(\*1) These companies were included in investment in associates because the Group has significant influence over them by participating in the board of directors' meeting, the decision-making organization.

(\*2) As of December 31, 2024, the application of the equity method has been suspended because the balance of the investment account is below "0."

(\*3) As the consolidated financial statements as of December 31, 2024, could not be obtained, the most recent consolidated financial statements available from the closing date were used. The effect of significant transactions or events incurred between the end of the reporting period of the associate and that of the Group was reviewed and reflected.

(\*4) As of December 31, 2024, the Group classified the investee as an associate investment stock because it could not exercise control over the investee.

(\*5) The company name has been changed from KTOP Short-Term Financial

Bond Active.

(\*6) As normal voting rights can be exercised following the conclusion of the corporate rehabilitation procedure, the financial instruments at FVTPL were reclassified as investments in associates.

(\*7) Since more than one investor must act together to direct related activities, the equity method was applied because the Group could not control the investee individually.

17-2 Consolidated financial statements as of and for the years ended December 31, 2024, and December 31, 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification                                                            | Assets      | Liabilities | Equity     | Operating income | Net income (loss) | Total comprehensive income (loss) | Dividends received |

## 19. INVESTMENT PROPERTY:

19-1 Details of investment property as of December 31, 2024 and 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification | Acquisition cost | Accumulated depreciation | Accumulated impairment loss | Government grants | Book value |
|----------------|------------------|--------------------------|-----------------------------|-------------------|------------|
| Land           | 465,097          | –                        | (3,125)                     | –                 | 461,972    |
| Buildings      | 405,361          | (188,104)                | (1,225)                     | (980)             | 215,052    |
| Total          | 870,458          | (188,104)                | (4,350)                     | (980)             | 677,024    |

December 31, 2023:

| Classification | Acquisition cost | Accumulated depreciation | Accumulated impairment loss | Government grants | Book value |
|----------------|------------------|--------------------------|-----------------------------|-------------------|------------|
| Land           | 467,073          | –                        | (3,125)                     | –                 | 463,948    |
| Buildings      | 386,860          | (172,175)                | (1,225)                     | (1,885)           | 211,575    |
| Total          | 853,933          | (172,175)                | (4,350)                     | (1,885)           | 675,523    |

19-2 Changes in investment property for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification    | Beginning balance | Disposal | Depreciation | Transfer (*) | Ending balance |
|-------------------|-------------------|----------|--------------|--------------|----------------|
| Land              | 463,948           | (9,802)  | –            | 7,826        | 461,972        |
| Buildings         | 213,460           | (1,512)  | (16,328)     | 20,412       | 216,032        |
| Government grants | (1,885)           | –        | 905          | –            | (980)          |
| Total             | 675,523           | (11,314) | (15,423)     | 28,238       | 677,024        |

(\*) The amount represents the change in the carrying amount of investment properties held by the Group due to the change in the ratio of lease occupancy.

December 31, 2023:

| Classification    | Beginning balance | Disposal | Depreciation | Transfer (*) | Ending balance |
|-------------------|-------------------|----------|--------------|--------------|----------------|
| Land              | 454,314           | (744)    | –            | 10,378       | 463,948        |
| Buildings         | 213,496           | (1,206)  | (14,770)     | 15,940       | 213,460        |
| Government grants | (2,868)           | –        | 983          | –            | (1,885)        |
| Total             | 664,942           | (1,950)  | (13,787)     | 26,318       | 675,523        |

(\*) The amount represents the change in the carrying amount of investment properties held by the Group due to the change in the ratio of lease occupancy.

19-3 Details of valuation techniques for measuring investment property and inputs used in the measurement as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification     | Fair value (*)    |                   | Description of the valuation techniques                                     | Inputs used in the fair value measurement    |
|--------------------|-------------------|-------------------|-----------------------------------------------------------------------------|----------------------------------------------|
|                    | December 31, 2024 | December 31, 2023 |                                                                             |                                              |
| Land and buildings | 1,404,372         | 1,027,340         | Appraised value of land reference method and estimates based on cost method | Appraised value of land and refinancing cost |

(\*) The fair value of investment property is classified as Level 3 of fair value hierarchy as it reflects the most recent market transaction price, followed by individual third-party transaction condition, and significant input factor, which is not predictable.

19-4 Rental income and operating expenses arising from the Group's investment properties for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                                                       | 2024   | 2023   |
|--------------------------------------------------------------------------------------|--------|--------|
| Rental income                                                                        | 10,189 | 10,395 |
| Operating cost directly related to investment properties that generate rental income | 566    | 544    |

## 20. INTANGIBLE ASSETS:

20-1 Details of intangible assets as of December 31, 2024 and 2023, are as follows (KRW in millions):

December 31, 2024:

| Classification                | Acquisition cost | Accumulated amortization | Accumulated impairment loss | Government grants | Book value |
|-------------------------------|------------------|--------------------------|-----------------------------|-------------------|------------|
| Goodwill                      | 892              | –                        | –                           | –                 | 892        |
| Industrial proprietary rights | 2,927            | (2,448)                  | –                           | –                 | 479        |
| Core deposits                 | 6,107            | (4,938)                  | –                           | –                 | 1,169      |
| Software                      | 413,913          | (282,290)                | –                           | –                 | 131,623    |
| Systems development costs     | 1,339,363        | (1,060,279)              | (46)                        | (20)              | 279,018    |
| Memberships                   | 28,447           | –                        | (2,933)                     | –                 | 25,514     |
| Others                        | 368,533          | (255,504)                | (28)                        | –                 | 113,051    |
| Total                         | 2,160,232        | (1,605,459)              | (3,007)                     | (20)              | 551,746    |

December 31, 2023:

| Classification                | Acquisition cost | Accumulated amortization | Accumulated impairment loss | Government grants | Book value |

|-----------------------------------------------|-------------------|-------------------|
| Demand deposits                               |                   |                   |
| Demand deposits in Korean won                 | 16,543,045        | 16,130,967        |
| Demand deposits in foreign currency           | 32,704,649        | 31,630,980        |
| Subtotal                                      | 49,247,694        | 47,761,947        |
| Time and savings deposits                     |                   |                   |
| Time and savings deposits in Korean won (*)   | 289,087,164       | 278,789,580       |
| Time and savings deposits in foreign currency | 28,936,174        | 23,665,607        |
| Subtotal                                      | 318,023,338       | 302,455,187       |
| Certificate of deposits                       | 19,921,128        | 19,532,319        |
| Total                                         | 387,192,160       | 369,749,453       |

(\*) Time and savings deposits in Korean won include savings deposits (₩42,903,649 million as of December 31, 2024, and ₩40,213,612 million as of December 31, 2023) and corporate savings deposits (₩59,772,612 million as of December 31, 2024, and ₩58,318,632 million as of December 31, 2023).

23-2 Allocations of deposit liabilities by the customer as of December 31, 2024 and 2023, are as follows (Korean won in millions):

| Classification               | December 31, 2024 | December 31, 2023 |
|------------------------------|-------------------|-------------------|
| Individuals                  | 130,744,744       | 122,951,894       |
| Corporations                 | 126,925,232       | 123,338,987       |
| Other banks                  | 22,535,064        | 22,490,050        |
| Public institutions          | 20,745,641        | 21,830,459        |
| Other financial institutions | 52,702,149        | 46,902,752        |
| Government                   | 6,848,106         | 7,714,009         |
| Non-profit corporations      | 18,527,756        | 16,107,455        |
| Foreign organizations        | 2,027,298         | 2,503,999         |
| Others                       | 6,136,170         | 5,909,848         |
| Total                        | 387,192,160       | 369,749,453       |

## 24. FINANCIAL LIABILITIES AT FVTPL:

24-1 Details of financial liabilities at FVTPL as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                          | December 31, 2024 | December 31, 2023 |
|-----------------------------------------|-------------------|-------------------|
| Securities borrowed                     | 460,301           | 452,426           |
| Derivative liabilities held for trading | 14,342,968        | 6,042,066         |
| Total                                   | 14,803,269        | 6,494,492         |

24-2 Details of financial liabilities designated at FVTPL as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification | December 31, 2024 | December 31, 2023 |
|----------------|-------------------|-------------------|
| Deposits       | 321,777           | 173,339           |
| Debentures     | 50,620            | 61,379            |
| Total          | 372,397           | 234,718           |

Financial liabilities are at FVTPL in order to eliminate or significantly reduce a measurement or recognition inconsistency.

24-3 Difference between the book value and maturity amount of the financial liabilities designated at FVTPL as of December 31, 2024 and 2023, is as follows (KRW in millions):

| Classification               | December 31, 2024 | December 31, 2023 |
|------------------------------|-------------------|-------------------|
| Book value                   | 372,397           | 234,718           |
| Repayment amount at maturity | 400,000           | 270,000           |
| Difference                   | (27,603)          | (35,282)          |

## 25. BORROWINGS:

Details of borrowings as of December 31, 2024 and 2023, are as follows  
(KRW in millions):

| Classification                                               | Lender                                    | Annual interest rate (%) | December 31, 2024 | December 31, 2023 |
|--------------------------------------------------------------|-------------------------------------------|--------------------------|-------------------|-------------------|
| Borrowings in Korean won                                     |                                           |                          |                   |                   |
| BOK borrowings                                               | BOK                                       | 1.50~2.00                | 4,001,857         | 3,420,958         |
| Government borrowings                                        | Korea Development Bank, etc.              | 0.50~5.16                | 2,350,422         | 2,155,315         |
| Other borrowings                                             | Korea Energy Management Corporation, etc. | 0.00~3.53                | 4,659,630         | 4,843,543         |
| Subtotal                                                     |                                           |                          | 11,011,909        | 10,419,816        |
| Borrowings denominated in foreign currencies                 |                                           |                          |                   |                   |
| Bank overdrafts                                              | Foreign banks, etc.                       | 0.00~9.50                | 524,253           | 268,487           |
| Other borrowings                                             | Wells Fargo, HSBC, etc.                   | 0.00~8.92                | 9,986,029         | 9,250,262         |
| Subtotal                                                     |                                           |                          | 10,510,282        | 9,518,749         |
| Call money                                                   |                                           |                          |                   |                   |
| Call money in foreign currencies                             | KB Bank, etc.                             | 0.50~6.20                | 1,292,470         | 934,111           |
| Bonds sold under repurchase agreements                       |                                           |                          |                   |                   |
| Bonds sold under repurchase agreements in Korean won         | General customers                         | 0.00                     | 124,330           | 30                |
| Bonds sold under repurchase agreements in foreign currencies | Citi                                      | 5.10~5.57                | 1,300,709         | 1,140,907         |

### 27-1 Details of net defined benefit liabilities (assets)

Details of net defined benefit liabilities (assets) as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                              | December 31, 2024 | December 31, 2023 |
|---------------------------------------------|-------------------|-------------------|
| Present value of defined benefit obligation | 2,482,644         | 2,221,636         |
| Fair value of plan assets                   | (2,011,738)       | (2,048,061)       |
| Net defined benefit liabilities             | 470,906           | 173,575           |

### 27-2 Defined benefit obligation

#### 27-2-1 Changes in present value of defined benefit obligation

Changes in present value of defined benefit obligation for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                              | December 31, 2024 | December 31, 2023 |
|---------------------------------------------|-------------------|-------------------|
| Beginning balance                           | 2,221,636         | 1,996,586         |
| Current service cost                        | 138,130           | 128,683           |
| Interest cost                               | 90,539            | 98,760            |
| Remeasurements                              | 200,127           | 181,634           |
| Benefits paid                               | (169,030)         | (183,794)         |
| Changes due to transfers between affiliates | 383               | (441)             |
| Others                                      | 859               | 208               |
| Ending balance                              | 2,482,644         | 2,221,636         |

27-2-2 Total costs recognized in accordance with defined benefit plans

Total costs incurred in relation to defined benefit pension plans for the years ended December 31, 2024 and 2023, are as follows

(KRW in millions):

| Classification                 | December 31, 2024 | December 31, 2023 |
|--------------------------------|-------------------|-------------------|
| Current service cost           | 138,130           | 128,683           |
| Interest cost                  | 90,539            | 98,760            |
| Interest income on plan assets | (82,592)          | (100,800)         |
| Total                          | 146,077           | 126,643           |

27-2-3 Weighted-average duration of defined benefit obligation as of December 31, 2024 and 2023, is 7.58 years and 7.60 years, respectively.

## 27-3 Actuarial assumptions

27-3-1 Principal assumptions for the actuarial valuation method as of December 31, 2024 and 2023, are as follows:

December 31, 2024:

| Classification          | Rate(%)     | Content                               |
|-------------------------|-------------|---------------------------------------|
| Demographic assumptions |             |                                       |

| Discount rate    | 2,221,636                                  | 2,045,775         | 2,365,833         |
| Wage growth rate | 2,221,636                                  | 2,367,760         | 2,041,468         |

#### 27-4 Plan assets

27-4-1 Changes in the fair value of plan assets for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                        | 2024      | 2023      |
|-------------------------------------------------------|-----------|-----------|
| Beginning balance                                     | 2,048,061 | 2,064,640 |
| Employer contributions                                | 656       | 625       |
| Interest income on plan assets                        | 82,592    | 100,800   |
| Remeasurements of the net defined benefit liabilities | (13,951)  | (20,558)  |
| Benefit paid                                          | (106,005) | (97,235)  |
| Changes due to transfers between affiliates           | 385       | (211)     |
| Ending balance                                        | 2,011,738 | 2,048,061 |

## 27-4-2 Details of plan assets

Details of plan assets as of December 31, 2024 and 2023, are as follows  
(KRW in millions):

December 31, 2024:

| Classification | Active market price<br>exists | Active market price<br>inexists | Total     |
|----------------|-------------------------------|---------------------------------|-----------|
| Time deposits  | —                             | 748,831                         | 748,831   |
| Others(*)      | —                             | 1,262,907                       | 1,262,907 |
| Total          | —                             | 2,011,738                       | 2,011,738 |

(\*) Guaranteed income contracts and equity-linked bonds, etc., are included.

December 31, 2023:

| Classification | Active market price<br>exists | Active market price<br>inexists | Total     |
|----------------|-------------------------------|---------------------------------|-----------|
| Time deposits  | —                             | 847,883                         | 847,883   |
| Others(*)      | —                             | 1,200,178                       | 1,200,178 |
| Total          | —                             | 2,048,061                       | 2,048,061 |

(\*) Guaranteed income contracts and equity-linked bonds, etc., are included.

27-4-3 The Bank expects to contribute ₩142,032 million next year in relation to the defined benefit plans.

27-5 Remeasurements of the net defined benefit liabilities (assets)

Remeasurements of the net defined benefit liabilities (assets) as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                                              | 2024      | 2023      |
|-----------------------------------------------------------------------------|-----------|-----------|
| Actuarial gains and losses                                                  |           |           |
| Effects on changing financial assumptions                                   | (121,915) | (118,245) |
| Effects on changing demographic assumptions                                 | 263       | —         |
| Others                                                                      | (78,475)  | (63,389)  |
| Subtotal                                                                    | (200,127) | (181,634) |
| Return on plan assets                                                       |           |           |
| Actual return on plan assets                                                | 68,641    | 80,242    |
| Amount included in net interest of net defined benefit liabilities (assets) | (82,592)  | (100,800) |
| Subtotal                                                                    | (13,951)  | (20,558)  |
| Total                                                                       | (214,078) | (202,192) |

## 28. CONTINGENT LIABILITIES, AGREEMENTS AND PROVISIONS:

28-1 Details of provisions as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                    | December 31, 2024 | December 31, 2023 |
|-----------------------------------|-------------------|-------------------|
| Provision for payment guarantees: |                   |                   |
| Financial guarantee contracts (*) | 645               | 466               |
| Non-financial guarantee contracts | 49,615            | 71,609            |
| Bills endorsed                    | 10                | 2                 |
| Subtotal                          | 50,270            | 72,077            |
| Provision for unused commitments  | 83,980            | 73,065            |
| Other provisions:                 |                   |                   |
| Provision for restoration         | 69,999            | 57,976            |
| Provision for lawsuits            | 61,370            | 3,400             |
| Others                            | 369,092           | 554,055           |
| Subtotal                          | 500,461           | 615,431           |
| Total                             | 634,711           | 760,573           |

(\*) The Group recognizes the amount exceeding the unamortized amount of the initial fair value at subsequent measurement of the financial guarantee contracts as provisions for payment guarantees. The Group recognizes the unamortized amount as financial guarantee contract liabilities in the amount of ₩19,911million and ₩18,607 million as of December 31, 2024 and 2023, respectively.

28-2 Changes in provision for unused commitments for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

For the year ended December 31, 2024:

| Classification                       | Unused commitments |                          |                      | Total  |
|--------------------------------------|--------------------|--------------------------|----------------------|--------|
|                                      | 12-month ECL       | Lifetime ECL             |                      |        |
|                                      |                    | Non-credit-impaired loan | Credit-impaired loan |        |
| Beginning balance                    | 53,802             | 17,212                   | 2,051                | 73,065 |
| Transfer to 12-month ECL             | 5,260              | (5,135)                  | (125)                | –      |
| Transfer to non-credit-impaired loan | (1,664)            | 1,673                    | (9)                  | –      |
| Transfer to credit-impaired loan     | (61)               | (14)                     | 75                   | –      |
| Provision (reversal of)              | (541)              | (2,207)                  | 14,267               | 11,519 |
| Changes in exchange rates            | (642)              | 38                       | –                    | (604)  |
| Ending balance                       | 56,154             | 11,567                   | 16,259               | 83,980 |

For the year ended December 31, 2023:

| Total                                                      | 115,596,363                | 110,495,839       |

(\*) The financial guarantee contracts as of December 31, 2024 and 2023, amount to ₩14,052,540 million and ₩13,731,626 million, respectively.

## 28-7 Lawsuits

As of December 31, 2024, the Bank is involved in 189 lawsuits as a plaintiff and 276 lawsuits as a defendant. The aggregate amounts of claims as plaintiff and defendant are ₩181,576 million and ₩423,353 million, respectively. The Bank recognizes provisions in consideration of the likelihood of winning a lawsuit.

The Bank's material lawsuits in progress as a defendant are as follows (KRW in millions):

| Plaintiff                      | Amount | Status of lawsuit |                               | Content                                |
|--------------------------------|--------|-------------------|-------------------------------|----------------------------------------|
|                                |        | First trial       | On appeal                     |                                        |
| F*****Bankruptcy administrator | 49,382 | Won               | In progress<br>(Second trial) | Return of an illicit gain              |
| Guiju*****Co., Ltd.            | 49,213 | In progress       | –                             | Creditor interest infringement dispute |
| MT*****                        | 28,811 | In progress       | –                             | Return of a frozen fund                |
| ****Cooperation Co., Ltd.      | 15,000 | Partial won       | In progress<br>(Second trial) | Return of an illicit gain              |
| **Education Co., Ltd.          | 10,169 | Won               | In progress<br>(Second trial) | Return of an illicit gain              |
| ****Securities Co., Ltd.       | 10,000 | In progress       | –                             | Compensation for damages               |
| ****Word Co., Ltd.             | 10,000 | In progress       | –                             | Compensation for damages               |

28-8 The Fair Trade Commission's investigation into whether four commercial banks, including the Bank, engaged in unfair collaborative practices is ongoing, and the results cannot be predicted at this time.

28-9 In connection with the Ukraine crisis in February 2022, international sanctions against the Russian Federation of the international community could affect companies and individuals subject to sanctions, as well as companies, industries and economies that do business directly or indirectly with Russia. As of the settlement date, the Bank expects to have a financial impact on the business of KEB Hana Bank Russia, a subsidiary in Russia, but cannot reasonably predict the estimate.

### 30. CAPITAL STOCK AND OTHER PAID-IN CAPITAL:

30-1 Details of capital stock as of December 31, 2024 and 2023, are as follows (KRW in millions and shares):

| Classification                      | December 31, 2024 | December 31, 2023 |
|-------------------------------------|-------------------|-------------------|
| Number of shares authorized         | 2,000,000,000     | 2,000,000,000     |
| Par value per share (in Korean won) | 5,000             | 5,000             |
| Number of shares issued             | 1,071,915,717     | 1,071,915,717     |
| Common stock                        | 5,359,578         | 5,359,578         |

30-2 Details of capital surplus and capital adjustments as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification      | December 31, 2024 | December 31, 2023 |
|---------------------|-------------------|-------------------|
| Capital surplus (*) | 6,161,303         | 6,161,303         |
| Capital adjustments |                   |                   |
| Others              | (37,652)          | (37,921)          |
| Total               | 6,123,651         | 6,123,382         |

(\*) As of December 31, 2024, the Group's capital surplus includes the amount recognized at the time of the business combination under common control.

30-3 Details of hybrid securities as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                          | Issuance date | Expiry date | Annual interest rate (%) | December 31, 2024 | December 31, 2023 |
|-----------------------------------------|---------------|-------------|--------------------------|-------------------|-------------------|
| Hybrid securities in foreign currencies | 2021-10-19    | –           | 3.50                     | 353,738           | 353,738           |
| Total                                   |               |             |                          | 353,738           | 353,738           |

The Group can repay the above hybrid securities in foreign currencies five years from the issuance date or at every interest payment date (every sixmonths) after five years from the issuance date if the Group receives the approval from the Governor of Financial Supervisory Service.

### 31. ACCUMULATED OTHER COMPREHENSIVE INCOME (LOSS):

Changes in accumulated other comprehensive income (loss) for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

For the year ended December 31, 2024:

| Classification                                                          | Beginning balance | Increase (decrease) (excluding reclassification and transfer of retained earnings) | Transfer of retained earnings | Reclassification (*) | Tax effects | Ending balance |
|-------------------------------------------------------------------------|-------------------|------------------------------------------------------------------------------------|-------------------------------|----------------------|-------------|----------------|
| Gain (loss) on valuation of financial assets at FVOCI                   | (439,719)         | 538,041                                                                            | (203,425)                     | (113,945)            | (55,896)    | (274,944)      |
| Changes in equity of investments in associates                          | 66,829            | 276,175                                                                            | –                             | –                    | (72,910)    | 270,094        |

| Classification                                             | December 31, 2024 | December 31, 2023 |
|------------------------------------------------------------|-------------------|-------------------|
| Legal reserve                                              |                   |                   |
| Earned surplus reserve (*1)                                | 2,678,700         | 2,349,400         |
| Voluntary reserve                                          |                   |                   |
| Revaluation reserves on property, plant and equipment (*2) | 203,898           | 203,998           |
| Other reserves (*3)                                        | 116,594           | 102,155           |
| Regulatory reserve for bad debts (*4)                      | 2,492,716         | 2,593,244         |
| Other voluntary reserves                                   | 5,450,200         | 5,450,200         |
| Subtotal                                                   | 8,263,408         | 8,349,597         |
| Unappropriated retained earnings                           | 11,789,424        | 10,351,090        |
| Total                                                      | 22,731,532        | 21,050,087        |

(\*1) Article 40 of the Banking Law of the Republic of Korea requires the Group to appropriate at least 10% of net income after income tax to legal reserve every time to pay dividends, until such reserve equals 100% of its paid-in capital. This reserve is restricted to reduce deficit or be transferred to capital.

