Basel 3 standard model since January 2023.

#### 8-1-4 Operation of crisis management system

The Group operates a crisis management system that can respond effectively to crises caused by drastic changes in the internal and external management environment. The Group operates an early warning system in order to respond to the drastic changes in the financial market in a consistent and systematic manner. In the event of an anomaly, the holding company declares the level of crisis at the group level, and the Group analyzes the impact on the portfolio in accordance with the step-by-step response plan and carries out specific countermeasures.

#### 8-2 Organization and structure of risk management

The risk management organization consists of the Risk Management Committee, the Risk Management Operation Committee under the Risk Management Committee within the board of directors, the risk management officer and the organization in charge of risk management, which are the top decision-making bodies for the risk management. The organization in charge of risk management, independent from operating segment, manages risk limits and risk management policies.

##### 8-2-1 Risk Management Committee

The Risk Management Committee regularly holds meeting once every quarter and resolves the establishment and management of allowable limits for risks, establishment and changes in risk management policies and reviews the results of the management of allowable risk limits and suitability tests of risk management system.

##### 8-2-2 Risk Management Operation Committee

The Risk Management Operation Committee is responsible for setting and allocating specific operational limits to comply with the allowable limits for each type of risk as resolved by the Risk Management Committee, adjusting the internal capital limit between business units within the same risk type and carrying out risk management policies and strategies set by the Risk

Management Committee, including preliminary deliberations on the agenda items.

### 8-2-3 Organization in charge of risk management

The Risk Management Group is composed of Comprehensive Risk Management team, Credit Risk Management team and Credit Supervision team. The Risk Management Group is independent of operating and investment segments and manages the execution of risk management policies. The Comprehensive Risk Management team oversees the market, interest rate, liquidity, operational risk and middle office and supports the Risk Management Committee and the Risk Management Operation Committee. The Credit Risk Management team oversees credit risk and credit concentration risk. The Credit Supervision team oversees the loans and early warning system.

### 8-3 Credit risk

Credit risk is the risk incurred when the Group faces a loss because its customers or counterparties fail to discharge their contractual obligations. Credit risk arises from on-balance and off-balance accounts, including loans, derivatives, securities, financial guarantee agreements and other guarantees.

#### 8-3-1 Management of credit risk

##### 8-3-1-1 Loans

##### 8-3-1-1-1 Measurement of credit risk

To determine the possibility of bankruptcy for its customers or counterparties, the Group uses various methods comprehensively. Risks pertaining to the retail sector compared to those pertaining to the corporate sector are relatively easy to predict, but cyclical and seasonal factors may influence the outcomes.

The frequency of impairment loss in the overall retail sector is relatively high, but in terms of individual cases, the loss rate is lower than in the corporate sector. Based on these differences, the Group manages each sector differently in terms of credit rating, pricing and subsequent management.

As for the business customers, the branch managers and Credit Rating team carry out the credit risk assessment by using a detailed valuation model, depending on the size and the nature of the industry. The corporate financial valuation model is further subdivided based on the characteristics of the loans and is a combination of statistical and expert valuation models. Also, the Loan Review team of the credit risk management regularly performs the subsequent reviews in order to establish adequacy of the credit grading. As for the retail sector, a credit scoring system is used to compute the credit scores of the borrower. The system includes an application scoring model, which is used for the application of loans, and a behavioral scoring model, which has been used after handling the loans.

Expected loss is calculated using the expected default rate based upon the historical default rate and the estimated loss rate gives a rise to the default rate from a collection of historical information. A measured expected loss is reflected in the client's interest rate and allowances when applying for or renewing a loan. Unexpected loss, which takes into account the allowance for potential volatility in the actual loss compared to the expected loss, is measured using K-function of the Basel 3 internal rating method. The value measured is used as a credit risk reference value in capital allocation and is reflected as part of the unexpected loss when calculating interest rates.