(\*2) The Group records gains from revaluation of property, plant and equipment previously recognized as other comprehensive income to the voluntary reserve as it applies the revaluation amount as deemed cost at the first-time adoption of K-IFRSs. The reserve is recognized in distributable retained earnings when the relevant property, plant and equipment are disposed.

(\*3) Relevant Japanese regulations require the Group's overseas branches located in Japan to appropriate a minimum of 10% of net income for the period as a legal reserve, until the reserve equals ¥2,000 million. This reserve is restricted to be used upon liquidation of the Japanese branches. In addition, the legal reserves of the Bank's overseas branches located in Chennai, Panama, Singapore, Hanoi, Ho Chi Minh, Abu Dhabi and Hong Kong are appropriated in

accordance with the relevant regulation of each country.

(\*4) The Group has provided allowances for possible loan losses in accordance with K-IFRSs. The difference in this amount and the provision for possible loan and other asset losses accumulated in accordance with the minimum accumulation ratio required by FSS is reserved as regulatory reserve for bad debts.

32-2 Changes in appropriated retained earnings for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                                                                    | December 31, 2024 | December 31, 2023 |
|---------------------------------------------------------------------------------------------------|-------------------|-------------------|
| Beginning balance                                                                                 | 21,050,087        | 19,236,315        |

| Ending balance                                                                                    | 22,731,532        | 21,050,087        |

### 32-3 Dividends

Details of calculation on common stock dividends for the years ended December 31, 2024 and 2023, are as follows (KRW in millions and shares in units):

| Classification                                                                          | 2024 (*1)     | 2023          |
|-----------------------------------------------------------------------------------------|---------------|---------------|
| Number of dividend shares                                                               | 1,071,915,717 | 1,071,915,717 |
| Par value per share (in Korean won)                                                     | 5,000         | 5,000         |
| Dividend ratio                                                                          | 33.77%        | 33.77%        |
| Dividend per share (in Korean won)                                                      | 1,688.57      | 1,688.57      |
| Dividends                                                                               | 1,810,000     | 1,810,000     |
| Net income (*2)                                                                         | 3,356,409     | 3,476,636     |
| Dividend payout ratio based on net income                                               | 53.93%        | 52.06%        |
| Adjusted income after deducting provisions for bad debt reserve                         | 3,134,695     | 3,589,342     |
| Dividends payout ratio based on adjusted income after deducting provisions for bad debt | 57.74%        | 50.43%        |

(\*1) The dividend for 2024 will be presented at the annual general meeting of shareholders, which is scheduled on March 21, 2025.

(\*2) Adjusted profit after reflecting net income and reserves for bad debts is the amount based on the parent company's ownership stake.

### 33. REGULATORY RESERVE FOR BAD DEBTS:

Regulatory reserve for bad debt is calculated and disclosed in accordance with Article 29, Sections 1 and 2 of Regulation on Supervision of Banking Business of the Republic of Korea.

33-1 Details of regulatory reserve for bad debts as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                | December 31, 2024 | December 31, 2023 |
|-----------------------------------------------|-------------------|-------------------|
| Beginning balance                             | 2,577,402         | 2,690,108         |
| Planned provision for (reversal of) bad debts | 221,714           | (112,706)         |
| Ending balance                                | 2,799,116         | 2,577,402         |

33-2 Provisions for (reversal of) bad debt reserve and income adjusted for deductions of provisions for bad debt for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                                                                   | 2024      | 2023      |
|--------------------------------------------------------------------------------------------------|-----------|-----------|
| Net income attributable to equity holders of the parent before deducting provisions for bad debt | 3,356,409 | 3,476,636 |
| Reversal of (provision for) bad debt reserve                                                     | (221,714) | 112,706   |
| Adjusted income after deducting provisions for bad debt                                          | 3,134,695 | 3,589,342 |
| Basic EPS adjusted after reflecting reserve for bad debt (*1) (in Korean won)                    | 2,911     | 3,326     |
| Diluted EPS adjusted after reflecting reserve for bad debt (*2) (in Korean won)                  | 2,911     | 3,326     |

(\*1) The amount of ₩14,422 million and ₩23,834 million was deducted from the adjusted income after reflecting the bad debt reserve for the calculation of EPS after reflecting reserve for bad debt for the years ended December 31, 2024 and 2023, respectively.

(\*2) Since the Bank does not have dilutive potential ordinary stock, basic EPS is the same as diluted EPS.

### 34. OPERATING INCOME AND OPERATING EXPENSES:

34-1 Operating income for the years ended December 31, 2024 and 2023, is as follows (KRW in millions):

| Classification                                     | 2024       | 2023       |
|----------------------------------------------------|------------|------------|
| Interest income                                    | 20,285,966 | 19,793,063 |
| Fees and commission income                         | 1,026,474  | 931,532    |
| Gains on financial instruments at FVTPL            | 33,585,874 | 23,575,868 |
| Gains on fair value hedging derivative instruments | 97,707     | 140,983    |
| Gains on financial instruments at FVOCI            | 163,376    | 88,412     |
| Gains on financial instruments at AC               | 2          | 232        |
| Reversal of credit loss                            | 2          | 36,277     |
| Other operating income                             | 7,722,245  | 7,934,269  |
| Total                                              | 62,881,646 | 52,500,636 |

34-2 Operating expenses for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                        | 2024       | 2023       |
|-------------------------------------------------------|------------|------------|
| Interest expenses                                     | 12,547,419 | 11,875,652 |
| Fees and commission expenses                          | 282,419    | 270,068    |
| Expenses on financial instruments at FVTPL            | 33,486,509 | 23,084,120 |
| Expenses on fair value hedging derivative instruments | 160,617    | 114,647    |
| Expenses on financial instruments at FVOCI            | 3,054      | 3,979      |
| Provision for credit loss                             | 342,564    | 694,584    |
| General and administrative expenses                   | 3,479,233  | 3,448,610  |
| Other operating expenses                              | 8,032,930  | 8,403,458  |
| Total                                                 | 58,334,745 | 47,895,118 |

### 35. NET INTEREST INCOME:

35-1 Interest income for the years ended December 31, 2024 and 2023, is as follows (KRW in millions):

| Classification                                    | 2024       | 2023       |
|---------------------------------------------------|------------|------------|
| Interest income in accordance with the EIR method |            |            |
| Interest income on due from banks                 | 604,084    | 657,982    |
| Interest income on loans                          | 17,412,428 | 17,119,560 |
| Interest income on financial assets at FVOCI      | 1,039,882  | 837,112    |
| Interest income on securities at AC               | 977,972    | 1,002,738  |
| Subtotal                                          | 20,034,366 | 19,617,392 |
| Interest income on financial instruments at FVTPL | 251,600    | 175,671    |
| Total                                             | 20,285,966 | 19,793,063 |

35-2 Interest expenses for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                      | 2024       | 2023       |
|-----------------------------------------------------|------------|------------|
| Interest expense on deposit liabilities             | 10,211,821 | 9,772,767  |
| Interest expense on borrowings                      | 766,929    | 782,002    |
| Interest expenses on financial instruments at FVTPL | 13,262     | 4,908      |
| Interest expense of debentures                      | 1,190,023  | 986,274    |
| Interest expense of lease liabilities               | 30,854     | 23,929     |
| Others                                              | 334,530    | 305,772    |
| Total                                               | 12,547,419 | 11,875,652 |

### 36. NET FEES AND COMMISSION INCOME:

36-1 Fees and commission income for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                             | 2024      | 2023    |
|--------------------------------------------|-----------|---------|
| Commissions received from loans and others | 653,693   | 581,283 |
| Commissions received on payment guarantee  | 119,018   | 101,755 |
| Commissions related to foreign exchange    | 253,763   | 248,494 |
| Total                                      | 1,026,474 | 931,532 |

36-2 Fees and commission expenses for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                          | 2024    | 2023    |
|-----------------------------------------|---------|---------|
| Commissions paid                        | 219,093 | 212,279 |
| Commissions related to foreign exchange | 63,326  | 57,789  |
| Total                                   | 282,419 | 270,068 |

### 37. GAIN (LOSS) ON FINANCIAL INSTRUMENTS AT FVTPL:

37-1 Details of gain (loss) on financial instruments at FVTPL for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                            | 2024       | 2023       |
|-------------------------------------------|------------|------------|
| Gain on financial instruments at FVTPL    |            |            |
| Financial instruments at FVTPL            |            |            |
| Gain on valuation                         | 546,563    | 623,974    |
| Gain on disposals                         | 137,891    | 114,121    |
| Subtotal                                  | 684,454    | 738,095    |
| Derivative instruments held for trading   |            |            |
| Gain on valuation of derivatives          |            |            |
| Gain on currency-related derivatives      | 13,460,235 | 3,756,674  |
| Gain on interest rate-related derivatives | 298,856    | 477,114    |
| Gain on stock-related derivatives         | 5,464      | 5,948      |
| Others                                    | —          | 1,875      |

(\*) Deferred tax assets and deferred tax liabilities arising from overseas subsidiaries and overseas branches were not offset because the tax authorities were different.

The effective income tax rate of 26.4% as of December 31, 2024, is applied when calculating deferred tax assets or liabilities. Also, deferred tax assets are recognized when it is foreseeable that future taxable income will be incurred and that future tax credits will be realized.

47-4 The unrealizable temporary differences on investments in associates as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                   | December 31, 2024 | December 31, 2023 |
|----------------------------------|-------------------|-------------------|
| Deductible temporary differences | 343,162           | 337,867           |
| Taxable temporary differences    | (355,579)         | (355,579)         |
| Total                            | (12,417)          | (17,712)          |

47-5 Changes in deferred taxes charged (credited) directly to equity for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

#### 47-6 The global minimum tax implementation

The global minimum tax implementation ("Pillar 2") applies to companies that are members of a multinational group with sales of more than 750 million euros in the consolidated financial statements for at least two of the four preceding years, and to subsidiaries that are a permanent establishment and meet certain requirements. This is a system in which, if the effective tax rate of a company is less than 15%, the equivalent amount is paid to the tax office of the country where the parent company that meets certain requirements.

Korea enacted a tax law related to Pillar 2 in 2023, and the law should be applied from fiscal years beginning on or after January 1, 2024. Accordingly, the Group is in the process of analyzing the impact on corporate tax in relation to the global minimum tax system, and it is not expected to have a significant impact on current corporate tax expense for the year ended December 31, 2024.

#### 48. EARNINGS PER SHARE:

48-1 Weighted-average number of common stocks for the years ended December 31, 2024 and 2023, is as follows (shares):

| Classification    | Periods               | Number of shares | Weights | Weighted-average number of ordinary stocks |
|-------------------|-----------------------|------------------|---------|--------------------------------------------|
| December 31, 2024 | 2024.01.01~2024.12.31 | 1,071,915,717    | 366/366 | 1,071,915,717                              |
| December 31, 2023 | 2023.01.01~2023.12.31 | 1,071,915,717    | 365/365 | 1,071,915,717                              |

Since the Group does not have potentially dilutive common stock, the weighted-average number of common stock outstanding per basic share is the same as the weighted-average number of shares of common stock outstanding per diluted share.

48-2 The Group's basic EPS for the years ended December 31, 2024 and 2023, is calculated as follows (KRW in millions, except per share amounts):

| Classification                                                 | 2024          | 2023          |
|----------------------------------------------------------------|---------------|---------------|
| Net income for the period attributable to owners               | 3,356,409     | 3,476,636     |
| Dividends on hybrid equity securities                          | (14,422)      | (23,834)      |
| Total                                                          | 3,341,987     | 3,452,802     |
| Weighted-average number of shares of common stocks outstanding | 1,071,915,717 | 1,071,915,717 |
| Basic EPS (*) (in Korean won)                                  | 3,118         | 3,221         |

(\*) Basic EPS is the same as diluted EPS for the years ended December 31, 2024 and 2023.

#### 49. SHARE-BASED PAYMENT:

The Group operates a performance share plan. The Group's performance share plan is a cash-settled share-based compensation system linked to the shares of HFG, the parent company. It is a system in which the payment quantity is determined based on the performance over the three-year period from the grant date and paid in cash.

GLN International Co., Ltd., a subsidiary of the Group, granted 400,000 new share options to an executive during November 2021. The exercise price of the stock purchase option is ₩500 per share, and the options vest if the executive has served for more than two years from the date of grant, and the exercise period is within five years from the date of grant. However, due to the retirement of the executive concerned, all of the share options have been canceled due to the failure to meet the terms of service, and there are no share options granted as of the end of the reporting period.

49-1 Details of liabilities related to share-based payment and total intrinsic value of rights accounted for as accounts payable in case that option holders achieve rights to receive cash or other assets as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                           | December 31, 2024 | December 31, 2023 |
|----------------------------------------------------------|-------------------|-------------------|
| Book value of liabilities related to share-based payment |                   |                   |
| Performance share (granted by the Group)                 | 29,950            | 29,972            |

49-2 The compensation costs for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                         | 2024   | 2023  |
|--------------------------------------------------------|--------|-------|
| Costs recognized due to share-based payment            |        |       |
| Equity-linked special incentive (granted by the Group) | 14,851 | 7,304 |
| Stock options (granted by subsidiary)                  | —      | (17)  |
| Total                                                  | 14,851 | 7,287 |

49-3 Details of performance-linked stocks granted to the executives and department head of the Group as of December 31, 2024, are as follows:

| Classification                   | 11th                         | 12th                         | 13th                         | 14th                         |
|----------------------------------|------------------------------|------------------------------|------------------------------|------------------------------|
| Granted by                       | Hana Bank                    | Hana Bank                    | Hana Bank                    | Hana Bank                    |
| Grant date                       | 2021.01.01                   | 2022.01.01                   | 2023.01.01                   | 2024.01.01                   |
| Payment date                     | 2023.12.31                   | 2024.12.31                   | 2025.12.31                   | 2026.12.31                   |

| Reservation period               | 2024.01.01~<br>2024.12.31    | 2025.01.01~<br>2025.12.31    | 2026.01.01~<br>2026.12.31    | 2027.01.01~<br>2027.12.31    |
| Payment period                   | Within 2025.4.30             | Within 2026.4.30             | Within 2027.4.30             | Within 2028.4.30             |
| Payment method                   | Market-based<br>compensation | Market-based<br>compensation | Market-based<br>compensation | Market-based<br>compensation |
| Shares at settlement<br>date (*) | 167,266 shares               | 131,567 shares               | 156,760 shares               | 86,240 shares                |

(\*) The Bank provides the executives and department head of the Bank with the right to receive stocks. The number of stocks granted is adjusted based on the performance. The number of stocks granted is adjusted based on the assessment indicator that constitutes the Group's performance (relative shareholders' rate of return) of 40% and the Bank's performance (Return on Equity, net income, and soundness) of 60%. Meanwhile, as of the end of the reporting period, the number of performance-based shares that have reached their payment date, but have not been paid, are 2,456 shares for the 8th round, 6,784 shares for the 9th round and 3,600 shares for the 10th round.

## 50. CASH FLOW INFORMATION:

50-1 Details of cash and cash equivalents as of December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                                                | December 31, 2024 | December 31, 2023 |
|-------------------------------------------------------------------------------|-------------------|-------------------|
| Cash                                                                          | 2,165,192         | 1,742,359         |
| Due from banks in Korean won                                                  | 11,930,280        | 10,450,468        |
| Due from banks in foreign currencies                                          | 20,937,392        | 18,371,452        |
| Subtotal                                                                      | 35,032,864        | 30,564,279        |
| Restricted balances (*)                                                       | 3,763,074         | 1,824,242         |
| Deposits with a maturity of more than three months at the time of acquisition | 314,597           | 457,734           |
| Net amount                                                                    | 30,955,193        | 28,282,303        |

(\*) Restricted balances exclude reserve deposits that meet the definition of cash equivalents.

50-2 Significant non-cash transactions for the years ended December 31, 2024 and 2023, are as follows (KRW in millions):

| Classification                                                       | 2024    | 2023    |
|----------------------------------------------------------------------|---------|---------|
| Recognition in right-of-use assets                                   | 430,158 | 166,171 |
| Recognition in lease liabilities                                     | 405,719 | 131,262 |
| Change in valuation of financial assets at FVOCI                     | 422,970 | 852,837 |
| Transfer from property, plant and equipment to investment properties | 28,238  | 26,318  |
| Changes in equity on investments in associates                       | 276,053 | 11,641  |
| Exchange differences on translation of foreign operations            | 444,804 | 75,374  |
| Conversion of investment                                             | 17,982  | 188     |

50-3 Reconciliation of liabilities arising from financing activities for the years ended December 31, 2024 and 2023, is as follows (KRW in millions):

For the year ended December 31, 2024:

| Classification                              | Beginning balance | Financing activities | Exchange rate fluctuation | Fair value hedging | Acquisition and termination of lease | Others   | Ending balance |
|---------------------------------------------|-------------------|----------------------|---------------------------|--------------------|--------------------------------------|----------|----------------|
| Borrowings                                  | 22,033,914        | 480,745              | 1,713,417                 | 29,271             | –                                    | (1)      | 24,257,346     |

## Independent Auditor's Report

(English Translation of Independent Auditor's Report

Originally Issued in Korean on February 29, 2024)

To the Shareholders and Board of Directors of

Hana Bank Co., Ltd. and its Subsidiaries:

### Report on the Audited Consolidated Financial Statements

#### Audit Opinion

We have reviewed the accompanying consolidated financial statements of Hana Bank Co., Ltd. (the "Bank") and its subsidiaries (collectively, the "Group"), which comprise the consolidated statements of financial position as of December 31, 2023 and 2022, respectively, and the related consolidated statements of profit or loss and comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows for the years ended December 31, 2023 and 2022, respectively, and notes to the consolidated financial statements including a summary of material accounting policies and other explanatory information.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Group as of December 31, 2023 and 2022, respectively, and its financial performance and its cash flows for the years ended December 31, 2023 and 2022, respectively, in accordance with Korean International Financial Reporting Standards ("K-IFRSs").

## **Basis for Audit opinion**

We conducted our audits in accordance with Korean Standards on Auditing ("KSA"). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audits of the consolidated financial statements section of our report. We are independent of the Group in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in the Republic of Korea, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

## **Management's Responsibility for the Consolidated Financial Statements**

Management is responsible for the preparation and presentation of these consolidated financial statements in accordance with K-IFRSs, and for such internal control as management determines is necessary to enable the preparation of the consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Group's ability to continue as a going concern; disclosing, as applicable, matters related to going concern and using the going concern; basis of accounting, unless management either intends to liquidate the Group or to cease operations, or has no realistic alternative, but to do so.

Those charged with governance are responsible for overseeing the Group's financial reporting process.

## Auditor's responsibility for the Audit of Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with KSA will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with KSAs we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error; design and perform audit procedures responsive to those risks; and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.

- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

*Deloitte Idnjin LLC*

February 29, 2024

This audit report is effective as of February 29, 2024, the independent auditor's report date. Accordingly, certain material subsequent events or circumstances may have occurred during the period from the date of the independent auditor's report to the time this report is used. Such events and circumstances could significantly affect the accompanying consolidated financial statements and may result in modifications to this report.

# Consolidated Statements of Financial Position

As of December 31, 2023 and 2022

## Notes to Consolidated Financial Statements

As of and for the years ended December 31, 2023 and 2022

Hana Bank Co., Ltd. and its subsidiaries

### 1. General information

General information on Hana Bank Co., Ltd., previously Korea Exchange Bank (the "Bank" or the "Parent company") and its subsidiaries (collectively, the "Group") in accordance with Korean International Financial Reporting Standard ("K-IFRS") 1110, *Consolidated Financial Statements*, is as follows:

#### 1-1 Summary of the Parent company (The Bank)

The Bank was established on January 30, 1967, as a government-controlled bank, to engage in foreign exchange and trade finance business under the *Korea Exchange Bank Act* enacted on July 28, 1966.

On December 30, 1989, the *Korea Exchange Bank Act* was repealed, and the Bank was reorganized as a stock company under the Commercial Act of the Republic of Korea. On April 4, 1994, the Bank was listed on the Korea Exchange (previously, Korea Stock Exchange). On February 28, 2004, the Bank merged its subsidiary, Korea Exchange Bank Credit Service Co., Ltd. On August 31, 2014, the Bank spun off its credit card division.

On February 9, 2012, Hana Financial Group Inc. ("HFG") had control over the Bank by acquiring 52.27% equity interest in the Bank and later on April 5, 2013, the Bank became a wholly owned subsidiary of HFG after HFG acquired the remaining interest in the Bank through an all-inclusive exchange of the shares.

The Bank changed to its current name on September 1, 2015, following the merger of Korea Exchange Bank and Hana Bank.

The Bank provides commercial banking service under the Banking Act of the Republic of Korea, trust banking service under the Financial Investment Services And Capital Markets Act, merchant banking service due to the merger with the Korea International Merchant Bank, foreign exchange business and other related businesses. As of December 31, 2023, the Bank's headquarters is located at Seoul, with 597 domestic branches (including 64 satellite offices) and 24 overseas branches (including one satellite office and four offices).

The Bank is authorized to issue 2,000 million shares (par value amount : ₩5,000) of common stock, and as of December 31, 2023, after a number of capital increases and decreases, stock splits and conversion of preferred shares to common shares, the Bank has 1,071,915,717 shares of common stock issued and outstanding with the total capital stock amounting to ₩5,359,578 million.

The consolidated financial statements of the Group as of and for the year ended December 31, 2023, were approved by the Board of Directors on January 30, 2024, and will be approved finally at the shareholders' meeting to be held on March 20, 2024.

## 1-2 Scope and overview of consolidation

The Group's ownership percentages in its consolidated subsidiaries as of December 31, 2023, are summarized as follows (ownership in %):

| Investee                                  | Country   | Major business     | Share ratio (%) | Reporting date |
|-------------------------------------------|-----------|--------------------|-----------------|----------------|
| Subsidiaries of Hana Bank                 |           |                    |                 |                |

### 1-3 Structured entities

#### 1-3-1 Consolidated structured entities

1-3-1-1 Hana UBS Power PEF Invest Trust 21 and a set of two other private equity investment vehicles

In accordance with K-IFRS 1110, two other private equity investment vehicles and Hana UBS Power PEF Invest Trust 21 were included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

1-3-1-2 Sevenstar Co., Ltd. and 60 other special-purpose entities

In accordance with K-IFRS 1110, 60 SPCs and Sevenstar Co., Ltd. were included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

### 1-3-1-3 Trust accounts

In accordance with K-IFRS 1110, trust accounts are included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

### 1-3-1-4 Hana Tech Value-Up Investment Fund and one other fund

In accordance with K-IFRS 1110, Hana Tech Value-Up Investment Fund and one other fund are included in consolidation scope because the Group has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee.

### 1-3-1-5 Contractual commitments to consolidated structured entities

The consolidated structured company for the securitization of assets is established for the securitization of loans. The Group is involved in the acquisition of subordinated bonds issued by the consolidated structured company or provide credit for the asset-backed commercial paper ("ABCP") and others, and is exposed to the risk of not being able to recover the acquisition amounts based on the investment performance. Characteristics and intentions of contractual commitments offered by the Group to the consolidated structured entities are as follows:

| Company name                       | The characteristics and purposes                                                                                                                                                                              | Intention                                                       |
|------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------|
| Development trust and other trusts | The Group offers principal conservation commitment to trust accounts. The Group is required to conserve the deficit amount in case the trust account stands below the principal as a result of the operation. | Credit risk mitigation on financial management of trust account |
| Ocean Betts The First Co., Ltd.    | The Group partially purchased ABCP (purchase commitment of ₩50,000 million) from Ocean Betts The First Co., Ltd..                                                                                             | Operating activities                                            |
| Hana H in the holdings 1st LLC     | The Group partially purchased ABCP (purchase commitment of ₩150,000 million) from Hana H in the holdings 1st LLC.                                                                                             | Operating activities                                            |
| H-Plus 1st, LLC                    | The Group partially purchased ABCP (purchase commitment of ₩100,000 million) from H-Plus 1st, LLC.                                                                                                            | Operating activities                                            |
| Hana CK 1st Co., Ltd.              | The Group partially purchased ABCP (purchase commitment of ₩56,400 million) from Hana CK 1st Co., Ltd..                                                                                                       | Operating activities                                            |

## 2. Basis of preparation and material accounting policies

### 2-1 Basis of preparation

The Group prepares statutory consolidated financial statements in accordance with K-IFRS enacted by the *Act on External Audit of Stock Companies*.

The accompanying consolidated financial statements have been translated into English from Korean consolidated financial statements prepared in Korean. In the event of any differences in interpreting the consolidated financial statements or the independent auditor's report thereon, the Korean version, which is used for regulatory reporting purposes, shall prevail.

The directors have, at the time of approving the consolidated financial statements a reasonable expectation that the Group has adequate resources to continue in operational existence for the foreseeable future. Thus they continue to adopt the going-concern basis of accounting in preparing the consolidated financial statements.

### 2-2 Changes in material accounting policies

The material accounting policies used for the preparation of the consolidated financial statements are the same as those adopted in preparing annual financial statements as of and for the year ended December 31, 2022, except for the adoption of new standards and interpretations effective as of January 1, 2023.

Changes in accounting policies in accordance with the adoption of new standards and interpretations for the current reporting period are as follows:

2-2-1 K-IFRS 1001, *Presentation of Financial Statements and IFRS Practice Statement 2 Making Materiality Judgments – Disclosure of Accounting Policies (Amendments)*

The amendments change the requirements in K-IFRS 1001 with regard to disclosure of accounting policies. The amendments replace all instances of the term 'significant accounting policies' with 'material accounting policy information.' Accounting policy information is material if, when considered together with other information included in an entity's financial statements, it can reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements.

The supporting paragraphs in K-IFRS 1001 are also amended to clarify that accounting policy information that relates to immaterial transactions, other events or conditions is immaterial and need not be disclosed. Accounting policy information may be material because of the nature of the related transactions, other events or conditions, even if the amounts are immaterial. However, not all accounting policy information relating to material transactions, other events or conditions is itself material.

The International Accounting Standards Board has also developed guidance and examples to explain and demonstrate the application of the 'four-step materiality process' described in International Financial Reporting Standard Practice Statement 2.

There is no material impact of this amendment on the Group's consolidated financial statements.

2-2-2 K-IFRS 1001, *Presentation of Financial Statements– Disclosure of financial liabilities with condition to adjust exercise price (Amendments)*

The amendments require disclosure of valuation gains or losses (limited to those recognized in the profit or loss) of the conversion options or warrants (or financial liabilities including them), if all or part of the financial instrument with exercise price that is adjusted depending on the issuer's share price change is classified as financial liability as defined in paragraph 11 (2) of K-IFRS 1032.

There is no material impact of this amendment on the Group's consolidated financial statements.

2-2-3 K-IFRS 1008, *Accounting Policies, Changes in Accounting Estimates and Errors – Definition of Accounting Estimates (Amendments)*

The amendments replace the definition of a change in accounting estimates with a definition of accounting estimates. Under the new definition, accounting estimates are "monetary amounts in financial statements that are subject to measurement uncertainty" and the definition of a change in accounting estimates was deleted.

There is no material impact of this amendment on the Group's consolidated financial statements.

2-2-4 K-IFRS 1012, *Income Taxes – Deferred Tax related to Assets and Liabilities arising from a Single Transaction (Amendments)*

The amendments reduce the scope of the initial recognition exemption. Depending on the applicable tax law, equal taxable and deductible temporary differences may arise on initial recognition of an asset and liability in a transaction that is not a business combination and affects neither accounting profit nor taxable profit.

Under the amendments, an entity does not apply the initial recognition exemption for transactions that give rise to equal taxable and deductible temporary differences and is required to recognize the related deferred tax asset and liability with the recognition of any deferred tax asset being subject to the recoverability criteria in K-IFRS 1012.

There is no material impact of this amendment on the Group's consolidated financial statements.

*2-2-5 K-IFRS 1012, Income Taxes – International Tax Reform – Pillar Two Model Rules (Amendments)*

The amendments clarify that the standard applies to income taxes arising from tax law enacted or substantively enacted to implement the Pillar Two Model Rules published by the Organisation for Economic Co-operation and Development including tax law that implements qualified domestic minimum top-up taxes described in those rules. The amendments introduce a temporary exception to the accounting requirements for deferred taxes in K-IFRS 1012, so that an entity would neither recognize nor disclose information about deferred tax assets and liabilities related to Pillar Two income taxes. Following the amendments, the Group is required to disclose that it has applied the exception and to disclose separately its current tax expense (income) related to Pillar Two income taxes.

The Group applies a temporary exception to the accounting requirements for deferred taxes related to Pillar Two Model Rules, and as the law will be enforced from January 1, 2024, the current corporate tax expense related to Pillar Two income taxes is not recognized. The potential tax impact from the law enforcement is under consideration.

2-2-6 K-IFRS 1117, *Insurance Contracts (New standard)*

K-IFRS 1117 establishes the principles for the recognition, measurement, presentation and disclosure of insurance contracts and supersedes K-IFRS 1104, *Insurance Contracts*. The standard mainly features measuring the current value of insurance liabilities, recognizing insurance income on accrual basis and indicating the distinction between insurance gains and investment gains.

The Group does not have any contracts that meet the definition of an insurance contract under K-IFRS 1117, and there is no material impact of this amendment on the Group's consolidated financial statements.

The new and amended standards and interpretations that are issued, but not yet effective up to the date of issuance of the Group's consolidated financial statements are disclosed below.

2-2-7 K-IFRS 1001, *Presentation of Financial Statements – Classification of Liabilities as Current or Non-current (Amendments of 2020)*

The amendments clarify that the classification of liabilities as current or non-current is based on the entity's right to defer settlement of liabilities at the end of the reporting period, not by the likelihood that the entity will exercise the right or not. The amendments highlight that the right exists if the entity complies with the borrowing agreement at the end of the reporting period and the definition of settlement is transferring cash, equity instruments, other assets or services to the counterparty.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, must be applied retrospectively and early adoption is permitted. If an entity applies this amendments for an earlier period, it is also required to apply the 2023 amendments early.

2-2-8 K-IFRS 1001, *Presentation of Financial Statements – Non-current Liabilities with Covenants (Amendments of 2023)*

Only the borrowing agreement to be complied within the end of the reporting period ("Agreement"), affects the entity's right to defer settlement of liabilities at least 12 months after the reporting period.

Even if compliance of Agreement is assessed only after the reporting period, Agreement defines the existence of rights at the end of the reporting period. Agreement to be complied with only after the reporting period does not affect the right to defer settlement. However, if the deferral right depends on Agreement complied within 12 months after the reporting period, the entity should disclose information about the risk that the liability may be settled within 12 months. Disclosure includes information about Agreement (including the nature and the time for the entity to comply with Agreement), the carrying amount of the liability and the facts and circumstances indicating that the arrangement may be difficult to comply with.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024, must be applied retrospectively, and early adoption is permitted. If an entity applies the amendments for an earlier period, it is also required to apply the 2020 amendments early.

2-2-9 K-IFRS 1007, *Statement of Cash Flows* and K-IFRS 1107, *Financial Instruments: Disclosures– Supplier Finance Arrangements (Amendments)*

These amendments add a requirement to disclose information about financing arrangements to enable financial statement users of K-IFRS 1007 to assess the impact of financing arrangements on the entity's liabilities and cash flows.

Additionally, K-IFRS 1107 has been amended to include financing arrangements as an example of requirements to disclose information related to exposure to liquidity concentration. This aims to ensure that users can evaluate the impact of financing arrangements on the entity's financial position accurately.

The term 'supplier finance arrangements' is not defined. Instead, the amendments describe the characteristics of an arrangement for which an entity would be required to provide the information.

To meet the disclosure objective, an entity will be required to disclose in aggregate for its supplier finance arrangements:

- The terms and conditions of the arrangements
- The carrying amount and associated line items presented in the entity's statement of financial position of the liabilities that are part of the arrangements
- The carrying amount and associated line items for which the suppliers have already received payment from the finance providers
- Ranges of payment due dates for both those financial liabilities that are part of a supplier finance arrangement and comparable trade payables that are not part of a supplier finance arrangement
- Types and effects of non-cash changes in the carrying amount of financial liabilities that are part of a supplier finance arrangement
- Liquidity risk information

The amendments, which contain specific transition reliefs for the first annual reporting period in which an entity applies the amendments, are applicable for annual reporting periods beginning on or after January 1, 2024. Earlier application is permitted.

#### 2-2-10 K-IFRS 1116 *Leases- Lease Liability in a Sale and Leaseback (Amendments)*

The amendments add subsequent measurement requirements for sale and leaseback transactions that satisfy the requirements in K-IFRS 1115 to be accounted for as a sale. The amendments require the seller-lessee to determine 'lease payments' or 'revised lease payments' such that the seller-lessee does not recognize a gain or loss that relates to the right of use retained by the seller-lessee, after the commencement date.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024. Earlier application is permitted.

#### 2-2-11 K-IFRS 1001 *Presentation of Financial Statements– Disclosure of Virtual Assets (Amendments)*

The amendments add additional disclosure requirements required by other standards for transactions related to virtual assets, setting out disclosure requirement for each case of 1) holding virtual assets, 2) holding virtual assets on behalf of customer and 3) issuing virtual assets.

When holding a virtual asset, disclosure on the general information about virtual assets, the accounting policy applied and each virtual asset's acquisition method, cost and the fair value at the end of the reporting period are required. Also, when issuing a virtual asset, the entity's obligations and status of fulfilment of the obligation related to the issued virtual asset, the timing and amount of the recognized revenue of the sold virtual asset, the number of virtual assets held after issuance and important contract details shall be disclosed.

The amendments are effective for annual reporting periods beginning on or after January 1, 2024. Earlier application is permitted.

#### 2-3 Scope and principles of consolidation

Significant methods of accounting for consolidation when preparing consolidated financial statements are as follows:

##### 2-3-1 Subsidiaries

The Bank has the ability to determine the financial and operating policies of subsidiaries. Generally, the Bank classified the entity as subsidiary in case the Bank has existing rights that give it the current ability to direct the relevant activities, and is not only exposed, or has rights, to variable returns, but also has the ability to use its power to affect the Group's returns from its involvement with the investee. Subsidiaries are fully consolidated from the date on which the

control is transferred to the Group and excluded from the subsidiaries at the point when the Group loses the control.

#### 2-3-2 Offset of the investment accounts of the Group and the corresponding equity accounts

The investment accounts of the Group and the corresponding equity accounts of the subsidiaries are eliminated in consolidation.

#### 2-3-3 Process of difference between the costs of investment

The consolidated financial statements reflect on only the share of the consolidated subsidiaries post application of purchase accounting method. When applying the acquisition method, if the transfer consideration, the amount of non-controlling interest in the acquiree and the total fair value of the parent's previous holdings exceed the fair value of the subsidiary's asset liabilities, the difference is recognized as goodwill and is considered for impairment at the end of each reporting period.

Changes in the parent's ownership interest in a subsidiary that does not lose control after the date of acquisition of control are treated as capital transactions. When the group loses control of a subsidiary, a gain or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), less liabilities of the subsidiary and any non-controlling interests.

#### 2-3-4 Elimination of intercompany transactions and the unrealized gain or loss, etc.

All significant intercompany transactions and the account balances among the consolidated companies are eliminated on consolidation. Unrealized gains or losses included in loans and borrowings arising from transactions between consolidated companies are eliminated on consolidation. The related accounts receivable and payable are also eliminated on consolidation.

## 2-3-5 Investments in associates and a joint venture

Investments in entities over which the Group has control or significant influence are accounted for using the equity method. Under the equity method of accounting, the Group's initial investment in an investee is recorded at acquisition cost. Subsequently, a share of changes in equity (the Group's share of amount of the changes in associates' net assets) is adjusted to reflect in the carrying value. The share of changes in equity is accounted differently per sources. If the change in net asset has occurred due to net income or loss, it is accounted for as gain or loss on equity method. If it has occurred due to unappropriated retained earnings carried over from prior years, it is accounted for as changes in retained earnings under equity method. The change in net assets due to changes in equity, except those mentioned above, is accounted for as equity adjustments in equity method or negative equity changes in equity method.

If the carrying amount of investments in associates is equal to or under '0,' it suspends equity method and carries the investments value at '0.' If the Group has investment assets, such as preferred shares and long-term bonds of associates, it continues recognizing its share of further losses to the extent of the carrying amount of such asset's value '0.' The Group resumes the application of the equity method if the Group's share of income or change in equity of an investee exceeds the Group's share of losses accumulated during the period of suspension of the equity method of accounting. When the Group retains an interest in the former associate or a joint venture and the retained interest is a financial asset, the Group measures the retained interest at fair value at that date and the difference between the carrying amount of the associate or a joint venture at the date the equity method was discontinued, and the fair value of any retained interest and any proceeds from disposing of a part interest in the associate or a joint venture is included in the determination of the gain or loss on disposal of the associate or joint venture.

At the date of acquisition, the excess of the cost of the investment over the Group's share of the net fair value of the investee's identifiable assets and liabilities is accounted for as goodwill or negative goodwill. The goodwill is not amortized, and if there is any indication that investment shares in associates and joint ventures, including those, have been impaired, it is being considered against the recoverable value (greater of net fair value and value in use). In addition, the difference between the fair value and the carrying amount of the identifiable assets and liabilities of the investee at the time of stock acquisition is amortized or reversed according to the equity method of the investee.

The Group's share in the investee's unrealized profits and losses resulting from transactions between the Group and its investee is eliminated to the extent of the interest in the investee.

#### 2-3-6 Special reserve on trust accounts

A special reserve provided under the arrangement of guaranteed fixed rate of return and guaranteed repayment of the principal is included under the retained earnings in the consolidated financial statements.

#### 2-3-7 Non-controlling interests

Subsidiaries' equity that is not included in the Group's share is accounted as non-controlling interests. In case, subsidiaries' non-controlling interests are below '0,' negative non-controlling interests are presented as deduction of equity.

## 2-4 Foreign currency transaction

### 2-4-1 Functional currency

When preparing for the consolidated financial statements, the Group measures and recognizes all items and transactions according to the functional currency. The term functional currency is defined as the monetary unit of account of the principal economic environment in which the entity operates and trades between entities using its own functional currency and other currencies that are converted to the Group's functional currency to be measured and recognized.

### 2-4-2 Transactions and balances at the end of the reporting period

Transactions in foreign currencies are initially recognized as functional currency, applying spot or average exchange rates. Monetary assets and liabilities denominated in foreign currencies are retranslated at the functional currency spot rate of exchange at the reporting date and differences arising on settlement or translation of monetary items are recognized in profit or loss. Non-monetary assets and liabilities at fair value in a foreign currency are translated at the exchange rates at the end of the reporting date. When a gain or loss on a non-monetary item is recognized in profit or loss, any exchange differences of that gain or loss are recognized in profit or loss and when a gain or loss on a non-monetary item is recognized in other comprehensive income, any exchange differences of that gain or loss are recognized in other comprehensive income. Non-monetary items not measured at fair value in a foreign currency are translated using the exchange rates as at the dates of the initial transactions and thus, there are no exchange differences.

However, an item for which settlement is neither planned nor likely to occur in the foreseeable future is, in substance, a part of the entity's net investment in that foreign operation. Exchange differences arising on a monetary item that forms a part of a reporting entity's net investment in a foreign operation are recognized initially in other comprehensive income and reclassified from equity to profit or loss on disposal of the net investment.

#### 2-4-3 Translation of the presentation currency

As of the reporting date, the assets and liabilities of overseas branches are translated into the Group's presentation currency, Korean won ("KRW").

The Group's assets and liabilities are translated at the rate of exchange prevailing at the reporting date and the Group's consolidated statements of profit or loss and other comprehensive income and changes in equity are translated using the exchange rates at the transaction date or the average exchange rates for the period. The exchange differences arising on translation are recognized in other comprehensive income.

#### 2-5 Cash and cash equivalents

Cash and cash equivalents in the consolidated statements of financial position are composed of cash at bank and on hand, etc. The purpose of cash and cash equivalents is not to make short-term investments, but to meet short-term cash demands. Cash and cash equivalents are highly liquid, easily convertible and subject to an insignificant risk of changes in value.

Deposits restricted from use by the Group under contracts with third parties are included as part of cash, unless such restrictions prevent deposits from meeting the definition of cash any longer. Contractual restrictions affecting the use of cash and deposits are described in Note 10-2.

#### 2-6 Financial asset classification and subsequent measurement

At initial recognition, financial assets are classified as measured at fair value through profit or loss ("FVTPL"), fair value through other comprehensive income ("FVOCI") and amortized cost, and financial liabilities are classified as measured at FVTPL and amortized cost and in accordance with the business model and characteristics of the contractual cash flows.

Regular-way purchase or sale of financial assets is recognized at the trade date that an entity commits itself to purchase or sell an asset. Regular-way purchase or sale of financial assets means purchase or sale of financial assets under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

Financial assets and liabilities are initially measured at fair value and the transaction costs directly attributable to the acquisition (issuance) of financial assets (liabilities) are added to (deducted from) the fair value at initial recognition if they are not measured at FVTPL. The fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value of financial instruments is generally measured at the transaction price (the fair value of the consideration received or transferred) at initial recognition.

#### 2-6-1 Financial assets at FVTPL

Financial assets held for trading or designated as at FVTPL and financial assets that are not classified as at FVOCI or amortized cost are classified as FVTPL.

Also, the Group may designate a financial asset as measured at FVTPL if doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring assets or liabilities or recognizing the gains and losses on them on a different base.

Financial assets at FVTPL are measured at fair value and the gain or loss on valuation is recognized as profit or loss. Dividends and interest income from the financial assets are also recognized as profit or loss.

## 2-6-2 Financial assets at FVOCI

The Group classifies debt securities, which are held within a business model, whose objective is achieved by both collecting contractual cash flows and selling financial assets and meet the assessment of contractual cash flow characteristics and equity securities designated as measured at FVOCI, which are held not with intention to sell, but for strategic purpose, as financial assets at FVOCI. Financial assets at FVOCI are measured at fair value after initial recognition. Gain or loss arising from changes in the fair value is recognized as other comprehensive income, except for interest income under the effective interest method, dividends and foreign exchange differences on monetary assets that are directly recognized in profit or loss.

When financial assets at FVOCI are disposed of, the cumulative income recognized in other comprehensive income is transferred to the current profit or loss. However, the cumulative income recognized for equity securities designated as financial assets at FVOCI is not transferred to the current profit or loss.

The fair value of financial assets at FVOCI presented in foreign currencies is translated using the exchange rate at the end of the reporting period. Changes in the fair value from exchange differences due to changes in amortized cost are recognized in the current profit or loss, while other changes are recognized directly in equity.

## 2-6-3 Financial assets at amortized cost

Financial assets within a business model whose objective is achieved by collecting contractual cash flows, which meet the contractual cash flow characteristics are classified as financial assets at amortized cost. After initial recognition, the financial assets are measured at amortized cost using the effective interest rate ("EIR") method and presented by deducting from the amortized cost the allowance for loan losses. Interest income is recognized using the effective interest method.

The Group defers loan origination fees ("LOF")/ loan origination costs ("LOC") associated with originating loans and LOCs that have future economic benefits. Loan balances are reported net of these LOF/LOCs. The deferred LOF/LOCs are amortized based on the effective interest method, with the amortization recognized as adjustments to interest income.