## 8-3-1-1-2 Management of credit risk

### 8-3-1-1-2-1 Management process

Both retail and corporate sectors are developing and operating a credit risk management system appropriately designed for each sector. The Credit Risk Management Committee and the Credit Rating team measure and manage credit risks for the corporate sector; Credit Risk Management Committee and Personal Loans Committee measure and manage credit risks for the retail sector.

The Group manages, as well as controls the credit risk by setting the limits on the amount of risk willing to accept for individual counterparties and for geographical and industry concentration, and by monitoring exposures relating to such limits. The Group reviews on a monthly basis in accordance with the economic conditions and industry characteristics and examines the adequacy of the limits on a quarterly basis. The Group continuously examines the adequacy of credit rating models for retail and corporate sectors, PD, LGD and Exposure At Default("EAD") and manages data related to the estimation of the credit rating models, PD, LGD and EAD.

### 8-3-1-1-2-2 Credit limits management and capital allocation

The Group annually performs a comprehensive analysis of economic conditions and changes in the economic environment in order to appropriately assess the credit quality of financial assets by setting credit limits on same entities, industries, countries and financial instruments. In addition, for the unexpected loss management, the Group regularly sets, distributes and checks for the compliance maintenance of internal capital limits according to the corporate and household sectors and the size of clients through the risk management system.

### 8-3-1-1-2-3 Risk monitoring and early warning system

The Group measures and manages the risk indicators, such as delinquency rate, roll rate and vintage. Also, in order to assess the credit quality of the assets, the Group operates an early warning system and regularly examines companies whose credit rating is likely to degrade.

#### 8-3-1-1-2-4 Credit rating system

In order to separately evaluate the characteristics of clients in the corporate sector, the Group operates a detailed valuation model based on the external and non-external audit and is in the process of continuing the stability of the corporate credit rating system through the subsequent examinations and performance improvements. The Group operates a detailed valuation model based on the credit rating model and the activity rating model for the household sector, in accordance with the client's characteristics. The Group improves the efficiency of the model through the subsequent examinations and performance improvements. Credit ratings for new clients, as well as an automatic renewal and adjustments to the credit limits, are managed by the household and Small Office and Home Office ("SOHO") credit extension system.

#### 8-3-1-1-2-5 Examination of credit

For a large amount of credit line, after the approval of credit extension, the Group regularly examines the borrower's credit status and the adequacy of the borrower's credit rating as part of the subsequent management process. In addition, the Group significantly focuses on industries by increasing credit risks based on the analysis of the risk indicators and examines samples for smaller credit extensions.

#### 8-3-1-1-2-6 Risk mitigation policy

The Group obtains the collateral for the granted loans in order to reduce risks. Guidelines are implemented regarding the acceptability of types of collateral and valuation parameters. The main types of the collateral obtained are as follows:

- a. Residential properties in relation to mortgage loans
- b. Business assets, such as equipment, plants and real estate properties
- c. Financial instruments, such as deposits, debt and equity securities

#### 8-3-1-2 Debt securities

The Group trades the debt securities above the investment-grade status level in order to manage the credit risks and manage the exposure of credit ratings to maintain credit quality of the assets.

#### 8-3-1-3 Derivative instruments

The credit risk arising from the derivative instruments is managed based on the net position and maintained under a strict control limit. The degree of credit risk exposure is measured based on the positive fair values of derivative instruments. The Group manages the exposure as a part of the unused commitment of loans.

#### 8-3-2 Significant increase in credit risk

The Group measures the ECL for debt instruments at AC or FVOCI in three stages, as described below.

##### 8-3-2-1 Stage 1: Twelve-month ECL

For financial assets, whose credit risk has not increased significantly since initial recognition, ECLs that result from default events that are possible within 12 months after the reporting date are recognized.

##### 8-3-2-2 Stage 2: Lifetime ECL

For financial assets, whose credit risk has increased significantly, but not impaired, since initial recognition, ECLs that result from all possible default events over the expected life of the financial instrument are recognized.