## 2-7 Derivative financial instruments and hedge accounting

Derivative instruments are initially recognized at fair value on the date on which a derivative contract is entered into and are classified as trading derivatives or hedging derivatives depending on whether hedge accounting is applied. After initial recognition, derivative instruments are subsequently remeasured at fair value. Any gains or losses arising from changes in fair value on derivatives are taken directly to the consolidated financial statements, except for the effective portion of cash flow hedges or hedges of net investment in a foreign operation, which is recognized in other comprehensive income.

The Group applies fair value hedge accounting to hedge the changes in fair value, as a whole or some parts, of recognized assets or liabilities from particular risks or an unrecognized firm commitment. Cash flow hedge is accounted to hedge the changes in cash flows of recognized assets or liabilities from particular risks or a highly probable forecast transaction.

The Group documents the hedge relationship, risk management objective, strategy, the nature of the risk being hedged and method to assess the effectiveness of hedge to apply hedge accounting. The effectiveness of hedge means the effect of offsetting the exposure to changes in fair value or cash flow of hedged items by changes in fair value or cash flow of derivatives attributed by the hedged risk. The Group assesses and documents whether such hedges are expected to be highly effective at the end of the reporting period.

An ineffective part of the hedge may be due to differences between underlying variables, such as acquisition date, credit risk or liquidity and the hedging

instruments that the entity accepts to achieve an effective cost-to-cost hedging relationship with.

#### 2-7-1 Fair value hedges

When fair value hedge accounting is applied, the unrealized gain or loss on hedged items that are attributable to a hedged risk and hedging instruments is symmetrically recognized in the consolidated financial statements as current income for the same reporting period to ensure that changes in the fair value of the hedged items are offset by changes in the fair value of the hedging instruments. When the hedged item is an equity instrument designated at FVOCI, the hedging gain or loss remains in other comprehensive income. If an application of hedge accounting is no longer valid, the Group discontinues the hedge accounting prospectively. Any adjustment to the carrying amount of hedged items is amortized to profit or loss in the consolidated statements of profit or loss and other comprehensive income over the remaining maturity using the effective interest method.

#### 2-7-2 Cash flow hedges

When cash flow hedge accounting is applied, the effective portion of the unrealized gain or loss on the hedging instrument is directly recognized in other comprehensive income (loss) in the consolidated statements of financial position to ensure that changes in the cash flows of the hedged items are offset by changes in the cash flows of the hedging instruments while any ineffective portion is recognized immediately in the consolidated statements of profit or loss and other comprehensive income. Amounts recognized as other comprehensive income are transferred to the consolidated statement of comprehensive income when the hedged transaction affects profit or loss. If an application of hedge accounting no longer meets the criteria, the Group discontinues the hedge accounting prospectively and the cumulative gain or loss on the hedging instrument previously recognized in other comprehensive income is transferred to profit or loss in the consolidated statements of profit or loss and other comprehensive income.

### 2-7-3 Hedge accounting of net investment in a foreign operation

When applying hedge accounting of net investment in a foreign operation, the effective portion of changes in fair value of the hedging instrument is recognized in other comprehensive income and the ineffective portion of the hedge is recognized as current profit or loss in order to offset changes in the fair value of the hedged item caused by the hedging with changes in the fair value of the hedging instrument. The effective portion of hedge recognized in other comprehensive income will be reclassified from other comprehensive income to current profit or loss in accordance with K-IFRS 1021, *The Effects of Changes in Foreign Exchange Rates*, at the time of disposal of a foreign operation or disposal of a portion of its foreign operations in the future.

### 2-7-4 Embedded derivatives

An embedded derivative is a component of a hybrid contract that also includes a non-derivative host with the effect that some of the cash flows of the combined instrument vary in a way similar to a stand-alone derivative. Derivatives embedded in other financial instruments or other host contracts are accounted for as separate derivatives when their risks and characteristics are not closely related to those of the host contracts and the host contracts are not measured at FVTPL.

### 2-7-5 'Day 1' profit or loss

In case of derivatives in Level 3, fair value is determined using data that is not observable from markets. The difference between the transaction price and fair value at initial recognition (a 'Day 1' profit or loss) is deferred and amortized up to its maturity using the straight-line method.

### 2-7-6 Credit risk valuation adjustment

When assessing derivatives at fair value, expected loss from credit risk is measured and deducted from derivative assets to reflect credit risk of counterparties.

## 2-8 Expected credit loss ("ECL") for financial assets

Loss allowance is recognized for financial assets at FVOCI and amortized cost using the ECL model.

ECL is the weighted-average amount of possible outcomes within a certain range, reflecting the time value of money; estimates on the past; current and future situations; and information accessible without excessive cost or effort.

The ECL can be measured in following three ways:

- General approach: when financial assets do not fall into below two categories and are off-balance-sheet undrawn commitments
- Simplified approach: when financial assets are trade receivables, contract assets or lease receivables
- Credit-impaired approach: when financial assets are credit impaired at initial recognition

The general approach is applied differently depending on the significance of the increase of the credit risk. If, at the reporting date, the credit risk on a financial instrument has not increased significantly since initial recognition, the Group shall measure the loss allowance for that financial instrument at an amount equal to 12-month ECL. If the credit risk on that financial instrument has increased significantly since initial recognition, the Group shall measure the loss allowance for a financial instrument at an amount equal to the lifetime ECL at each reporting date.

The loss allowance is measured at an amount equal to lifetime ECL for the simplified approach and the Group shall only recognize the cumulative changes in lifetime ECL since initial recognition as a loss allowance for purchased or originated credit-impaired financial assets at each reporting date for the credit-impaired approach.

The following non-exhaustive list of information may be relevant in assessing changes in credit risk:

- Significant changes in internal price indicators of credit risk as a result of a change in credit risk since inception
- Other changes in the rates or terms of an existing financial instrument that would be significantly different
- An actual or expected significant change in the financial instrument's external credit rating
- An actual or expected internal credit rating downgrade for the borrower or decrease in behavioral scoring used to assess credit risk internally
- An actual or expected significant change in the operating results of the borrower
- Past-due information, etc.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a financial instrument has not increased significantly since initial recognition if the financial instrument is determined to have low credit risk at the reporting date.

#### 2-8-1 Reflecting forward-looking information

The Group measures the significance of the increase of the credit risk and the ECL using forward-looking information.

The Group assumes that the risk component is correlated with changes in market conditions and calculates the ECL using the forward-looking information by modeling macroeconomic variables and risk components.

The forward-looking information used to measure the ECL is derived from 'stress-case' or 'worst-case' scenarios.

#### 2-8-2 Measurement of ECL for financial assets at amortized cost

ECL for financial assets at amortized cost is measured as the present value of the difference between the contractual cash flows that are due to the Group under the contract and the cash flows that the Group expects to receive. For this purpose, the Group calculates expected contractual cash flows for individually significant financial assets (allowance for loan losses on an individual assessment). Financial assets insignificant in value individually are measured on a collective basis with financial assets with similar credit risks (allowance for loan losses on a collective assessment).

##### 2-8-2-1 Allowance for loan losses on an individual assessment basis

Allowance for loan losses on an individual assessment basis is based on the best estimates of management with regard to the present value of cash flows expected to be recovered from receivables. In estimating the cash flows, the Group uses all available information, including the financial conditions, such as the operating cash flows of counterparties and the net realizable value of collateral provided.

##### 2-8-2-2 Allowance for loan losses on a collective assessment basis

Allowance for loan losses on a collective assessment basis uses the estimation model that accounts for the forward-looking information based on the past loss rate to measure the ECL. The model considers the probability of default and the loss given default ("LGD") reflecting the type of instruments and borrowers, credit rating, portfolio size and collection period. Also, certain assumptions are applied to model the ECL measurement and to determine input variables based on past experiences and forward-looking information. Methodologies and assumptions for this model are regularly reviewed to minimize the difference between the allowance for loan losses and the actual loss.

The ECL for financial assets at amortized cost is recognized as the allowance for loan losses, and when the financial asset is determined to be irrecoverable, the carrying amount and allowance for loan losses are decreased. If financial assets previously written off are recovered, the allowance for loan losses is increased and the difference is recognized in the current profit or loss.

#### 2-8-3 ECL measurement for financial assets at FVOCI

The measurement method is the same as the one for financial assets at amortized cost, but the change in the allowance is recognized as other comprehensive income. The allowance for financial assets at FVOCI is reclassified from other comprehensive income to current profit or loss when the assets are disposed of or repaid.

#### 2-9 Derecognition of financial assets

A financial asset is derecognized when the contractual rights to the cash flows from the financial asset expire, or the Group transfers substantially all the risks and rewards of ownership of the financial asset. If the Group neither transfers nor retains substantially all the risks and rewards of ownership of the financial asset, but has retained control, the Group recognizes the asset and the associated liability to the extent of the Group's continuing involvement in the financial asset. If most of the risks and rewards of owning a financial asset are controlled without holding or transferring it, the Group recognizes them in its consolidated statements of financial position as the Group continues to be involved in the financial asset and related liabilities to be paid.

On derecognition of a financial asset measured at amortized cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognized in profit or loss. In addition, on derecognition of an investment in a debt instrument classified as at FVOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is reclassified to profit or loss. In contrast, on derecognition of an investment in equity instrument that the Group has elected on initial recognition to measure at FVOCI, the cumulative gain or loss previously accumulated in the investments revaluation reserve is not reclassified to profit or loss, but is transferred to retained earnings.

## 2-10 Classification and measurement of financial liabilities

All financial liabilities that are classified as financial liabilities at FVTPL, borrowings or others are measured initially at their fair value, minus transaction costs, except in the case of financial liabilities recorded at FVTPL.

### 2-10-1 Financial liabilities at FVTPL

Financial liabilities at FVTPL include financial liabilities held for trading and financial liabilities designated upon initial recognition as at FVTPL. Financial liabilities are classified as held for trading if they are acquired for the purpose of selling in the near term. All derivatives, including an embedded derivative separated from the host contract, are reclassified as financial liabilities at FVTPL, except for financial liabilities designated as effective hedging instruments or financial guarantee contracts. After initial recognition, the changes in the fair value of the financial liabilities at FVTPL and the related interest expenses are recognized as profit or loss. However, for financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognized in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss.

The Group performs securities lending and borrowing classified as held-for-trading financial liabilities. When the Group borrows securities from Korea Securities Depository, securities borrowed are managed as memorandum value and when selling them, they are recorded as securities sold. At closing, the difference between the price securities are sold and the market price prevailing on the closing date is taken into account as valuation gain or loss on securities sold, and at the time of selling the securities, the difference in book value and the price at which securities are purchased is recorded as trading gain or loss on securities sold.

#### 2-10-2 Deposits, borrowings and debentures

Interest-bearing deposits, borrowings and debentures are subsequently measured at amortized cost using the effective interest method. The difference between the consideration received after deducting transaction costs and the amount repayable on maturity is amortized by the effective interest method and recognized in profit or loss for the relevant period.

#### 2-11 Derecognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged, canceled or expired. When an existing financial liability is replaced by another from the same lender on substantially different terms or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability, and the difference in the respective carrying amounts is recognized in the consolidated statements of profit or loss and other comprehensive income. It is assumed that the terms are substantially different if the discounted present value of the cash flows under the new terms, discounted using the original EIR is at least 10% different from the discounted present value of the remaining cash flows of the original financial liability.

## 2-12 Offsetting of financial assets and liabilities

Financial assets and financial liabilities are offset, and the net amount reported in the consolidated statements of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis or to realize the asset and settle the liability simultaneously.

## 2-13 Provisions

Provisions are recognized when the Group has a present obligation (legal or constructive) as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the obligation is expected, it is unlikely or the amount of the loss cannot be estimated reliably, the amount is disclosed. If the effect of the time value of money is material, provisions are stated at present value. At the end of each reporting period, the remaining provision balance is reviewed and assessed to determine if the current best estimate is being recognized. If the existence of an obligation to transfer economic benefit is no longer probable, the related provision is reversed during the period.

The Group accounts for the payment guarantee provision in the same way in accounting allowance for loan losses on a collective assessment basis by applying the Cash Conversion Factor to the confirmed/unconfirmed payment guarantees and bills endorsed. The Group provides an allowance for loan losses on a certain portion of unused credit line. The Group records the provision for such unused balances as an allowance for loan losses on unused commitments, which are calculated by applying a credit conversion factor and provision rates.

#### 2-14 Financial guarantee contract

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument and is measured at fair value on the date of initial recognition. After initial recognition, the Group, as an issuer of such a contract, measures it at the higher of (i) the amount determined in accordance with K-IFRS 1109, *Financial Instruments*, or (ii) the amount initially recognized less, when appropriate, cumulative amortization recognized in accordance with K-IFRS 1115, *Revenue from Contract with Customer*.

#### 2-15 Bonds purchased under resale agreements and bonds sold under repurchase agreements

Bonds purchased under resale agreements and bonds sold under repurchase agreements are included in loans and borrowings, respectively, in the accompanying consolidated statements of financial position. Interest income and expenses from purchase or sale are recognized as interest income on loans and interest expenses on borrowings, respectively.

#### 2-16 Property, plant and equipment

Property, plant and equipment are measured at cost, and the carrying amount after initial recognition is expressed as the amount of the acquisition cost minus the accumulated depreciation and the accumulated impairment loss. The cost of property, plant and equipment is an expenditure directly related to the purchase or construction of the asset, including the cost directly related to the location and condition required to operate the asset in the manner intended by management and the cost initially estimated to be required to dismantle, remove or restore the site.

The subsequent costs are recognized as an asset when it is probable that future economic benefits associated with the asset will flow to the Group and the costs of the asset can be measured reliably. The other maintenances and repairs are expensed in the year in which they are incurred, and the carrying amount of certain parts that are replaced is derecognized.

Land is not depreciated. For depreciation of other assets, amount of acquisition cost, less residual value is calculated on a straight-line basis and declining-balance basis over the following estimated useful life of the asset:

| Classification                                | Depreciation method      | Years   |
|-----------------------------------------------|--------------------------|---------|
| Buildings, building components and structures | Straight-line method     | 5 to 55 |
| Leasehold improvements                        | Straight-line method     | 3 to 10 |
| Equipment and vehicles                        | Declining-balance method | 3 to 20 |

If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is immediately reduced to its recoverable amount.

The residual value and economic useful life are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for, if necessary. Any gain or loss arising on the derecognition of the asset is recognized in 'Non-operating income' or 'Non-operating expenses' in the consolidated statements of profit or loss and other comprehensive income in the year the asset is derecognized.

## 2-17 Investment properties

Investment properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are stated using the cost model.

Investment properties are derecognized either when they have been disposed of or the investment property is permanently withdrawn from use and no future economic benefit is expected from its disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognized in the consolidated statements of profit or loss and other comprehensive income in the period of derecognition, and transfers are made to or from investment property only when there is a change in use. Land is not depreciated among investment properties, and the depreciation method of the buildings is a straight-line method, and their useful life is 5 to 55 years. The depreciation method, residual value and useful life of investment property are reviewed at the end of each reporting period, and if it is deemed appropriate to change it, it is accounted for as a change in accounting estimates.

## 2-18 Intangible assets

An intangible asset, which comprises industrial property rights, software, development costs and others, is recognized as an asset only if it is probable that future economic benefits associated with the asset will flow to the Group and the costs of the asset can be measured reliably. Intangible assets acquired individually are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is their fair value as of the date of acquisition in accordance with K-IFRS 1103, *Business Combination*.

Amortization of intangible assets with definite useful lives is calculated on the following amortization method over the estimated useful life of the assets:

| Classification                                                    | Depreciation method  | Years   |
|-------------------------------------------------------------------|----------------------|---------|
| Industrial property rights, software and system development costs | Straight-line method | 5       |
| Core deposits                                                     | Straight-line method | 14      |
| Other intangible assets                                           | Straight-line method | 1 to 12 |

Intangible assets with indefinite useful lives are not amortized, but are annually tested for impairment or whenever there is an indication that the intangible asset may be impaired. The assessment of indefinite useful life is reviewed annually to determine whether the indefinite useful life continues to be supportable.

#### 2-19 Impairment of non-financial assets

The Group tests the depreciable asset for impairment whenever there is a change of environment or an event that the carrying amount may not be recoverable. The Group recognizes an excess of the carrying amount over the recoverable amount as an impairment loss. The Group defines recoverable amount as the higher of an asset's or cash-generating unit ("CGU")'s fair value, less costs to sell, or its value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels (CGUs) for which there are separate and identifiable cash flows. The Group assesses the reversal of an impairment loss recognized for the non-financial assets other than goodwill at the end of the reporting period.

#### 2-20 Net defined benefit liabilities (assets)

The Group calculates defined benefit liabilities and pension benefit expenses based on a defined benefit plan and defined contribution plan when an employee retires in accordance with pension-related regulations. For defined benefit plans, the cost of retirement benefits is measured by an actuary services company, using the projected unit credit method. The present value of a defined benefit obligation is computed by discounting expected future cash outflows with market rate of return measured against the yield of high-graded corporate bond, whose date of payment and maturity is similar to that of a defined benefit obligation. Actuarial gains and losses, incurred from the change in actuarial assumptions and the difference between the assumptions and the actual results, are recognized in other comprehensive income for the period. Past service cost is recognized immediately to the extent that the benefits are already vested and otherwise is amortized on a straight-line basis over the period until the benefits become vested.

The Group has entered into retirement trust fund and retirement pension plan agreements to pay retirement benefits to its employees. The retirement benefit obligation represents the present value of the defined benefit obligation as adjusted for unrecognized past service costs and as reduced by the fair value of plan assets. Any asset resulting from this calculation is limited to unrecognized actuarial losses and past service costs, plus the present value of available refunds and reductions in future contributions to the plan.

Discretionary contributions made by employees or third parties reduce service cost upon payment of these contributions to the plan. When the formal terms of the plans specify that there will be contributions from employees or third parties, the accounting treatment depends on whether the contributions are linked to service, as follows:

- If the contributions are not linked to services (e.g. contributions are required to reduce a deficit arising from losses on plan assets or from actuarial losses), they are reflected in the remeasurement of the net defined benefit liability (asset).
- If contributions are linked to services, they reduce service costs. For the amount of contribution that is dependent on the number of years of service, the entity reduces service cost by attributing the contributions to periods of service using the attribution method required by K-KFRS 1019 paragraph 70 for the gross benefits. For the amount of contribution that is independent of the number of years of service, the entity reduces service cost in the period in which the related service is rendered.

## 2-21 Share-based payment

In the case of equity-settled share-based payment, the goods or services received and the corresponding increase in equity are measured directly at the fair value of the goods or services and accounted for as compensation costs and equity. If the goods or services provided cannot be reliably measured, the endowed equity is indirectly estimated at fair value and the Group accounts for compensation costs and equity (capital adjustment). The cost of cash-settled transactions is measured initially at fair value at the grant date, taking into account the terms and conditions upon which the instruments were granted. This fair value is expensed over the period until vesting with recognition of a corresponding liability. The liability is remeasured to fair value at each reporting date including the settlement date, with changes in fair value recognized in the consolidated statements of profit or loss and other comprehensive income. Also, in the case of a selectable share-based payment transaction in which the employees have a choice between a cash-settled transaction and an equity-settled transaction, the Group records the amount depending on its substance.

## 2-22 Employee benefits

### 2-22-1 Short-term employee benefits

When employees have rendered services to the Group during an accounting period, the Group recognizes the undiscounted amount of short-term employee benefits. This amount is expected to be settled in whole before 12 months after the end of the reporting period, in exchange for those services.

### 2-22-2 Termination benefits

The Group recognizes an expense for termination benefits when an employee accepts the offer or when a restriction on the Group's ability to withdraw the offer takes effect.

## 2-23 Recognition of income tax expenses and deferred tax assets and liabilities

Income taxes are composed of current and deferred taxes. All items related to taxes, other than those recognized directly in equity, are accounted for in the consolidated statements of profit or loss and other comprehensive income. Accordingly, items recognized directly in equity and the related taxes are accounted for as other comprehensive income in the consolidated statements of profit or loss and other comprehensive income.

The tax rates and tax laws used to compute the amount are those that are enacted, or substantively enacted, by the reporting date, in the countries where the Group operates and generates taxable income. If the applied tax laws require an interpretation, the Group calculates income tax payable expected to be paid to the taxation authorities based on the opinion made when the taxes were reported.

Deferred tax is provided on the temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

The Group measures deferred tax assets and liabilities at the tax rates that are expected to apply to the period when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted, or substantively enacted by the end of the reporting period.

The Group recognizes a deferred tax asset for all deductible temporary differences to the extent that it is probable that taxable profit will be available against which the deductible temporary differences can be utilized.

The Group recognizes a deferred tax liability for all taxable temporary differences with investments in subsidiaries and associates, except to the extent that both of the following conditions are satisfied: (a) the Group is able to control the timing of the reversal of the temporary difference and (b) it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

The Group offsets deferred tax assets and liabilities if, and only if, the Group has a legally enforceable right to set off current tax assets against current tax liabilities, and the deferred tax assets and the deferred tax liabilities relate to income taxes levied by the same taxation authority on either on the same taxable entity or different taxable entities, which intend either to settle current tax liabilities and assets on a net basis or to realize the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

## 2-24 Equity

### 2-24-1 Classification of equity

The Group classifies financial instruments at initial recognition as either financial liabilities or financial equity depending on the contractual materiality. In the case where it is possible to avoid the related contractual obligations, the financial item is classified as a financial equity. An equity is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities.

### 2-24-2 Stock issuance costs

New stock issuance costs or incremental costs related to the stock issuance for business combinations are recorded as a deduction from paid-in capital, net of tax effects.

### 2-25 Earnings per share

Basic and diluted earnings per share ("EPS") are computed by dividing net income by the weighted-average number of shares of common stock outstanding during the year.

## 2-26 Accounting basis for trust accounts

The Group accounts for trust operations (the "trust accounts") separately from the Group's accounts in accordance with the *Financial Investment Services and Capital Markets Act*. In this regard, the funds lent by the Group to the trust account are accounted for as due to trust accounts of the Group's accounts, and the funds borrowed by the Group from the trust account are accounted as due from trust accounts of the Group's accounts. Trust compensation paid to the trustee (the Group) in connection with the operation, management and disposal of trust property is accounted as trust operation profits. The Group recognizes trust commissions earned from trust accounts as income from trust operations in connection with the operation, management and disposal of trust property. In addition, in the case of a joint operation money trust with a "guarantee contract of the principal or profits" of the trust account, if the operating profit falls short of the "principals to be preserved or profits to be guaranteed" and this shortage is more than covered by the trust compensation and special reserves, the Group accounts the amount paid to the trust account as the trust account's operating losses.