##### 8-3-2-3 Stage 3: Lifetime ECL

A financial asset is credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Lifetime ECL is recognized for credit-impaired financial assets and interest income is recognized using the EIR on AC.

The Group assesses, at each reporting date, whether the credit risk increases significantly compared to that of initial recognition, using internal and external credit rating information, early warning system and number of days past due.

#### 8-3-2-4 Occurrence of default

The Group considers that a default has occurred for financial assets on the following situations:

- a. When receivables are sold despite an economic loss.
- b. When receivables have decreased due to adjustments resulting in an exemption of principal, interest or related fees or delayed payments.
- c. When the borrower has been declared bankrupt or has declared bankruptcy or has taken other similar measures to delay or avoid repayments.

#### 8-3-2-5 Method for determining whether a financial asset is credit impaired

A financial asset is deemed impaired if, and only if, there is an objective evidence of impairment as a result of one or more events, which have occurred after the initial recognition of the item (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows, such as changes in arrears or economic conditions, which correlate with defaults, delinquency in interest for more than 90 days, credit information management rules and damages incurred due to poor exposure.

### 8-3-3 Measurement of ECL

ECL is measured at the probability-weighted amounts of the present value of all cash shortfalls over the expected life of the financial instrument. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the Group expects to receive.

However, the Group adjusts historical data, such as credit loss experience, on the basis of current observable data to reflect the effects of the current conditions and its forecasts of future conditions that did not affect the period on which the historical data is based and to remove the effects of the conditions in the historical period that are not relevant to the future contractual cash flows. Also, the Group measures ECL using the macroeconomic factors, such as the growth rate, interest rate and stock indices. The methodology for future economic forecasts is regularly reviewed.

If the credit risk on financial instruments, for which lifetime ECLs have been recognized, subsequently improves so that the requirement for recognizing lifetime ECL is no longer met, the loss allowance should be measured at an amount equal to 12-month ECL.

### 8-3-4 Write-off policy

Financial assets are written off when an entity has no reasonable expectations of recovering the contractual cash flows on a financial asset in its entirety or a portion thereof. Generally, financial assets are written off when it is determined that the Group is not able to generate sufficient cash flows to make repayments. However, financial assets written off can be recovered by the Group.

### 8-3-5 The maximum exposure to credit risk

The maximum exposure to credit risk as of December 31, 2024 and 2023, is as follows. The following table shows the maximum exposure to credit risk before the effect of mitigation through credit enhancement and collateral agreements, and reflects the impairment losses and offsetting. Equity securities in financial assets at FVTPL and financial assets at FVOCI are excluded (KRW in millions).

| Classification                      | December 31, 2024 | December 31, 2023 |
|-------------------------------------|-------------------|-------------------|
| On-balance-sheet items              |                   |                   |
| Due from banks                      | 32,867,673        | 28,821,920        |
| Financial assets at FVTPL           |                   |                   |
| Debt securities                     | 16,040,603        | 11,442,332        |
| Derivative assets held for trading  | 14,733,205        | 5,965,872         |
| Private convertible bonds, etc.     | 8,350             | 7,447             |
| Subtotal                            | 30,782,158        | 17,415,651        |
| Financial assets at FVOCI           | 37,399,721        | 36,243,645        |
| Securities at AC                    | 33,966,179        | 36,337,949        |
| Derivative assets used for hedging  | 20,774            | 1,723             |
| Loans                               | 367,214,258       | 347,246,910       |
| Other financial assets              | 14,654,073        | 18,078,742        |
| Merchant banking account assets     | 4,233,336         | 4,637,824         |
| Total                               | 521,138,172       | 488,784,364       |
| Off-balance-sheet items             |                   |                   |
| Financial guarantee contracts       | 502,593           | 498,156           |
| Payment guarantee                   | 24,353,746        | 23,535,495        |
| Commitments                         | 114,936,363       | 109,725,839       |
| Merchant banking account-commitment | 660,000           | 770,000           |
| Total                               | 140,452,702       | 134,529,490       |

### 8-3-6 Details of effects of credit risk mitigation by collateral and other credit enhancements

The financial effects related to credit risk mitigated by collateral and other credit enhancements as of December 31, 2024 and 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification | Impaired loan         |                       |
|----------------|-----------------------|-----------------------|
|                | Individual assessment | Collective assessment |
| Guarantees     | 59,723                | 360,920               |
| Deposits       | –                     | 19,706                |
| Real estates   | 247,784               | 405,828               |
| Securities     | –                     | 21                    |
| Others         | 6,757                 | 16,687                |
| Total          | 314,264               | 803,162               |

December 31, 2023:

| Classification | Impaired loan         |                       |
|----------------|-----------------------|-----------------------|
|                | Individual assessment | Collective assessment |
| Guarantees     | 16,627                | 311,605               |
| Deposits       | –                     | 18,575                |
| Real estates   | 213,417               | 338,703               |
| Securities     | –                     | 1                     |
| Others         | 5,847                 | 6,395                 |
| Total          | 235,891               | 675,279               |

8-3-6-1 The amount of financial assets for which loss allowance is not recognized due to sufficient collaterals is ₩1,019,090 million and ₩1,125,587 million as of December 31, 2024 and 2023, respectively.

8-3-6-2 There is no change in the collateral policy of the Group.

## 8-3-7 Credit risk exposure

### 8-3-7-1 Loans

As of December 31, 2024 and 2023, gross carrying amounts of loans by internal credit rating in accordance with the loss allowance measurement method are as follows (KRW in millions):

December 31, 2024:

| Classification  | 12-month ECL | Lifetime ECL              |                       | Total       |
|-----------------|--------------|---------------------------|-----------------------|-------------|
|                 |              | Non-credit-impaired loans | Credit-impaired loans |             |
| Household loans |              |                           |                       |             |
| Grade 1         | 108,007,233  | 12,181,951                | –                     | 120,189,184 |
| Grade 2         | 11,810,179   | 6,603,980                 | –                     | 18,414,159  |
| Grade 3         | 111,797      | 432,917                   | 543,357               | 1,088,071   |
| Subtotal        | 119,929,209  | 19,218,848                | 543,357               | 139,691,414 |
| Corporate loans |              |                           |                       |             |

#### 8-4 Liquidity risk

The Group defines liquidity risk as the possibility of incurring losses due to a temporary shortage in funds caused by a maturity mismatch or an unexpected capital outlay leading to rise in interest or sale of assets at a price below normal price.

##### 8-4-1 Measurement of liquidity risk

The Group maintains a limit management indicator to measure the liquidity coverage ratio, liquidity ratio in foreign currency, net stable funding ratio, foreign currency maturity mismatch ratio and long-term access to financing ratio in foreign currency in accordance with the guidelines and standards of the Financial Supervisory Service. In addition, the Group maintains a monitoring indicator to measure unbalance of funding, etc., to manage the liquidity risk and manage early warning indicators in order to identify worsening trends in the early stage to respond in a timely manner.

##### 8-4-2 Management of liquidity risk

At an early stage, the Group identifies factors affecting liquidity in order to manage liquidity risks and has achieved an adequate level of liquidity via performing systematic management.

The Group has the following basic principles for liquidity risk management:

- a. Set and comply with liquidity risk limits, and coordinate and manage early warning indicators to identify liquidity risk at an early stage.
- b. Regularly execute an analysis of stress tests and prepare an emergency procurement plan in case of liquidity.
- c. Focus on maintaining a diversified portfolio in order to avoid excessive concentrations of risks.
- d. Evaluate and manage the effect of a large amount of money, which is loaned out, invested or procured on liquidity risks.

In order to manage liquidity risk, the Group builds internal control systems for each department. In order to comply with liquidity ratios and the maturity mismatch ratio set by the Financial Supervisory Service, the Comprehensive Risk Management department conducts daily monitoring. Liquidity risk status is reported to the Risk Management Operation Committee on a monthly basis and to the Risk Management Committee on a quarterly basis.