## 2-27 Lease accounting

Under K-IFRS 1116, *Leases*, the Group applies a single recognition and measurement method for all leases, except for leases of low-value assets. This standard provides guidance on specific requirements and simplified methods applied by an entity.

The Group recognized the right-of-use assets and the lease liabilities that were previously classified as operating leases, except for leases of low-value assets. Right-of-use assets for most leases were recognized as carrying amounts measured as if they had been applying the standards from the inception of the lease, except that they were discounted at the lessee's incremental borrowing rate as of the date of initial application. In some leases, the right-of-use asset was recognized based on the amount equal to the lease liabilities, adjusted for any related prepaid and accrued lease payments previously recognized. The lease liability was measured at the present value of the remaining lease payments, discounted at the incremental borrowing rate as of the date of the initial application.

The practical expedients that the Group applied are as follows:

- Application of a single discount rate to a portfolio of leases with significantly similar characteristics
- Replacement of impairment review by determining whether leases are onerous before the initial application date
- Exclusion of initial direct costs from the measurement of the right-of-use asset at the initial application date
- Using hindsight for lessee

Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Amounts due from lessees under finance leases are recognized as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

## 2-28 Merchant banking account

As permitted by the Restructuring of Financial Institutions Act, the Group may continue its merchant banking operations, including leasing business, until the existing contracts acquired from the Korea International Merchant Bank upon merger are terminated.

Material accounting policies applied to the Group's merchant banking operations are summarized as follows:

### 2-28-1 Revenue recognition on discounted notes

Interest income on discounted notes is accrued over the term of the notes. Income from the sale of discounted notes is recognized at the date of transaction based on the difference between the purchase prices and sales prices of the notes, adjusted for interest earned during the holding period.

### 2-28-2 Cash Management Accounts ("CMA")

The Group recognizes interest income from CMA investments and interest expenses from CMA deposits as operating income and operating expenses, respectively.

## 2-29 Interest income and interest expenses

Interest income and interest expenses are recognized over time using the effective interest method.

The effective interest method is a method of calculating the amortized cost of a financial asset or a financial liability and allocating the interest income or interest expenses over the relevant period. The EIR is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or, when appropriate, a shorter period to the net carrying amount of the financial asset or financial liability. When calculating the EIR, the Group estimates cash flows considering all contractual terms of the financial instrument, but does not consider future credit losses. Cash flows at the time of

the calculation include all the fees and points paid to, or received, from parties to the contract that are an integral part of the EIR, including transaction costs, and all other premiums or discounts.

#### 2-30 Fees and commission income

The Group's revenue recognition standard varies depending on the type of service provided to customers. Fee income, which is an integral part of the EIR of financial instruments, is adjusted using the EIR and recognized as interest income.

Fee income is recognized using the five-stage revenue recognition model (Identification of a contract with a customer → Identification of performance obligations in the contract → Determination of the transaction price → Allocation of the transaction price to the separate performance obligations in the contract → Recognition of revenue upon satisfying the performance obligations) in accordance with K-IFRS 1115.

#### 2-31 Dividend income

Dividend income is recognized when the Group's right to receive the payment is established.

#### 2-32 Government grants

Government grants are recognized at fair value when there is a reasonable assurance that the entity will comply with the conditions attached to it and that the grant will be received. Grants related to income are recognized as revenue on a systematic basis over the period necessary to match the related costs that the grant is intended to cover. On the other hand, grants related to an asset are presented by subtracting the carrying amount of the asset and accounting for by deducting depreciation expenses over the useful life of the asset.

### 3. Material judgments and accounting estimates

In the application of the Group's accounting policies, management is required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily observable from objective sources. The estimation and assumption are based on other factors that are related to historical experience. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future period if the revision affects both current period and future period.

In the process of applying the Group's accounting policies, management has made the following judgments that have a material effect on the amounts recognized in the consolidated financial statements:

#### 3-1 Fair value of financial instruments

The fair value of financial instruments is determined by referencing quoted market prices in active markets in the first place. For financial instruments not traded in an active market, the fair value is determined using appropriate valuation techniques, including (i) between knowledgeable and willing parties in a recent arm's-length transaction, (ii) reference to the current fair value of another instrument that is substantially the same, (iii) discounted cash flow ("DCF") analysis and (iv) option-pricing models.

### 3-2 ECL of financial assets

The Group recognizes impairment losses on debt instruments, lease receivables, loan commitment and financial guarantee contracts that were accounted for at amortized cost, or at FVOCI, based on the ECL impairment model using a three-stage model for 12-month ECL, or lifetime ECL, based on changes in credit risk since initial recognition of financial assets.

| Classification |                                                                                                  | Loss allowance                                                                                                                                                  |
|----------------|--------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| STAGE 1        | Credit risk on a financial instrument has not increased significantly since initial recognition. | 12-month ECL: Expected credit losses that result from default events on a financial instrument that are possible within the 12 months after the reporting date. |
| STAGE 2        | Credit risk on a financial instrument has increased significantly since initial recognition.     | Lifetime ECL: Expected credit losses that result from all possible default events over the expected life of a financial instrument.                             |
| STAGE 3        | Credit-impaired.                                                                                 |                                                                                                                                                                 |

The cumulative changes in lifetime ECL since initial recognition are recognized as loss allowance for a financial asset that is considered credit impaired at initial recognition.

### 3-3 Retirement benefit

The cost of providing benefits under the defined benefit plans is determined using the actuarial valuation. Actuarial assumptions were made for the discount rate and an increase in the future pay rate. Retirement benefits include significant uncertainties in the estimates due to the longer duration of the period.

### 3-4 Impairment of non-financial assets

The Group assesses at the end of each reporting period, whether there is an indication that non-financial assets may be impaired. An intangible asset with an indefinite useful life is tested for impairment annually or tested whenever there is an indication that the intangible asset may be impaired. Other non-financial assets are tested for impairment whenever there is an indication that the book value cannot be recovered. For the calculation of value in use, management estimates an expected future cash flow incurred from the asset or CGU. For the calculation of present value of the expected future cash flow, appropriate discount rate is selected.

### 3-5 Income tax

There have been various transactions and tax accounting methods, which have made computing the final tax expenses for the period uncertain. The contingent liability from any future tax assessments is based on the estimates of the likelihood of additional taxes imposed and has been included in the Group's consolidated financial statements for the current period. When the finalized tax expense assessments are different from the appropriated amounts, the differences, if any, are recognized in current deferred tax assets, liabilities and expenses for the period.

### 4. Fair value measurement of financial assets and liabilities

The standards the Group applies when measuring fair values of financial assets and liabilities are described below:

- a. Quoted market prices at the settlement date in an active market are the best evidence of fair value and should be used when available.
- b. If a market for a financial instrument is not active, the Group establishes fair value using a valuation technique that makes maximum use of market inputs and includes (i) between knowledgeable and willing parties in a recent arm's-length transaction, (ii) reference to the current fair value of another instrument that is substantially the same, (iii) DCF analysis and (iv) option-pricing models. An acceptable valuation technique incorporates all factors that market participants would consider in setting a price and is consistent with accepted economic methodologies for pricing financial instruments.
- c. When determining fair value using the valuation techniques, comparison with the current market transaction of another instrument that is substantially the same as the financial instrument needed to be objectively substantiated or inclusion of variables in the marketable data must be performed. Not all significant market variables are observable and in relevant cases, reasonable estimates or assumptions are required to determine the fair value.

#### 4-1 Fair value hierarchy of financial instruments

Fair value hierarchy of financial instruments as of December 31, 2023 and 2022, is as follows (Korean won in millions):

<December 31, 2023>

| Classification                            | Levels of the fair value hierarchy (*1) |            |           | Total      |
|-------------------------------------------|-----------------------------------------|------------|-----------|------------|
|                                           | Level 1                                 | Level 2    | Level 3   |            |
| Financial assets                          |                                         |            |           |            |

(\*1) The Group recognizes transfers between levels at the beginning of each reporting period when events or changes in circumstances causing the transfers between levels have occurred.

The Group classifies and discloses the fair value of the financial instruments into the following three hierarchies:

- a. Level 1: The fair values are based on quoted prices (unadjusted) in active markets.
- b. Level 2: The fair values are based on techniques using observable market data.
- c. Level 3: The fair values are based on techniques using unobservable inputs.

Details of fair value, valuation technique and inputs used to develop those measurements classified into Level 2 assets and liabilities that are measured at fair value as of December 31, 2023 and 2022, are as follows  
(Korean won in millions):

◁December 31, 2023>

| Classification                            | Fair value | Valuation techniques                                                      | Inputs                                                                                                         |

4-3 Amount recognized in profit or loss from changes in the fair value hierarchy of financial instruments categorized as Level 3

The amount recognized in profit or loss from changes in the fair value hierarchy of financial instruments categorized as Level 3 for the years ended December 31, 2023 and 2022, is recorded in the consolidated financial statements as follows (Korean won in millions):

<2023>

| Classification                                          | Total gains or losses recognized in profit or loss | Profit or loss recognized related to financial instruments held at the end of reporting period |
|---------------------------------------------------------|----------------------------------------------------|------------------------------------------------------------------------------------------------|
| Gain on financial instruments at FVTPL                  | 10,816                                             | 7,276                                                                                          |
| Gain related to derivative instruments used for hedging | 3,033                                              | 3,033                                                                                          |
| Total                                                   | 13,849                                             | 10,309                                                                                         |

<2022>

| Classification                                          | Total gains or losses recognized in profit or loss | Profit or loss recognized related to financial instruments held at the end of reporting period |
|---------------------------------------------------------|----------------------------------------------------|------------------------------------------------------------------------------------------------|
| Loss on financial instruments at FVTPL                  | (32,083)                                           | (25,872)                                                                                       |
| Loss related to derivative instruments used for hedging | (21,714)                                           | (21,714)                                                                                       |
| Total                                                   | (53,797)                                           | (47,586)                                                                                       |

4-4 Transfers between fair value hierarchies

There is a transfer out of Level 3 of the fair value hierarchy for the years ended December 31, 2023 and 2022.

| Classification                     | 2023    | 2022 |
|------------------------------------|---------|------|
| Transfer out of Level 3 to Level 1 | (1,000) | —    |

#### 4-5 Sensitivity analysis

Sensitivity analysis of the financial instruments classified as Level 3 from the changes in significant unobservable inputs as of December 31, 2023 and 2022, is as follows. The impact of fair value fluctuations on profit or loss or other comprehensive income is divided into favorable and unfavorable changes. The financial instruments classified as Level 3 which were excluded from the sensitivity analysis as it is practically impossible, amount to ₩1,343,558 million and ₩1,046,318 million as of December 31, 2023 and 2022, respectively.

(Korean won in millions):

<December 31, 2023>

| Classification                               | Favorable changes | Unfavorable changes |
|----------------------------------------------|-------------------|---------------------|
| Financial assets                             |                   |                     |
| Financial assets at FVTPL                    |                   |                     |
| Debt securities (*3)                         | 1,419             | (1,331)             |
| Derivative assets held for trading (*1)      | 118               | (164)               |
| Subtotal                                     | 1,537             | (1,495)             |
| Financial assets at FVOCI                    |                   |                     |
| Equity securities (*2)                       | 19,012            | (10,743)            |
| Total                                        | 20,549            | (12,238)            |
| Financial liabilities                        |                   |                     |
| Derivative liabilities held for trading (*1) | 122               | (98)                |
| Derivative liabilities used for hedging (*1) | 9                 | (23)                |
| Total                                        | 131               | (121)               |

(\*1) Unfavorable and favorable changes in fair value are calculated by increasing/decreasing 10% of 1) correlation between rates of Interest Rate Swap (IRS) of KRW, 2) correlation between rates of IRS of KRW and USD, 3) correlation between stock index and individual stock and 4) correlation between exchange rates of KRW/USD and stock index.

(\*2) Changes in fair value of equity securities are calculated by increasing/decreasing growth rate (0.0% ~ 1.0%) and discount rate, which are main unobservable inputs.

(\*3) Changes in fair value of debt securities are calculated by increasing/decreasing discount rate (-1.0% ~ 1.0%), which is the main unobservable input. It is impossible in practice to assess sensitivity based on the changes in input

variables of beneficiary securities, but favorable or unfavorable changes in fair value, only limited to real estate, are calculated by changing discount rate of lease cash flow (−1.0%~1.0%) and growth rate of selling price of real estate (−1.0%~1.0%).

| Financial assets at FVOCI              | 532,760           | 532,760    | 46                | 46         |
| Financial assets at amortized cost     | 801,692           | 770,167    | 484,066           | 443,630    |
| Total                                  | 1,334,452         | 1,302,927  | 484,112           | 443,676    |
| Related liabilities                    |                   |            |                   |            |
| Bonds sold under repurchase agreements | 1,140,937         | 1,119,671  | 487,732           | 436,183    |

#### 4-8-2 Loaned securities

When lending securities held by the Group, ownership of the securities is transferred; however, the securities would be returned at the end of the rental period. Therefore, the Group continues to recognize the entire loaned securities as it retains most of the risks and rewards of the securities. Details of loaned securities as of the end of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                     | December 31, 2023 |            | December 31, 2022 |            |
|------------------------------------|-------------------|------------|-------------------|------------|
|                                    | Book value(*)     | Fair value | Book value(*)     | Fair value |
| Financial assets at FVTPL          | 9,936             | 9,936      | 412,492           | 412,492    |
| Financial assets at FVOCI          | 1,051,270         | 1,051,270  | 1,925,345         | 1,925,345  |
| Financial assets at amortized cost | 194,312           | 188,457    | 416,386           | 395,502    |
| Total                              | 1,255,518         | 1,249,663  | 2,754,223         | 2,733,339  |

(\*) Carrying amount is before allowances for doubtful debts.

#### 4-8-3 Asset-backed securitization

The Group's consolidated structured companies issued asset-backed securities by securitizing their securities and loans. The Group retains the contractual right to receive cash flows from the financial assets, but the received cash flows are effectively transferred to the holder of asset-backed securities. In addition, the Group bears related risks through purchase agreements or credit exposures.

As of the end of December 31, 2023 and 2022, details of financial instruments that were transferred, but not derecognized in relation to asset-backed securitization transactions by the Group, are as follows (Korean won in millions):

| Classification         |                                       | December 31, 2023 | December 31, 2022 |
|------------------------|---------------------------------------|-------------------|-------------------|
|                        |                                       | Book value(*)     | Book value(*)     |
| Transferred asset sets | Financial assets at FVTPL             | 40,000            | 20,000            |
|                        | Loans at amortized cost               | 2,482,508         | 1,291,332         |
|                        | Total                                 | 2,522,508         | 1,311,332         |
| Related liabilities    | Asset-backed securitization borrowing | 2,537,828         | 1,321,944         |

(\*) Carrying amount is before allowances for doubtful debts.

## 5. Fair value of financial assets and liabilities

Book values and fair values of financial assets and liabilities as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                          | December 31, 2023 |             | December 31, 2022 |             |
|-----------------------------------------|-------------------|-------------|-------------------|-------------|

(\*) Lease liabilities are included in Other financial liabilities.

The following standards are applied in measuring the fair value of financial instruments:

- a. Loans: Expected cash flows, current market interest rates and discount rates, including borrowers' credit risks are factors to calculate the fair value of loans. For lines of credit available for deposit and withdrawal from time to time and loans with a short-term maturity (less than three months), it is assumed that the carrying amounts approximate their fair value.
- b. Securities at amortized cost: The fair value of securities at amortized cost is as stated by the market, broker or by credible sources. If none of the information from these entities is usable, quoted market price of financial instruments with similar credit rating, maturity and return on investment is used to estimate the fair value.
- c. Deposits: For deposits without an explicit maturity period, including deposits with no interests, deposits that have a short-term maturity (less than three months) and deposits with a floating-rate readjustment period of less than three months, it is assumed that the carrying amounts approximate their fair value. The estimated fair value of fixed interest-bearing deposits is based on discounted future cash flows using interest rates for new financial liability with similar time to maturity.
- d. Borrowings: For borrowings that have a short-term maturity (less than three months) and borrowings with floating-rate readjustment period of less than three months, it is assumed that the carrying amounts approximate their fair value. The estimated fair value of fixed interest-bearing borrowings is based on discounted future cash flows using interest rates for new financial liability with similar time to maturity.
- e. Debentures: For debentures issued, the fair values are determined based on quoted market prices in active market. For those issued where quoted market prices in active market are not available, a DCF model is used based on a current interest rate yield curve appropriate for the remaining term to maturity and credit spreads.

## 6. Categories of financial assets and financial liabilities

6-1 The Group categorizes its financial assets as of December 31, 2023 and 2022, as follows (Korean won in millions):

### <December 31, 2023>

| Classification                     | Financial assets<br>at FVTPL | Financial assets<br>at FVOCI | Financial assets<br>at amortized cost | Derivatives<br>used for hedging | Total       |

(\*) Lease liabilities are included in Other financial liabilities.

## 7. Offsetting financial assets and liabilities

The Group engages in master netting agreements with counterparties through International Swaps and Derivatives Association or similar agreements in relation to over-the-counter derivatives and spot exchange transactions. Under this agreement, in the event of the counterparty's bankruptcy etc., the transaction with the counterparty will be terminated. Upon termination, the amounts to be paid or received by each party are offset and paid or received. Repurchase agreements of trade and securities lending and borrowing of securities have been made by offsetting arrangement, which is similar to the arrangement for derivatives.

In the case of uncollected domestic exchange bonds and unpaid domestic exchange obligations between banks, as the Group holds the rights of setoff and settles in net amounts, the net amounts are presented in the consolidated statements of financial position. Other financial instruments include bonds and debts related to securities traded in the market, which are presented in net amounts in the consolidated statements of financial position as there is a legally enforceable right of setoff and intention to settle on a net basis.

7-1 Financial assets offset, the executable master netting agreement and financial assets subject to a similar arrangement as of December 31, 2023 and 2022, are as follows (Korean won in millions):

## 8. Risk management

The Group is exposed to credit risk, liquidity risk, market risk and various operating risks. The objectives of risk management are to pursue economic benefits by managing the associated risk in the changing financial environment and to utilize capital efficiently.

The basic principles of risk management are as follows:

- a. Minimize the rapid fluctuation in profit by balancing the risks and the income.
- b. Maximize long-term shareholder value.
- c. Comply with procedures to ensure operating activities are confined to allowable risk limits.
- d. Examine the type and size of risk along with the changes in potential economic value of portfolios and establish risk management strategy in order to utilize assets and distribute capital efficiently.

The basic policies in order to realize the basic principles of risk management are as follows:

- a. Set and comply with allowable limits for each risk type.
- b. Establish an appropriate balance between income and associated risk.
- c. When a conflict between income and associated risk exists, the Group pursues income while complying with the allowable risk limits.
- d. Prioritize the distribution of risk in order to avoid risk concentration in certain areas.
- e. Analyze the effect of various market fluctuations on parts or the entire portfolio on a regular basis.
- f. Separate risk management segments, operational segments and other segments, which deal with trade confirmations and payments in order to maintain independence.

## 8-1 Strategy and procedure of risk management

### 8-1-1 Operation of and setting risk limits

The Group established and operates a limit management system to maintain the appropriate level of risk relative to the equity capital held. The Risk Management Committee approves total risk limits and limits by types of risks, taking into account of capital, business plans, risk management regulations and institutional changes within the risk level that the Group can manage. The Risk Management Operation Committee sets up and allocates other operational limits (e.g., by organization, product, investment and loss) to comply with allowable limits for each type of risk, approved by the Risk Management Committee, and periodically checks the status of limit management.

### 8-1-2 Risk measurement and management

The Group prepares the appropriate risk measurement methods considering the nature of risks and measures them by the types of risks. Risk measurement and evaluation results are regularly reviewed and reported to the Risk Management Committee, Risk Management Operation Committee and management. Risk measurement and evaluation results are also used for daily business management activities, such as establishment of business plan and management strategy.

### 8-1-3 Operation of risk management information system

In order to provide advanced risk management in a rapidly changing financial environment that meets the new Bank for International Settlements ("BIS") standards, the Group has established and adopted a credit risk-weighted assets ("RWA") calculation system based on Basel 3 regulation since March 2021. The market/operational RWA is calculated based on Basel 3 standard model since January 2023.

#### 8-1-4 Operation of crisis management system

The Group operates a crisis management system that can respond effectively to the crisis caused by drastic changes in the internal and external management environment. The Group operates an early warning system in order to respond to the drastic changes in the financial market in a consistent and systematic manner. In the event of an anomaly, the holding company declares the level of crisis at the group level and the Group analyzes the impact on the portfolio in accordance with the step-by-step response plan and carries out the specific countermeasures.

#### 8-2 Organization and structure of risk management

The risk management organization consists of the Risk Management Committee, the Risk Management Operation Committee under the Risk Management Committee within the board of directors, the risk management officer and the organization in charge of risk management, which are the top decision-making bodies for the risk management. The organization in charge of risk management, independent from operating segment, manages risk limits and risk management policies.

##### 8-2-1 Risk Management Committee

The Risk Management Committee regularly holds meeting once every quarter and resolves the establishment and management of allowable limits for risks, establishment and changes in risk management policies and reviews the results of the management of allowable risk limits and suitability tests of risk management system.

##### 8-2-2 Risk Management Operation Committee

The Risk Management Operation Committee is responsible for setting and allocating specific operational limits for compliance with the allowable limits for each type of risk as resolved by the Risk Management Committee, adjusting the internal capital limit between business units within the same risk type and carrying out risk management policies and strategies set by the Risk

Management Committee, including preliminary deliberations on the agenda items.

### 8-2-3 Organization in charge of risk management

The Risk Management Group is composed of Comprehensive Risk Management team, Credit Risk Management team and Credit Supervision team. The Risk Management Group is independent of operating and investment segments and manages the execution of risk management policies. The Comprehensive Risk Management team oversees the market, interest rate, liquidity, operational risk and middle office and supports the Risk Management Committee and the Risk Management Operation Committee. The Credit Risk Management team oversees credit risk and credit concentration risk. The Credit Supervision team oversees the loans and early warning system.