In order to maintain the liquidity risk management indicators to stay within acceptable limits, the Treasury department recommends the necessary measures in relation to the procurement and operation of the assets and liabilities traded in the capital market. In addition, stages of emergency planning have been established in order to respond to liquidity emergencies. The Planning and Management department has established a portfolio management strategy based on the internal and external liquidity risk management requirements and the outlook of the procurement and operating markets.

#### 8-4-3 Analysis of contract maturity

##### 8-4-3-1 Analysis criteria

The details of the remaining contractual maturities of financial liabilities are analyzed by the earliest maturity date when the Group would be required to pay, based on the undiscounted cash outflows of the Group's financial liabilities. In addition, financial liabilities at FVTPL and depository liabilities (payment on demand) are shown at fair value in the immediate payment column. All derivatives used for hedging are presented based on the net cash flows, as all products are paid in the net amount. A contract maturity exists in payment guarantees that correspond to financial guarantees, such as bond issuance and loan security provided by the Group; loan commitment; and other credit granting. However, payment must be made immediately once the counterparty requests payment. As such, they are included in the immediate payment column.

8-4-3-2 The remaining contractual maturities of financial liabilities and off-balance-sheet items

The remaining contractual maturities of financial liabilities and off-balance-sheet items as of December 31, 2024 and 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification                        | On demand   | Less than<br>1 month | 1 month<br>~ 3 months | 3 months<br>~ 1 year | 1 year<br>~ 5 years | More than<br>5 years | Total       |

Assets available for use to execute unused loan commitments after redeeming all financial liabilities are cash and bank deposits, debt securities, equity securities and loans. In addition, the Group is able to cope with unexpected cash outflows through the sale of securities and additional sources of funding, such as asset-backed securitization.

## 8-5 Market risk

Market risk is a risk incurred in assets and liabilities, subject to management, based on the changes in market prices, such as interest rate, stocks and foreign exchange.

### 8-5-1 Market risk management

The purpose of market risk management is to manage the loss of assets and liabilities incurred due to changes in market variables, such as interest rates, foreign exchanges and equity prices, to remain within the allowable limits in order to ensure profitability and stability.

### 8-5-2 Market risk management targets

Market risk management targets include marketable securities, foreign currency net positions, derivatives and other assets and liabilities, with embedded market risks. The Group classifies exposures to market risk into either trading or non-trading positions and manages each of those portfolios separately.

### 8-5-3 Management of market risk related to trading position

#### 8-5-3-1 Trading account classification

A trading account is a concept of a trading book and refers to a set of products held for short-term trading purposes, etc., and there should be no legal restrictions on selling or completely hedging products that are to be classified as trading accounts. Specifically, the following financial products are classified as trading accounts, excluding products that cannot be classified as trading accounts and bank account products:

- a. Financial instruments for the short-term trading
- b. Financial instruments for the purpose of hedging risks
- c. Financial instruments for the purpose of acquiring arbitrages
- d. From A to C, hedge of other goods held for any of the purposes
- e. Financial instruments included in the Correlation Trading Portfolio ("CTP")
- f. Financial instruments that generate credit or stock net selling positions in bank accounts (\*)

- g Underwriting arrangements for securities that are actually expected to be purchased on the settlement date
- (\*) Credit or stock net selling positions in bank accounts: Bank account positions whose current value rises as issuer credit spreads of debt instruments expand or share prices fall

#### 8-5-3-2 Management of the trading position limits

The Risk Management Committee divides capital, annual loss and exposure limit in relation to market risks of the trading position by business unit (division) annually. Within the given limit, the Risk Management Operation Committee further subdivides the limits by business units (divisions) and desks. The Risk Management Group provides information necessary for deliberation and review by the committee, reports trading limits and measures risks.

The middle office performs mark-to-market measures and monitors trade violations and compliance with the limits. The middle office establishes and complies with trading policy regulations, measures market risk for trading positions and checks daily compliance within the acceptable limits for each risk. The office also conducts daily inspections of changes in the management exposure, compliance with the limit, postverification and crisis analysis, and reports the results to the management team every day.