### 8-3 Credit risk

Credit risk is a risk incurred when the Group faces a loss because its customers or counterparties fail to discharge their contractual obligations. Credit risk arises from on-balance and off-balance accounts, including loans, derivatives, securities, financial guarantee agreements and other guarantees.

#### 8-3-1 Management of credit risk

##### 8-3-1-1 Loans

##### 8-3-1-1-1 Measurement of credit risk

To determine the possibility of bankruptcy for its customers or counterparties, the Group uses various methods comprehensively. Risks pertaining to the retail sector compared to those pertaining to the corporate sector are relatively easy to predict, but cyclical and seasonal factors may influence the outcomes.

The frequency of impairment loss in the overall retail sector is relatively high, but in terms of individual cases, the loss rate is lower than in the corporate sector. Based on these differences, the Group manages each sector differently in terms of credit rating, pricing and subsequent management.

As for the business customers, the branch managers and credit rating team carry out the credit risk assessment by using a detailed valuation model depending on the size and the nature of the industry. The corporate financial valuation model is further subdivided based on the characteristics of the loans and is a combination of statistical and expert valuation models. Also, the Loan Review team of the credit risk management regularly performs the subsequent reviews in order to establish adequacy of the credit grading. As for the retail sector, a credit scoring system is used to compute the credit scores of the borrower. The system includes an application scoring model, which is used for the application of loans and a behavioral scoring model, which has been used after handling of the loans.

Expected loss is calculated using the expected default rate based upon the historical default rate and the estimated loss rate gives a rise to the default rate from a collection of historical information. A measured expected loss is reflected on the client's interest rate and allowances when applying for or renewing a loan. Unexpected loss, which takes into account the allowance for potential volatility in the actual loss compared to the expected loss, is measured using K-function of the Basel 3 internal rating method. The value measured is used as a credit risk reference value in capital allocation and is reflected as a part of the unexpected loss when calculating interest rates.

#### 8-3-1-1-2 Management of credit risk

##### 8-3-1-1-2-1 Management process

Both retail and corporate sectors are developing and operating a credit risk management system appropriately designed for each sector. The Credit Risk Management Committee and the Credit Rating team measure and manage credit risks for the corporate sector; Credit Risk Management Committee and Personal Loans Committee measure and manage credit risks for the retail sector.

The Group manages as well as controls the credit risk by setting the limits on the amount of risk willing to accept for individual counterparties and for geographical and industry concentration, and by monitoring exposures relating to such limits. The Group reviews on a monthly basis in accordance with the economic conditions and industry characteristics and examines the adequacy of the limits on a quarterly basis. The Group continuously examines the adequacy of credit rating models for retail and corporate sectors, Probability of Default (PD), Loss Given Default (LGD) and Exposure At Default (EAD) and manages data related to the estimation of the credit rating models, PD, LGD and EAD.

##### 8-3-1-1-2-2 Credit limits management and capital allocation

The Group annually performs a comprehensive analysis on economic conditions and changes in the economic environment in order to appropriately assess the credit quality of financial assets by setting credit limits on same entities, industries, countries and financial instruments. In addition, for the unexpected loss management, the Group regularly sets, distributes and checks for the compliance maintenance of internal capital limits according to the corporate and household sectors and the size of clients through the risk management system.

##### 8-3-1-1-2-3 Risk monitoring and early warning system

The Group measures and manages the risk indicators, such as delinquency rate, roll-rate and vintage. Also, in order to assess the credit quality of the assets, the Group operates an early warning system and regularly examines companies whose credit rating is likely to degrade.

#### 8-3-1-1-2-4 Credit rating system

In order to separately evaluate the characteristics of clients in the corporate sector, the Group operates a detailed valuation model based on the external and non-external audit and is in the process of continuing the stability of the corporate credit rating system through the subsequent examinations and performance improvements. The Group operates a detailed valuation model based on the credit rating model and the activity rating model for the household sector in accordance with the client's characteristics. The Group improves the efficiency of the model through the subsequent examinations and performance improvements. Credit rating on new clients as well as an automatic renewal and adjustments to the credit limits are managed by the household and Small Office and Home Office ("SOHO") credit extension system.

#### 8-3-1-1-2-5 Examination of credit

For a large amount of credit line, after the approval of credit extension, the Group regularly examines the borrower's credit status and the adequacy of the borrower's credit rating as in part of the subsequent management process. In addition, the Group significantly focuses on industries by increasing credit risks based on the analysis of the risk indicators and examines the sample for smaller credit extensions.

#### 8-3-1-1-2-6 Risk mitigation policy

The Group obtains the collateral for the granted loans in order to reduce risks. Guidelines are implemented regarding the acceptability of types of collateral and valuation parameters. The main types of the collateral obtained are as follows:

- a. Residential properties in relation to mortgage loans
- b. Business assets, such as equipments, plants and real estate properties
- c. Financial instruments, such as deposits, debt and equity securities

#### 8-3-1-2 Debt securities

The Group trades the debt securities above the investment-grade status level in order to manage the credit risks and manage the exposure of credit ratings to maintain credit quality of the assets.

#### 8-3-1-3 Derivative instruments

The credit risk arising from the derivative instruments is managed based on the net position and maintained under a strict control limit. The degree of credit risk exposure is measured based on the positive fair values of derivative instruments. The Group manages the exposure as a part of the unused commitment of loans.

#### 8-3-2 Significant increase in credit risk

The Group measures the ECL for debt instruments at amortized cost or FVOCI in three stages as described below:

##### 8-3-2-1 Stage 1: 12-month ECL

For financial assets whose credit risk has not increased significantly since initial recognition, ECLs that result from default events that are possible within 12 months after the reporting date are recognized.

##### 8-3-2-2 Stage 2: Lifetime ECL

For financial assets whose credit risk has increased significantly, but not impaired, since initial recognition, ECLs that result from all possible default events over the expected life of the financial instrument are recognized.

##### 8-3-2-3 Stage 3: Lifetime ECL

A financial asset is credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Lifetime ECL is recognized for credit-impaired financial assets and interest income is recognized using the EIR on amortized cost.

The Group assesses at each reporting date whether the credit risk increases significantly compared to that of initial recognition, using internal and external credit rating information, early warning system and number of days pastdue.

#### 8-3-2-4 Occurrence of default

The Group considers that a default has occurred for financial assets on the following situations:

- a. When receivables are sold despite an economic loss.
- b. When receivables have decreased due to adjustments resulting in an exemption of principal, interest or related fees or delayed payments.
- c. When the borrower has been declared bankrupt or has declared bankruptcy or has taken other similar measures to delay or avoid repayments.

#### 8-3-2-5 Method for determining whether a financial asset is credit impaired

A financial asset is deemed impaired if, and only if, there is objective evidence of impairment as a result of one or more events, which have occurred after the initial recognition of the item (an incurred 'loss event') and that loss event (or events) has an impact on the estimated future cash flows, such as changes in arrears or economic conditions, which correlate with defaults, delinquency in interest for more than 90 days, credit information management rules and damages incurred due to poor exposure.

### 8-3-3 Measurement of ECL

ECL is measured at the probability-weighted amounts of the present value of all cash shortfalls over the expected life of the financial instrument. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the Group expects to receive.

However, the Group adjusts historical data, such as credit loss experience, on the basis of current observable data to reflect the effects of the current conditions and its forecasts of future conditions that did not affect the period on which the historical data is based and to remove the effects of the conditions in the historical period that are not relevant to the future contractual cash flows. Also, the Group measures ECL using the macroeconomic factors, such as the growth rate, interest rate and stock indices. The methodology for future economic forecasts is regularly reviewed.

If the credit risk on financial instruments, for which lifetime ECLs have been recognized, subsequently improves so that the requirement for recognizing lifetime ECL is no longer met, the loss allowance should be measured at an amount equal to 12-month ECL.

### 8-3-4 Write-off policy

Financial assets are written off when an entity has no reasonable expectations of recovering the contractual cash flows on a financial asset in its entirety or a portion thereof. Generally, financial assets are written off when it is determined that the Group is not able to generate sufficient cash flows to make repayments. However, financial assets written off can be recovered by the Group.

### 8-3-5 The maximum exposure to credit risk

The maximum exposure to credit risk as of December 31, 2023 and 2022, is as follows. The following table shows the maximum exposure to credit risk before the effect of mitigation through credit enhancement and collateral agreements and reflects the impairment losses and offsetting. Equity securities in financial assets at FVTPL and financial assets at FVOCI are excluded (Korean won in millions):

| Classification                      | December 31, 2023 | December 31, 2022 |
|-------------------------------------|-------------------|-------------------|
| On-balance-sheet items              |                   |                   |
| Due from banks                      | 28,821,920        | 39,183,885        |
| Financial assets at FVTPL           |                   |                   |
| Debt securities                     | 11,442,332        | 8,553,379         |
| Derivative assets held for trading  | 5,965,872         | 9,851,754         |
| Private convertible bonds           | 7,447             | 7,394             |
| Subtotal                            | 17,415,651        | 18,412,527        |
| Financial assets at FVOCI           |                   |                   |
| Securities at amortized cost        | 36,337,949        | 37,583,487        |

#### 8-4 Liquidity risk

The Group defines liquidity risk as the possibility of incurring losses due to a temporary shortage in funds caused by a maturity mismatch or an unexpected capital outlay leading to rise in interest or sale of assets at a price below normal price.

##### 8-4-1 Measurement of liquidity risk

The Group maintains a limit management indicator to measure the liquidity coverage ratio, liquidity ratio in foreign currency, net stable funding ratio, foreign currency maturity mismatch ratio and long-term access to financing ratio in foreign currency in accordance with the guidelines and standards of the Financial Supervisory Service. In addition, the Group maintains a monitoring indicator to measure unbalance of funding etc., to manage the liquidity risk and manage early warning indicators in order to identify worsening trends in the early stage to respond in a timely manner.

##### 8-4-2 Management of liquidity risk

At an early stage, the Group identifies factors affecting liquidity in order to manage liquidity risks and has achieved an adequate level of liquidity via performing systematic management.

The Group has the following basic principles for liquidity risk management:

- a. Set and comply with liquidity risk limits and coordinate and manage early warning indicators to identify liquidity risk at an early stage.
- b. Regularly execute an analysis of stress tests and prepare an emergency procurement plan in case of liquidity.
- c. Focus on maintaining a diversified portfolio in order to avoid excessive concentrations of risks.
- d. Evaluate and manage the effect of a large amount of money, which is loaned out, invested or procured on liquidity risks.

In order to manage liquidity risk, the Group builds internal control systems for each department. In order to comply with liquidity ratios and the maturity mismatch ratio set by the Financial Supervisory Service, the Comprehensive Risk Management department conducts daily monitoring. Liquidity risk status is reported to the Risk Management Operation Committee on a monthly basis and to the Risk Management Committee on a quarterly basis.

In order to maintain the liquidity risk management indicators to stay within acceptable limits, the Treasury department recommends the necessary measures in relation to the procurement and operation of the assets and liabilities traded in the capital market. In addition, stages of emergency planning have been established in order to respond to liquidity emergencies. The Planning and Management department has established a portfolio management strategy based on the internal and external liquidity risk management requirements and the outlook of the procurement and operating markets.

#### 8-4-3 Analysis of contract maturity

##### 8-4-3-1 Analysis criteria

The details of the remaining contractual maturities of financial liabilities are analyzed by the earliest maturity date when the Group would be required to pay, based on the undiscounted cash outflows of the Group's financial liabilities. In addition, financial liabilities at FVTPL and depository liabilities (payment on demand) are shown at fair value in the immediate payment column. All derivatives used for hedging are presented based on the net cash flows, as all products are paid in the net amount. A contract maturity exists in payment guarantees that correspond to financial guarantees such as bond issuance and loan security provided by the Group, loan commitment and other credit granting. However, payment must be made immediately once the counterparty requests payment. As such, they are included in the immediate payment column.

8-4-3-2 The remaining contractual maturities of financial liabilities and off-balance-sheet items

The remaining contractual maturities of financial liabilities and off-balance-sheet items as of December 31, 2023 and 2022, are as follows (Korean won in millions):

<December 31, 2023>

| Classification                        | On demand   | Less than<br>1 month | 1 month<br>~ 3 months | 3 months<br>~ 1 year | 1 year<br>~ 5 years | More than<br>5 years | Total       |

Assets available for use to execute unused loan commitments after redeeming all financial liabilities are cash and bank deposits, debt securities, equity securities and loans. In addition, the Group is able to cope with unexpected cash outflows through the sale of securities and additional sources of funding, such as asset-backed securitization.

## 8-5 Market risk

Market risk is a risk incurred in assets and liabilities subject to management based on the changes in market prices, such as interest rate, stocks, foreign exchange.

### 8-5-1 Market risk management

The purpose of market risk management is to manage the loss of assets and liabilities incurred due to changes in market variables, such as interest rates, foreign exchanges and equity prices to remain within the allowable limits in order to ensure profitability and stability.

### 8-5-2 Market risk management targets

Market risk management targets include marketable securities, foreign currency net positions, derivatives and other assets and liabilities with embedded market risks. The Group classifies exposures to market risk into either trading or non-trading positions and manages each of those portfolios separately.

### 8-5-3 Management of market risk related to trading position

#### 8-5-3-1 Trading account classification

A trading account is a concept of a trading book and refers to a set of products held for short-term trading purposes etc., and there should be no legal restrictions on selling or completely hedging products that are to be classified as trading accounts. Specifically, the following financial products are classified as trading accounts, excluding products that cannot be classified as trading accounts and bank account products.

- a. Financial instruments for the short-term trading
- b. Financial instruments for the purpose of hedging risks
- c. Financial instruments for the purpose of acquiring arbitrages
- d. From A to C, hedge of other goods held for any of the purposes
- e. Financial instruments included in the Correlation Trading Portfolio ("CTP")
- f. Financial instruments that generate credit or stock net selling positions in bank accounts (\*)

- g Underwriting arrangements for securities that are actually expected to be purchased on the settlement date
- (\*) Credit or stock net selling positions in bank accounts: Bank account positions whose current value rises as issuer credit spreads of debt instruments expand or share prices fall

#### 8-5-3-2 Management of the trading position limits

The Risk Management Committee divides capital, annual loss and exposure limit in relation to market risks of the trading position by business unit (division) annually. Within the given limit, the Risk Management Operation Committee further subdivides the limits by business units (divisions) and desks. The Risk Management Group provides information necessary for deliberation and review by the committee, reports trading limits and measures risks.

The middle office performs mark-to-market measures and monitors trade violations and compliance with the limits. The middle office establishes and complies with trading policy regulations, measures market risk for trading positions and checks daily compliance within the acceptable limits for each risk. The office also conducts daily inspections of changes in the management exposure, compliance with the limit, post verification and crisis analysis and reports the results to the management team every day.

#### 8-5-3-3 Market Risk Measurement (Basel 3 Standard)

The basic calculation method for managing and measuring the exposure of trading account products to market risks is calculated by dividing them into sensitivity risk, default risk and residual risk. Sensitivity risk refers to the risk of loss due to changes in market risk factors, such as exchange rates, interest rates and stock prices. The risk of default refers to the risk of loss due to bankruptcy of bonds or stock issuers.

#### 8-5-3-4 Amount of risk by risk type

The details of regulated capital by market risk group as of December 31, 2023, are as follows (Korean won in millions):

| Classification                | Risk type                                        | Amount  |
|-------------------------------|--------------------------------------------------|---------|
| Sensitivity Risk Charge       | General interest rate risk                       | 48,762  |
|                               | Credit spread risk ("CSR") (non-securitizations) | 31,929  |
|                               | CSR (securitizations (non-CTP))                  | —       |
|                               | CSR (securitization (CTP))                       | —       |
|                               | Equity risk                                      | 24,666  |
|                               | Foreign exchange risk                            | 407,954 |
|                               | Commodity risk                                   | —       |
| Default Risk Charge           | Non-securitizations                              | 36,230  |
|                               | Securitizations (Non-CTP)                        | —       |
|                               | Securitizations (CTP)                            | —       |
| Residual Risk Add-On ("RRAO") | RRAO (*)                                         | 614     |
| Total                         |                                                  | 550,155 |

(\*) RRAO: Residual Risk Add-On

#### 8-5-4 Management of market risk related to non-trading position

##### 8-5-4-1 Interest rate risk

Interest rate risk of non-trading position is a risk of losses in financial assets and liabilities with interest rates due to adverse changes in interest rates and is incurred when maturity structure does not match interest rate setting cycle of the related assets and liabilities. The Group manages the interest rate risks of non-trading position in order to maintain the stability of net interest income and net asset value based on changes in interest rates. The following is subject to the Group's management of interest rate risk:

- a. Financial assets with interest rates, such as bank deposits, debt securities and loans
- b. Financial liabilities with interest rates, such as depository liabilities, borrowings and debentures
- c. Financial derivatives, such as interest rate swaps

Interest rate risk is calculated using the gap between interest-sensitive assets and liabilities. The interest rate risks measure the interest rate gap ratio as a primary indicator, while  $\Delta$ EVE,  $\Delta$ NII ratio and duration are used as secondary indicators. The Risk Management Committee and the Risk Management Operation Committee establish the interest rate risk limits on an annual basis; the compliance thereof is reported to Risk Management Operation Committee as well as the Risk Management Committee on a monthly and quarterly basis, respectively.

Economic value of equity ("△EVE") refers to changes in the economic value of equity capital, indicating the effect of adverse changes in interest rates on the present value of assets, liabilities and others. As of December 31, 2023 and 2022, the Group's △EVE is as follows (Korean won in millions):

| Classification | December 31,<br>2023 | Average   | Minimum   | Maximal   | December 31,<br>2022 |
|----------------|----------------------|-----------|-----------|-----------|----------------------|
| △EVE           | 1,883,644            | 2,240,459 | 1,883,644 | 2,427,370 | 2,106,981            |

△EVE calculates the maximum value compared to the default scenario by applying six interest rates (parallel rise, parallel fall, short-term fall and long-term rise, short-term rise and long-term fall, short-term rise and short-term fall) after generating cash flows for interest-sensitive assets and liabilities under the Supervision of Banking Business Appendix 9-1.

#### 8-5-4-2 Equity price risk

Equity price risk is a risk incurred when the fair value of equities results in changes in the level of related revenue and capital. Fluctuation in equity reflects the sensitivity of each equity. Effects on capital due to the fluctuation in equity price risk as of December 31, 2023, are as follows (Korean won in millions):

| Classification    | 20% decline | 10% decline | 10% rise | 20% rise |
|-------------------|-------------|-------------|----------|----------|
| Equity price risk | (60,317)    | (30,158)    | 30,158   | 60,317   |

## 8-5-5 Currency risk concentration

Currency risk is a risk incurred when the value of a financial instrument or future cash flows fluctuates due to the changes in foreign exchange rates. Currency risk arises from the financial instruments expressed in currencies other than the functional currency. Currency risk does not arise from the financial instruments expressed in the functional currency or in non-monetary items. In order to establish the stop loss and limits, the Group manages the foreign exchange net exposure amount of the trading and non-trading positions by each currency.

Significant foreign currency assets and liabilities denominated in Korean won as of December 31, 2023 and 2022, are as follows (Korean won in millions):

## 8-6 Operating risk

Operational risk is the risk of loss arising from system failure, human error, fraud or other external events. Risks related to legal or regulatory implications are identified as operational risks, but risks related to the strategy of damaging reputation are excluded from operational risks. Operational risk includes losses from internal operational problems and externalities, such as natural disasters, etc., and legal lawsuit, but excludes losses from policy decision errors or unmeasurable reputation damage, etc. Operational risk does not have a direct correlation with income and the Group needs to mitigate such risk through internal controls and insurance.

Operating risk capital is calculated by multiplying the Business Indicator Component based on consolidated financial statements and the internal loss multiplier (ILM). The business index factor is calculated based on the consolidated financial statements by multiplying the annual average of interest-lease dividend factors, service factors and financial transaction factors over the past three years by the factor of each section. The ILM is the log function value of the loss element and the business index element, and the loss element is calculated by multiplying the average annual loss amount generated internally by the bank over the past 10 years by 15.

The Risk Management Committee determines the operational risk limits. In case the excess limit is expected, the management plan for the excess of internal capital limits should be reported to the Risk Management Operation Committee and if additional limits are given, an approval from the Risk Management Committee is needed beforehand. If the limit is exceeded due to the occurrence of an exceptional situation, an ex post facto approval from the Risk Management Committee is needed for the information on exceeded amount and post hoc results, as well as the subsequent plans.

## 8-7 Capital management

The Group implements the BIS capital requirement system in order to secure the capital adequacy and comply with the supervisory regulations. By BIS regulation, the Group keeps its BIS capital adequacy ratio (hereinafter, "BIS ratio") above the minimum BIS ratio for "RWA". In addition, the Group performs a capital adequacy assessment in order to cope with an unexpected loss.

RWA which are calculated per each risk type when calculating BIS ratio, are as follows:

- a. RWA of credit risk are calculated using the basic internal ratings-based approach. The Group uses the standardized approach for governments, banks, public institutes, overseas exposure, other assets, etc.
- b. RWA of the market risk are calculated by multiplying 12.5 to the amount of capital required by adding individual risks calculated by the standard model to the general risk calculated by the internal model.
- c. RWA of the operational risk are calculated by multiplying 12.5 to the amount of operational risk capital calculated by advanced measurement approach for the Group and basic indicator approach for its subsidiaries.

Regulatory capital in accordance with the Regulations on the Supervision of Banking Business for calculating BIS ratio is as follows:

- a. Common equity: Capital incurred in connection with common stock issued to meet the eligible requirement, capital surplus and capital adjustments, retained earnings, accumulated other comprehensive income and other capital surplus, capital adjustments, non-controlling interest on common shares issued by banks, affiliated subsidiaries, etc.
- b. Other basic capital: The capital securities to meet accreditation requirements of other basic capital, capital surplus associated with the issuance of the other basic capital, non-qualifying capital securities and the accredited amount as other basic capital of a non-controlling interest on equity securities issued by a subsidiary, etc.
- c. Supplementary capital: The capital securities to meet supplementary capital accreditation requirements, capital surplus associated with the issuance of supplementary capital, the accredited amount of supplementary capital of non-qualifying capital securities, the accredited amount as supplementary capital of a non-controlling interest on equity securities issued by a subsidiary, eligible allowance for possible loan losses on "normal" or "precautionary" category assets, allowance for possible loan losses in excess of the total amount of expected losses, etc.