#### 8-5-3-3 Market Risk Measurement (Basel 3 Standard)

The basic calculation method for managing and measuring the exposure of trading account products to market risks is calculated by dividing them into sensitivity risk, default risk and residual risk. Sensitivity risk refers to the risk of loss due to changes in market risk factors, such as exchange rates, interest rates and stock prices. The risk of default refers to the risk of loss due to bankruptcy of bonds or stock issuers.

Starting from December 31, 2024, the bank excludes structural foreign exchange positions approved by the Financial Supervisory Service Governor from the market risk in market risk regulatory capital measurement. The currencies of the structural foreign exchange positions are AED (United Arab Emirates), BRL (Brazil), CNY (China), IDR (Indonesia), INR (India), MXN (Mexico), PHP (Philippines), RUB (Russia) and TWD (Taiwan).

#### 8-5-3-4 Amount of risk by risk type

The details of regulated capital by market risk group as of December 31, 2024, are as follows (KRW in millions):

| Classification                | Risk type                                        | Amount  |
|-------------------------------|--------------------------------------------------|---------|
| Sensitivity Risk Charge       | General interest rate risk                       | 41,732  |
|                               | Credit spread risk ("CSR") (non-securitizations) | 33,871  |
|                               | CSR (securitizations (non-CTP))                  | —       |
|                               | CSR (securitization (CTP))                       | —       |
|                               | Equity risk                                      | 20,548  |
|                               | Foreign exchange risk (*)                        | 269,426 |
|                               | Commodity risk                                   | —       |
| Default Risk Charge           | Non-securitizations                              | 34,343  |
|                               | Securitizations (non-CTP)                        | —       |
|                               | Securitizations (CTP)                            | —       |
| Residual Risk Add-On ("RRAO") | RRAO                                             | 760     |
| Total                         |                                                  | 400,680 |

(\*) Structural foreign exchange positions approved by the FSS (Financial Supervisory Service) are excluded from the calculation of regulatory capital.

#### 8-5-4 Management of market risk related to non-trading position

##### 8-5-4-1 Interest rate risk

Interest rate risk of non-trading position is a risk of losses in financial assets and liabilities with interest rates due to adverse changes in interest rates and is incurred when maturity structure does not match interest rate setting cycle of the related assets and liabilities. The Group manages the interest rate risks of non-trading position in order to maintain the stability of net interest income and net asset value based on changes in interest rates. The following is subject to the Group's management of interest rate risk:

- a. Financial assets with interest rates, such as bank deposits, debt securities and loans
- b. Financial liabilities with interest rates, such as depository liabilities, borrowings and debentures
- c. Financial derivatives, such as interest rate swaps

Interest rate risk is calculated using the gap between interest-sensitive assets and liabilities. The interest rate risks measure the interest rate gap ratio as a primary indicator, while Economic value of equity (" $\Delta$ EVE"), Net interest income (" $\Delta$ NII") ratio and duration are used as secondary indicators. The Risk Management Committee and the Risk Management Operation Committee establish the interest rate risk limits on an annual basis; the compliance thereof is reported to Risk Management Operation Committee, as well as the Risk Management Committee on a monthly and quarterly basis, respectively.

△EVE refers to changes in the △EVE capital, indicating the effect of adverse changes in interest rates on the present value of assets, liabilities and others. As of December 31, 2024 and 2023, the Group's △EVE is as follows (KRW in millions):

| Classification | December 31,<br>2024 | Average   | Minimum   | Maximum   | December 31,<br>2023 |
|----------------|----------------------|-----------|-----------|-----------|----------------------|
| △EVE           | 2,097,932            | 2,211,531 | 1,827,664 | 2,467,826 | 1,883,644            |

△EVE calculates the maximum value compared to the default scenario by applying nine interest rates (parallel rise, parallel fall, short-term fall and long-term rise, short-term rise and long-term fall and short-term rise and short-term fall) after generating cash flows for interest-sensitive assets and liabilities under the Supervision of Banking Business Appendix 9-1.

#### 8-5-4-2 Equity price risk

Equity price risk is a risk incurred when the fair value of equities results in changes in the level of related revenue and capital. Fluctuation in equity reflects the sensitivity of each equity. Effects on capital due to the fluctuation in equity price risk as of December 31, 2024, are as follows (KRW in millions):

| Classification    | 20% decline | 10% decline | 10% rise | 20% rise |
|-------------------|-------------|-------------|----------|----------|
| Equity price risk | (18,722)    | (9,361)     | 9,361    | 18,722   |

## 8-5-5 Currency risk concentration

Currency risk is a risk incurred when the value of a financial instrument or future cash flows fluctuates due to the changes in foreign exchange rates. Currency risk arises from the financial instruments expressed in currencies other than the functional currency. Currency risk does not arise from the financial instruments expressed in the functional currency or in non-monetary items. In order to establish the stop loss and limits, the Group manages the foreign exchange net exposure amount of the trading and non-trading positions by each currency.

Significant foreign currency assets and liabilities denominated in Korean won as of December 31, 2024 and 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification                          | USD        | JPY       | EUR       | CNY        | IDR       | Others     | Total      |
|-----------------------------------------|------------|-----------|-----------|------------|-----------|------------|------------|
| <b>Assets</b>                           |            |           |           |            |           |            |            |

## 8–6 Operational risk

Operational risk is the risk of loss arising from system failure, human error, fraud or other external events. Risks related to legal or regulatory implications are identified as operational risks, but risks related to the strategy of damaging reputation are excluded from operational risks. Operational risk includes losses from internal operational problems and externalities, such as natural disasters, etc., and legal lawsuit, but excludes losses from policy decision errors or unmeasurable reputation damage, etc. Operational risk does not have a direct correlation with income, and the Group needs to mitigate such risk through internal controls and insurance.

Operational risk capital is calculated by multiplying the Business Indicator Component based on consolidated financial statements and the internal loss multiplier ("ILM"). The business index factor is calculated based on the consolidated financial statements by multiplying the annual average of interest-lease dividend factors, service factors and financial transaction factors over the past three years by the factor of each section. The ILM is the log function value of the loss element and the business index element, and the loss element is calculated by multiplying the average annual loss amount generated internally by the bank over the past 10 years by 15.

The Risk Management Committee determines the operational risk limits. In case, the excess limit is expected, the management plan for the excess of internal capital limits should be reported to the Risk Management Operation Committee and if additional limits are given, an approval from the Risk Management Committee is needed beforehand. If the limit is exceeded due to the occurrence of an exceptional situation, an ex post facto approval from the Risk Management Committee is needed for the information on exceeded amount and post hoc results, as well as the subsequent plans.

#### 8-7 Capital management

The Group implements the BIS capital requirement system in order to secure the capital adequacy and comply with the supervisory regulations. By BIS regulation, the Group keeps its BIS capital adequacy ratio ("BIS ratio") above the minimum BIS ratio for the RWA. In addition, the Group performs a capital adequacy assessment in order to cope with an unexpected loss.

RWA, which is calculated per each risk type when calculating BIS ratio, is as follows:

- a. RWA of credit risk is calculated using the basic internal ratings based approach. The Group uses the standardized approach for governments, banks, public institutes, overseas exposure, other assets, etc.

- b. RWA of the market risk is calculated by multiplying 12.5 to the amount of capital required by adding individual risks calculated by the standard model to the general risk calculated by the internal model.
- c. RWA of the operational risk is calculated by multiplying 12.5 to the amount of operational risk capital calculated by advanced measurement approach for the Group and basic indicator approach for its subsidiaries.