Regulatory capital and BIS ratios as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                                                                                                          | December 31,<br>2023 | December 31,<br>2022 |
|-----------------------------------------------------------------------------------------------------------------------------------------|----------------------|----------------------|
| Common equity                                                                                                                           |                      |                      |
| Capital stock, capital surplus and capital adjustments incurred in connection with common stock issued that meets eligible requirements | 5,359,548            | 5,359,508            |
| Retained earnings                                                                                                                       | 21,050,087           | 19,236,315           |
| Accumulated other comprehensive income and other capital surplus, capital adjustments                                                   | 5,019,367            | 4,556,672            |
| Non-controlling interest on common shares issued by a bank, a consolidated subsidiary                                                   | 71,380               | 67,750               |

(\*) The equity below the lowest limit is presented in credit risk-weighted assets.

#### 8-7-1 Internal capital adequacy assessment and management

Internal capital is the amount that allows for continuous operation of business while accounting for all risks. Internal capital is defined as the size of capital needed to cope with an unexpected loss under a certain rate. The purpose of managing the internal capital is to compare the size of internal capital and available capital (Tier 1) and to serve as a measure of financial strength.

Managing the internal capital also provides the amount of risk-adjusted capital and basic measurement. The indicators are composed of the risk appetite ratio, as well as exhaustion ratio of foreign holding limits. The risk appetite ratio is an internal capital ratio established after taking into consideration a capital buffer in Tier 1 capital. The exhaustion ratio of foreign holding limits is a ratio used to measure the amount of internal capital used against the internal capital limits.

Internal capital limits are established after accounting for the size of current and subsequent Tier 1 capital, as well as the components, quality, risk appetite, target credit rating, operational strategy and business plans. The Risk Management Committee determines risk types and the internal capital limits for the Group more than once a year. In the case where new operations or the expansion of operations results in the amount exceeding the internal capital limits, an approval from the Risk Management Committee is needed beforehand. If such a situation occurs in cases outlined as exceptions, an approval from the Risk Management Committee is needed for the information on exceeded amount and post hoc results, as well as the subsequent plans.

## 9. Operating segment information

### 9-1 General information

In order to set strategies to achieve goals and efficiently conduct performance assessment, the business sectors of the Group are divided by the operations as follows:

- a. Operating bank segment: It consists of four banks (Center, Yeongnam, Chungcheong and Honam). It offers household loan and deposit, retirement pension, company loan, deposit, etc.
- b. Capital market segment: This segmentation offers investment and operation of securities, buying and selling of public bonds and development and operation of derivatives.
- c. Other segment: It consists of the overseas business segment, headquarters supporting segment, trust segment, risk segment, audit segment and after-management segment.

## 9-2 Profit or loss by operating segment

9-2-1 Details of net income by operating segments for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

Net deferred origination fees and costs are not reflected in the gross carrying amounts above.

15-5 Amortized costs before changes in contractual cash flows of loans (contractual cash flows changed for the years ended December 31, 2023 and 2022) for which allowances for loan losses have been at the lifetime ECL and net gain or loss recognized based on the changes in contractual cash flows are as follows (Korean won in millions):

| Classification                   | 2023   | 2022   |
|----------------------------------|--------|--------|
| Amortized cost before change     | 60,826 | 81,226 |
| Allowance before change          | 58,669 | 78,847 |
| Amount after deducting allowance | 2,157  | 2,379  |
| Net loss due to change           | 43     | 835    |

15-6 Loans whose contractual cash flows changed for which the measurement of allowance for loan losses changed from the lifetime ECL to 12-month ECL on initial recognition during the reporting period do not exist as of December 31, 2023, and are ₩1,355 million as of December 31, 2022.

15-7 The contractual non-recoverable amount of the loans that has been fully written off as of the end of the reporting period, but is still trying to recover, is ₩3,790,688 million and ₩4,090,534 million as of December 31, 2023 and 2022, respectively.

## 16. Derivative instruments

16-1 Details of amounts of the unsettled derivative contract and fair value of derivatives held by the Group as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification           | Amounts of unsettled contract |                      | Accumulated valuation gain (loss) |             |                   |             |

(\*1) These companies were included in investment in associates because the Group has significant influence over them by participating in the board of directors' meeting, the decision-making organization.

(\*2) As of December 31, 2023, the application of the equity method has been suspended because the balance of the investment account is below "0."

(\*3) As the consolidated financial statements as of December 31, 2023, could not be obtained, the most recent consolidated financial statements available from the closing date were used. The effect of significant transactions or events incurred between the end of the reporting period of the associate and that of the Group was reviewed and reflected.

(\*4) As of December 31, 2023, the Group classified the investee as an associate investment stock because it could not exercise control over the investee.

(\*5) Since more than one investor must act together to direct-related activities, the equity method was applied because the Group could not control the investee individually.

17-2 Condensed financial statements of associates and a joint venture as of December 31, 2023 and 2022, are as follows (Korean won in millions):

17-6 Details of investment shares in marketable associates and a joint venture as of December 31, 2023 and 2022, are as follows (Korean won in millions):

<December 31, 2023>

| Company | Market price | Price per share<br>(in Korean won) |
|---------|--------------|------------------------------------|
| BIDV    | 1,974,243    | 2,309                              |

<December 31, 2022>

| Company | Market price | Price per share<br>(in Korean won) |
|---------|--------------|------------------------------------|
| BIDV    | 1,572,811    | 2,073                              |

17-7 A company that the Group holds more than 20% of shares, but excluded from investments in associates, as of December 31, 2023, is as follows:

<December 31, 2023>

| Company Name | Country | Industry                                | Ownership (%) |
|--------------|---------|-----------------------------------------|---------------|
| COLORART (*) | Korea   | Sign and advertisement<br>manufacturing | 20.93         |

(\*) The Group holds more than 20% of shares, but excluded the company from investment in associates due to its limited control over the company because of its corporate workout.

There is no company that the Group holds more than 20% of shares, but is excluded from investments in associates, as of December 31, 2022.

Investment trusts whose significant influence on related activities is limited by trust contracts are excluded from investment stocks in associates.

## 18. Property, plant and equipment

18-1 Property, plant and equipment as of December 31, 2023 and 2022, consist of the following (Korean won in millions):

### <December 31, 2023>

| Classification                               | Acquisition cost | Accumulated depreciation | Accumulated impairment loss | Government grants | Book value |
|----------------------------------------------|------------------|--------------------------|-----------------------------|-------------------|------------|
| Land                                         | 873,584          | —                        | (3,786)                     | —                 | 869,798    |
| Buildings                                    | 988,291          | (325,864)                | (10,203)                    | —                 | 652,224    |
| Leasehold improvements                       | 340,431          | (274,428)                | —                           | —                 | 66,003     |
| Equipment and vehicles                       | 936,718          | (736,238)                | —                           | (43)              | 200,437    |
| Construction in progress                     | 10,484           | —                        | —                           | —                 | 10,484     |

## 19. Investment properties

19-1 Details of investment properties as of December 31, 2023 and 2022, are as follows (Korean won in millions):

〈December 31, 2023〉

| Classification | Acquisition cost | Accumulated depreciation | Accumulated impairment loss | Government grants | Book value |
|----------------|------------------|--------------------------|-----------------------------|-------------------|------------|
| Land           | 467,073          | –                        | (3,125)                     | –                 | 463,948    |
| Buildings      | 386,860          | (172,175)                | (1,225)                     | (1,885)           | 211,575    |
| Total          | 853,933          | (172,175)                | (4,350)                     | (1,885)           | 675,523    |

〈December 31, 2022〉

| Classification | Acquisition cost | Accumulated depreciation | Accumulated impairment loss | Government grants | Book value |
|----------------|------------------|--------------------------|-----------------------------|-------------------|------------|
| Land           | 457,439          | –                        | (3,125)                     | –                 | 454,314    |
| Buildings      | 367,958          | (153,237)                | (1,225)                     | (2,868)           | 210,628    |
| Total          | 825,397          | (153,237)                | (4,350)                     | (2,868)           | 664,942    |

19-2 Changes in investment properties for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

<2023>

| Classification    | Beginning balance | Disposal | Depreciation | Transfer (*) | Ending balance |
|-------------------|-------------------|----------|--------------|--------------|----------------|
| Land              | 454,314           | (744)    | –            | 10,378       | 463,948        |
| Buildings         | 213,496           | (1,206)  | (14,770)     | 15,940       | 213,460        |
| Government grants | (2,868)           | –        | 983          | –            | (1,885)        |
| Total             | 664,942           | (1,950)  | (13,787)     | 26,318       | 675,523        |

(\*) The amount represents the change in the carrying amount of investment properties held by the Group due to the change in the ratio of lease occupancy.

<2022>

| Classification    | Beginning balance | Acquisition | Disposal | Depreciation | Transfer (*) | Ending balance |
|-------------------|-------------------|-------------|----------|--------------|--------------|----------------|
| Land              | 407,058           | –           | (6,111)  | –            | 53,367       | 454,314        |
| Buildings         | 385,887           | –           | (7,690)  | (13,340)     | (151,361)    | 213,496        |
| Government grants | (2,256)           | (1,493)     | –        | 881          | –            | (2,868)        |
| Total             | 790,689           | (1,493)     | (13,801) | (12,459)     | (97,994)     | 664,942        |

(\*) The amount represents the change in the carrying amount of investment properties held by the Group due to the change in the ratio of lease occupancy.

19-3 Details of valuation techniques for measuring investment property and inputs used in the measurement as of December 31, 2023 and 2022 are as follows (Korean won in millions):

| Classification     | Fair value (*)    |                   | Description of the valuation techniques                                     | Inputs used in the fair value measurement    |
|--------------------|-------------------|-------------------|-----------------------------------------------------------------------------|----------------------------------------------|
|                    | December 31, 2023 | December 31, 2022 |                                                                             |                                              |
| Land and buildings | 1,027,340         | 1,052,023         | Appraised value of land reference method and estimates based on cost method | Appraised value of land and refinancing cost |

(\*) The fair value of investment property is classified as Level 3 of fair value hierarchy as it reflects the most recent market transaction price, followed by individual third-party transaction condition, and significant input factor, which is not predictable.

19-4 Rental income and operating expenses arising from the Group's investment properties for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                                                       | 2023   | 2022  |
|--------------------------------------------------------------------------------------|--------|-------|
| Rental income                                                                        | 10,395 | 9,608 |
| Operating cost directly related to investment properties that generate rental income | 544    | 670   |

## 20. Intangible assets

20-1 Details of intangible assets as of December 31, 2023 and 2022, are as follows (Korean won in millions):

### <December 31, 2023>

| Classification                | Acquisition cost | Accumulated amortization | Accumulated impairment loss | Government grants | Book value |
|-------------------------------|------------------|--------------------------|-----------------------------|-------------------|------------|
| Goodwill                      | 892              | –                        | –                           | –                 | 892        |
| Industrial proprietary rights | 2,800            | (2,228)                  | –                           | –                 | 572        |
| Core deposits                 | 5,357            | (3,630)                  | –                           | –                 | 1,727      |

(\*) Of the other intangible asset amortization costs, ₩26,977 million is included in other operating expenses.

## 21. Non-current assets held for sale

Details of non-current assets held for sale as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification              | December 31, 2023 | December 31, 2022 |
|-----------------------------|-------------------|-------------------|
| Acquisition cost (*)        | 40,602            | 36,423            |
| Accumulated impairment loss | (124)             | —                 |
| Book value                  | 40,478            | 36,423            |
| Net fair value              | 40,478            | 36,423            |

(\*) Acquisition cost is presented as net of accumulated depreciation before classification as non-current assets held for sale.

Non-current assets held for sale are composed of 124 collaterals acquired for the purpose of repayment of loans and one other whose sale is currently in progress as of December 31, 2023.

## 22. Other assets and merchant banking account assets

22-1 Details of other assets as of December 31, 2023 and 2022, are as follows  
(Korean won in millions):

| Classification                     | December 31, 2023 | December 31, 2022 |
|------------------------------------|-------------------|-------------------|
| Guarantee deposits paid            | 638,872           | 632,878           |
| Accounts receivable                | 11,290,946        | 6,615,170         |
| Accrued income                     | 1,904,053         | 1,574,847         |
| Prepaid expenses                   | 158,133           | 113,074           |
| Suspense payments                  | 383,972           | 269,386           |
| Expenditures                       | 2,483             | 1,873             |
| Deposit money to court             | 9,193             | 8,783             |
| Domestic exchange settlement debit | 4,193,365         | 4,223,350         |
| Other miscellaneous assets         | 64,495            | 78,015            |
| Allowance for other assets         | (11,503)          | (11,421)          |
| Total                              | 18,634,009        | 13,505,955        |

22-2 Changes in the allowance for other assets for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                | 2023    | 2022    |
|-----------------------------------------------|---------|---------|
| Beginning balance                             | 11,421  | 9,241   |
| Provision for allowance for possible losses   | 4,117   | 6,280   |
| Write-offs                                    | (540)   | (860)   |
| Sales of non-performing loans, etc.           | (420)   | (163)   |
| Collection of loans written off in prior year | 495     | 1,025   |
| Interest income on impaired assets            | (1)     | 3       |
| Exchange rate fluctuation and others          | (3,569) | (4,105) |
| Ending balance                                | 11,503  | 11,421  |

22-3 Details of merchant banking account assets as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                    |                          | December 31, 2023 | December 31, 2022 |
|---------------------------------------------------|--------------------------|-------------------|-------------------|
| On-balance-sheet items                            |                          |                   |                   |

| Classification                                | December 31, 2023 | December 31, 2022 |
|-----------------------------------------------|-------------------|-------------------|
| Demand deposits                               |                   |                   |
| Demand deposits in Korean won                 | 16,130,967        | 14,732,552        |
| Demand deposits in foreign currency           | 31,630,980        | 40,871,143        |
| Subtotal                                      | 47,761,947        | 55,603,695        |
| Time and savings deposits                     |                   |                   |
| Time and savings deposits in Korean won (*)   | 278,789,580       | 266,881,680       |
| Time and savings deposits in foreign currency | 23,665,607        | 24,320,573        |
| Subtotal                                      | 302,455,187       | 291,202,253       |
| Certificate of deposits                       | 19,532,319        | 13,052,533        |
| Total                                         | 369,749,453       | 359,858,481       |

(\*) Time and savings deposits in Korean won include savings deposits (₩40,213,612 million as of December 31, 2023, and ₩39,861,040 million as of December 31, 2022) and corporate savings deposits (₩58,318,632 million as of December 31, 2023, and ₩57,322,227 million as of December 31, 2022).

23-2 Allocations of deposit liabilities by the customer as of December 31, 2023 and 2022 are as follows (Korean won in millions):

| Classification               | December 31, 2023 | December 31, 2022 |
|------------------------------|-------------------|-------------------|
| Individuals                  | 122,951,894       | 112,111,078       |
| Corporations                 | 123,338,987       | 129,975,988       |
| Other banks                  | 22,490,050        | 21,293,082        |
| Public institutions          | 21,830,459        | 16,398,077        |
| Other financial institutions | 46,902,752        | 44,929,310        |
| Government                   | 7,714,009         | 8,206,272         |
| Non-profit corporations      | 16,107,455        | 13,812,098        |
| Foreign organizations        | 2,503,999         | 3,049,951         |
| Others                       | 5,909,848         | 10,082,625        |
| Total                        | 369,749,453       | 359,858,481       |

## 24. Financial liabilities at FVTPL

24-1 Details of financial liabilities at FVTPL as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                          | December 31, 2023 | December 31, 2022 |
|-----------------------------------------|-------------------|-------------------|
| Securities borrowed                     | 452,426           | 323,661           |
| Derivative liabilities held for trading | 6,042,066         | 10,742,577        |
| Total                                   | 6,494,492         | 11,066,238        |

24-2 Details of financial liabilities designated at FVTPL as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification           | December 31, 2023 | December 31, 2022 |
|--------------------------|-------------------|-------------------|
| Deposits                 | 173,339           | 162,069           |
| Debentures in Korean won | 61,379            | —                 |
| Total                    | 234,718           | 162,069           |

Financial liabilities are at FVTPL in order to eliminate or significantly reduce a measurement or recognition inconsistency.

24-3 Difference between the book value and maturity amount of the financial liabilities designated at FVTPL as of December 31, 2023 and 2022, is as follows (Korean won in millions):

| Classification               | December 31, 2023 | December 31, 2022 |
|------------------------------|-------------------|-------------------|
| Book value                   | 234,718           | 162,069           |
| Repayment amount at maturity | 270,000           | 210,000           |
| Difference                   | (35,282)          | (47,931)          |

## 25. Borrowings

Details of borrowings as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                               | Lender                                    | Annual interest rate (%) | December 31, 2023 | December 31, 2022 |
|--------------------------------------------------------------|-------------------------------------------|--------------------------|-------------------|-------------------|
| Borrowings in Korean won                                     |                                           |                          |                   |                   |
| BOK borrowings                                               | BOK                                       | 0.25~2.00                | 3,420,958         | 5,085,245         |
| Government borrowings                                        | Korea Development Bank, etc.              | 0.50~5.16                | 2,155,315         | 2,061,794         |
| Other borrowings                                             | Korea Energy Management Corporation, etc. | 0.00~3.60                | 4,843,543         | 3,584,732         |
| Subtotal                                                     |                                           |                          | 10,419,816        | 10,731,771        |
| Borrowings denominated in foreign currencies                 |                                           |                          |                   |                   |
| Bank overdrafts                                              | Foreign banks, etc.                       | 0.00~20.13               | 268,487           | 380,662           |
| Other borrowings                                             | Wells Fargo, HSBC, etc.                   | 0.00~7.70                | 9,250,262         | 9,664,760         |
| Subtotal                                                     |                                           |                          | 9,518,749         | 10,045,422        |
| Call money                                                   |                                           |                          |                   |                   |
| Call money in foreign currencies                             | MIZUHO Bank, etc.                         | 0.07~7.40                | 934,111           | 970,661           |
| Bonds sold under repurchase agreements                       |                                           |                          |                   |                   |
| Bonds sold under repurchase agreements in Korean won         | General customers                         | 0.00                     | 30                | 30                |
| Bonds sold under repurchase agreements in foreign currencies | Citi                                      | 6.03~6.50                | 1,140,907         | 487,702           |
| Subtotal                                                     |                                           |                          | 1,140,937         | 487,732           |

| Classification                                                   | 2023      | 2022      |
|------------------------------------------------------------------|-----------|-----------|
| Actuarial gains and losses                                       |           |           |
| Effects on changing financial assumptions                        | (118,245) | 425,234   |
| Effects on changing demographic assumptions                      | –         | (337,902) |
| Others                                                           | (63,389)  | (68,191)  |
| Subtotal                                                         | (181,634) | 19,141    |
| Return on plan assets                                            |           |           |
| Actual return on plan assets                                     | 80,242    | 32,971    |
| Amount included in net interest of net defined benefit liability | (100,800) | (43,271)  |
| Subtotal                                                         | (20,558)  | (10,300)  |
| Total                                                            | (202,192) | 8,841     |

## 28. Contingent liabilities, agreements and provisions

28-1 Details of provisions as of December 31, 2023 and 2022, are as follows  
(Korean won in millions):

| Classification                    | December 31, 2023 | December 31, 2022 |
|-----------------------------------|-------------------|-------------------|
| Provision for payment guarantees  |                   |                   |
| Financial guarantee contracts (*) | 466               | 449               |
| Non-financial guarantee contracts | 71,609            | 81,450            |
| Bills endorsed                    | 2                 | 13                |
| Subtotal                          | 72,077            | 81,912            |
| Provision for unused commitments  | 73,065            | 56,480            |
| Other provisions                  |                   |                   |
| Provision for restoration         | 57,976            | 51,596            |
| Provision for lawsuits            | 3,400             | 43,215            |
| Others                            | 554,055           | 331,775           |
| Subtotal                          | 615,431           | 426,586           |
| Total                             | 760,573           | 564,978           |

(\*) The Group recognizes the amount exceeding the unamortized amount of the initial fair value at subsequent measurement of the financial guarantee contracts as provisions for payment guarantees. The Group recognizes the unamortized amount as financial guarantee contract liabilities in the amount of ₩18,607 million and ₩14,843 million as of December 31, 2023 and 2022, respectively.

28-2 Changes in provision for unused commitments for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

<2023>

| Classification                       | Unused commitments |                          |                      | Total   |
|--------------------------------------|--------------------|--------------------------|----------------------|---------|

## 28-6 Commitments

Details of unused commitments as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                             | Unused commitments balance |                   |
|------------------------------------------------------------|----------------------------|-------------------|
|                                                            | December 31, 2023          | December 31, 2022 |
| Commitments on loans in Korean won                         | 65,144,227                 | 60,462,709        |
| Commitments on loans in foreign currencies                 | 30,837,779                 | 28,960,160        |
| Commitments on credit lines on asset-backed securities (*) | 118,300                    | 85,200            |
| Commitments on purchase of securities (*)                  | 13,625,533                 | 11,875,336        |
| Commitments on discounted notes from merchant banking      | 770,000                    | 620,000           |
| Total                                                      | 110,495,839                | 102,003,405       |

(\*) The financial guarantee contracts as of December 31, 2023 and 2022, amount to ₩13,731,626 million and ₩10,565,130 million, respectively.

## 28-7 Lawsuits

As of December 31, 2023, the Group is involved in 390 lawsuits as a plaintiff and 181 lawsuits as a defendant. The aggregate amounts of claims as plaintiff and defendant are ₩371,186 million and ₩305,077 million, respectively. The Group recognizes provisions in consideration of the likelihood of winning a lawsuit.

The Group's material lawsuits in progress as a defendant are as follows (Korean won in millions):

| Plaintiff                      | Amount | Status of lawsuit |                               | Content                   |
|--------------------------------|--------|-------------------|-------------------------------|---------------------------|
|                                |        | First trial       | On appeal                     |                           |
| F*****Bankruptcy administrator | 43,315 | Won               | In progress<br>(Second trial) | Return of an illicit gain |
| MT*****                        | 25,271 | In progress       | –                             | Return of frozen funds    |
| ****Cooperation Co., Ltd.      | 15,000 | In progress       | –                             | Return of an illicit gain |
| **** **Ward Co., Ltd.          | 10,000 | In progress       | –                             | Compensation for damages  |
| ****Securities Co., Ltd.       | 10,000 | In progress       | –                             | Compensation for damages  |

On the other hand, although not included in the list above, \*\* bank in China has filed an additional execution for 183 million yuan in relation to the default of \*\*\* financing leases against the Group at Shanghai Financial Court in December 2023. As of December 31, 2023, it is not possible to reasonably predict the financial impact on the Group's consolidated financial statements.

28-8 Due to the decline of the Hong Kong HIndex, losses on Hong Kong H Index-linked securities sold by the Group are expected. As of December 31, 2023, the Group cannot reasonably predict and estimate the financial impact on the Group's financial statements. In addition, an investigation on unfair collaborative practices of four major commercial banks, including the Group, is underway by the Fair Trade Commission and the Group cannot reasonably predict the result.

28-9 In connection with the Ukraine crisis in February 2022, international sanctions against the Russian Federation of the international community could affect companies and individuals subject to sanctions, as well as companies, industries and economies that do business directly or indirectly with Russia. As of the settlement date, the Bank expects to have a financial impact on the business of KEB Hana Bank Russia, a subsidiary of Russia, but cannot reasonably predict the estimate.

## 29. Other liabilities and merchant banking account liabilities

29-1 Details of other liabilities as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                | December 31, 2023 | December 31, 2022 |
|-----------------------------------------------|-------------------|-------------------|

### 30. Capital stock and other paid-in capital

30-1 Details of capital stock as of December 31, 2023 and 2022, are as follows (Korean won in millions and shares):

| Classification                      | December 31, 2023 | December 31, 2022 |
|-------------------------------------|-------------------|-------------------|
| Number of shares authorized         | 2,000,000,000     | 2,000,000,000     |
| Par value per share (in Korean won) | 5,000             | 5,000             |
| Number of shares issued             | 1,071,915,717     | 1,071,915,717     |
| Common stock                        | 5,359,578         | 5,359,578         |

30-2 Details of capital surplus and capital adjustments as of December 31, 2023 and 2022, are as follows (Korea won in millions):

| Classification      | December 31, 2023 | December 31, 2022 |
|---------------------|-------------------|-------------------|
| Capital surplus (*) | 6,161,303         | 6,159,820         |
| Capital adjustments |                   |                   |
| Stock option        | –                 | 17                |
| Others              | (37,921)          | (37,703)          |
| Subtotal            | (37,921)          | (37,686)          |
| Total               | 6,123,382         | 6,122,134         |

(\*) As of December 31, 2023, the Group's capital surplus includes the amount recognized at the time of the business combination under common control.

30-3 Details of hybrid securities as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                          | Issuance date | Expiry date | Annual interest rate (%) | December 31, 2023 | December 31, 2022 |
|-----------------------------------------|---------------|-------------|--------------------------|-------------------|-------------------|
| Hybrid securities in Korean won         | 2013-10-25    | 2043-10-25  | 5.45                     | –                 | 179,737           |
| Hybrid securities in foreign currencies | 2021-10-19    | –           | 3.50                     | 353,738           | 353,738           |
| Total                                   |               |             |                          | 353,738           | 533,475           |

The Group can repay the above hybrid securities early for five years from the issuance date or every six months(the date of interest payment) after five years if it obtains approval from the Director of the Financial Supervisory Service. Meanwhile, the Group has repaid hybrid securities in Korean won early on October 25, 2023.

### 31. Accumulated other comprehensive income (loss)

Changes in accumulated other comprehensive income (loss) for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

#### <2023>

| Classification                                                          | Beginning balance | Increase (decrease) (excluding reclassification and transfer of retained earnings) | Transfer of retained earnings | Changes in equity in subsidiaries | Reclassification (*) | Tax effects | Ending balance |

(\*) Loss on valuation of financial assets at FVOCI recognized as accumulated other comprehensive income (loss) is reclassified due to disposal of financial assets at FVOCI.

## 32. Retained earnings

32-1 Details of retained earnings as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                             | December 31, 2023 | December 31, 2022 |
|------------------------------------------------------------|-------------------|-------------------|
| Legal reserve                                              |                   |                   |
| Earned surplus reserve (*1)                                | 2,349,400         | 2,050,800         |
| Voluntary reserve                                          |                   |                   |
| Revaluation reserves on property, plant and equipment (*2) | 203,998           | 203,998           |
| Other reserves (*3)                                        | 102,155           | 87,276            |
| Regulatory reserve for bad debts (*4)                      | 2,593,244         | 2,617,149         |
| Other voluntary reserves                                   | 5,450,200         | 5,450,200         |
| Subtotal                                                   | 8,349,597         | 8,358,623         |
| Unappropriated retained earnings                           | 10,351,090        | 8,826,892         |
| Total                                                      | 21,050,087        | 19,236,315        |

(\*1) Article 40 of the Banking Law of the Republic of Korea requires the Group to appropriate at least 10% of net income after income tax to legal reserve every time to pay dividends until such reserve equals 100% of its paid-in capital. This reserve is restricted to reduce deficit or be transferred to capital.

(\*2) The Group records gains from revaluation of property, plant and equipment previously recognized as other comprehensive income to the voluntary reserve, as it applies the revaluation amount as deemed cost at the first-time adoption of K-IFRSs. The reserve is recognized in distributable retained earnings when the relevant property, plant and equipment are disposed of.

(\*3) Relevant Japanese regulations require the Group's overseas branches located in Japan to appropriate a minimum of 10% of net income for the period as a legal reserve, until the reserve equals ¥2,000 million. This reserve is restricted from being used upon liquidation of the Japanese branches. Chennai, Panama, Singapore, Hong Kong, Hanoi and Ho Chi Minh branches' statutory reserves are included in other reserves in accordance with India, Panama, Singapore and

Vietnam's regulations.

(\*4) The Group has provided allowances for possible loan losses in accordance with K-IFRS. The difference in this amount and the provision for possible loan and other asset losses accumulated in accordance with the minimum accumulation ratio required by the Financial Supervisory Service is reserved as a regulatory reserve for bad debts.

32-2 Changes in appropriated retained earnings for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                                                                    | 2023        | 2022        |
|---------------------------------------------------------------------------------------------------|-------------|-------------|
| Beginning balance                                                                                 | 19,236,315  | 13,897,317  |
| Net income                                                                                        | 3,476,636   | 3,095,845   |
| Dividends                                                                                         | (1,690,000) | (1,230,400) |
| Dividends on hybrid securities                                                                    | (23,834)    | (23,770)    |
| Reclassification of valuation gain or loss on equity securities at FVOCI upon derecognition, etc. | 50,970      | (2,677)     |
| Capital surplus income                                                                            | —           | 3,500,000   |
| Ending balance                                                                                    | 21,050,087  | 19,236,315  |

### 32-3 Dividends

Details of calculation on common stock dividends for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions and shares in units):

| Classification                                                                           | 2023 (*1)     | 2022          |
|------------------------------------------------------------------------------------------|---------------|---------------|
| Number of dividend shares                                                                | 1,071,915,717 | 1,071,915,717 |
| Par value per share (in Korean won)                                                      | 5,000         | 5,000         |
| Dividend ratio                                                                           | 33.77%        | 27.05%        |
| Dividend per share (in Korean won)                                                       | 1,688.57      | 1,352.72      |
| Dividends                                                                                | 1,810,000     | 1,450,000     |
| Net income (*2)                                                                          | 3,476,636     | 3,095,845     |
| Dividend pay out ratio based on net income                                               | 52.06%        | 46.84%        |
| Adjusted income after deducting provisions for bad debt reserve (*2)                     | 3,589,342     | 3,119,771     |
| Dividends pay out ratio based on adjusted income after deducting provisions for bad debt | 50.43%        | 46.48%        |

(\*1) The dividend for 2023 will be presented at the annual general meeting of shareholders, which is scheduled on March 20, 2024.

(\*2) Adjusted income after deducting provisions for bad debt reserve is based on the controlling company's shares.

### 33. Regulatory reserve for bad debts

Regulatory reserve for bad debts is calculated and disclosed in accordance with Article 29, Sections 1 and 2 of Regulation on Supervision of Banking Business of the Republic of Korea.

33-1 Details of regulatory reserve for bad debts as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                | December 31, 2023 | December 31, 2022 |
|-------------------------------|-------------------|-------------------|
| Beginning balance             | 2,690,108         | 2,714,034         |
| Planned reversal of bad debts | 112,706           | 23,926            |
| Ending balance                | 2,577,402         | 2,690,108         |

33-2 Reversal of (provisions for) bad debt reserve and income adjusted for deductions of provisions for bad debt for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                                                                        | 2023      | 2022      |
|-------------------------------------------------------------------------------------------------------|-----------|-----------|
| Net income attributable to equity holders of the parent company before deducting reserve for bad debt | 3,476,636 | 3,095,845 |
| Reversal of bad debt reserve                                                                          | 112,706   | 23,926    |
| Adjusted income after deducting reserve for bad debt                                                  | 3,589,342 | 3,119,771 |
| Basic EPS adjusted after reflecting reserve for bad debt (*1) (in Korean won)                         | 3,326     | 2,888     |
| Diluted EPS adjusted after reflecting reserve for bad debt (*2) (in Korean won)                       | 3,326     | 2,888     |

(\*1) The dividend on hybrid equity securities in the amount of ₩23,834 million and ₩23,770 million for the years ended December 31, 2023 and 2022, respectively, was deducted from the adjusted income after reflecting the bad debt reserve for the calculation of EPS after reflecting reserve for bad debt for each period.

(\*2) Since the Group does not have dilutive potential ordinary stock, basic EPS is the same as diluted EPS.

### 34. Operating income and operating expenses

34-1 Operating income for the years ended December 31, 2023 and 2022, is as follows (Korean won in millions):

| Classification                                     | 2023       | 2022       |
|----------------------------------------------------|------------|------------|
| Interest income                                    | 19,793,063 | 13,347,231 |
| Fees and commission income                         | 931,532    | 874,721    |
| Gains on financial instruments at FVTPL            | 23,575,868 | 31,421,014 |
| Gains on fair value hedging derivative instruments | 140,983    | 397,349    |
| Gains on financial instruments at FVOCI            | 88,412     | 10,551     |
| Gains on financial instruments at amortized cost   | 232        | 4          |
| Reversal of credit loss                            | 36,277     | 603        |
| Other operating income                             | 7,934,269  | 7,615,689  |
| Total                                              | 52,500,636 | 53,667,162 |

34-2 Operating expenses for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                        | 2023       | 2022       |
|-------------------------------------------------------|------------|------------|
| Interest expenses                                     | 11,875,652 | 5,738,554  |
| Fees and commission expenses                          | 270,068    | 281,109    |
| Expenses on financial instruments at FVTPL            | 23,084,120 | 31,296,313 |
| Expenses on fair value hedging derivative instruments | 114,647    | 460,900    |
| Expenses on financial instruments at FVOCI            | 3,979      | 8,389      |
| Provision of credit loss                              | 694,584    | 658,252    |
| General and administrative expenses                   | 3,448,610  | 3,318,831  |
| Other operating expenses                              | 8,403,458  | 7,838,212  |
| Total                                                 | 47,895,118 | 49,600,560 |

### 35. Net interest income

35-1 Interest income for the years ended December 31, 2023 and 2022, is as follows (Korean won in millions):

| Classification                                                        | 2023       | 2022       |
|-----------------------------------------------------------------------|------------|------------|
| Interest income in accordance with the effective interest rate method |            |            |
| Interest income on due from banks                                     | 657,982    | 277,868    |
| Interest income on loans                                              | 17,119,560 | 11,761,608 |
| Interest income on financial assets at FVOCI                          | 837,112    | 544,009    |
| Interest income on securities at amortized cost                       | 1,002,738  | 698,892    |
| Subtotal                                                              | 19,617,392 | 13,282,377 |
| Interest income on financial instruments at FVTPL                     | 175,671    | 64,854     |
| Total                                                                 | 19,793,063 | 13,347,231 |

35-2 Interest expenses for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                      | 2023       | 2022      |
|-----------------------------------------------------|------------|-----------|
| Interest expenses on deposit liabilities            | 9,772,767  | 4,558,562 |
| Interest expenses on borrowings                     | 782,002    | 342,306   |
| Interest expenses on financial instruments at FVTPL | 4,908      | 4,045     |
| Interest expenses of debentures                     | 986,274    | 671,472   |
| Interest expenses of lease liabilities              | 23,929     | 15,857    |
| Others                                              | 305,772    | 146,312   |
| Total                                               | 11,875,652 | 5,738,554 |

### 36. Net fees and commission income

36-1 Fees and commission income for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                             | 2023    | 2022    |
|--------------------------------------------|---------|---------|
| Commissions received from loans and others | 581,283 | 521,833 |
| Commissions received on payment guarantees | 101,755 | 89,740  |
| Commissions related to foreign exchange    | 248,494 | 263,148 |
| Total                                      | 931,532 | 874,721 |

36-2 Fees and commission expenses for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                          | 2023    | 2022    |
|-----------------------------------------|---------|---------|
| Commissions paid                        | 212,279 | 226,715 |
| Commissions related to foreign exchange | 57,789  | 54,394  |
| Total                                   | 270,068 | 281,109 |

### 37. Gain (loss) on financial instruments at FVTPL

37-1 Details of gain (loss) on financial instruments at FVTPL for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                            | 2023       | 2022       |
|-------------------------------------------|------------|------------|
| Gain on financial instruments at FVTPL    |            |            |
| Financial instruments at FVTPL            |            |            |
| Gain on valuation                         | 623,974    | 138,271    |
| Gain on disposals                         | 114,121    | 35,850     |
| Subtotal                                  | 738,095    | 174,121    |
| Derivative instruments held for trading   |            |            |
| Gain on valuation of derivatives          |            |            |
| Gain on currency-related derivatives      | 3,756,674  | 8,065,307  |
| Gain on interest rate-related derivatives | 477,114    | 908,399    |
| Gain on stock-related derivatives         | 5,948      | 3,333      |
| Others                                    | 1,875      | —          |
| Subtotal                                  | 4,241,611  | 8,977,039  |
| Gain on transaction of derivatives        |            |            |
| Gain on currency-related derivatives      | 12,213,996 | 16,472,062 |
| Gain on interest rate-related derivatives | 6,342,524  | 5,744,598  |
| Gain on stock-related derivatives         | 34,424     | 13,394     |
| Subtotal                                  | 18,590,944 | 22,230,054 |
| Gain on securities sold                   | 5,218      | 6,269      |

(\*) Deferred tax assets of foreign branches are not offset against the deferred tax liabilities due to the differences in tax jurisdictions.

The effective income tax rate of 26.4% as of December 31, 2023, is applied when calculating deferred tax assets or liabilities. Also, deferred tax assets are recognized when it is foreseeable that future taxable income will be incurred and that future tax credits will be realized.

47-4 The unrealizable temporary differences on investments in associates as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                   | December 31, 2023 | December 31, 2022 |
|----------------------------------|-------------------|-------------------|
| Deductible temporary differences | 337,867           | 337,867           |
| Taxable temporary differences    | (355,579)         | (355,579)         |
| Total                            | (17,712)          | (17,712)          |

47-5 Changes in deferred taxes charged (credited) directly to equity for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Total                                                                    |                   |                   | 224,156 |

#### 48. Earnings per share

48-1 Weighted-average number of shares of common stock for the years ended December 31, 2023 and 2022, is as follows (shares):

| Classification    | Periods               | Number of shares | Weights | Weighted-average number of shares of common stock |
|-------------------|-----------------------|------------------|---------|---------------------------------------------------|
| December 31, 2023 | 2023.01.01~2023.12.31 | 1,071,915,717    | 365/365 | 1,071,915,717                                     |
| December 31, 2022 | 2022.01.01~2022.12.31 | 1,071,915,717    | 365/365 | 1,071,915,717                                     |

Since the Group does not have potentially dilutive common stock, the weighted-average number of shares of common stock outstanding per basic share is the same as the weighted-average number of shares of common stock outstanding per diluted share.

48-2 The Group's basic EPS for the years ended December 31, 2023 and 2022, is calculated as follows (Korean won in millions, except per share amounts):

| Classification                                                | 2023          | 2022          |
|---------------------------------------------------------------|---------------|---------------|
| Net income for the period attributable to owners              | 3,476,636     | 3,095,845     |
| Dividends on hybrid equity securities                         | (23,834)      | (23,770)      |
| Total                                                         | 3,452,802     | 3,072,075     |
| Weighted-average number of shares of common stock outstanding | 1,071,915,717 | 1,071,915,717 |
| Basic EPS (*) (in Korean won)                                 | 3,221         | 2,866         |

(\*) Basic EPS is the same as diluted EPS for the years ended December 31, 2023 and 2022.

#### 49. Share-based payment

The Group operates a Performance Share Plan. It is a share-based payment with cash settlement linked to the stocks of HFG, and the amount of shares are determined based on performance for three years from the grant date.

GLN International Co., Ltd., a subsidiary of the Group, granted 400,000 new share options to an executive during November 2021. The exercise price of the stock purchase option is ₩500 per share, and the options vest if the executive has served for more than two years from the date of grant, and the exercise period is within five years from the date of grant. However, due to the retirement of the executive concerned, all of the share options have been canceled due to the failure to meet the terms of service, and there are no share options granted as of the end of the reporting period.

49-1 Details of liabilities related to share-based payment and total intrinsic value of rights accounted for as accounts payable in case that option holders achieve rights to receive cash or other assets as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                           | December 31, 2023 | December 31, 2022 |
|----------------------------------------------------------|-------------------|-------------------|
| Book value of liabilities related to share-based payment |                   |                   |
| Performance share (granted by the Group)                 | 29,972            | 36,127            |

49-2 The compensation costs for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                         | 2023  | 2022   |
|--------------------------------------------------------|-------|--------|
| Costs recognized due to share-based payment            |       |        |
| Equity-linked special incentive (granted by the Group) | 7,304 | 10,782 |
| Stock options (granted by subsidiary)                  | (17)  | 15     |
| Total                                                  | 7,287 | 10,797 |

49-3 Details of performance-linked stocks granted to the executives and department head of the Group as of December 31, 2023, are as follows:

| Classification                | 8th                       | 9th                       | 10th                      | 11th                      | 12th                      | 13th                      |
|-------------------------------|---------------------------|---------------------------|---------------------------|---------------------------|---------------------------|---------------------------|
| Granted by                    | Hana Bank                 | Hana Bank                 | Hana Bank                 | Hana Bank                 | Hana Bank                 | Hana Bank                 |
| Grant date                    | 2018.01.01                | 2019.01.01                | 2020.01.01                | 2021.01.01                | 2022.01.01                | 2023.01.01                |

| Evaluation period             | 2018.01.01~2020.12.31     | 2019.01.01~2021.12.31     | 2020.01.01~2022.12.31     | 2021.01.01~2023.12.31     | 2022.01.01~2024.12.31     | 2023.01.01~2025.12.31     |
| Reservation period            | 2021.01.01~2021.12.31     | 2022.01.01~2022.12.31     | 2023.01.01~2023.12.31     | 2024.01.01~2024.12.31     | 2025.01.01~2025.12.31     | 2026.01.01~2026.12.31     |
| Payment period                | Within 2022.4.30          | Within 2023.4.30          | Within 2024.4.30          | Within 2025.4.30          | Within 2026.4.30          | Within 2027.4.30          |
| Payment method                | Market-based compensation | Market-based compensation | Market-based compensation | Market-based compensation | Market-based compensation | Market-based compensation |
| Shares at settlement date (*) | 10,250 shares             | 25,373 shares             | 309,551 shares            | 168,063 shares            | 102,509 shares            | 79,313 shares             |

(\*) The Group provides the executives and department head of the Group with the right to receive stocks. The number of stocks granted is adjusted based on the performance. The number of stocks granted is adjusted based on the assessment indicator that constitutes the Group's performance (relative shareholders' rate of return) of 40% and the Bank's performance (return on equity, net income, soundness) of 60%.

## 50. Cash flow information

50-1 Details of cash and cash equivalents as of December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                                                | December 31, 2023 | December 31, 2022 |
|-------------------------------------------------------------------------------|-------------------|-------------------|
| Cash                                                                          | 1,742,359         | 1,903,972         |
| Due from banks in Korean won                                                  | 10,450,468        | 15,950,890        |
| Due from banks in foreign currencies                                          | 18,371,452        | 23,232,995        |
| Subtotal                                                                      | 30,564,279        | 41,087,857        |
| Restricted balances (*)                                                       | 1,824,242         | 2,010,077         |
| Deposits with a maturity of more than three months at the time of acquisition | 457,734           | 577,354           |
| Net amount                                                                    | 28,282,303        | 38,500,426        |

(\*) Restricted balances exclude reserve deposits that meet the definition of cash equivalents.

50-2 Significant non-cash transactions for the years ended December 31, 2023 and 2022, are as follows (Korean won in millions):

| Classification                                                       | 2023    | 2022      |
|----------------------------------------------------------------------|---------|-----------|
| Reduction in capital surplus                                         | —       | 3,500,000 |
| Recognition of right-of-use assets                                   | 166,171 | 306,049   |
| Recognition of lease liabilities                                     | 131,262 | 311,888   |
| Change in valuation of financial assets at FVOCI                     | 852,837 | 852,663   |
| Transfer from property, plant and equipment to investment properties | 26,318  | 97,994    |
| Changes in equity on investments in associates                       | 11,641  | 1,132     |
| Exchange differences on translation of foreign operations            | 75,374  | 313       |
| Conversion from debt instruments                                     | 188     | 40,370    |

50-3 Reconciliation of liabilities arising from financing activities for the years ended December 31, 2023 and 2022, is as follows (Korean won in millions):

<2023>

| Classification               | Beginning balance | Financing activities | Exchange rate fluctuation | Fair value hedging | Acquisition and termination of lease | Others   | Ending balance |
|------------------------------|-------------------|----------------------|---------------------------|--------------------|--------------------------------------|----------|----------------|
| Borrowings                   | 22,256,597        | (1,339,106)          | 1,116,423                 | —                  | —                                    | —        | 22,033,914     |