Regulatory capital in accordance with the Regulations on the Supervision of Banking Business for calculating BIS ratio is as follows:

- a. Common equity: Capital incurred in connection with common stock issued to meet the eligible requirement, capital surplus and capital adjustments, retained earnings, accumulated other comprehensive income and other capital surplus, capital adjustments, non-controlling interest on common shares issued by banks, affiliated subsidiaries, etc.
- b. Other basic capital: The capital securities to meet accreditation requirements of other basic capital, capital surplus associated with the issuance of the other basic capital, non-qualifying capital securities and the accredited amount as other basic capital of a non-controlling interest on equity securities issued by a subsidiary, etc.
- c. Supplementary capital: The capital securities to meet supplementary capital accreditation requirements, capital surplus associated with the issuance of supplementary capital, the accredited amount of supplementary capital of non-qualifying capital securities, the accredited amount as supplementary capital of a non-controlling interest on equity securities issued by a subsidiary, eligible allowance for possible loan losses on "normal" or "precautionary" category assets, allowance for possible loan losses in excess of the total amount of expected losses, etc.

Regulatory capital and BIS ratios as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                                                                                                          | December 31, 2024 | December 31, 2023 |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------|-------------------|
| Common equity                                                                                                                           |                   |                   |
| Capital stock, capital surplus and capital adjustments incurred in connection with common stock issued that meets eligible requirements | 5,359,554         | 5,359,548         |
| Retained earnings                                                                                                                       | 22,731,531        | 21,050,087        |

(\*) The equity below the lowest limit is presented in credit risk-weighted assets.

#### 8-7-1 Internal capital adequacy assessment and management

Internal capital is the amount that allows for continuous operation of business while accounting for all risks. Internal capital is defined as the size of capital needed to cope with an unexpected loss under a certain rate. The purpose of managing the internal capital is to compare the size of internal capital and available capital (Tier 1) and to serve as a measure of financial strength.

Managing the internal capital also provides the amount of risk-adjusted capital and basic measurement. The indicators are composed of the risk appetite ratio, as well as exhaustion ratio of foreign holding limits. The risk appetite ratio is an internal capital ratio established after taking into consideration a capital buffer in Tier 1 capital. The exhaustion ratio of foreign holding limits is a ratio used to measure the amount of internal capital used against the internal capital limits.

Internal capital limits are established after accounting for the size of current and subsequent Tier 1 capital, as well as the components, quality, risk appetite, target credit rating, operational strategy and business plans. The Risk Management Committee determines risk types and the internal capital limits for the Group more than once a year. In case where new operations or the expansion of operations results in the amount exceeding the internal capital limits, an approval from the Risk Management Committee is needed beforehand. If such a situation occurs in cases outlined as exceptions, an approval from the Risk Management Committee is needed for the information on exceeded amount and post hoc results, as well as the subsequent plans.

## 9. OPERATING SEGMENT INFORMATION:

### 9-1 General information

In order to set strategies to achieve goals and efficiently conduct performance assessment, the business sectors of the Group are divided by operations as follows:

- a. Operating bank segment: It consists of four banks (Center, Yeongnam, Chungcheong and Honam). It offers household loan and deposit, retirement pension, company loan, deposit, etc.
- b. Capital market segment: This segment offers investment and operation of securities, buying and selling of public bonds and development and operation of derivatives.
- c. Other segment: It consists of the overseas business segment, headquarters supporting segment, trust segment, risk segment, audit segment and after-management segment.

### 9-2 Profit or loss by operating segment

9-2-1 Details of net income by operating segments for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

For the year ended December 31, 2024:

| Classification                            | Operating group segments |             |             |           | Finance sector and other sectors | Subtotal     | Adjustments | Total        |
|-------------------------------------------|--------------------------|-------------|-------------|-----------|----------------------------------|--------------|-------------|--------------|
|                                           | Center                   | Yeongnam    | Chungcheong | Honam     |                                  |              |             |              |
| Net interest income                       | 4,970,270                | 805,359     | 751,478     | 230,921   | 978,655                          | 7,736,683    | 1,864       | 7,738,547    |
